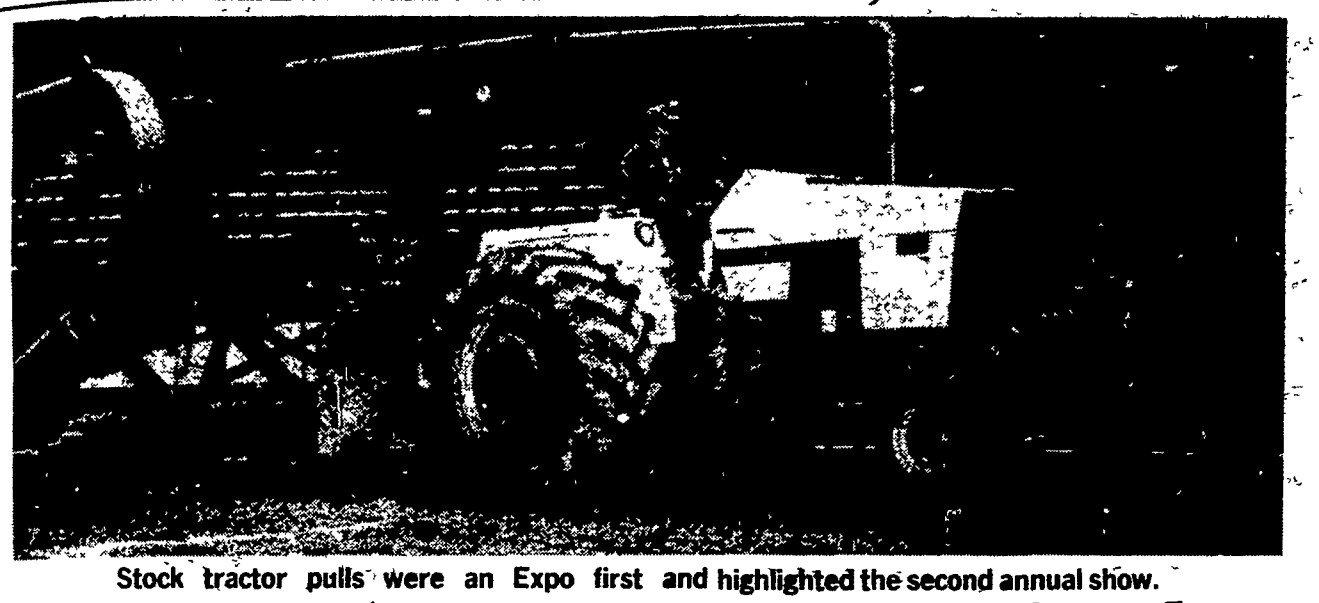
Lancaster Farming

VOL. 25 No. 18 Lancaster Farming, Saturday, March 1, 1980 $7.00 Per Year



Stock tractor pulls were an Expo first and highlighted the second annual show.

Expo opens at Harrisburg

BY SHEILA MILLER

HARRISBURG — The Farm Machinery Exposition kicked off its second year with a number of changes.

This year's event was opened on Wednesday evening with an exhibitors banquet, held at the Pennsylvania Department of Agriculture building.

Roughly 100 people turned out for the evening of socializing. Unfortunately, PDA Secretary Hallowell, his assistant Chet Heim, and the Farm Show Director, Hugh Coffman had to cut their visits short because of a budget conference with the Governor.

Thursday morning opened with the draft horse and mule show, another first for Expo. The show was followed by a tack sale, and then the horses exhibited in the morning's show were auctioned off. See accompanying story.

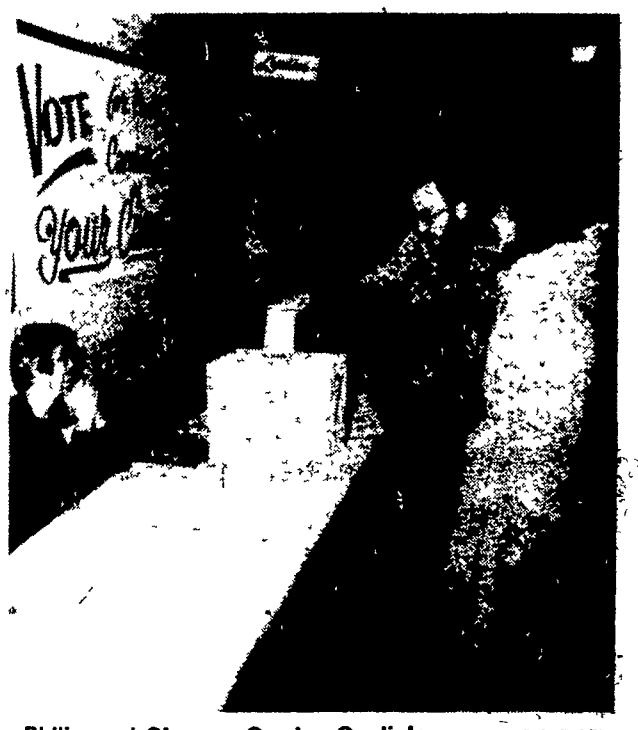
One of the key exhibits had a rough time getting off the ground, on Thursday. The Pennsylvania Liquor Control Board would not allow Martin Distributors to set up their still demonstration because they said Martins didn't have a permit.

According to Hugh Coffman, LCB told Martins they didn't get the application to set up the still on the Farm Show Complex site until this past Wednesday. "They told Martins it would be a few days until they processed their application, and it's obvious that by the time it was processed the Expo would be over."

Coffman explained with Secretary Hallowell's help and telephone calls to the LCB officials, the misunderstanding should be cleared up and the still in operation. At press time, the Farm Show staff and the LCB representatives will be conferring and hopefully resolving the difficulty.

The PDA officials had the traditional ribbon cutting ceremonies at noon on Thursday, along with a kick-off luncheon. The luncheon was held in the main exhibit hall of the machinery display area, and about 100 people turned out to listen to

(Turn to Page A35)



Philip and Sharon Cunio, Carlisle, were among many Expo guests to cast ballots in the Department of Agriculture's straw vote. Manning the booth is Department employee Peg Crumling.

Straw poll to be computed from Equipment Expo guests

BY CURT HARLER

HARRISBURG — Candidates for several state and national political offices were on hand throughout the Farm Equipment Exposition to field questions from farmers.

And the Pennsylvania Department of Agriculture ran its own version of the November election by giving visitors the opportunity to vote in a straw election.

Results from the straw poll will be counted on Monday, March 3.

Voter interest appeared strong as the Second Annual Farm Equipment Exposition opened Thursday.

Interest in the candidates themselves started out quite slowly.

At the opening of the Expo politicians and their representatives were located in the poultry barn. There were no other exhibits in the poultry barn and the political arena was overlooked by the majority of the crowd.

Later on Thursday the candidates' tables were moved into the concourse between the main exhibit floor and the barn housing horses. With the move, candidates found increased exposure to the public.

Indeed, some feared the highlight of the day for the political arena would be the crashing to the floor of a large sign to attract visitors to the area.

The mishap was greeted with cheers from those present.

David Heisey, representing Ed Howard, the Bucks County candidate for U.S. Senate, spoke for most of those in the political area when he said farmers were asking few questions.

He said most guests asked if Howard were a Republican. When assured he is, the guests would say "that's good" and walk on.

Lucille O'Brien, working for Attorney General Candidate Al Benedict, agreed that most passers-by asked few questions but said they were taking literature readily.

The George Bush table was one of the few which reported much active interest.

Russell Davis, representing the Republican presidential hopeful, said many people seem not to have made up their minds on who they will vote for in the upcoming election.

"They are looking at the man and the issues," he said. He added that most farmers were not talking agricultural issues, but were stressing general problems like inflation.

Most of the candidates' representatives would agree with opinions expressed by supporters of Roy Zimmerman for attorney general.

While pointing out that few persons were asking questions—and that many seemed unaware the attorney general's position is for the first time elective—the farmers seemed to take the election seriously.

Farmers continuing effort to replace bridge

BY DICK ANGLESTEIN

FALMOUTH — After a year and a half of contacts with officials in four municipalities, a group of farmers in Lancaster and Dauphin counties remain unsuccessful in their efforts to have a burned—out bridge replaced over the Conewago Creek

'It looks as if we may be pretty much at the end of the line, but we're still hoping that something can be done," Clair Nissley, who farms on the Dauphin County side of the creek, said

Nissley accompanied by some neighboring farmers in both counties, appeared at this week's meeting of Lancster County Commissioners to continue the long—standing plea for replacement of the Nissley Mill Bridge, which was burned by vandals in August, 1978

As farmers, one of our major concerns is the transport of our equipment back and forth across the creek to get to different fields," Nissley said.

He explained that the bridge had been used quite extensively before the fire not only by farmers, but by Lancaster County residents who commuted to work in the Middletown and Harrisburg areas.

An alternate route can be utilized along Rt. 441, according to Nissley, but is not as suitable as the township roads leading to the bridge.

"The other route is much busier, particularly early in the morning, and more dangerous for operating slow—moving farm equipment," he said. "We have a skid—steer loader and have noticed how much worse it is when we couldn't use the township roads."

Nissley and Christian G. Becker, who farms on the Lancaster County side of the creek, have particular difficulty in moving their equipment." The two farmers jointly own and use various pieces of equipment in their operations on both sides of the creek.

"During the season, hardly a day goes by that we wouldn't use the bridge,"

(Turn to Page A38)

Farmers slaughter beef checkoff plan

LANCASTER — Locally, and across Pennsylania, farmers voted overwhelmingly against the proposed beef checkoff plan.

A national tabulation will not be made until some time late the first week of March.

The proposed checkoff program calls for assessment of 20 cents per $100 of the value of cattle marketed. Money gathered would be used for promotion of the beef industry.

Pennsylvania had 8977 farmers registered to vote. Just 789 voted for, with 6855 against. About 100 ballots were disqualified.

In Maryland, 717 farmers registered to vote. A total of 316 were for the referendum, 264 against.

Vote tabulators in Maryland noted no difference in voting trends between the Eastern Shore and the rest of the state.

Delaware, with 34 producers eligible to vote, cast 8 ballots for the program, 29 against. Two ballots were disqualified.

It came as little surprise to most observers that farmers in Pennsylvania should vote strongly against the beef checkoff.

In a previous beef checkoff vote, held two years ago, farmers in dairy states generally opposed the program.

States like Pennsylvania, Wisconsin, and New York

New England Shell Eggs

Tuesday, February 26
Report supplied by USDA

Prices trended slightly higher on white mediums while holding unchanged on the balance of both white and brown eggs. Cartoned egg movement has tapered off in most areas is no better than fair. Floor stocks are heavy in several quarters, but causing little or no concern among dealers. Supplies of the larger sized eggs range from adequate to fully adequate while the smaller sizes are fully adequate to ample.

Prices paid per producer, cents per dozen, cases exchanged for loose eggs picked up at farm, Grade A yield basis:

BROWN

RANGE: Jumbo 58-62; Ex. Large 49-53; Large 47-51; Medium 38-42; Small 21-25.

MOSTLY: Jumbo 60-61; Ex. Large 51-52; Large 49-50; Medium 40-41; Small 23-24.

WHITE

Ex. Large 45-47; Large 44-46; Medium 33-38.

BOSTON: Prices to retailers - sales to volume buyers, consumer grade brown eggs in cartons delivered store door:

A Extra Large 64-68; A Large 62-66; A Medium 53-57.

PACMA Fowl

PACMA-FACTS

The following market is supplied by PACMA-FACTS, a direct marketing organization affiliated with the Pennsylvania Farmers' Association. Participating poultrymen are members of PACMA, which employs a fowl marketing agent, The Farmers' Agricultural Cooperative Trading Society (FACT) - to sell members' fowl. PACMA works directly with the PFA poultrymen in the program.

Farm point prices prevailing for fowl to be marketed by members during the week of March 3 will be 10½ plant, 8 farm.

North Atlantic Egg Review

Tuesday, February 26
Report supplied by auction

The market is struggling under a heavy supply of nest run eggs and a noticeable lack of consumer buying interest. Despite some producers dumping class 3's to the breaker, prices advanced a cent on mediums in major terminal markets. Brokers indicated they have orders for March delivery but none for this week. Floor stocks are heavy and accumulating earlier than usual for Easter requirements.

Northeast Broiler/Fryer Comment

Monday, February 25
Report supplied by USDA

Trucklot trading improved and is fairly good. Offerings are adequate and more firmly held than last week. Buying interest is good for breasts and legs but only fair for wings. Movement at the retail level is only fair although major buyers are more willing to take on inventory for end of the week delivery. Stocks are adequate. Undertone fully steady.

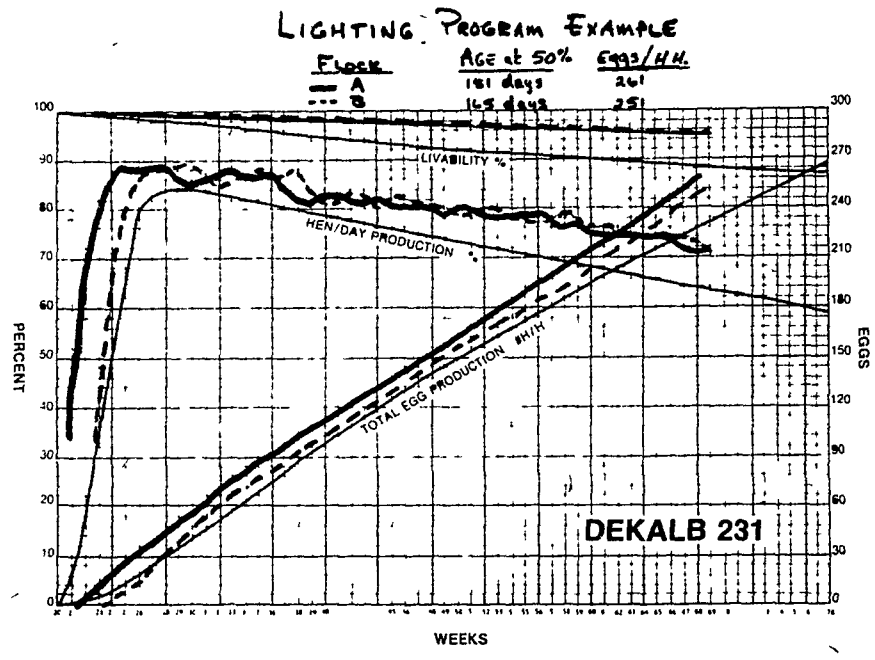
Market your cattle & hogs the auction way.
Sale every Monday 2 P.M.
Melvin M. Lehman (Owner)

How much are 10 eggs worth?



Here's an example of what a proper lighting program can mean to you when you own a flock of DEKALBS. The two hen day production lines don't look much different. But the 2 week earlier maturity meant 10 more eggs. It also meant about 3½ lbs. less feed to 50% production. Make sure you're realizing the maximum potential from your layer flock.

HUBBARD WHITE MT. BROILERS

Probing your dairy farm for better profits.

As the nutritional content of your cows' forage goes, so goes your milk yield . and its profitability That's why this forage sampling is vital to your farm. It catches the changes in nutritional content from one of your crops to another ... from one of your fields to another .. even from one set of weather conditions to another In short, it spots any nutritional over- or under-balance ... so you can do something about it

This forage sampling is a vital part of the Pennfield Computerized Total Ration Service. And here's how it works: **1.** We collect samples of your forage. **2.** Then we evaluate the quality of your forages. We determine the total digestible nutrients. The fiber content. The protein content The amount of carbohydrates. **3.** The computer quickly spots any nutrients lacking in the forage. For your milking cows And for your dry cows. It immediately points out the overfeeding of nutrients. Underfeeding, too. Both, of course, may be different at different times of the year. And the printout will tell you what you need And when. **4.** Your Penn Pro Professional advises you on the quantity and type of nutrients that should be added, to balance your total feeding program to your cows' nutritional requirements **5.** The result can be increased milk production at the lowest possible feed cost.

J Shephard Wolff, of Valley Acres Farm, RD #1 Newmansville Pa, reviews forage sampling operation with Penn Pro Gene Schlosnagle while (inset) Mike Thomas, Supervisor of Quality Control analyzes another forage sample in Pennfield's in-house laboratory

The Pennfield Computer Total Ration Service could bring on your greatest growth act. In your milk yield. And your profits.

Try the Pennfield Computerized Total Ration Service. There's no cost or obligation for this unique service to your dairy operation. Just phone us right now. Today. At Pennfield Feeds Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll-free 800-732-0467. Pennfield Feeds, Rohrerstown Road, Lancaster, PA 17604.

THE OLD FARMER'S ALMANAC

MARCH 3-9, 1980

If mists in March we see, frosts in May will be.

Start sorting income tax papers now Johnny Appleseed died March 11, 1847 Last quarter of the moon March 9 Average length of days for the week 11 hours, 32 minutes Maple sap starts running and crocuses are up Twilights shortest now Skunks are mating Banks closed March 5, 1933 Closed doors are more easily heard through than open ones

Ask the Old Farmer. Was chewing gum ever made from horses' hoofs? G S, Jackson, Mich

No We don t know why but some folks years ago used to discourage children from chewing it by saying it was made from horses' hoofs

Home Hints To keep small bugs out of flour, keep it in the freezer, it never freezes

OLD FARMER'S WEATHER FORECASTS

New England: Sunny and milder throughout the week, weekend brings showers coast, flurries inland, and cold

Greater New York-New Jersey: Cold, snow, becoming clear and warmer mid-week, by week's end, partly sunny and mild with light rain

Middle Atlantic Coastal: Cloudy and very cold at start, with flurries, middle through end of week is sunny, warmer

Piedmont and Southeast Coastal: Week begins cold with hard frost, snow north, and rain south, by end of week, clear and very warm

Omaha Cattle

Thursday, February 28

Closing prices on Slaughter Steers were 50-1.00 lower Heifers closed 50-75 lower, instances 1 00 off. Cows were 50-1.00 lower, and bulls steady

Four day receipts this week: 14,600; last week: 11,100; Year ago· 12,900

The fed cattle trade was characterized by a general atmosphere of caution, as slow carcass trading at the wholesale level provided little stimulation Live prices were forced downward on a rather liberal Monday run and recovered little of the downturn in later trading; an uneven midweek trade closed out on a bearish note The overall finish of the steer and heifer supply was not particularly attractive with a large share Good to Average-Choice Feedlot conditions worsened over the weekend as temperatures climbed, and the mud was a prevalent factor Many cattle carrying a sizable amount of mud sold 1.00-1.50 below those of same grade which were relatively clean Slaughter steers made up approximately 49 pct and heifers 34 pct Cows comprised 9 pct and Feeders 7 pct.

STEERS: Few loads and part loads Choice with few Prime predominantly 3 1075-1319 lbs. 67.75-68.00 during week. At midweek, two loads Choice and Prime 3-4 1175-1257 lbs. 66 75-67.00. Choice 2-4 1000-1300 lbs. closed 66.50-67.50, some quite muddy or with substantial percentage 4 65.00-66.50. Mixed Good and Choice 2-3 1000-1250 lbs. 65.50-66.75. Good 2-3 62.00-65.00. Part load Good with few Choice 2-3 1200 lb. Holsteins 60.00.

Average of LS-214 detailed quotations for Choice 900-1100 lb. steers this week 67.28; Choice 1100-1300 lbs. 67.02. Average weight steers this week 1170 as compared 1177 last week. Average weight heifers this week 1004 as compared 1022 last week.

HEIFERS: Several loads Choice and Prime 3-4 982-1092 lbs. 67.00. Choice 2-4 900-1100 lbs. 65.25-66.50, some large share 4 or muddly 64.00-65.00. Mixed Good and Choice 2-3 900-1050 lbs. 64.00-65.50. Good 2-3 60.00-63.50.

COWS: Utility and Commercial 2-4 49.00-51.00, few 51.50-52.00. Cutter 46.00-49.50. Canner and Low-Cutter 44 00-47 00

BULLS· 1-2 1300-2100 lbs 57.00-62 00, few individual 1 63.00-65.00

BUSH HOG® NEW QUICK ATTACH LOADERS

Right for your tractor, Right for your jobs

You can tackle the toughest loading jobs with confidence behind one of these new quick attach loaders from Bush Hog®. New models 2400 QT and 3400 QT mount or dismount in under four minutes on simple mounting brackets —that remain out of the way during maintenance or other jobs. Their frames adapt easily to fit most tractor makes and models. Built tough with breakaway capacity of 3,340 lbs. on model 2400 QT and a massive 5,000 lbs. on model 3400 QT, these two new Bush Hog loaders will stand up to the biggest loading jobs.

MODEL 2400 QT

• Fits tractors of 35 to 75 HP • 2,400 lbs. lifting capacity, 3,340 lbs. breakaway capacity • Close coupled for close quarters turning—yet high lift for easy dumping • Quick attach/detach — it's on-or-off in under four minutes • Buckets — fill to capacity and dump clean • Single cross member on main frame allows good visibility • Regreasable pivot points for longer life • Tubular hydraulic lines • Level indicator standard equipment • Rust resistant, chrome-plated, high tensile steel cylinder rods • Two-tone color scheme

MODEL 3400 QT

• Fits tractors of 80 to 120 HP • 3,500 lbs lifting capacity, 5,000 lbs. breakaway capacity • Quick attach/detach — mounting brackets remain out of the way during maintenance or other jobs • Buckets — fill to capacity and dump clean • Rust resistant, chrome-plated, high tensile steel cylinder rods • Exclusive V-type piston packing withstands weathering, eliminates leaking • Two-tone color scheme

Look for the new Bush Hog loaders — the ones with the new look.

BY CURT HARLER, EDITOR

Lancaster Farming says...

They do understand us

Many campaigns are mounted in the farm community to gain the respect of urbanites for rural living.

But often the communication is rather one-sided. What do farmers really know about the way city people feel about agriculture?

The Louis Harris pollsters recently did a survey to find out how non-farmers compare with farmers in their appreciation for and outlook on agriculture and conservation.

The survey found more than 80 percent of Americans adhere to an ethic of conservation. And they do not equate conservation with strict preservationism, which is rejected by a majority of Americans.

Farmers, understandably, take a stronger pro-conservation position than does the public as a whole.

The surprise comes, though, in how knowledgable the general public is about soil conservation problems and practices. Both formal education and practical farm experience appear to be effective in teaching about conservation.

The Harris people found better than half of Americans are concerned about the loss of good farmland. The public said its second highest concern in all agricultural issues is to "help make sure that our best farmland isn't used for other things."

That's an impressive showing for the importance of farmland to city folks. And in recent years they've shown willingness to put their money where their mouths are.

The Clean and Green ammendment to the Pennsylvania Constitution passed by a three to one majority, even in urban centers. The tax break to help keep land in agriculture was an impressive committment by urbanites to keep the State's farms alive.

Americans indicated their preference for agriculture in allocation of scarce resources by giving food production a disproportionate share of land and water resources compared to industry and jobs, energy, housing, or recreation.

The public favors conservation strategies that involve a partnership between government and the farmer, based on mutual interest. Only a tiny segment of the public said mandatory programs which require the farmer to pay conservation costs are fair.

On the other hand, most favor depriving farmers and landowners who do not protect soil and water of any public help for any phase of their farming operation.

Over three-fourths of Americans feel we should be more concerned about getting the conservation job done than in pinching pennies.

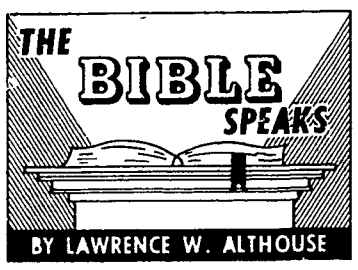
As might be expected, farmers would allocate more federal money to agriculture than would non-farmers Farmers asked $30 out of $100 for increasing crops compared to the general public's $24.40.

Urbanites agree that most years farmers have a difficult time staying in business.

Overall, the Harris people concluded, the American people have a good grasp of the realities of contemporary American agriculture They support the concept of the small, family farm and the federal policies aimed at preserving and increasing the number of small family farms in the country.

We'd agree with that conclusion The general public seems to be on the farmers' bandwagon. It seems all of the work farmers have done is paying off.

City people seem to understand our position better than we might think they do. Let's not let them down.



NICODEMUS

Lesson for March 2, 1980

Background Scripture:
John 3:1-21; 7:32-52; 19:38-42.
Devotional Reading:
Ezekiel 36:26-32.

We often associate the name of Nicodemus with timidity. We remember well that "This man came to Jesus by night..." (John 3:2). And we know why: he was a Pharisee, "a ruler of the Jews," in all probability a member of the Sanhedrin. We smile somewhat cynically when we think of this powerful man coming to Jesus secretly so that no one would know of his interest in the Nazarene.

Born Anew

We remember also that he was slow to comprehend what Jesus was saying to him. Told that he must be "born anew," Nicodemus replies, "How can this be?" And we love Jesus' reply that puts him in his place: "Are you a teacher of Israel, and yet you do not understand this" (3:9,10).

The writer of John's Gospel becomes so intent upon Jesus' response that he fails to tell us anything more of Nicodemus until Chapter 7. Here we find the Pharisees and chief priests - probably the Sanhedrin - discussing charges against Jesus and Nicodemus challenging them: "Does our law judge a man without first giving him a hearing and learning what he does?" (7:51).

It is hardly a ringing confession of faith in Jesus as the Christ, yet we begrudgingly admit that at least Nicodemus spoke up in public for justice. Even that took some courage, although we would like to have seen courage enough for Nicodemus to testify for Jesus. That's what we would have done, had we been Nicodemus, isn't it?"

Are you sure?

Nicodemus Also

There is but one more mention of Nicodemus in John's Gospel and it is very brief. In John 19 we are told that Joseph of Arimathea, another prominent Pharisee, asked for Jesus' body and placed him in his own newly-cut tomb. And John adds: "Nicodemus also, who had at first come to him by night, came bringing a mixture of myrrh and aloes" (19:39). And that is all the mention there is of Nicodemus in the New Testament, although some legends tell us that he was subsequently baptised by Peter and John and was banished from Jerusalem as a Christian after the martyrdom of Stephen.

Whether or not the legends are true, if we think about it, we find that there is more to admire in this man than most of us might have suspected. For the truth of the matter is that his story could easily be our story Although we like to think that we would have been courageous spokesmen for Jesus had we lived then, it is more likely that our witness would be, at first, timid like his. And in the three passages in John's Gospel we can see a line of steady growth from a man who timidly comes to Jesus by night to a disciple who publicly honors the martyred Nazarene. It has taken some time, but Nicodemus has surely been "born anew"!

NOW IS THE TIME

By Max Smith Lancaster County Agricultural Agent
Phone 394-6851

TO INCORPORATE MANURE

The time is soon coming when my barns and feedlots will be cleaned out and the animal waste will be applied on the soil. This is a valuable source of fertilizer and we hope that all livestock and poultry producers realize it's value. However, the manner in which manure is stored and handled will determine the actual fertilizer content. After it is taken from the pit, or the barn into the field, it should be incorporated into the topsoil as quickly as possible. Glenn Wissler of Ephrata R1, has often told me that his soil injector spreader is a good investment. The manure is injected into the topsoil and therefore, little leaching of the fertilizer elements. Also, fewer objections from nearby neighbors. Don't lose fertilizer values because of too much time between application and incorporation.

TO PROVIDE ADEQUATE VENTILATION

The proper ventilation of dairy and beef barns continue to be a problem. In the recent months I have been approached by several producers because of dripping of water from the roof or ceiling area. Too frequently this has happened when a lean-to shed was constructed against the main barn. Another case was a barnyard covered over with a roof and built solidly against the main barn. Lester Burdette, Livestock Specialist from Penn State, urged producers to leave a 6 to 8-inch slot between the new construction and the old barn. This will allow the warm, moisture-laden air to escape. If this is not done, the air will be trapped at the roof and against the old barn; this causes condensation and rotting of the wood structure.

TO EVALUATE SEWAGE SLUDGE

More sewage sludge is becoming available for agricultural use. This by-product of sewage plants has considerable fertilizer value. Also, the organic matter is good for the soil. However, some sludges contain higher amount of heavy metals such as cadmium, copper, and zinc. In these cases the rate per acre should be decreased. Too much heavy metals in the soil will be toxic to plants. Ray Shipp, our Agronomy Specialist at Penn State, reports that all sludge should be tested before applied to the soil; This test is available at Penn State University. The maximum rate per acre is then based on the heavy metal content. Details are available at any of our extension offices.

TO SAVE ENERGY WITH TREE WINDBREAKS

The spring months are a good time to plant trees for windbreak purposes

Homes, and other buildings, that are protected by a good winbreak will require less fuel for heating and cooling purposes. Several rows of trees planted on the west and northwest side of the building is one way to conserve energy. The trees should be from 50 to 75 feet into the wind from the structure to be protected I'm aware of a few of these in the county. Elmer Lapp at Kinzers R1, has benefited for years from his windbreak and is considering to expand it larger.

Pa. Auction Summary

Friday, February 29
Report supplied by PDA

CATTLE: 5457. Compared with 3326 head last week, and 6329 head a year ago. Slaughter steers even 75 cents higher to $1 lower; Sl. heifers steady to $2 lower; Sl. cows mostly steady to $1 lower; Sl. bullocks $1 lower. Sl. steers Choice No. 3-4 69.25-72.00. Sl. heifers Choice 2 & 4 66.50-72.00, few to 73.00; Good 61.00-66.50; Standard 58.00-63.00; Sl. cows Utility & Commercial 50.00-56.50; Cutters 48.00-54.50; Shells down to 40.00. Sl. bullocks Choice 65.00-73.00; Good 66.00-67.00.

FEEDER CATTLE: Steers Medium Frame No. 1 300-600 lbs. 65.00-85.00, few to 94.00; few Large Frame No. 1 to 99.00; Medium & Large Frame No. 2 300-600 lbs. 60.00-80.00; Heifers, Medium & Large Frame No. 1, 300-650 lbs. 63.00-85.00.

CALVES: 3783. Compared with 2630 head last week and 3941 head a year ago. Vealers $3-5 lower. Prime 115.00-135.00 lbs. Choice 103.00-120.00; Good 190.00-205.00; Standard & Good 90-115 lbs. 70.00-90.00; 60-90 lbs. 65.00-80.00; Utility 50-100 lbs. 50.00-70.00.

HOGS: 9103. Compared with 5476 head last week and 9100 head a year ago. Barrows and gilts $1-2.50 lower. US No. 1-2 200-240 lbs. 36.00-38.50, few to 41.00; No. 1-3 200-250 lbs. 35.00-38.00; No. 2-3 190-270 lbs. 34.00-37.00; No. 1-3 140-190 lbs. 28.00-35.00; Sows highly uneven. US No. 1-3 300-575 lbs. 32.00-37.00, few 39.50; No. 2-3 200-350 lbs. 26.00-32.00. Boars 24.00-29.00, few to 34.00.

FEEDER PIGS: 1737. Compared with 793 head last week and 1229 a year ago. Steady to $2 lower. US No. 1-3 20-30 lbs. 14.00-20.00, few down to 9.00 per head; No. 1-3 35-50 lbs. 17.00-28.00; No. 1-3 50-80 lbs. 24.00-33.50.

GRADED FEEDER PIGS: 2757. Compared with 2425 head last week and 2985 head a year ago. All sales by CWT. Feeder Pigs 1 & 2 uneven, $3 higher to $4 lower; 2 & 3 $7-10 higher. US No. 1-2 25-40 lbs. 62.00-77.00, few to 79.50; 40-50 lbs. 61.00-73.50, few to 78.00; 50-60 lbs 55.00-73.00, 60-70 lbs. 49.00-62.00, 70-100 lbs. 41.00-46.50; US No. 2-3 25-40 lbs. 55.00-75.00; 40-50 lbs. 44.00-68.00, 50-60 lbs. 47.00-60.00; US No. 3 60-95 lbs. 41.00-53.00.

SHEEP: 301. Compared with 114 head last week and 332 head a year ago. Wooled sl. lambs uneven. Choice 70-110 lbs. 67.00-75.00; Good 60-110 lbs. 55.00-66.00.

SOMETHING TO CROW ABOUT...

Lancaster Farming has over 36,000 subscribers

Figure it for yourself.

When you shortchange their nutrition, you shortchange yourself.

Looking for ways to cut on down on out-of-pocket feed costs without cutting down on milk production?

Cutting production costs will backfire if you end up shortchanging your herd's nutrition in the process.

But you can cut those costs safely by feeding homegrown grains and grain silage fortified with the right Vigortone Dairy Pre-Mix. These potent pre-mixes contain the proper levels of vitamins, calcium, phosphorus, and other minerals needed to balance your farm's feedstuffs.

Vigortone Dairy Pre-Mixes can be mixed in or metered on any palatable grain or roughage. This lets you change ration content to fit the supplies you have on hand without risking herd performance.

Better herd nutrition means a bigger milk check. Minimum out-of-pocket feed costs mean more in your pocket.

Your figures will prove it.

Dry cow nutrition pays future profits.

Shortchanging your dry cow's nutrition can be risky too. Most problems dairymen experience in getting cows back in the string can be traced to careless treatment during the dry period.

Keep them in top condition until their next lactation. To help you do it, Vigortone has developed unique dairy pre-mixes specially concentrated for dry cow rations.

Now is the time to compare.

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's cost-saving dairy feeding programs with any other you name.

Raw milk sales are their bag

BY PAT KAUFFMAN

HERSHEY — Nestled within sight of the Pennsylvania Turnpike, Al-Har-La Goat Dairy struggles to turn a dream into reality.

Alda and Harry Davidhizar along with their son, Larry, call four level acres here home. And they and their herd of mostly registered Saanens are doing what they enjoy most, making milk.

In a barn, which they have built themselves, Larry says he has more things he'd like to do. Meanwhile, 22 mature goats and 16 kids contentedly munch hay.

Arriving at milking time, one finds a pot of hot coffee on the milk cooler, and all three members of the family pitching in to hurry the does onto milking stands measure feed, and proceed with the business at hand.

The milking parlor is U-shaped and has space for 4 does at a time. In the center of the U, scales, paper, pencils and milking machine are conveniently located. Harry explains, "We designed the milking parlor so that we can reach everything we needed with only a step in either direction. From here I can reach both the in and out doors, as well as any of the 4 does."

The Davidhizar's explained that while stanchions for 2 does at a time would have been acceptable, they feed grain only when milking and the does would not have enough time to eat their grain. For this reason, they find the 4 doe system works well for them.

Does are fed 4 to 10 lbs. of grain per day depending on production. The grain they feed is a 15 per cent calf ration purchased at a local feed store. To this mix, Harry adds crimped oats because, "Oats put the body on goats."

When asked about any special tricks to raising his goats, he also mentions that he mixes edible lime at the rate of a scant half pound to each 400 pound batch of grain. This he mentions hesitantly, though, like a prize-winning cook giving away his secret recipe. Alda and Harry are retired, although Alda still works in a nursing home part-time. Larry is a long-distance trucker. Their common dream is to build a raw milk trade capable of turning a profit. They admit the going will be rough for awhile.

"Right now," Larry says, "I'm trucking to support us and the goats. We worked out an agreement where Dad tends the goats when I'm on the road and helps to build the business. I've been self-employed before, and once you've been self-employed you think there's no other way. I'm anxious for the day when I can make a living from the herd." Meanwhile, Larry takes goat milk with him to drink on his long hauls.

The Davidhizar's are facing the challenge before them. The lack of milk marketing structures in the state, and the costs of advertising they counter with a modestly priced product. Harry says, "Lots of people buy goat milk to drink or use for someone in the family with medical problems. What we are trying to do is price it as competitively with cow's milk as we can so they will use it in all their cooking. We feel that this is the way to sell more milk and keep the customers coming back.

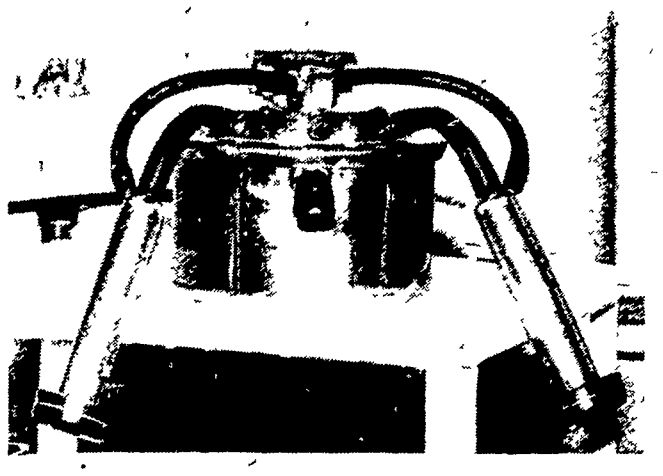
To keep their prices low, the family has adopted an aggressive culling policy. Any animal which cannot adapt to the freestall living arrangement and herd routine is sold.

One of the things that troubles them with the herd is their output. They are quick to point out that while they paid good prices for their stock, they found too late that some were other people's culls. One of the problems they see to someone starting out is the lack of quality breeding stock in the area.

Presently, their average production per goat is 5 pounds per day. And while some animals are at the end of long lactations, Harry feels this should be higher. Their present goal is 2000 pounds of milk per year averaged per goat. Their butterfat test on herd samples is a respectable 3.5.

The Davidhizar's emphasize that while they received their raw milk permit only eight months ago, they owned goats in the early 1950's and had a raw milk permit then. Perhaps

(Turn to Page A17)



The converted Surge milker system features a 3 quart stainless steel pail the Davidhizars custom designed. The extra nipples are capped with medicine dropper tops which they say are easy to clean.

Mixed Alfalfa hay is fed free choice to the kids from the age of ten days.

Mastitis, prostaglandin featured at York dairy day

BY PATRICIA GREEK

DOVER — The annual York County Dairy Day program was held Thursday, February 21 at the Dover Fire Hall.

The program began with Steve Spencer, Penn State extension dairyman, speaking on mastitis control.

According to Spencer, the most prevalent form of bacterial mastitis is Strep A. This type is highly contagious and immune to many mastitis treatments.

All forms of bacteria that cause mastitis enter the udder through the teat end. They normally live only in a cow's udder, but can live on a human's hands for 48 hours.

Thus, the infection can be transmitted from one cow to the next.

Spencer noted that teat dipping does influence mastitis control. A study was made using 19 herds that used teat dip and 10 that did not. There were fewer cases of mastitis in the dipper herds than in the herds that were not dipped.

Dry treating a cow also helps, Spencer said.

The next speakers talked about a milestone reached in breeding heifers, the prostaglandin injection.

Speakers on this subject were Kevin Williams and Carol Reese, both of the Upjohn Company.

Prostaglandin was first discovered in the 1930's by a Swedish scientist. The real breakthrough didn't come until the late 1960's when it was discovered how to make man-made prostaglandin.

According to Williams, the Upjohn Company has Federal clearance to use this drug on dairy and beef heifers, but not on lactating dairy cows as of yet.

There are many benefits for the use of this program. The dairy farmer can reduce or eliminate heat detection in heifers. Artifical insemination can be used more efficiently, with genetically superior calves being produced.

Kevin Williams, of the Upjohn Corporation, outlined the advantages and cautions farmers should consider when using prostaglandins.

Farmers, therefore, can choose the exact time they want their heifer to enter the milking string.

Williams then told the audience the basics needed in the use of prostaglandin. First off, a farmer needs a normally cycling heifer. If she isn't cycling every month, then it's just a waste of money," he said.

Good nutrition and herd health are also essential.

The heifers are given an injection while in the 6 to 16 days of the heat cycle when there is a corpus lutem on the ovary. Then comes a wait of 11 days.

After the 11 days, the heifer gets another injection. After waiting another 80 hours, the farmer breeds the heifer.

The drug is not a fertility drug. Farmers should expect the normal conception rates for their herd.

Williams stated there was no meat residue with the use of this product, but there is one side effect. If the animal is already pregnant when the shot is given, she will abort.

Anyone who intends to use this prostaglandin injection, should get in touch with their veterinarian first, he advised.

The Upjohn trade name for prostaglandin in Lutalyse. The product comes in 10cc vials.

The usual dose is 5c per animal per treatment. The average cost is $5 per dose.

PROLASSE® 8%

ALL NATURAL PROTEIN

SAVE MONEY ON FEED COSTS
USE MORE HOME GROWN GRAIN

Increase production and feed intake with a more palatable ration made with liquid ProLasse on your own farm.

Now for the first time there is a liquid molasses that can be applied with inexpensive metering equipment and any P.T.O. mixer.

New ProLasse's exclusive patented formulation controls the dispersal and penetration of the liquid and assures uniform mixing with no particle segregation. ProLasse also helps prevent molding when using ear corn or other grain with too high a moisture content. Pro Lasse also contains a stable guaranteed vitamin and mineral package.

Only a small amount of liquid ProLasse is needed to make a sweet feed that is not sticky and will flow freely in Automatic Feeding Systems without bridging.

Sold and distributed by your local feed dealer, mobile grinder mixer operator or liquid supplement dealer.

Telephone collect for name of dealer nearest you.

Pa. Shorthorn Breeders elect new officers

BUTLER — Officers elected at the 1980 Annual Dinner Meeting of the Pennsylvania Shorthorn & Polled Shorthorn Breeders' Association on Feb. 16 were president, Richard C. McElhaney, McElhaney Stock Farm, R.D. 1 Hookstown; vice-presidet, Gregg Kerr, Duncancroft, R.D. 1 Saxonburg; and secretary-treasurer, Mr. & Mrs. Richard C. Peoples, Mapleview Ranch, R.D. 2 Volant.

Directors elected to 3-year terms were: Jim Fogal, Tuscarora Shorthorns, Neelyton; George Six, 6'S Polled Shorthorns, R.D. 1 New Freeport; Denise Whiting, D.L. & D.R. Enterprises, R.D. 1, Box 258A, Eidenburg, Pa. 16116 and George Fairchild, Breezy Acres Ranch, R.D. 1, Monroeton.

Eric Peoples was appointed to serve as the junior representative on the Board of Directors.

Plans were made for several 1980 events. The Annual Spring Sale will be held at the Mercer 4-H Park on Saturday, May 3, beginning with a show at 3 p.m., followed by the sale at 7:30 p.m.

The Pennsylvania State Shorthorn Show will be held in conjunction with the Greene County Fair, Aug. 3-9 at Waynesburg. The date has been set for the Annual Fall Sale to be held at Waynesburg on Saturday, Oct. 18.

The Pennsylvania Junior Association announced it will be holding a raffle again this year to help defray the expenses of the juniors attending the 1980 National Junior Shorthorn Youth Conference in Rochester, Mn., June 13-15. First prize will be a Frey Brothers Blocking Chute, 2nd prize a Goose Down Vest and 3rd prize a Leather Show Halter. The drawing will be held during the 1981 Pennsylvania Farm Show in Harrisburg. The Pennsylvania delegates to the 1980 Youth Conference will be Nadine Butler of Clinton and Sheila Peoples, with Jeanne Peoples serving as alternate.

Top dollar paid for Belgian mare

HARRISBURG — The first draft horse and mule sale was held at this year's Farm Machinery Exposition. The sale was held after the Thursday morning show, also a first at the Expo.

The high selling animal consigned at the sale was a Belgian filly, Julie Du Marais. The young draft horse was sold by Jacon L. Kanagy, Belleville.

Julie, who is not quite a year old will be travelling to Fisher, West Virginia today. She was purchased by Emory Crites, a farmer and machinery businessman, for the top dollar of $2750.

Crites said he has been in the horse-raising business all of his life, recalling his father always loved horses and working with them. Presently, Crites said he has around 20 grade Belgians, along with twenty-five to thirty saddlebred light horses.

The West Virginia farmer raises roughly 500 head of beef cattle, too, on his two farms of 620 acres total. Besides the young stock, Crites runs a herd of about 200 commercial cows, primarily Charolais, Hereford, and Angus, and rents close to 500 acres in addition to the land he owns.

In his spare time, Crites takes his big heavy horses in parades. He said they are somewhat of a hobby for him.

Before coming to the sale in Pennsylvania, he had travelled to a sale in Columbus, Ohio, but didn't find anything that matched what he was looking for and his pocketbook too. Crites said he came to the Expo sale to buy a couple of the better draft horses.

The grand champion stallion was pulled from the sale when the bidding closed at $2750.

There were twenty-two animals consigned for an average price of $1162. SM

USDA approves meat extenders

WASHINGTON, D.C. — The U.S. Department of Agriculture added two enzyme-treated milk products to the list of binders and extenders approved for use in meat and poultry products, effective February 15.

Under revised meat and poultry inspection regulations, enzyme-treated calcium-reduced dried skim milk will be permitted in sausage, imitation sausage, nonspecific loaves (luncheon loaf, honey loaf, etc.), soups, stews and various poultry products. Enzyme-treated sodium caseinate will be permitted in all those products except sausage.

Rennet, the enzyme used in treating calcium-reduced dried skim milk and sodium caseinate, has been used for many years in making cheese. Rennet is generally recognized as safe by the Food and Drug Administration and does not alter the nutritional character of the binder-extenders.

The revised regulations were published in the February 13 Federal Register. For a copy of the final impact statement, write to: Robert G. Hibbert, Meat and Poultry Standards and Labeling Division, FSQS, USDA, Washington, D.C., 20250.

USDA's Food Safety and Quality Service administers the Federal Meat Inspection Act and the Poultry Products Inspection Act. These laws require that all meat and poultry products prepared and sold in interstate commerce be wholesome, unadulterated and properly labeled.

Alternative tax could relieve property tax

UNIVERSITY PARK — An income tax, as a substitute for the school property tax, would lower tax burdens for many people, according to an economist at Penn State.

"Citizens must be concerned, however, with what is given up if the property tax is no longer used to finance schools," declared Dr. Theodore R. Alter, agricultural economist with the College of Agriculture at Penn State.

Using 1975 as a typical year, Alter and associates found that property taxes in Pennsylvania ranged from 7.5 per cent of income for farmers with the lowest incomes to 1.4 per cent of income for nonfarmers with the highest incomes.

Farm Tax burdens were consistently higher than those of nonfarmers for all income groups and in total, he added.

Dissatisfactions with the property tax exist on the part of both citizens and government officials and many people are pushing for reform, Alter reported.

Property tax reform generally means three things, it was pointed out. First, there is the possibility of improving administration of the current system. Second, the current property tax can sometimes be modified to make it more equitable and to reduce other negative aspects. A third reform is to substitute, completely or partially, another tax source for property tax.

Alter and associates studied both local and state income taxes as full substitutes for the 1975 school property tax. They found that a local flat rate income tax would generally lead to the greatest decrease in tax burdens for most taxpayers.

The local flat rate was folllowed in order of effectiveness by, first, a combined flat rate tax was followed to order of effectiveness, by, first, a combined flat rate state and local income tax, and second, by a flat rate state income tax.

Under each of these alternatives, taxes for farmers would on the average be reduced significantly, it was stated. For nonfarmers, taxes would be reduced on the average except for people with incomes over $15,000 where 1975 school taxes were levied at 1.4 per cent of income.

The increases, however, would be less than the tax reductions experienced by other nonfarm and farm taxpayers.

Variations in local property and income tax bases would result in some differences from this general summary of tax burden changes, Alter noted.

In defense of the property tax, Alter said it is a stable and productive source of revenue. Then too, property tax decisions keep citizens keenly aware of, and involved in, decisions regarding school district revenue and expenditures.

He said the property tax is truly a local tax, in that most decisions regarding its use are made locally. Moving to a state income tax to finance schools could weaken the link between preferences for local expenditures and decisions to fund these expenditures, he observed.

The project was supported in part of Fair Funds administered by the Pennyslvania Department of Agriculture.

Collins tops Md. soybean list with double-cropped entry

EASTON, Md. — For the fourth consecutive year, Maryland's top soybean grower hails from the Eastern Shore. But the crown has shifted about 27 miles southwestward from northern Caroline to central Talbot County.

This year's winner is Maurice E. Collins of Easton with a yield of 62.2 bushels per acre of double-cropped Essex soybeans.

Collins planted his soybeans on July 1 in 20-inch rows after harvesting a crop of wheat. His planting rate was 90 pounds of seed per acre. The field had been planted to sweet corn in 1978.

Runnerup for the second consecutive year was another Talbot County farmer, Earl J. Hutchinson of Cordova. His 1979 contest yield was 61.4 bushels per acre.

Hutchinson's cultural methods were almost identical to those of Collins. He planted Essex soybeans on June 14 in 18-inch rows at a rate of 90 pounds of seed per acre. His soybeans were double-cropped in tandem with barley.

Like his state champion counterpart, Hutchinson used Lasso, Lorox and Paraquat herbicides for week control; he did no cultivation; and he applied no insecticide.

Maryland's official yield record for soybeans (69.8 bushels per acre) was set in 1976 by Dale Reagan of Federalburg (Caroline County).

The top 10 growers in the 1979 Maryland contest attained an average yield of 57.38 bushels per acre. This achievement is noteworthy in a year when the statewide average soybean yield fell below that of the previous year.

Talbot county placed five soybean growers in Maryland's top 10 last year, and Queen Annes county had four. Seven of these nine growers planted Essex soybeans; one had the Miles variety, and one raised Williams. The top three in Talbot county utilized 18 or 20-inch rows, while the top three in Queen Annes county had 7-inch rows.

All six of these no-till farmers had applied lime to their contest fields in the last two years at a rate of one ton per acre. None had used insecticide treatments on their soybeans, a practice typical of double-cropping.

John H. Brown, Jr., of Goldsboro, Caroline county, had the top 1979 Maryland yield for soybean grown under conventional tillage methods. His yield of 61.3 bushels per acre with Essex soybeans placed him third in the over-all standings.

Brown planted his foundation seed in 38-inch rows on May 7 at a rate of only 25 pounds per acre. The field had produced carrots during 1978. He cultivated twice and used a Lorox-Lasso herbicide combination.

Winners in both the official Maryland corn and soybean yield contests were honored Tuesday night in the Tidewater Inn at Easton during the seventy-third annual meeting of the Maryland Crop Improvement Association.

The official statewide yield contests have been conducted each year since 1952 as part of the crop improvement programs of the Cooperative Extension Service at the University of Maryland in College Park. Yield measurements are supervised by Extension agricultural agents in participating counties.

Grange youth plan events

VIRGINVILLE — The Youth of the Virginville Grange is planning is hold a full schedule of meetings and special events during the coming month.

The first event will be a roller skating party on Monday at Pheasantland. The group's regular meeting will be held Wednesday at the hall, followed by a county youth meeting on March 10.

The county youth is planning a sale of Italian sandwiches on April 12. Interested persons should contact Steve Mohn. The following day the youth of the grange will conduct their community trash pickup project.

Five new members were accepted at the grange meeting on Feb. 21. They include Dwayne DeLong, Lewis Stump, Wayne Stump, Raymond Reppert and Shirley Green. A cherry pie baking contest was conducted at the meeting and winners were Lillian Mengel, first; Shirley Dreibelbis, second; and Joyce Miller, third.

A decision was made to enter the community project. Persons interested in helping to rebuild the home of the Curtis Lash family should contact Irvin Kauffman.

The pail needs to be dumped twice for this first freshener, but Harry says he doesn't mind. In fact, he'd like to do it more often.

Raw milk

(Continued from Page A13)

this is one reason their problems in acquiring good stock upsets them.

If they had so much problem searching out decent stock, they reason, someone with no experience in dairy goats must find the quest a nightmare. "There's too much emphasis on show qualities," says Larry. "So many people we visited had no records on milk production for the animals."

As the 17 does they are currently milking take their places, are milked, and leave, they explain that each doe knows her name and comes in when called. In addition to tattoo identification, each doe wears half a yellow plastic cow chain around her neck. On each one, a beef ear tag has been hung and marked on it in indelible ink is the doe's name. Names range from the common, Anita, to the whimsical, Tweedy Bird.

The milking machine itself is a clever conversion. The standard Surge lid has been custom fitted to a 3 quart stainless steel pan which originated in Alda's kitchen. The top edge of the pan has been fitted and polished by Harry. He points out that the first kettle they custom fitted cut into the lid gasket too much. The one they made later has a slightly flared out rim.

Other adaptations to the milking equipment include setting the vacuum at 12 p.s.i. and putting medicine dropper rubbers over the

Both sides of the barn have been outfitted with hay mangers that run the full length of the barn. Eventually, the barn will feature a walkway around it's entire inside perimeter.

The senior herd sire flirted with the camera amid grunts and clicks.

PUT MORE PROFIT IN YOUR ALFALFA.

Whether you grow for a cash crop or to feed your own livestock, you can't afford weeds in your alfalfa or clover field. They shorten stand life, lower protein content, lower TDN and reduce overall digestibility and palatability of your hay. In short, excessive weed growth just plain picks your pocket.

ORTHO Paraquat CL herbicide burns back weeds on contact. Apply Paraquat during the winter to dormant established stands. It's exceptionally broad spectrum and destroys weeds with extraordinary speed. Apply Paraquat with ORTHO X-77® Spreader.

DANGER: Paraquat is highly toxic if swallowed and should be kept out of the reach of children. To prevent accidental ingestion, never transfer to food, drink or other containers. Read the label carefully and follow all directions, danger statements and worker safety rules. Restricted Use Pesticide. Use all chemicals only as directed.

Brief answers to short questions

Sheila's Shorts

By Sheila Miller

Water, water, everywhere!

As the winter months come to an end, many of us are looking toward the gentle spring showers that are always promised in April.

After a dry winter like we've experienced this past winter, it is almost hard to imagine having too much water. The soil is really dry, right now, and the streams are probably at their lowest point in years.

But, soon, the spring rains will come to soak into the warming soil. These rain showers are not always the gently falling rains described in poetry; but all too often, they are vicious downpours that scour the land and muddy-up the streams.

So, what can you do now to prepare for these torrential rains? Well, there's probably not a whole heck of a lot you can do, but if you farmed with controlling the excess water in mind, you should survive the Pennsylvania monsoons with very little damage.

Many farmers are farming with diversions and waterways, cropland terraces with tile outlets, and some have even gone so far as to construct holding ponds to store some of the runoff water.

With as little moisture as has fallen from the skies this winter, by July and August, the water that is kept in the fields now may make a big difference in the next harvest.

But what do you do if you're farming with storm water management in mind, and a housing development moves in next door. Suddenly where there were hay fields and contour strips, there are streets and homes. The spring rains have a hard time soaking into roof tops and asphalt.

Although you might feel a bit helpless in stopping the uncontrolled-water pouring off adjacent land, there is something that you can do besides looking for a giant cork.

On October 4, 1978, Milton Shapp signed into law Act 167, the Storm Water Management Act. This law was passed to stop what they termed, "accelerated runoff".

This runoff is the result of development and creates a situation where there is too much water for the streams and current storm sewer facilities to handle.

What happens then is the storm water gets out of control and takes off on a damaging spree, eroding away soil which clogs the stream channels. In its worst stage, the uncontrolled water becomes a raging flood, destroying homes and property and sometimes claiming lives.

The October, 1978 law calls for:

—Planning and management of storm water runoff in every watershed, consistent with sound water and land use practices.

—Developing a comprehensive program of storm water management to preserve and restore the flood carrying capacity of Commonwealth streams, to preserve the natural storm water runoff courses, and to protect the ground water and recharge areas.

—Encouraging the local administration and management of storm water.

But, the act goes one step further. In section 13 it states:

"Any landowner and any person engaged in the alteration or development of land which may affect storm water runoff characteristics shall implement such measures consistent with the provisions of the applicable watershed storm water plan as are reasonably necessary to prevent injury to health, safety or other property Such measures shall include such actions as are required:

—to assure that the maximum rate of storm water runoff is no greater after development than prior to development activities; or

—to manage the quantity, velocity and direction of resulting storm water runoff in a manner which otherwise adequately protects health and property from possible injury.

What this part of the law does is gives some teeth to enforcing the control of storm water runoff.

If you are having a problem with a neighbor's storm water being dumped onto your farm, you can call Eugene Counsil, director of the Division of Storm Water Management in the Department of Environmental Resources and report the problem. His telephone number is 717/787-6827; or you can write to him at Post Office Box 2357, Harrisburg, PA. 17120.

If the problem has been created since the act was passed, you may have some legal help in correcting the nuisance runoff

Economist optimistic about milk

LEBANON — William Johnston, Extension agricultural economist from Penn State told Lebanon County farmers there is conflict in the milk market. He was speaking to a group of nearly 100 farmers during a meeting held last Thursday at the Treadway Inn, Lebanon.

The meeting was sponsored by the Lebanon Valley National Bank, and featured presentations by Johnston, on milk marketing; Steve Hoffman, on tax planning; and Darryl Ford, on estate planning.

Johnston pointed out there are conflicts in the milk marketing industry between farmers with high and low butterfat production, resulting in differential payments. He also cited the current head-to-head discussions between the co-ops and independent milk producers.

The Extension economist chided the dairymen for turning their marketing responsibilities over to someone else, namely the co-ops and the state and federal milk marketing boards.

"The market requires your constant attention to keep it humming," he said. "Your income and future are tied to marketing. There is no book available to learn from completely—you have to pick it up by osmosis and keep abreast with the changes."

Johnston noted milk markets as being one of the highly administered market places, along with liquor, banks, and utilities.

The four "big" issues Johston discussed included price support, federal orders, co-ops, and imports and substitutes.

"Many dairymen in the East are unaware of how the price support programs affect their paychecks," he stated.

The price support program was started in 1949 with 75-90 percent parity, and in 1977 was changed to 80 percent of parity. Johnston pointed out milk is the only commodity still marketed under parity.

Federal orders governing the milk market have decreased from the original 80 to the present day 47, and there is a question of whether there should be just one order in the North East, according to Johnston.

He mentioned the transportation differentials, and CNI proposals as present conflicts in this area.

"The CNI proposals have threatened the industry somewhat," Johnston noted, "and the major associations, such as the Milk Industry Foundation, the Dairy Processors Association, and the Milk Marketing Foundation, said they feel there are changes needed, but CNI was not the approach to take."

Under the discussion on co-ops, Johnston said he felt they were the major thrust of influence in changing state and federal regulations. Although he said their present state is fragmented.

Johnston said there is a way for people in the marketing business to get around the regulations on importing and making milk substitutes. He cited the casein manufacturers for an example.

But, despite the on-going conflicts within the milk marketing industry, Johnston said he is optimistic about the future of the Eastern milk producers

"You have the skill, motivation and technology to produce," he said. "But you have to keep studying—more people need to understand the impact of marketing on their future." SM

Lancaster Dairy Day Scheduled Tuesday

LANCASTER — Dairymen and other individuals interested in dairy farming are invited to attend the Annual Lancaster County Dairy Day, March 4 at the Farm and Home Center, Lancaster.

Come as early as 9 a.m. to enjoy coffee and donuts and an opportunity to inspect the commercial exhibits, or observe the demonstration on screen testing milk or antibiotics.

Dr. Lawrence Hutchinson, Penn State Extension veterinarian, will discuss the problems of nitrates in feed and water. This has been a growing concern to many local dairy farmers. In the afternoon, Dr. Hutchinson will also discuss programs for raising healthy calves and heifers.

About mid-morning, a panel of dairy farmers will share their experiences with several types of mastitis: coliform, mycoplasma, strep and staph infections. The three panelists will be Donald Ranck, Paradise; Jay Frey, Washington Boro; and David Windle, Cochranville.

Alfalfa is an important forage crop for dairymen. Donald Robinson, Garden Spot Vo-Ag Adult Instructor, will update dairymen on managing alfalfa for top yield and for top quality.

Prior to lunch, and during the lunch hour, farmers will have the opportunity to become recertified as private applicators. Interested persons should be sure to bring their application permits to the meeting. David Thompson, Pesticides Coordinator for the Pennsylvania Department of Agriculture will be present to explain the recertification program.

After lunch, Stephen Spencer, Penn State Dairy Specialist, will talk about "stray" voltage problems, which plague many dairymen and interfere with herd performance and udder health. He'll also discuss ideas for reducing energy costs by reclaiming and utilizing the heat given off in the process of cooling milk.

Recently, the use of prostaglandins has been approved for use with dairy heifers. This gives dairymen a new tool for use in their breeding program.

Michael O'Conner, Penn State's new dairy specialist, will discuss its application to dairy cattle breeding.

Berks slates swine meetings

BETHEL — The Berks County extension service invites all swine producers to two upcoming swine meetings, on March 5th and 6th.

Mid-Way Diner, exit 5 off of Route 78 near Bethel, will be host to the March 5 all-day meeting, starting at 9 a.m. The March 6 evening meeting will be held at O.J. Roberts High School, Rt. 23 just off of Rt. 100, South of Pottsville, starting at 6 p.m.

Swine farrowng will be the subject covered in the morning session on March 5. Producers are welcome at 9 a.m. for coffee, doughnuts and to visit the commercial exhibits.

The program and speakers are as follows: "Selection of Breeding Stock-Characteristics for the Commercial Producer", Dwight Younkin, PSU Extension Swine Specialist; "Artificial Insemination - Is It For You?", panel of producers; "Meaningful Records", Virgil Crowley, PSU Extension Farm Management Specialist; "Health & Diseases of Today", Dr. Tim Trayer, Valley Animal Hospital; followed by a Pork Bar-B. Q. Luncheon.

The afternoon's program centers on Swine Feeding and includes: "Marketing - The Packers Viewpoint", Henry Gruber A & B Packing; "Feeding High Moisture Corn", panel of feed and silo officials, and producers; and a synopsis on feeder pigs, with "Buying", by Dr. Tim Trayer; "Feeding", Dwight Younkin; and "Diseases", Dr. Jerry Applegate; Swine Specialist for Pennfield Feeds. Reservations are needed for the luncheon.

The evening of March 6 will begin with an informal "Ask the Experts" question and answer period, with coffee and doughnuts. This period will be for producers to talk to the speakers.

Following this session the program includes: "Outlook The Slow Death", Jerry Clemens, Hatfield Packing Co. and Dwight Younkin, PSU Extension Swine Specialist. — "Meaningful Records", Virgil Crowley, PSU Extension Farm Management Specialist, "Diseases - The Quick Death", Dr. John Sellers, MVD, Chester County Veterinarian and Dr. Charles Clark, VMD., Chief Laboratory Division, Pennsylvania Veterinarian Diagnostic Laboratory, and "Improve Reproduction Efficiency" Dwight Younkin and Ken Keiphart, PSU Extension Assistant.

For more information on these two meetings and a reservation form for the Luncheon on March 5 call Clyde A. B. Myers, Berks County Agent, at the Berks County Agricultural Center, 215/378-1327.

Lancaster 4-H Dairy Clubs reorganizing

LANCASTER — The Lancaster County Dairy Clubs will be holding their reorganizational meetings during the month of March.

Interested youth are invited to attend these meetings and enroll as a member of a club of their choosing.

The Aryshire, Brown Swiss, Jersey 4-H Dairy Club will be meeting at 7:30 p.m. on March 10 at the home of David Harnish, 10 S. Hess St., Quarryvile. Leaders of the club are Milton Brubaker, Kenneth Eshleman, David Harnish and Donald Trimble.

The Golden Guernsey 4-H Club will meet at 7:30 p.m. on March 11 at the home of Raymond Witmer, Route 222, south of the Pequea Creek, about 7 miles south of Lancaster. Club leaders are Jesse Balmer and Peter Witmer.

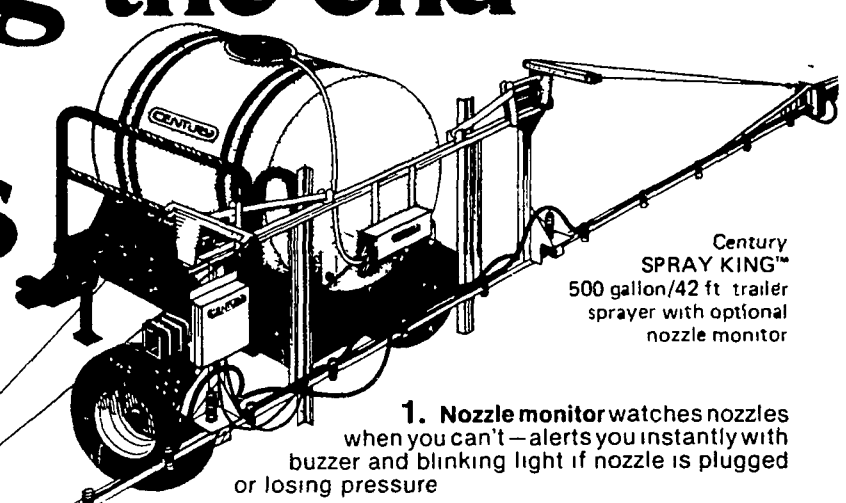
The Lancaster County 4-H Holstein Dairy Club is scheduled to meet at 7:30 p.m. on March 25 in the basement Community Room of Park City Mall, Lancaster. Club leaders consist of: Gary Akers, Elam Bollinger, Rodney Denlinger, Elvin Hess, Robert H. Kauffman, Jay Landis, Kenneth Rutt, and Earl Stauffer.

4-H Dairy club work gives youth the responsibility of owning and caring for their own dairy cattle. As part of their project requirement, they keep income and expense, feed and health records on their cattle. In addition to learning how to properly care for their cattle, the members are encouraged to train and groom them for show.

In addition to caring for their project animal, the members elect officers and conduct their own club meetings and help to plan their club's program. They participate in a variety of activities: tours, dairy cattle judging sessions, fun nights, community service projects, etc.

To be eligible for membership, youth should be between the ages of 8 and 18 as of January 1 and they are expected to own by May 1 a dairy heifer that is registered in their name and born prior to March 31 of this year. For more information, contact Lancaster Extension Office (717) 394-6851.

Announcing the end of costly hit-or-miss spraying.



Century SPRAY KING™ 500 gallon/42 ft trailer sprayer with optional nozzle monitor

Century helps assure accurate spraying with all these available advantages:

1. **Nozzle monitor** watches nozzles when you can't—alerts you instantly with buzzer and blinking light if nozzle is plugged or losing pressure

2. **No-drip nylon nozzles** prevent under or over application—keep herbicide from dribbling onto ground, burning crops Won't rust or corrode Wear four times longer than aluminum or brass

3. **Large ⅝-inch E.P.D.M. jumper hose** increases flow to outer nozzles—provides even pressure and proper output

4. **Heavy-duty 1½-inch square tubing** on all booms gives greater, longer lasting strength than round tube booms

5. **Two speed fast pressure control** lets you increase or decrease pressure quickly, easily as you spray

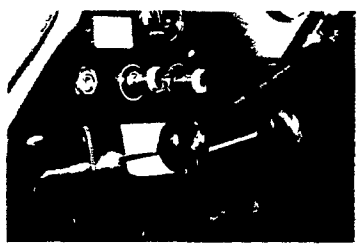
HARD WORKIN', TOUGH HAULIN' - that's O

Scissor & Telescopic HOISTS by OMAHA STANDARD

All Omaha Standard hoists are sold with the Omaha Standard Body Prop and a pump lever control guard which comply with all existing state and federal O S H A regulations

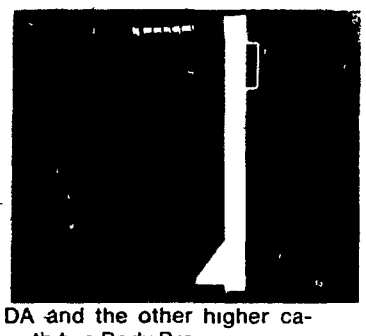
Omaha Standard Hoists Include These Quality Features...

Inside Cab Control



All Omaha Standard hoist models are standard double-acting (power-up, power-down) and are sold complete with inside the cab dashboard controls and bracket Pump control cables are non-corrosive and designed for all-weather use Hoists are offered complete with pump, hydraulic hoses and fittings, pump driveline and mounting components (less power-take-off)

Body Props

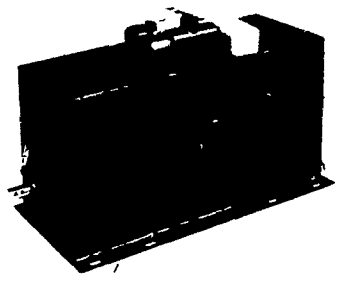


The Omaha Standard Body Prop is used to support an *empty* truck body in the raised position to allow maintenance and service work to be performed safely The Body Prop satisfies current OSHA regulations One Body Prop is supplied with each single cylinder hoist except the Model 629-S DA The 629-S DA and the other higher capacity hoists are equipped with two Body Props

Seamless Steel Cylinders

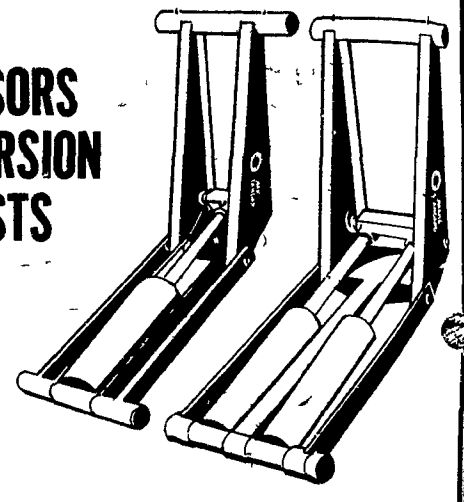
All Omaha Standard cylinders are pressure-tested and cycle-tested before installation Ground and polished, chromed rods insure long cylinder life The Super 529 DA, 61 DA and 629-S DA hoists use cylinders featuring a threaded end-cap to give additional reliability and resistance to shock loads

Pump, Reservoir, Control Valve and Guard

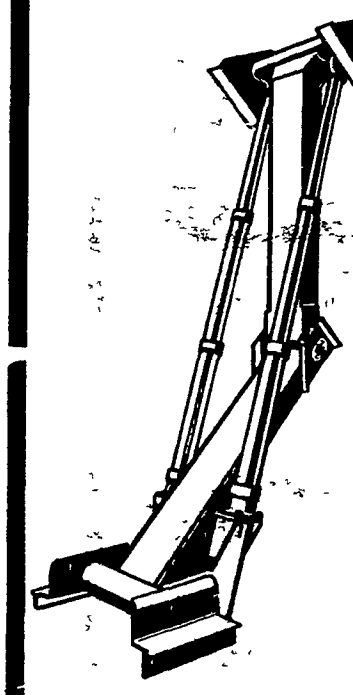


Integrated in a single compact unit the standard piston pumps reservoirs and control valves are built for high-pressure double-acting applications Each pump supplies pressure up to the maximum operating pressure for each model hoist and is equipped with internal relief valves The control valve lever guard and pump controls meet existing OSHA regulations Pumps with an additional control valve for auxiliary equipment are available as options

SCISSORS CONVERSION HOISTS



Omaha Standard's single cylinder scissors hoists handle a range of bodies from 8' to 20' for loads from 4 to 25 tons. All hoists are double acting (except electric gear pump models.) Twin cylinder hoists will handle virtually all heavy grain loads under bodies from 14' to 24' for loads from 14 to 34 tons. Critical components of all Omaha Standard hoists are fabricated from special high-strength low-weight steel.



Introducing the NEW standard in hoists...

OLYMPIC SERIES

Conversion Hoists by Omaha Standard

FEATURES

- **GREATER TORSIONAL STABILITY** than other hoists on the market —handles uneven loads with no box twisting
- **MORE LIFTING CAPACITY** — advanced design means greater capacity than competition stabilizer-type hoists
- **LONGER REACH** than other "stabilized" hoists for far forward lift point
- **LOW PROFILE** — 7-5/8" mounting height eliminates cutting of body cross members
- **HIGH POLISHED HARD-CHROMED TELESCOPIC CYLINDERS** for durability and long wear.
- **HIGH PRESSURE FITTINGS AND HOSES** mean greater safety and hoist longevity
- **MAY BE MOUNTED IN EITHER DIRECTION** for installation flexibility
- For body lengths 16 to 24 feet
- Quick, easy mounting
- 35° to 55° dump angle
- High pressure, positive displacement piston pump (gear pump/independent reservoir optional)
- Constructed from high strength steel

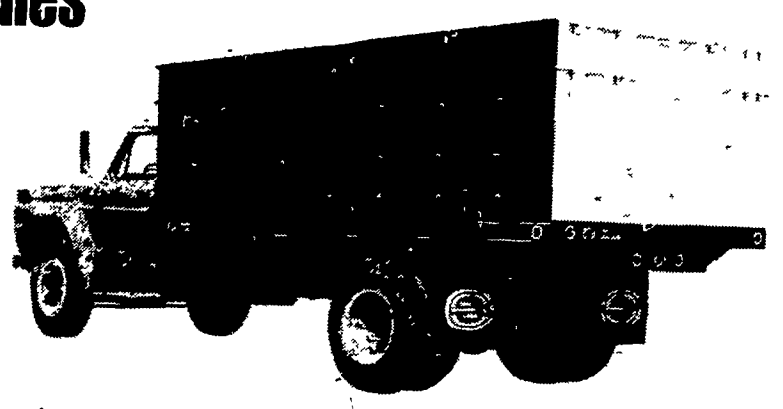
Livestock & Grain Bodies by OMAHA STANDARD

Steel Grain and Livestock Bodies

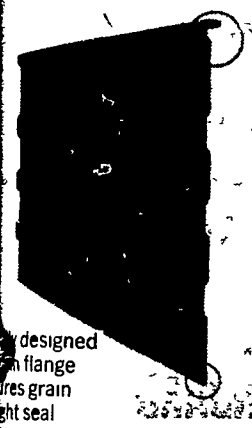
Available in heights of 28", 40" and the extra capacity 52" sides.

Rugged one-piece roll-formed sides

heck our body carefully. You will find tough 5 gauge steel on our familiar 28" and 40" steel body sides and even heavier 14 gauge on our large capacity 52" side Sides in all sizes are manufactured by continuous-process roll forming The result is a one-piece, durable side with maximum corrugation for maximum strength There are no welds to break, no warping under stress



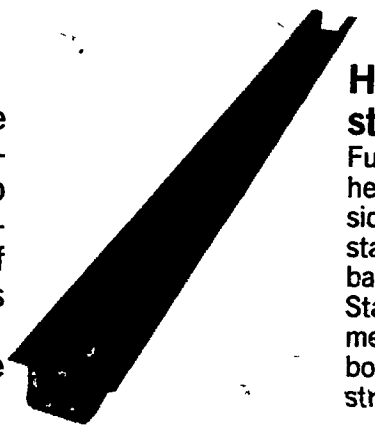
Steel body shown with optional 12" tip tops, which are available on 28", 40" and 52" steel sides in all lengths



designed flange res grain ght seal

"Rolled-in" Tarp Rail

Omaha Standard pioneered the rolled-lip type tarp rail that protects tarp and hands. Our tarp rail has no seams or welds because it is roll-formed as part of our one-piece side. This provides greater side strength. Specially designed bottom flange insures grain tight seal.



Heavy gauge roll-formed steel stakes

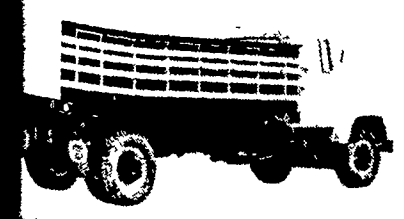
Full "hat" style construction from heavy gauge steel offers superior side strength. Additionally, each stake base is reinforced with a backing plate for greater rigidity. Stake placement every 24 inches means up to 20% more stakes per body. All this adds up to greater structural strength.

Hardwood Fold-Down

uick Conversion From Grain to Livestock

y is pictured th Omaha tandard's ique-design vented sides.

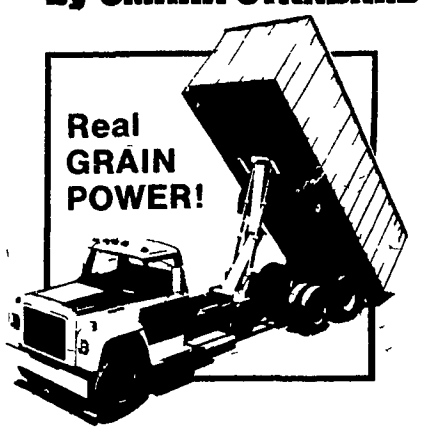
xibility is the primary advantage in using Omaha tandard all-wood upper racks. Our 18" and 26" old-downs are constructed from highest quality ardwoods. Use of wood in this critical area provides greater margin of flex and life. Cross chains and nti-spread bars are standard.



uck above features 40 vented steel sides h racks secured in the down position

Paint The brilliant red and white paint on all Omaha Standard bodies is high quality Alkyd enamel, designed for high gloss, long life and rust protection Underneath, our primer is a superior rust and corrosion inhibitor Cab matching paint and other colors available as an option Add the personal touch of hand-painted pinstriping and we've set the STANDARD for the truck body industry

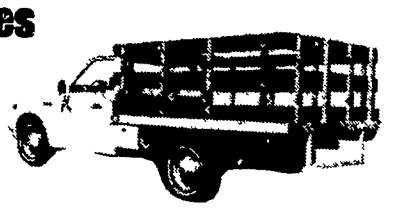
Stakeless Bodies by OMAHA STANDARD



Heavy gauge steel sides with deep corrugations for maximum strength The stakeless is available with either 48" or 60" high sides and standard lengths of 18' 20' and 22' It's super grain tight and well hinged with Omaha Standard's full opening rear doors and swingout header for easy loading

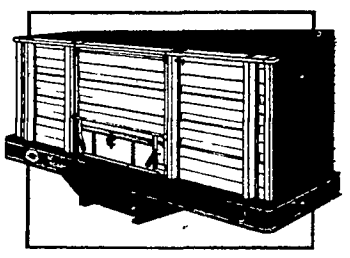
Mini-Stake Bodies

Especially designed for the popular, energy-saving small pickup, the mini-stake features clear finished, all hardwood racks and flooring

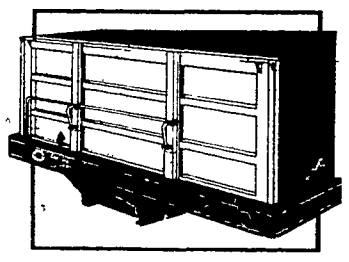


GATE OPTIONS

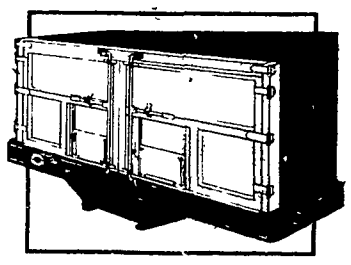
Omaha Standard offers a complete line of rugged gates for both steel and wood bodies Whatever your hauling requirements are, you'll find an Omaha Standard gate that's matched for the job and ready to work for you



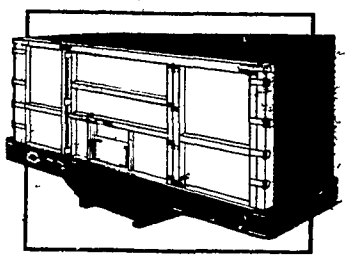
Standard Grain Gate for Steel Bodies — includes full-width side pull grain gate with exclusive horizontal metering trap — available in 40" and 52"



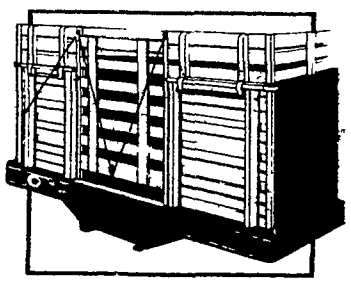
Top-hinged Dump Gate for Steel Bodies — available in 40" and 52" - includes grain trap



Two-section Full Opening Rear Door for steel bodies — includes grain traps — available in 40" and 52"



Three-section Full Opening Rear Door for steel bodies — includes grain trap — available in 40" and 52"

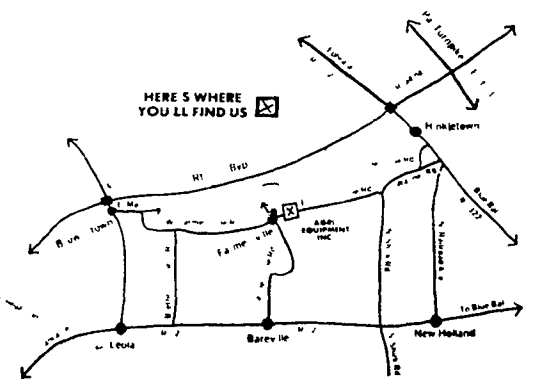


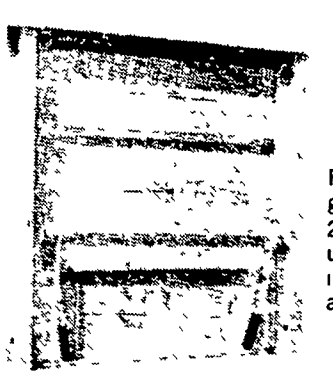
Hardwood Slide Gate for Steel Bodies — standard with fold-down racks — available in heights for all fold-down/lower combinations, gates for 66", 70" or 78" frames

ILLE EQUIPMENT INC.

717-354-4271

MON. - FRI. 8 A.M. - 8 P.M.
SAT. - 8 A.M. - 3 P.M.





GATE FEATURES

Full-width, steel metering grain gate is standard on 28", 40" and 52" steel side units A smaller grain gate insert for use with augers is also standard

New Holland special horse auction held

NEW HOLLAND — Buyers from as far north as Massachusetts and as far south as Tennessee flocked to the special Friday horse sale held recently at New Holland Sales Stables.

According to Paul Snyder, the number of mules and work horses was lower at this sale than at some of the special sales conducted by the Stables in the past. Snyder feels, however, that there will be more of these two categories at the next special sale to be held March 7, at 10:00 a.m.

A tack sale will preceed the sale at 9:00 a.m. Snyder stated that these tack sales usually contain an assortment of harness and horse paraphenalia ranging from bridles and sleighs to farm equipment such as cultivators.

In addition to the plain sects seeking carriage horses, buyers from out of state seeking pulling horses ranging from logging horses to pairs of fancier horses for pulling parade wagons attended.

Prices received at the February 22 auction were:

Tenn. mules, pairs, 1800-2400; Tenn. work horses, pairs, 1750-3900, singles, 850-1700; Tenn. mules, pairs, 1650-2500.

Tenn. driving horses, 775-1325; Pa. driving horses, 650-1375.

Saddlebred driving horses, Tenn, 900-1625; Saddlebred driving horses, N.Y., 775-1425.

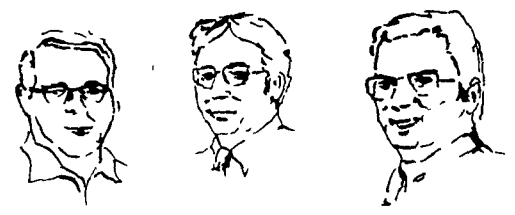
Local driving horses, 600-1200.

Local work horse pairs, 1500-2000; singles, 775-1750. Local mules, pairs, 1850-2100; singles, 600-1825.

February declared Potato Lover's month

February was declared "Potato Lover's Month" during late-in-the-month ceremonies in Harrisburg. Shown taking part in the proclamation signing are: top row left to right — Noah Kreider, Jr.; Dave Seiple; George Wolf; Sterman Masser; Everett Blass, Jr. Bottom row — Thomas Lyon; Governor Dick Thornburgh, and Chester Heim.

Ask the VMD



Leon Riegel Tim Trayer Edgar Sheaffer

Shots are a pain in the ...!

A reader asks:

I've heard that if you give injections to young livestock in their rumps, it can affect their development of the muscles in their hindquarters. Where should intermuscular shots be given, rump or neck?

Dr. Riegel comments:

It's possible that intermusular injections given in the rump area of young livestock can affect muscular development.

This is especially true if the substance being injected is very irritating, and is injected near major nerves in the hind leg.

This is a definite consideration when dealing with purebred show stock, where conformation of the hindquarters is of great importance.

Therefore, alternate sites such as the neck or larger muscles of the upper front leg when giving injections.

The rump area is, in most cases, the most convenient place to give intermuscular injections, and the probability of causing problems with muscular development is not extremely great.

So when dealing with large numbers of cattle that are not being considered for livestock show prospects, the rump area will be used for most intermuscular injections with little or no side effects.

If you have a question you would like to have answered by the team of doctors at Valley Animal Hospital, send it to Ask the VMD, Box 366, Lititz, PA 17543.

New agriculture yearbook features fun for kids

WASHINGTON, D.C. — "What's To Eat? And Other Questions Kids Ask About Food," the 1979 Yearbook of Agriculture, was published Wednesday by the U.S. Department of Agriculture.

The book is designed and written especially for 9 to 12 year olds. It was produced as one of USDA's commitments honoring the International Year of the Child.

Between the covers of the new yearbook is a lively and authoritative story of food, from the earliest struggle to get enough to tomorrow's problems of supply. Colorful illustrations, jokes, quizzes, craft ideas and recipes help enliven and support the story.

Besides being the first yearbook designed for children, the new 144-page book is also the first issued by USDA in paperback. This was done to hold down the price—$4.50 per copy—and to insure the widest possible use.

"The story of food is a fascinating one," Secretary of Agriculture Bob Bergland said. "This book tells the story in two ways. It tells the story of those who produce our food and it tells us how our health, well-being and pleasure are affected by food.

"There is no better audience for that story than our young people," Bergland said.

Among the book's eight sections are:

—A look at the history of food and eating, including some peculiar table etiquette of early days;

—A television interview with a soybean and a farm tour conducted by a 12-year-old farm boy that helps illustrate how and where food is grown and how it is delivered to dinner tables;

—Tours of a supermarket and other places to buy food, with some smart shopping tips along the way;

—The latest work in nutrition and what a body does with the food it's fed;

—Farm-and-dinner-table visits to faraway places to see the kinds of foods that are grown and eaten in other lands;

—A 50-year-ahead look at the kinds of food that will be eaten then; and

—Easy-to-do vegetable gardens, both outdoor and indoor types; and

—Pages of funny sayings and crafts that can be performed with foods.

Copies of "What's To Eat? And Other Questions Kids Ask About Food" are for sale by the Superintendent of Documents, U.S. Government Printing Office, Dept. 39-G, Washington, D.C. 20402. Members of Congress have limited numbers of the yearbook for free distribution to constituents.

Cecil County names top DHIAs

ELKTON, Md. — Following are the top ten dairy herds for Cecil County which are on test with the Cecil County Dairy Herd Improvement Association.

This information is compiled from records received in the Cecil County Extension Office during the period from January 16 through February 15.

Adequate supplies but higher fertilizer prices for 1980

BY DICK ANGLESTEIN

LANCASTER — A relatively mild winter here at home and a heat-up in international relations overseas should help in the availability of fertilizer for 1980.

But there will be additional fertilizer price hikes as the year progresses, closely allied to energy costs, particulary natural gas.

These are the essential elements of a fertilizer forecast offered this week by a top representative of the Ortho Fertilizer Division of the Chevron Chemical Company.

Paul L. Rushing, Ortho Manager of Manufacturing, was in Lancaster County to address the annual appreciation night dinner meeting of P. L. Rohrer & Bros., Inc., Smoketown, held Monday night at Willow Valley Motor Inn.

"All in all, the outlook for te availability of fertilizer this year is very favorable," Rushing said. "The mild winter experience in the mid-West has been a great help in the production of nitrogen."

Nitrogen production facilities are on an interrupted natural gas supply system in which first priority is given to home heating, Rushing explained. But due to the mild winter and lower demands for home heating, there have been sufficient supplies for both uses, resulting in no curtailment in nitrogen production this winter.

"Natural gas is the first building block in fertilizer production, particulary nitrogen," Rushing explained.

"Since there has been no interruption in this initial stage, the industry has been able to build what should be adequate supplies."

The current slowdown in phosphate exports to the Soviet Union also should improve is domestic availabilty, according to Rushing.

Paul Rushing

Rep. Tom Harkin of Iowa is leading a group in Congress calling for a halt in phosphate shipments to Russia, similar to the grain embargo, until Soviet troops are withdrawn from Afghanistan. The Carter Administration has suspended shipments for a two-week period, which is just now ending, and is requiring a case by case approval of future Soviet exports.

"By March, the fertilizer industry pretty well has its products in the pipeline on the way to dealers," Rushing said. "Therefore, due to the slowdown in the exports of phosphate, I don't anticipate there will be any severe production shortages for the U.S."

As far as the industry is concerned, that portion directly involved in exports naturally will be affected if any appreciable phosphate embargo continues, he said. But phosphate raw materials are in adequate supply to meet U.S. and export needs, he adds.

While overall fertilizer supplies appear to be quite adequate, Rushing is not discounting possible transportation problems.

"The on-going deterioration in railroad facilities and the availability of rolling stock will continue to affect the ability to move these materials and get them exactly where they are needed," he said.

The cost of natural gas will remain the most important question mark in future price increases, according to Rushing.

"A major new determining factor is the two-tier gas pricing system at the well-head," he explained.

Now, gas supplied from wells more than 15,000 feet deep is more costly than that coming from shallow wells. Most of the Gulf Coast gas finds are from deep wells with the higher prices.

"Assuming present forecasts concerning anticipated natural gas costs are accurate, I won't be surprised to see a 10 percent increase in fertilizer prices by the end of 1980," Rushing said.

"The mix in gas supplies, particulary how much must come from the higher-priced deep wells, will have a significant impact on future prices though."

For 1980, total fertilizer industry shipments may reach 55 million tons, which would make it a record production year.

"For the near term and the long term, prospects for the industry and the availability of fertilizer are very healthy," Rushing said.

He stressed that efforts must continue to encourage a shift of natural gas users to other fuels wherever possible. Thus, availability can be better guaranteed for fertilizer production and other essential uses.

Before approximately 100 guests at the dinner, Rushing reviewed Ortho's present and future manufacturing expansion plans to meet fertilizer demands. Production capacity at a plant in Iowa is being tripled, along with expansion in the state of Washington. The company's five-year program calls for new manufacturing facilities in the Southwest.

CCC to take contract

WASHINGTON, D.C. — The Commodity Credit Corporation has signed agreements with 12 grain exporters to acquire contractural obligation for up to 16,095,029 metric tons of corn, soybeans and wheat which could not be shipped to the Soviet Union due to the imposition of export controls, according to CCC deputy vice president John Gibbs.

This total will be reduced by the volume shipped to reach the 8 million ton level under the US-USSR grain agreement, Gibbs said.

Today was the final day the exporters could accept the CCC offer.

The 12 firms who accepted are Bunge, Cargill Inc., Continental Grain, Louis Dreyfus Corp., Farmers Export, Garnac Grain, Goodpasture Export Corp., Pasternak/Baum, Pillsbury Co., Tidewater Grain Co., Alfred C. Toepfer and Tradigrain Inc.

Gibbs said two firms, Central Soya and Philipp Brothers Grain Corp., declinded the offer.

The grain in the acquired contracts includes 10,846,516 metric tons (427 million bushels) of corn, 710,317 metric tons (26 million bushels) of soybeans and 4,538,196 metric tons (167 million bushels) of wheat.

Pennsylvania's first Holstein fieldman, Clarence Lyons, second from left, was honored with induction into the Hall of Fame. Remembering the early days of Lyon's career are executive secretary Bill Nichol, Martha Lyons and Lilly Nichol.

Retain southeast summer show

Holstein members induct pair into Association Hall of Fame

BY JOYCE BUPP
Staff Correspondent

MONROEVILLE — Two long-time Pennsylvania Holstein activists were inducted into the Association's Hall of Fame during the breakfast awards program, held at last week's state convention at the Al Monzo Howard Johnson Motor Lodge, near Pittsburgh.

William Conyngham and Clarence Lyons selection was announced as the finale of the awards presentations, wrap-up event for the annual confab of the largest state Holstein Association in the country.

Conyngham is secretary-treasurer of Hillside Farms, Inc., Wilkes-Barre. Born in 1920, Conyngham studied in Wyoming Seminary and Yale, then served a tour of duty with the Navy during World War II. He's represented Columbia-Luzerne counties on the state Holstein board and been a national director for 28 years, as well as serving a term as state president and chairman of the executive committee.

Hillside Farms is a third-generation family dairy and breeding establishment, with some 150 animals in one of the state's oldest herds. Some of the 75 milking cows trace back to an original Dutch black and white that was shipped to America in 1884, and calved out in 1885.

"We have a better type herd now than ever before," reflects Conyngham of his many years at Hillside Farms. Current herd average is over 16,000 pounds of milk with 600 of fat. A major accomplishment of the herd is that it has produced thirty 100,000-pound producers and is well know on the show circuit as well.

Conyngham and his wife Cornelia reside at Shavertown R7. Their two sons are involved in the operation and run a dairy store at Hillside. They also have three daughters. Active in his community, Conyngham is associated with the Wyoming Historical Society and is a director of the First Eastern Bank in Wilkes-Barre.

For the Pennsylvania Holstein industry, 1920 was a banner year, for it also produced the state's first fieldman, Clarence Lyons. After spending his boyhood years on a Michigan farm, Lyons graduated from Grantham College, and later served a stint with the Army during the war years.

On January 1, 1941, he began his first day of work for the state's Holstein breeders. Organizing local clubs was one of his main duties, and he re-established the classification program, which had been expended in 1929. Under Lyons' leadership, the state sales program and the Garden Spot sale were begun, and the Pennsylvania Holstein News printed its first issue from an Ohio office.

"Clarence is responsible for really getting Pennsylvania's membership programs organized and where we have them today," credits PHA executive secretary William Nichol.

But Lyons is especially remembered as the man who transferred some 2,000 animals registered with Harrisburg Association into the national registry at Brattleboro, Vermont. During the transfer process for those papers, Lyons spent hundreds of hours researching, updating and doing the bookwork on several animals in the pedigrees of each animal eventually transferred into the national Holstein book.

"Young people growing up in Lancaster County had a great respect for Clarence Lyons," fondly recalls Mowery Frey, Jr., who grew up under the former fieldman's leadership. "He meant so much to all of us."

Today, Lyons and his wife Martha reside at 321F Eden Road in Lancaster. Their son and daughter are both married, and the Lyons are proud of their three grandchildren. Clarence is now associated with Kingsway Realty and active in the Rotary Club.

Emcee for the breakfast awards presentations was Arthur W. Nesbitt, president of the Ft. Atkinson, Wisconsin, suppiy house, NASCO, International.

A former PHA executive secretary, Nesbitt is helping to spearhead Dairy Shrine Club efforts to construct an industry Hall of Fame near Ft. Atkinson. That museum is scheduled for construction, with the theme of "Yesterday, Today, Tomorrow."

Dairymen of all breeds are being encouraged to contribute toward the establishment of this memorial saluting their contribution to the American way of life.

The Rev. Richard A. Morledge, of the First Presbyterian Church in Bakerstown, spoke during the program. "This is the day" Rev. Morledge had titled his inspirational message, which stressed enthusiasm and positive

Long-time Pennsylvania Holstein director Bill Conyngham was inducted in the Association's Hall of Fame during convention awards presentations. Flanking Conyngham are his wife, Cornelia, and PHA special programs director Robert Morris.

Hall of Fame

(Continued from Page A25)

thinking as the way to put power into a life.

John Cope was elected the PHA president during a board reorganization meeting, held Feb. 21, just prior to the convention opening. Cope is manager of Ashcombe Farm Dairy, Inc., a Mechanicsburg-based jugging operation with dairy herds and milk sales stores in Cumberland and York counties. He and his wife, Helen, reside in Grantham.

Marion Alsdorf, Spartansburg, Crawford County, is the new vice-president and Samuel Minor, Washington R2, was re-elected treasurer.

Only one controversial item faced the business meeting held on Friday afternoon. Members rejected a change in the method of selection of the annual All-Pennsylvania awards.

Under the proposed procedure, first-place animals in each class at the state black and white show would have automatically been declared the All-Pennsylvania winners. A resolution, passed by the membership called for the present system, based on show winnings and photographs, to remain in effect for 1980.

Holstein awards breakfast speaker Rev. Richard Morledge urged the power of positive thinking and quoted singer Ethel Walters: "God don't make no junk and he don't sponsor no flops." He also referred to the "dairyman's scripture," Psalm 50:9.

Registered Holstein breeders from the south-central district caused Friday and rejected a recommendation to eliminate that summer district show. After that vote of confidence, the south-central competition will likely be scheduled again at the Carlisle Fairgrouds, which has made special provision to host the event.

Outgoing president Russell Jones was honored before nearly 500 dairymen and guest during the annual banquet, held Friday evening in the spacious grand ballroom of the Howard Johnson's.

Two Holstein youth were named as outstanding junior members, with Penny Smith, Mansfield, selected the distinguished junior girl and Bradley Beidel, Carlisle, named distinguished junior boy.

Junior Holstein members honored at state convention

MONROEVILLE — The future of the Pennsylvania Holstein dairy cow appears to be in good hands. Nine finalists in the state's distinguished junior member contest attest to that fact.

Penny Smith, Mansfield, and Bradley Beidel, Carlisle, were named the 1980 distinguished junior girl and boy during the Association's annual banquet, held last Friday evening in the elegant ballroom of the Al Monzo Howard Johnson's near Pittsburgh.

Pretty and poised, eighteen year-old Penny Smith is the daughter of Mr. and Mrs. William Smith, Mansfield R2. A graduate of Mansfield High School, she's spending her year representing the Future Farmers of America as a state officer, traveling across the state and promoting FFA.

A junior Holstein member for nine years, and 4-H dairy exhibitors for ten, Penny owns nine head of registered Holsteins, eight of which she bred herself. "Willmith Elevation Amy" is probably the current favorite of Penny's own-bred animals. "Amy" earned high honorable mention and reserve junior All-Pennsylvania honors this year as a junior calf. She took first place at the 1979 state Holstein show and placed eighth at the Eastern National show at Harrisburg in September.

"Don't give up," is Penny's sound advice to younger dairy members. It's a belief she not only preaches, but has had to practice as well. In fact, for Penny, the walk to the front of a show class was a long, long one.

Her first dairy calf freshened as a heifer with a blind quarter. With high hopes pinned on her second project calf, Penny then helplessly watched while the Hagen daughter developed a severe case of ringworm, and never grew back the coat in time for the showring competition. Then, when that heifer was to exhibit as a 2-year-old, the animal developed a lame foot.

Eventually as a mature cow, she redeemed herself, presenting Penny with two daughters by Elevation.

When she became the owner of a third heifer, Penny's hopes again soared, only to be knocked flat to the ground again. That heifer developed pinkeye, eventually going blind in the eye.

Now Penny is equally at home talking cows or speaking and singing before an audience. In 1978, she was crowned the 1978 Tioga County Dairy Princess and is involved in a variety of church, school and community activities. She's president of the Tioga County junior Holstein club and serves on the state junior executive board, holding the office of reporter.

A member of "The Michaels," a singing group, Penny has been performing with her vocal talent for over eighteen months.

Next year, Penny plans to

Maryland cattlemen to tour Lancaster County operations

LANCASTER — Maryland cattlemen will have an opportunity next week to visit four modern beef production facilities in Lancaster County. The one-day tour is set for Thursday, March 6.

Sponsoring organizations are the Extension Service at the University of Maryland, the Maryland Cattlemen's Association, and the Division of Marketing in the state Department of Agriculture.

Chief coordinator for the educational tour is William E. Kunkle, Extension beef cattle specialist and assistant professor of animal science at the College Park campus.

Kunkle reported the tour will stress waste management techniques, including manure-handling systems being used on the farms which are visited. Feed-handling systems will also be highlighted.

Transportation is being provided at nominal cost for tour participants. Buses will leave simultaneously at 7:30 a.m. from West Friendship, Howard County, and Westminster, Carroll County. Both buses will stop at the north gate of the Maryland State Fairground in Timonium, Baltimore county, to pick up additional passengers. They will depart from the fairground at 8:15 a.m.

The buses are scheduled to arrive by 9:30 a.m. at the Farm and Home Center, 1383 Arcadia Road, on the north edge of Lancaster.

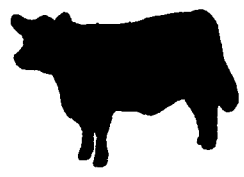
Residents of northeast Maryland and the Eastern Shore may board the buses in Lancaster at a reduced rate for the actual farm tour, provided that space is available.

Tour host will be Max Smith longtime Penn State Extension agricultural agent in Lancaster County.

Total cost for the tour is expected to be about $10 per person, Kunkle said. Reservations may be made by calling Dr. Kunkle's office in College Park; phone: 301/454-3732.

Locations of the Howard and Carroll county bus pickup points are the Baltimore Livestock Exchange north of West Friendship and the parking lot in Westminster behind Ascension Episcopal church and the county office building annex.

Buses are expected back at the original pickup points between 5:30 and 6 pm. In case of heavy snow, the tour will be postponed one week.



On being a farm wife - And other hazards

Joyce Bupp

A South Carolina farm woman lobbying in Washington recently told representatives that farmers should be "pitied, pampered and loved."

Well now, I can certainly go along with the "loved" part.

But as for the "pitied and pampered" – forget it!

Farmers have voluntarily chosen a vocation that inherently comes with long hours, uncertain financial returns, and daily roulette with livestock, machines and the weather.

Any farmer who want to be pitied for that had doggone well better tack up the "For Sale" sign and let some more positive producer take his place. We don't need him.

And as for pampering, only the lazy crave it or the sick deserve it. Agriculture is neither.

While we don't need pity or pampering, there are a few things we do seek.

Like respect. Respect for the contribution that agriculture is making to America's badly sagging economy. Only grain dollars have served as the stable prop under a shaky balance of payments on the world trade market. And respect for the fact that agriculture's productivity has made this country better fed at cheaper cost than any other nation in the world.

And instead of pampering, how about a little political support? But political support that reaps benefits, not just for the farmer, but for all.

Protection, for instance, from being hung by the noose of our own bureaucratic red tape, stretched ever tighter by desperate agencies clinging to the rope of their livelihood for dear life.

Or how about revisions to laws that allow the dumping on our markets of cheap, subsidized imports, not only of milk powder, cheese, or beef, but also of steel, shoes and garments.?

We don't need pity or pampering any more than doctors, truck drivers, lawyers, teachers, supermarket managers, business executives or welders.

All we ask is a little political common sense. Save the pity for those lacking it.

Raw milk

(Continued from Page A17)

two unused inflation fittings. From the ¾ h.p. motor powering the vacuum pump to the pliable narrow bore inflations, the unit functioned efficiently throughout the milking process.

The freestall barn is neatly arranged with hay feeders along both long sides. The multitude of white bodies prompts the question, "Why do you raise Saanens?" The reply is simple, "We like the white color." Opening off of the side, a neatly fenced lot goes unused. "We have to force the does outside even in the summer," states Harry. The three-strand electric fencing has proved adequate for the seldom used lot.

Kids are bottle fed until 10 days of age when they are switched to pan feeding. In all, they are fed milk a total of two months. At two weeks of age, free choice grain and hay, the same that are fed to the milkers, are placed in the kid pens. The Davidhizars castrate and disbud all kids, even those sent to a meat auction. That way they explain, if they end up as pets, they'll be nicer animals.

Looking over the barn, they relate a story of earlier days, when they were still building. The family arrived at the barn one morning to find the goats had unlatched a gate and spilled a new batch of feed. Once stuffed with the grain, they proceeded to trounce upon a whole case of new fluorescent light tubes. The family laughs about it now, but the listener gets the impression they haven't forgotten. All gates and doors are now double-latched.

The family's hope of a livelihood from their goats sometimes seems distant with their present sales of approximately 40 quarts per week at the door, but they are quick to point out they have just begun. And sales are growing.

Perhaps their sign sums up their feelings about their product the best. It reads simply, "Wonder Milk."

These Saanen kids are fed from pans from 10 days to 2 months of age. Larry takes over the feeding whenever he's not on the road.

Senate expects to see security bill this week

BY DICK WANNER

HARRISBURG — A milk security fund bill will probably be introduced into the Pennsylvania Senate early next week.

The bill's prime sponsor, Frank J. O'Connell, was busy this week trying to round up co-sponsors for the measure, which has seen more varieties than Mendel's pea patch.

The bill to be introduced calls for a security fund paid entirely by dealers through a one-cent per hundredweight payment. Instead of contributing to the fund, dealers could also post a bond or a letter of credit in an amount sufficient to pay for 75 percent of the value of their milk shipments in a 45-day period.

All private milk dealers buying milk in Pennsylvania would have to pay into the fund, unless they could post a bond or get a letter of credit. To clear up the question of who owns the milk between the time it's picked up from a farmer's bulk tank until it gets to the dairy — an especially thorny issue when the raw produce crosses a state line — the bill stipulates that the dairy will get title to the milk as soon as it leaves the farmer's bulk tank.

Pair of preservation bills

The Pennsylvania House this week passed a right to farm bill, a measure that would protect farmers from unwarranted nuisance suits filed by both individuals and municipalities.

While the bill aims to protect ordinary farming practices in existence for a year or more before the filing of any nuisance suit, it would not exempt farmers from environmental or clean streams regulations.

From the House, the bill goes to the Senate Ag committee, already considering the ag district bill reported on at length in last week's issue.

While the bills contain some redundant features — the ag district measure, for example, does for districts what the right to farm bill would do for isolated farms wherever they are - there is some feeling that both might be useful. The aim in both measures is to encourage farmland preservation, and the more guns for the battle the better, the reasoning goes.

Scenic Rivers Amendments

In an hour-long conference called the other week, 10 members of the state's Scenic Rivers Task Force hammered out three suggested amendments to the Scenic Rivers Act. State Grange staffers Charles Wismer and David Weinstock were on the horn with three DER representatives, and one person each from the Pennsylvania Environmental Council, the American Canoe Association, Trout Unlimited, the state Department of Community Affairs, and Fred Wertz, from the state Department of Agriculture.

First and foremost of the proposed amendments was one that would do away with the section of the act that deals with eminent domain. The conference consensus was that eminent dormain was not an integral part of the program, not needed in the act, and should therefore be deleted.

Another amendement would remove the requirement to notify landowners by certified mail when their lands are under consideration for inclusion in a scenic rivers system. First class mail was judged sufficient.

While seemingly a small point, it should be noted that certified letters look, quite literally, as if they're wrapped in red tape, they have to be signed for and they usually hold unpleasant tidings from a government agency or an individual bent on removing some part of the recipient's property, money or self-esteem.

The other amendment would provide for an additional category of scenic river to the four already mentioned in the act. To 'wild', 'scenic', 'recreational', and 'modified recreational' would be added a 'pastoral' category to accomodate the unique requirements of streams flowing through mostly agricultural land. This last categorization came about largely as a result of the debate over French Creek in Chester County.

There is so far one scenic river in the state, a 90-mile stretch of the Schuylkill. Two others are close to approval.

The House in September approved Stony Creek by a vote of 149-to-0, and the Senate more recently approved a portion of the Lehigh by a vote of 49-to-0. Both are non-controversial streams, with the Stony Creek banks owned entirely either by the Pennsylvania Game Commission or PP&L, and the Lehigh land owned almost entirely by DER as part of its Lehigh River Gorge Park project.

John Cope, center, newly-elected president of the Pennsylvania Holstein Association, congratulates distinguished junior winners Penny Smith and Bradley Beidel.

York County junior Holstein officers, front from left, are: Kevin Laughman and Roy Thompson, and back, David Krone and James Knight.

Junior Holstein

(Continued from Page A26)

attend Hesston College in Kansas, majoring in agriculture production, probably dairy, and with a minor in Bible studies. She hopes to continue her singing with participation in one of the college's vocal groups.

Bradley Beidel is the son of Mr. and Mrs. Roy Beidel, Terrace Avenue, Carlisle. He's nineteen, and a sophomore at Delaware Valley College, where he's majoring in dairy husbandry. Weekends, Brad works for Walebye Farms at Collegeville.

He also heads up the college's clipping service, carrying the responsibility for arranging clipping session schedules. The service can handle as many as 60 head in one night, and last year barbered nearly 400 head of cattle for shows and sales.

Also a 10 year 4-H and nine-year junior Holstein member, Brad owns ten head of registered black and whites, half of which he's bred. Five of the animals are milking, with one Ivanhoe Star daughter producing 23,000 milk and 1,000 fat during her 4-year lactation.

The Beidel family operated a dairy farm near Newberg, on the Cumberland-Franklin county line. His dad and older brother Wayne, dairyed in partnership until 1977, when Wayne took over the full operation. Brad houses his herd at the family farm, returning frequently to help out and monitor their progress.

This summer he hopes to find a job working on a dairy farm, preferably somewhere in the West, both for the different viewpoints on management and to see a bit of the country. But eventually, Brad's goal is to buy a piece of Pennsylvania land with a farmstead and start shipping milk as a career dairyman.

"Registered Holsteins offer two definite profit possibilities: milk production and salable breeding cattle," says Brad. "But the best thing about them is meeting the people you deal with in this industry.

Penny and Brad will spend part of the upcoming year encouraging younger members to become involved in junior activities, as well as promoting the purebred Holstein industry. Their scrapbooks will be sent to national competition, with winners to be announced in June at the national convention in Nashville, Tennessee.

"It's a definite good experience for whatever field you plan to go into," sums up Brad Beidel.

Other finalists in the senior girls division were: Melanie Alsdorf, daughter of Mr. and Mrs. Marion Alsdorf, Spartansburg; Jane Bomgardner, daughter of Mr. and Mrs. Harvey Bomgardner, Annville R3; Lisa Cooper, daughter of Mr. and Mrs. Wade Cooper, Slippery Rock R1; Karen Sattazhan, Womelsdorf; and Debra Stump, daughter of Mr. and Mrs. John Stump, Bernville R3.

Senior boys division finalists were Scott Miller, son of Mr. and Mrs. Ernest Miller, Hamburg R2, and Paul Cashell, son of Mr. and Mrs. George Cashell, Chambersburg R6.

Six youth were selected winners in the junior division. Heather Greene, was named first in the girls division. She's the daughter of Mr. and Mrs. Roger Greene, Warriors Mark R1. First runner-up was Connie Ohlinger, daughter of Mr. and Mrs. Elwood Ohlinger, Mohrsville R1; and second was Deb Cashell, daughter of Mr. and Mrs. Paul Cashell, Chambersburg R6.

Winner of the junior boys category was Brian Kelly, son of Mr. and Mrs. Tom Kelly, Tyrone R1. Bradley Ludwick, son of Mr. and Mrs. Alan Ludwick, Sugar Grove R3, was named the first runner up and second was Jay Bicksler, son of Mr. and Mrs. Ray Bicksler, Richland R1. — JB

Monica Allebach crowned for second year

BY SHEILA MILLER

HARRISBURG — For the second year in a row, Monica Allebach, a petite fourteen year old from Centre County, was selected as the Pennsylvania Draft Horse and Mule Association queen.

During ceremonies at the Wednesday evening Farm Machinery and Horse Pullers banquet, Connie Harness, the former Miss Pennsylvania, placed the sparkling crown on Monica's head to begin her second year's reign.

Talking to people about the draft horse and mule industry comes naturally for Monica because she was raised around the big animals. She recalled when she was about eight years old she was on the wagon seat with her father. Abe, and he handed her the lines and said "drive." At the time, Monica said she thinks she weighed about eighty pounds. Now, at one hundred pounds, she smiles when asked if she was ever afraid to handle the drafts that easily weigh in at a ton.

"I know those horses so well, I've been around them so long. They are really very docile," she said.

Monica helps to show the huge drafts at halter, along with her parents, Abe and Mary, and her two brothers, Gerald, 16, and Rodney, 22.

The Allebachs raise Percherons, with about 10 head at the present time. Monica said the family also keeps about nine light horses for riding. The big drafts are used to give hay rides, she added.

Along with their horses, the Allebachs milk 65 head of Holsteins on their dairy farm. And, Monica raises canaries as a hobby and small business.

"Right now I have six canaries, two females and four males, and a nest of three eggs," she said. Monica explained canaries aren't as hard to raise as most people think. She said they are not fragile and can take cold temperatures. What they can't take are fluctuations in temperature.

She said she makes the birds' nests out of food strainers that she cuts the handles from and wires the strainers to the bird cages. Then she tears up burlap and puts it on the cage floor. Soon, the birds take the strings and begin to build nests, she added.

Monica has been raising canaries for a year, having gotten her first pair last Christmas. She laughed, and said, "Most people think I'm crazy when I tell them I raise canaries."

During her first year as the Horse and Mule queen, Monica travelled to various local fairs and the National at Columbus, Ohio. She said her teachers have gotten used to her asking for time off to attend fairs and parades, and the week-long Farm Show. "They're very understanding, even the principal, and seem to be proud that I'm representing them, too," she said.

When asked what she thought the future for the big draft horses would be, Monica said she felt the future looked good. "In the past few years the price for a draft horse has tripled as more people are getting into raising and showing them. They're the biggest demand at most of the sales, and a lot of small farmers are starting to use them again on their farms."

With an outlook so bright for the animals she represents, the Penns Valley high school student from Spring Mills will do a great deal in serving the association for another year.

Monica Allebach will serve the Draft Horse and Mule Association as their queen for 1980.

Decker shows grand champion stallion

HARRISBURG — This year's Farm Machinery Exposition marked the first time in the show's history for a draft horse and mule show. The two year old show previously had only the draft horse and mule pulling competitions.

With slightly over twenty entries in the show's debut, the draft horse and mule people turned out with some of their best stock.

Robert W. Decker, Garrett, exhibited the senior champion stallion in the Belgian class. Decker's six-year-old stallion, Master's General, went on to be tagged the grand champion stallion of the show.

A March 30, 1979 foal, shown by Charles B. Lindsay of Greencastle, was chosen junior champion stallion by judge Vernon Claypool, from Indiana, Pa. The colt, Sam Farceur, was the high placing animal in his class of yearlings.

The grand champion mare in the Belgian show was Orndorff's Roan Donna, a fourteen-year-old owned by J. E. Zinn, Newville. Zinn also exhibited the top grade Belgian mare, Patsy, who is fourteen-years-old too.

Belgian Stallions

Senior Class

1. R. W. Decker, senior and grand champion.

Yearling Class

1. Charles B. Lindsay, junior champion; 2. Allen S. Smith, Hollidaysburg; 3. Charles B. Lindsay; 4. Everett G. Wagner, Chambersburg; 5. Allen S. Smith; 6. R. W. Decker.

Belgian Mares

1. J. E. Zinn, grand champion; 2. Jacob L. Kanagy, Belleville.

Grade Mares

1. J. E. Zinn; 2. R. W. Decker; 3. R. W. Decker.

Geldings

All-Breeds

1. Howard F. Streaker, grand champion, Percheron; 2. Howard F. Streaker, Percheron; 3. R. W. Decker, Belgian; 4. Tom and Peggy Metcalf, Camden, N.Y., Clydesdale; 5. Tom and Peggy Metcalf, Clydesdale.

Master's General, the grand champion Belgian stallion at the Equipment Expo, was exhibited by R. W. Decker, Garrett.

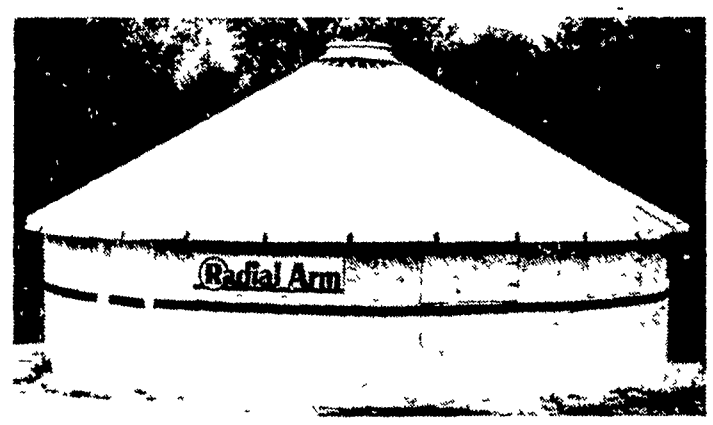
Introducing... Radial Arm™ circular finishing Automated Hog Confinement



NEW
SELF CLEANING
HOG BARN
102 Head Capacity

NEW EASY TO CONSTRUCT ROUND BARN-

Base comes in 12 curved sidewall sections One section includes a dutch walk door The other 11 sections can be ordered with or without a 24" x 48" ventilation door, thus allowing you to set up a natural ventilation condition or a total environmentally controlled unit or a combination of the two.

The unique circular design of the structure combined with vent doors that swing out (hinged on the side instead of at the top) provides a natural air scoop on one side and a natural air foil on the other side, thus causing air to cross ventilate regardless of wind direction Roof cap on the bin roof can also be manipulated to provide additional natural air movement

CIRCULAR CONED FLOOR is divided in half by Radial Arm Cleaning unit and gate on which feeders are mounted On command motor drives gate around pivot moving manure to gutter Material flows down gutter pushed by scraper paddle into pipe and out of building

The 12 sections can be assembled in about one hour Each section is complete with white painted strong panel steel on the exterior and fiberglass insulation in the wall A fiberglass pig barrier is provided for interior covering and comes in a roll for installation after sidewall sections are assembled thus providing for a seamless interior wall

The assembled sidewall sections are covered by a conventional grain bin roof which is insulated with white polystyrene 3½ inches thick The polystyrene comes in panels and is 100% moisture resistant The panels are installed using fasteners, and will not come down or sag with age It also enhances the appearance of the interior of the barn

SPECIAL INTRODUCTORY PRICE $8,995.00 f.o.b.

Competition keen in Expo's first tractor pulls

y SHEILA MILLER
RRISBURG — A John
4440 and a Case DC
the top two tractors in
day's stock tractor
g competition.
Case, driven by Paul
of R1 Shippensburg,
he winner in the 5500
class. The winning
as 129 feet and an inch
re.
John Deere was
ted by Albert Kiefer,
ngor. The competition
lose in the 13,000 pound
with a pull off between
Hoch's Case 970 and
d Gross's John Deere
but Kiefer pulled the
est load seven feet one
farther than the other
actors.
s was the first year
r pulling contests were
t the Farm Machinery
but the interest
d strong with over thirty entries in the 5500 pound class, and close to twenty entries each in the other two classes.

The final competition will take place on Saturday, with the 9000 pound class, and the pull-off for the championship.

Ten finalists were selected from the two weight classes that pulled on Thursday. These ten pullers then draw for their position for the Saturday evening finals.

"It can make a difference depending on what order you pull," said Charles Kershner, of the Franklin County Tractor Pullers Association. "The track only gets reworked between classes, and in between pulls it is just smoothed down a little."

Kershner, of R3 Greencastle, helps to run the weight sled for the pulling competition. One of three in the state, the Franklin County pullers' sled is the largest.

"There are two others like it, but one is in North Carolina and the other is in South Carolina," he added. The other two sleds in the state, he said, are one foot smaller in diameter all around. These sleds belong to the North East club and the Buck club in Lancaster County.

The sled is specially designed to take the exhaust from the tractors and pipe it outside. This is almost a necessity in an indoor show, Kershner explained. As a matter of fact, one tractor was disqualified from the pull when the exhaust apparatus came off his tractor.

The sled, said Kershner, is capable of going from zero weight to 42,000 pounds. A system of gears moves a weight box from the back of the sled, up over the axle, until all of the weight is on the front of the sled and the tractor is dragging the weight.

Air bags under the sled actually can lift it up off the ground, and the tractor is just rolling the load until the weight is added on.

The Franklin County puller said their sled has put 10,000 miles on in three years, going to tractor pulls around the state. Kershner added, "Tractor pulling is getting bigger all the time—especially the mini-tractors at 1500, 1700, and 1900 pounds. You don't need a big trailer to haul them around."

Kershner explained the mini-tractors can have more horse power than the modifieds. They are built from the ground up, he said, and aluminum parts are used to keep them light. "It can easily cost $5000 to build one," he added.

Albert Kiefer had the winning pull in tough competition in the 13,000 pound class.

The competition at this year's Expo only included the stock tractors. The stocks have a speed limit of 3 m.p.h. and there can't be any visible changes on the outside.

Besides stocks and mini-tractor competition, tractor pulls can also include modified and super stock, where the speed is unlimited, along with visible changes to the tractors.

"In the modifieds, about the only thing that belongs to a tractor is the rear-end, everything else is out of a car," said Kershner. "You can do anything to it as long as you stay in your weight class."

Out of the twenty finalists from Thursday's competition over half of them are farmers, mostly in the dairy business.

Paul Hoch, winner in the 5500 class, farms in partnership with his brother. They have a herd of 95 Holstein dairy cows, and farm 550 acres of land. This was his first win with the Case DC.

And Albert Kiefer is a farmer too. He farms 2500 acres and has a dairy operation. The tractor he used in this week's contests is one he uses to farm. His win at the Expo is added to a long list of first places in his six years in competition.

The ten finalists in the Thursday classes include:

5500 Class

1. Paul Hoch, 129-1; 2. Claude Homan, R1 Centre Hall, 123-4½; 3. Richard Troxell, R1 Andreas, 122-9; 4. Gilbert Watson, 122-8½; 5. Mike Miller, R3 Carlisle, 121-4; 6. Dale Shupp, R2 Tunkhannock, 121-1; 7. Carl Modica, Asbury, N.J., 120-5½; 8. Larry Klinger, R1 Selinsgrove, 119-2; 9. George Easton, R1 Cogan Station, 116-10; and 10. Donald Remley, R3 Benton, 116-5.

13,000 Class

1. Albert Kiefer, 121-9; 2. Paul Hoch, 114-8; 3. David Gross, R1 Hamburg, 114-5½; 4. Larry Klinger, R1 Winfield, 174-9; 6. Robert Kiefer, R1 Bangor, 172-11½; 7. Barry Ott, R2 Bangor, 171-8½; 8. Ray Reighard, RD Woodbury, 165-8½; 9. Ronald Jumper, R3 Newville, 163-7½; and 10. Randy Greene, R2 Canton, 159-7½.

Expo opens

(Continued from Page A1)

Noah Wenger, representative from Lancaster County.

"Farmers must be assured of sufficient energy at crucial times of the year," Wenger said. "The interstate highway systems have changed the face of Pennsylvania agriculture. We need to study energy and its usage and conservation, and look into alternate energy sources."

He added the Expo provides an opportunity for farmers to learn about some of the innovations in energy systems.

The young Expo drew a sizeable crowd for the tractor pulling competitions. The interest was high as far as the exhibitors were concerned, with entries reaching the upper limit in one of the classes. See accompanying story.

And, although not as full as its big sister, the Farm Show, the Expo had a good showing of machinery and equipment exhibitors. There were numerous wood stove displays, along with other homesteader types, silo manufacturers, trucks, trailers, and grain dealers, and many, many others.

xxx

The American Falls is 182 feet high and the Horseshoe (Canadian) Falls is 176 feet high.

xxx

Passage across the international border is a routine matter at Niagara Falls for natural-born citizens of the United States or Canada.

Others also pass freely across the border, although it is suggested that they carry identification papers to avoid delays.

The United States and Canada agreed in a 1950 treaty that 100,000 cubic feet of water per second must flow over the Falls during daylight hours in the tourist season from April to October. At other times, in the off-season and during evening hours, the flow may be reduced to 50,000 cubic feet per second.

Association members meet the candidates

BY JANE BRESEE
Staff Correspondent

CAMP HILL — More than 200 farmer members of the Pennsylvania Farmers Association and dignitaries from the Department of Agriculture gathered last week at the Penn-Harris Motel to see the candidates running for the U.S. Senate seat being vacated by Schweiker, and for the post of the first elected attorney general of Pennsylvania.

The occasion was a "Meet Your Candidate's" Banquet sponsored by the Public Affairs Department of PFA.

Following the dinner, the moderator Rudy Denes of Ohio, Member Relation Representative of the American Farm Bureau Federation introduced the 15 candidates for senate and two for attorney general.

Candidates present for senator were: Republicans Harold Haabestadt, small businessman; Warren Williams, engineer; Arlen Specter, Philadelphia district attorney; state Senator Edward Howard; Andrew Watson, farmer; Norman Bertasavage, insurance representative; Francis Worley, former state legislator; and Democrats, H. Craig Lewis, state Senator; John Pittinger, former state Education secretary; Joe Rhodes, state representative; Peter Liacouris, Temple Law School Dean; Pete Flaherty, former Pittsburgh mayor; John Logue, educator; Tom Anderson, and C Delores Tucker, former state Commonwealth secretary.

Candidates for state Attorney's office present were: Republican LeRoy Zimmerman, Harrisburg district attorney, and Democrat Walter Phillips, former special prosecutor for official and police corruption.

Each candidate was given three minutes to introduce himself and explain his philosophy. They took turns answering questions from the audience. Charles Mohn, assistant executive secretary of the PFA, acted as time-keeper for the event occasionally ringing an old-fashioned school bell donated by William Moore of Berks County.

Due to the number of candidates and the time involved, only three questions were asked: What steps would you take to see that the government operates on a balanced budget? What is your

(Turn to Page A37)

C. Delores Tucker, former state Commonwealth Secretary, the only woman running for the U.S. Senate seat, was present at the meeting.

Francis Worley, former state legislator now running for U.S. Senator teased Charles Mohn. right, about waving the school bell too much during the meeting.

Joseph Rhodes, state representative, 24th district, talked to Jan Carson, staff PFA member, about nuclear energy.

solution to the energy shortage? And what steps would you propose to remedy it?

The question "What is the role of political parties" was asked only of the candidates for attorney general.

Proceeds from some of the ticket sales benefited Farmer, PFA's Political Action Committee. The directors are: John Pitzer, chairman, William Moore, John Stoner, Frank Bertovich, George Gregg, Frank Sankey, and Chris Wolff.

The Measure Your Candidates meeting was part of a two-day political education conference attended by 80 PFA members from all parts of the state. Workshops included a four-member panel of members of the House Agriculture Committee who related why they had chosen to run for public office.

Other discussion groups were led by Chester Heim, Deputy Secretary of Agriculture; Bernard Allanson, president of Pennsylvania's for effective Government; Al Bukowski, Democratic Director of Legislative Services in the Pennsylvania Senate, and Mike Kraus, Executive Director of the Republican State Committee.

Letters To The Editor

Dear Editor,

An editorial examining the pro's and con's of allowing public school prayer is important, but some recognition that we have lost the freedom to make this decision for ourselves seems to be in order.

There is no doubt that we Americans have been losing our freedoms bit by bit and nowhere has this been more evident than in public education. In return for state aid, we are told what courses are mandatory, who is qualified to teach, how many days the school must operate each year, what constitutes a safe school bus and what building standards our schools must meet - just to name a few areas where the state gives us "direction."

In return for federal aid our schools are required to meet various federal "guidelines" which include the racial balance of teaching staffs and the racial balance of the student population, the latter, when unsatisfactory, being correctable by court ordered busing.

Our courts on all levels have determined what is proper for schools and educators to do and what they can not do. Court edicts govern procedure for expelling troublesome students; firing teachers; and establishing dress codes. After decades of practice in our public schools, public school prayer was suddenly decreed to be unconstitutional.

Understandably, the main concern of the people in charge of our schools has become complying with the laws, regulations and court decisions passed down from on high. The education of our kids took a secondary role long ago.

At the time of the School Prayer Decision there was a story going around about a school superintendent who was making the rounds one day when he noticed a group of children kneeling in one corner of a kindergarten classroom.

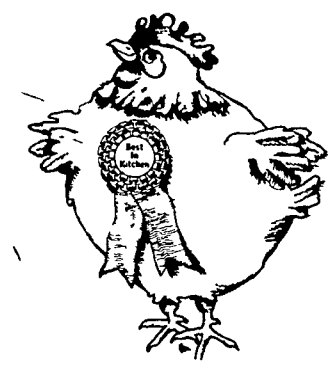
He summoned the teacher to the door and demanded "What are those children doing".

"They're shooting craps", responded the teacher.

"Oh, thank heavens," he said with relief. "I thought they were praying."

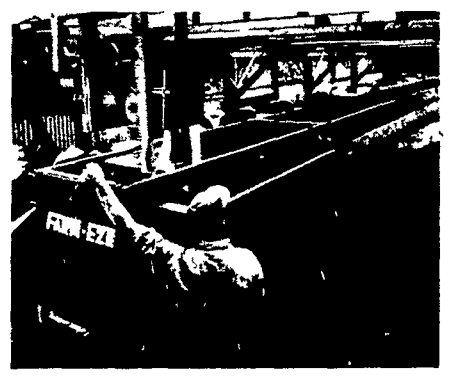
I don't think it matters whether school prayers are allowed or not. What does matter is that we regain the freedom to make this, and many other important decisions, for ourselves.

Erich Schmitt
R2 Leesport



AGWAY

FARM-EZE® BELT CONVEYOR lets you feed the right ration to any group in your herd... from one bunker



Farm-Eze will accept and distribute 250 pounds or more feed per minute to single- or double-sided bunks up to 200 feet long

Plow travels just over the surface of the moving belt to distribute feed

Now you can feed high producers, medium producers, dry cows, heifer replacements and dairy steers the right nutrients in the right amounts for top performance With no separating out, no compaction of feed

Simplicity is the secret. Feed is pushed off into the bunks by a lightweight plow traveling over the top of the belt So feed is deposited where you want it and without any change in composition.

The Farm-Eze Conveyor operates on low power 1-1/2 hp for the belt and 1/2 hp for the plow It's safe For the cattle and the operator Call Agway and ask for a Farm Systems Salesman He'll be glad to tell you all about this new, faster, easier way to bunk feed .. including a completely automatic system that measures, mixes and distributes at the touch of a button

HIGH PRODUCERS	MEDIUM PRODUCERS	
FARM-EZE BUNK FEEDER		
DRY COWS	HEIFER REPLACEMENTS	DAIRY STEERS

MULTIPLE GROUP FEEDING PLAN

Because the plow can be set to automatically reverse itself at any point and to supply either side, five (or more) groups can each receive a different ration

Bridge

(Continued from Page A1)

Nissley said, "and sometimes as many as four to six times a day."

In addition to the safety factor of moving equipment amidst heavier traffic, Nissley explained that there is the factor of the extra time involved in using the longer routes. This becomes especially important during the busy planting and harvesting periods when time is at a premium and can be critical in farming.

In addition to tractors, trucks and wagons, the farmers used the bridge for the transport of plows, discs and various hay and corn harvesting equipment.

As an alternative to the bridge, Nissley and Becker attempted to use a temporary ford across the creek between their properties. They have transported equipment in this way, but are seeking a more permanent solution either through rebuilding of the bridge or even possibly the construction of a better ford.

The group of farmers have been in continuing contact with officials of four municipalities since the bridge was a county facility, but the access roads are maintained by Conoy Township in Lancaster County and Londonderry Township in Dauphin County.

Beeferendum

(Continued from Page A1)

turned the proposal down then by lopsided margins.

In Lancaster County 33 producers voted in favor of the Beeferendum. A whopping 388 voted against the program.

A total of 503 farmers were eligible to vote in Lancaster County. The Agricultural Stabilization and Conservation Service recieved 421 ballots. Of those 421, 29 were challenged or postmarked too late to be accepted.

Other county results included:

County	For	Against
Adams	19	155
Berks	17	270
Chester	26	59
Cumberland	21	171
Dauphin	10	84
Franklin	25	298
Lebanon	13	129
Schuylkill	4	36
York	35	164

At that time a two-thirds positive vote was required for passage. While the checkoff program was approved by a majority of those voting nationwide, it failed to gain the two-thirds vote needed to become law.

This year's vote in Maryland closely resembeled national trends in the previous referendum.

The current program needs only a simple majority to become reality. Strongest support should come from the major cattle producing states.

Not a single county in Pennsylvania voted in favor of the program.

ASCS officials were handed one report of a positive county vote in Pennsylvania, but the margin was so one-sided in favor of the program that the officials rechecked the count

Upon investigation they found a clerical error had transposed the results.

State results will be compiled in Washington, D.C. early next week with final tabulation due later in the week.-CH

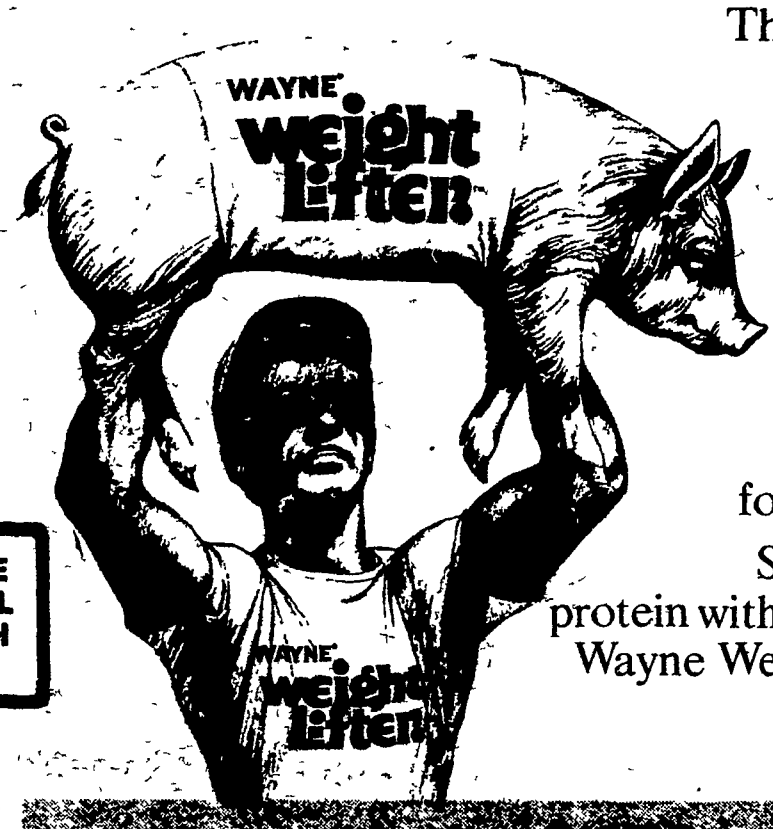
Wayne® Weight Lifter™ hog feeds. Save protein... save money.

Now, you can get a whole line of super-efficient Weight Lifter feeds—in both concentrate and complete feeds. It includes a complete grower, finisher, and complete sow feeds.

Tests show Weight Lifter complete feeds offer dramatic advantages in protein savings, improved daily gain, improved conversion and less time to market in comparison to Wayne's previous best complete hog feed program.



This performance is the result of formulating Weight Lifter feeds by calculating the availability of all 10 essential amino acids in each ingredient. It's a precise and economical way to formulate a hog ration.

Save money by saving protein with the complete line of Wayne Weight Lifter hog feeds. See us today.

Berks beef producers look at better feeding techniques

BY LAUREL SCHAEFFER
Staff Correspondent

LEESPORT — Berks County beef feeders were given the opportunity to attend a beef feeders meeting sponsored by the Extension Service in cooperation with Penn State, February 19 at the Berks County Agricultural Center.

The first such meeting in many years, featured techniques to feed cattle more profitably and explanation of the new USDA feeder cattle grading system.

Lester Burdette, Penn State extension specialist, stressed the use of concentrates, implants and feed additives. Remarking that investments on the proper implants can produce a relatively high return on investment, he urged cattlemen to use them.

He said that 85 to 95 percent of the beef sold in supermarkets was raised with the use of implants.

The beef specialist remarked that Rumensin, a commercial methane inhibitor, is the best discovery to "come down the road in beef feeding for 30 years." When feed as a supplement this product saves 8-10 percent of the feed needed to produce a market steer. However, it can only be purchased in a commercially prepared feed supplement.

Implants increase feed efficiency and rate of gain, Burdette continued. Directing his attention to producers who specialize in naturally fed beef, Burdette remarked that if they weren't getting eight to ten dollars more per hundredweight they were losing out.

Cattle under 600 pounds, he said, should be fed a natural protein consisting of 14 to 17 percent of a ration, but can be fed a non-protein-nitrogen (NPN) sources above this weight level.

"For cattle above 600 pounds, up to one-third of the protein in a ration can be from NPN," Burdette said, "and entire protein level in the ration can be lowered to 11 to 13 percent."

He discussed several different types of additives to increase the protein level of silage. He mentioned urea, urea and limestone, anhydrous ammonia, commercial NPN, and bacteria, yeast and enzymes.

With the present high overhead in feeding cattle, rate of gains exceeding two pounds per head per day are necessary for a profit, Burdette said.

He forecasted there won't be cattle marketed at 1,300 to 1,400 pounds in the near future. These weights will bankrupt feeders, Burdette explained. The producers were also told that marketing is probably the most important cost factor in producing cattle, but there were no easy answers to a marketing formula.

Briefly discussing shipping fever, the beef specialist explained that it is primarily caused by stress but is complicated by lack of potassium. It doesn't matter if the cattle were shipped 20 miles or 2,000 miles, in hot or cold weather, Burdette explained.

After shipping cattle, feed them alfalfa hay first, he advised for a good source of potassium. Grass hay may be substituted.

Due to changes in breeding cattle away from the three British breeds, a new grading system for cattle became necessary, Clair Engle, Penn State extension specialist, explained.

The old system failed to reflect a difference in frame size or body type of feeder cattle, and it didn't reflect the potential of the feeder cattle," Engle said.

The new system adopted by the USDA and presently in effect was designed to make grades more descriptive. It is a more effective basis for identifying and grouping feeder cattle.

The new system grades cattle according to the size of their frame. The designation "L" means tall, long cattle for their age. These cattle should weigh 1,200 pounds or more than when they acquire ½-inch of back fat thickness as steers and 1,000 pounds or more as heifers. Cattle graded "M" are slightly tall and long for their age and will weigh from 1,000 to 1,200 pounds when finished as steers and 850 and 1,000 pounds as heifers. Cattle graded "S" have small frames and should finish about with ½-inch of back fat before they are 1,000 pounds as steers and before they weigh 850 pounds as heifers.

Numerical grades for muscle thickness, include "1" for cattle that are well muscled and bulging; "2" for medium muscled cattle ususally with dairy breeding; and "3" for very thin cattle. Engle also noted there is an inferior grade for cattle. Double muscled cattle are also graded inferior because they do not acquire any fat, are infertile, and unuseable. Inferior cattle are marked with a blotch.

Also on the program were Clyde Myers and Jim Haldeman, Berks County extension agents. Myers presented a short program explaining the many services and news letters offered by the extension service. Haldeman conducted a recertification program for persons with pesticide certificates.

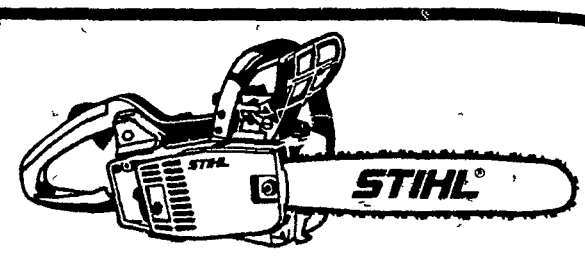
Broiler placements off three percent

HARRISBURG — Placements of broiler chicks in the Commonwealth during the week ending February 16 were 2,132,000, according to the Pennsylvania Crop Reporting Service.

The placements were three percent below the corresponding week a year earlier and eight percent below the previous week. Average placements during the past nine weeks were three percent above a year earlier.

Placements in the 21 key poultry producing states were 79,128,000, about the same as the previous week but six percent above the same a year earlier. Average placements during the past nine weeks were six percent above a year ago.

Broiler-fryers slaughtered in Pennsylvania under federal inspection during the week ending February 6 totaled 1,758,000, with an average liveweight of 3.96 pounds.



STIHL 020AVP. THE PROFESSIONAL SAW FOR WEIGHT WATCHERS.

The Stihl® 020AVP delivers more power with less weight than any other comparable saw on the market. On top of that it'll last longer and hold up better.

So before you buy somebody else's saw by the pound, buy the 020AVP by the ounce. You'll get a lot more saw for the money. And a lot less weight with Stihl.

STIHL®
The world's largest selling chain saw.

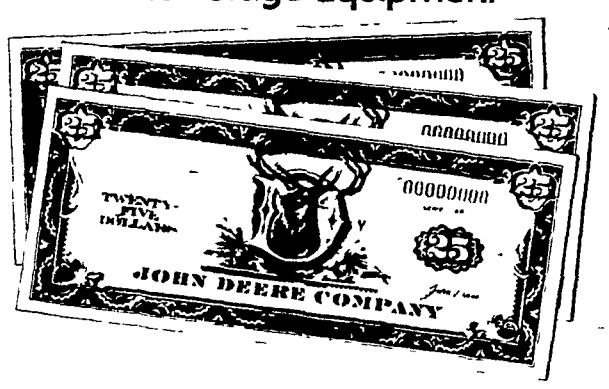
BONUS 1980

Up to $600 bonus buying power for early orders of John Deere Disks, Chisel Plows, or Hay and Forage Equipment



Preseason orders help John Deere plan production of most-needed models and sizes So from February 1 through May 31 1980 John Deere is offering impressive bonuses for preseason orders This bonus is above and beyond our best deal to you on this equipment

Your early order qualifies you for $50 to $600 in John Deere money for certain models of disks chisel plows balers mower/conditioners and pull-type forage harvesters Promptly after delivery you'll be mailed your bonus John Deere money to spend for products or services at our store

There's more You'll get price protection from the time you order any machine in the bonus program Use a John Deere Finance Plan and no finance charges will accrue on any machine in the program until the first day of the month which begins the 1980 use season in our area

This early-order program includes a list of dozens of disks chisel plows and hay and forage tools But your preseason order must be signed before March 31 to earn the most John Deere money Come in soon check the list and ask us for our best deal on this new equipment

You'll be expected to take delivery of the equipment as soon as it's available

Eagleton to keynote American Pork wrapup

DES MOINES, Ia. — U.S. Senator Thomas Eagleton, Missouri, has been named as keynote speaker for the American Pork Congress 'Presidential Luncheon' Friday, March 7.

The luncheon, wrapping up APC '80 in St. Louis, will include special recognition ceremonies highlighting contributions of NPPC's Committee, is chairman of the sub-committee on agriculture and related agencies and also serves on the Senate Human Resources Committee.

Featured speakers announced earlier include inspirational speaker Dr. Norman Vincent Peale, Prayer Breakfast, Thursday, March 6; Paul Harvey, annual awards luncheon, Thursday, March 6 and Former POW Charlie Plumb, annual breakfast (for producers and Porkettes), Friday, March 7.

The National Porkettes seminar program, Public Policy In the '80's..Nutrition', will include presentations by four well-known spokespersons, Audrey Cross, Office of the Secretary, USDA; Ellen Haas, Community Nutrition Institute, Washington, D.C.; Dr. Robert Olson, St. Louis University School of Medicine and Jane Anderson, American Meat Institute. This program will be at 1:30 p.m. Wednesday, March 5.

The 'Southern Kitchens Cooking School' including presentations by representatives of Progressive Farmer Company. Lt. Jim Bullard, Memphis, TN Police Department, will discuss 'Self Protection for Women' in the Porkettes' seminar program at 2 p.m., March 6 with 'Interior Design With Pigskin' by Lucia Refoy, Lucia Leathers, also scheduled for the same day.

The new National P rk Queen will be selected in coronation ceremonies in conjunction with the annual APC banquet Thursday evening, March 6, with entertainment by the comedy team of Skiles and Henderson.

Past Council presidents to be recognized include Wilbur Plager, IA (1954-1956); James Nance, TN (1957-1960); LaVerne Johnson, IL (1961-1963); James Peterson, IA (1964-1965); William R. Rothenberger, IN (1966-1967), deceased; Albert Gehlbach, IL, (1968-1969); Roy Keppy, IA (1970-1971); T. Euel Liner, TX (1972-1973); Gerald Beattie, NE (1974-1975); Virgil Rosendale, IL (1976-1977) and John Soorholtz, IA (1978-1979).

The New Christy Minstrels are providing musical entertainment for All-American Family Night, Wednesday evening, March 5 at which time State Pork All-Americans are honored in special recognition ceremonies.

Six production seminars are featured with participation by university and industry specialists and producers. Seminar topics include: Legislative Up-Date, Energy Alternatives and Waste Management Techniques, The Boar and Reproductive Failure, Wednesday, March 5; Improving Swine Performance, Concerns in Swine Health, Thursday, March 6 and Feeder Pig Production For Profit, March 7.

A new APC event, featuring the Presidential Address by NPPC President Bill Buller, Brookings, SD, is the opening ceremony set for 10:30 a.m. Wednesday, March 5.

The APC Delegate Session is scheduled to begin at 1 p.m. Wednesday, March 5, will recess at 4:30 p.m. and reconvene at 8:30 a.m., Thursday, March 6. The session will continue through the forenoon breaking for the annual luncheon with the final session at 2 p.m. March 6.

The National Porkettes Annual Meeting is at 9 a.m., Thursday, March 6.

The 1980 APC Trade show is one of the largest ever with over 400 exhibis and displays for viewing in the Cervantes Convention-Exposition Center. APC coordinators are predicting attendance at this year's Pork Congress, 'Gateway To The '80's, will set new records with as many as 20,000 persons in attendance.

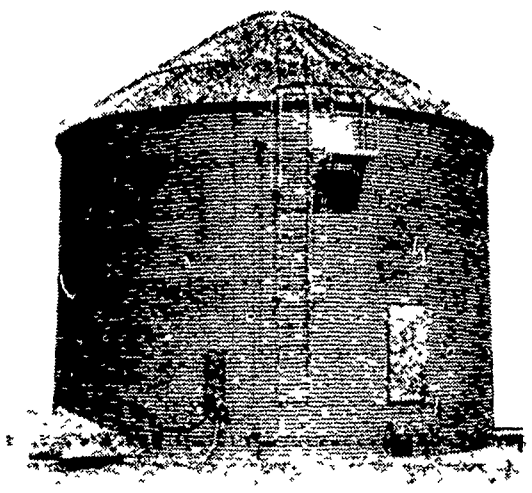
A GSI ON-FARM SAFE STORAGE SYSTEM

FARM BINS



GSI has the system to meet your demands. An on-farm storage system that lets you harvest when you're ready and sell when the price is right. From one bin to an entire system, GSI bins are priced right!

GSI manufactures farm bins up to 60 ft. diameters with capacities to 157,000 bushels. Sturdy construction for maximum grain protection, with important safety features. Easy field assembly.

To complete the system, GSI offers an entire drying package and a full line of grain handling equipment to match your needs. GSI on-farm storage systems . . . the profitable solution.

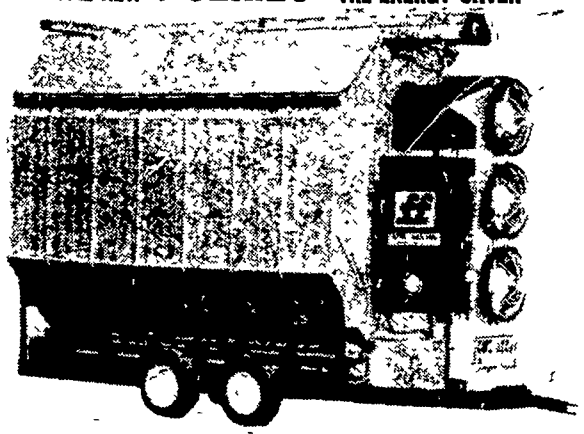
FEATURING:

- All galvanized steel with G-90 galvanized coating, including galvanized doors.
- Our steel is A446 Quality or a minimum yield of 40,000 pounds per square inch.
- Walk around steps on top of roof.
- Equipped with safety rings.
- No welding anywhere on roof, prevents rust.
- Slotted holes to raise & lower roof for air movement for drying.

FARM FAN DRYERS

YOU WILL BE SURPRISED WITH THE ECONOMICS OF A FARM FAN DRYER

THE ALL NEW J-SERIES "THE ENERGY SAVER"



- Two models - CMS-320J, CMS-420J.
- Choice of Continuous Multi-Stage or Continuous Flow drying.
- Exclusive Automatic System Control is weatherproof and tamperproof.
- "Temper Dries" automatically for premium quality grain.
- The J-Series is specially designed to meet today's need to save energy.
- Big capacity drying for high volume grain operations.
- Backed by almost 30 years experience in grain conditioning.

Two new officers to assume Farm Credit directorships

BALTIMORE, Md. — The Farm Credit Banks of Baltimore Wednesday announced the election of Harold K. Bailey, Buckingham, Va., to the position of Chairman of the banks' District Board of Directors.

Replacing Bailey as Vice-Chairman will be George Steele of Pocopson, PA. Steele is serving his second term in this position, having previously held it in 1966-67. He has also served as Chairman in 167-68.

Steele is currently Chairman of the Board and President of Agway, Int. and is a trustee of the American Institute of Cooperation.

Bailey, a farmer from Buckingham, has served on the District Board since his election to that body in 1975. He also serves on the Board of the Farmville Farm Credit Association, one of 26 such Associations throughout the Baltimore District which includes Maryland, Pennsylvania, Delaware, Virginia, West Virginia and Puerto Rico.

In addition to his activities within Farm Credit, Bailey is a member or director of several other agricultural organizations, including the Virginia Beef Cattle Association, the Farm Bureau, and the Soil and Water Conservation Service.

His election as Chairman of the Farm Credit Banks' Board follows two years of service as Vice-Chairman.

Create a souper meal, it's in the pot

BY SALLY BAIR
Staff Correspondent

LEBANON — Now is the perfect time for some hearty, satisfying soups in your menus. They'll not only warm you and fill you up, but they'll stretch the budget as well.

According to Alletta Schadler, extension home economist in Lebanon County, soups are a mainstay in the diets of all cultures, because it is an excellent way of taking a little bit of food, stretching it and making it go a long way.

She said there seems to be a lot of interest in learning to make food from scratch not only to save money, but also to get good quality and to have the enjoyment of creativity.

Speaking to a crowd of interested homemakers last week, Letie said that soup comes in many varieties, some thick, some thin. The very thinnest soup is bouillon, which is clear broth. Consomme is like bouillon, but it has been distilled down to double strength.

Jellied soups are made with stock cooked from bones and meat, and when chilled, they set because of the natural gelatin drawn from the bones.

Vegetable soups are usually made from meat stock and can be clear or thick. A vegetable puree is thick and smoother than traditional vegetable soup. Cream soups usually consists of cooked, smashed vegetables added to a cream sauce. Almost any vegetable can be used, and according to Letie, they can be part milk and part chicken stock. She said, "You can build a hearty soup from cream sauce using leftovers and combinations of vegetables."

A bisque is a cream soup, traditionally with seafood. And chowders are thick soups, also usually with fish.

One of the most important considerations in making soups, especially in large quantities, is the proper handling. Letie pointed out that soups are a "complex solution," and if they are not handled properly they will sour, which is in fact, a fermentation. This happens if they sit around warm for too long. Therefore she said, "With large quantities, cool the soup quickly by placing the large soup pot in a sink, washtub or bucket filled with cold water and ice." Chill the soup completely before placing it in containers for freezing and storing. She said that even putting the hot soup in containers in the refrigerator is not enough because the air doesn't circulate fast enough to cool the containers.

She also cautioned her audience to thaw the soup in the refrigerator, and not to leave it sit out at room temperature, or spoilage will occur.

She said further, "It is very important to have enough heat to do the job. Soup needs to simmer slowly. You want it to bubble, but not boil violently." She said containers which are too small for the burners to heat evenly should not be used.

Scorching can also be a problem in soup-making, but if it happens, Letie said the best thing is remove the contents immediately and clean the pot. The soup may be salvaged, but there is no sure-fire remedy for taking away the scorched flavor.

She recommended using a deep pot rather than a round one, and one which has a good fitting lid. "It is important to simmer soup for a period of time to get the flavors to blend."

If you think soup often tastes better on the second day, it's not your imagination. Letie said that the cooling process helps "the flavors to mingle."

When adding seasoning, Letie cautioned homemakers to "be lighthanded at the beginning. In most cases the soup is distilled and the flavor will become more concentrated. Adjust the seasonings just before serving," she suggested. Whole spices work better in long cooking times, and while thyme goes nicely in making stocks, oregano can be overpowering.

Wine, she noted, will give a fuller, more interesting flavor to soups. She said, "It is not expensive and the alcohol is long gone before eating it." She added that white wine usually works well, but should be added at the rate of no more than ¼ cup to a quart of soup. If using straight sherry, tawny or white port, it should be used in smaller quantities than white wine. In fish soups, Letie suggested using sherry or white wine, but "with a light hand."

Cooking wines should be used advisedly because they have salt added, and the wine intensifies the salt flavor.

In choosing meats to use in making soup stock, Letie says soup meat should be the least expensive, less tender cuts. "You get more flavor because it needs a long time to distill the flavor. Shop around because prices vary a lot. Using just bones as a source of stock can be very expensive." She said it might be better to invest in meat and a few bones since the cost of bones has gone up drastically. She suggested using the cheapest cut of chuck blade for the meat and added that roasting it in the oven for one hour per pound at 350 degrees F. will produce a browned meat and good juices for the soup.

Bones like knuckle, marrow, neck, short ribs, shank and oxtails are good in soups. In chickens, necks, wings and backs are good soup bases. While a stewing chicken is also good, it is not always available in all stores. An alternative is to purchase a whole chicken and extra boney pieces.

Ham hocks are good for bean soup but must be cooked for a long time. "Get the butcher to cut them in half," Letie advises.

Calves' heads and the heads and feet of chickens are also sometimes used in soups. Chicken feet have a thickening quality, she added.

A pressure cooker can be used to shorten the cooking time in soups, and can save both time and energy. It doesn't distill down the liquid, but it does extract the marrow from the bone.

Aids for making soup stock are available, Letie noted. There are bouillon cubes, bouillon granules and soup base mixes which are commercial products.

(Turn to Page B5)

Rivels are one of the delights of Pennsylvania Dutch cooking. Here Letie demonstrates the proper method for dropping the rivels into the boiling liquid.

(Continued from Page B4)

She demonstrated the fine art of making "rivels," which she called a Pennsylvania Dutch delight. She said they are mini-dumplings and showed how they can be rubbed between the hands into the boiling liquid. She cautioned that the liquid must be boiling or the rivels will sink to the bottom. They also swell as they cook, she noted.

For bean soup Letie said a number of things affect how fast they will soften. It will take longer if beans are very old or if the water is very hard. All beans should be soaked before being cooked, either by soaking overnight or by bringing them to a boil and soaking for an hour. The exception to this is lentils and split peas.

After the beans are soaked, they should be cooked before tender. Letie said, "Don't add sugar or tomatoes until they are tender, because the addition of the sugar and the acid will not let them get tender no matter how long they cook."

To make tomato soup without curdling requires combining ingredients in the right order "and a little luck," Letie said. Both the thin white sauce base and the tomato juice should be heated to close to the boiling point in separate containers, then the tomato juice should be poured slowly into the milk. This should produce uncurdled soup. She cautioned that the addition of baking soda to neutralize the acid destroys the Vitamin C.

Included below are two recipes to get you started on making soups for your family, and providing warm nourishment for the remaining cold winter days.

CREAM OF TOMATO SOUP

2 tablespoons butter or margarine
2 tablespoons flour
1 teaspoon salt
1/8 teaspoon pepper
1 quart milk
2 cups tomato juice (plain or seasoned)

Melt butter, add flour, salt and pepper and heat until it bubbles, stirring constantly. Remove from heat, slowly add milk, stir rapidly with wire whisk or rubber scraper. Return to heat and bring to a boil. Meanwhile, in another saucepan, heat tomato juice almost to a boil. Remove from heat.

When milk is hot, remove from heat. Pour heated tomato juice slowly into the milk, stirring constantly. Serve promptly.

LES HALLES FRENCH ONION SOUP

6 cups brown beef stock or canned beef broth
6 large yellow onions, thinly sliced
2 tablespoons butter
1 tablespoon oil
½ cup port wine
½ cup diced Gruyere or Colby cheese
1 cup shredded Parmesan or Romano and Gruyere or Colby
6 sliced buttered toasted French bread, ½" thick
1 tablespoon butter, melted

Saute onions in butter and oil until limp. Cover and simmer for 15 minutes. Pour in beef stock and simmer 30 minutes. Taste, season if necessary. Add port wine and simmer 30 minutes longer. (This can be done in the oven at 350 degrees F. in oven-proof casserole if you plan to serve from the casserole at the table. If you plan to serve in individual oven-proof bowls, do this

Farm Talk

Jerry Webb

Do Delmarva farmers really spend their winters in Florida, enjoying the fruits of their summer's labors?

There is an old myth to that effect and every once in a while someone mentions a crop rotation that includes corn, soybeans, and Miami. That indicates that some farmers, especially those who grow only crops, limit their activities to corn and soybeans that are grown in a relatively confined period, leaving them plenty of time for extended winter vacations.

That myth was probably started by a dairyman who was a little sore at spending seven days a week milking cows while his crops-farming neighbor took a few days off. But the general consensus here on the Delmarva peninsula, and throughout the country for that matter, is that farmers are rather reluctant to take a vacation even during the winter lull.

With luck, a corn and soybean farmer can be all through with the hard part of harvesting well before Christmas. That means three or four months before the tractors start to roll again.

That's not to say there isn't anything to do around the farm. First off, most farmers have a big obligation to Uncle Sam that includes a lot of time-consuming paperwork. When that's done there's still the talk of marketing last year's crop, planning for the new season, buying supplies, and getting equipment in shape.

The fact that farmers have to let a lot of things go during the busy harvest season. They're working day and night trying to get the crops in the bin before the weather turns bad. Some years they make it, some years they don't. Given a rainy fall, they can be out there well into January trying to scrape up crops that have fallen to the ground.

There's no doubt most farmers take it a little easy in January and February, spending time in educational meetings, attending auctions, shopping around for equipment and supplies, and in general moving at a slower pace. And a few even take real vacations.

Some sign up for farm-related tours to exotic places like Hawaii, New Orleans, Arizona, and so on. And some go off on their own to visit family in other places or just to look around.

In recent years, quite a bunch of them have climbed aboard their tractors for a few fun-filled days in downtown Washington, D.C.

As a group, it's hard to get farmers away from the farm even when their duties are pretty well caught up. Maybe it's part of that age-old tradition that says farmers are hardworking, God-fearing, salt-of-the-earth types with their shoulders to the wheel and their noses to the grindstone.

That's a heavy burden and it makes having fun quite difficult.

There's a certain amount of pride in the voice of some farmers when they tell you they never take a vacation, or they haven't been off the farm for more than a day in 20 years.

There's also something kind of sad about that, especially when you consider an older farmer who is not hurting financially, who's never been anywhere or done anything else besides farm. The world is a lot larger than a 200-acre farm, and it wouldn't hurt most farmers to take a little time to find that out.

People in business and industry take vacations. They use this time to relax and rejuvenate, and it's said they come back to work with new prospectives and new enthusiasm. Maybe that's what farmers need after many months of fighting all of the problems of agriculture.

So if you hear about a neighbor who's gone to Disney World for a few days, don't be too hard on him when he gets back After all, he's put in a lot of hours this past year and he has some compensatory time due him.

You can bet come early March, when the first signs of Spring start to show, he'll be back from wherever vacation spot he may have chosen with his equipment in tune and his supplies on hand, ready to start another farming year.

Create

simmer step on top of the range.)

Add diced cheese to hot soup. (Ladle into individual bowls at this point if you plan to serve this way.) Top casserole or bowls with toasted bread, sprinkle with cheese, drizzle with butter. Place in 425 degrees F. oven for 10 minutes, turn on broiler and heat until browned. Serve at once.

Sibling quarrels - normal

NORRISTOWN — Quarrels among children in a family are a normal part of growing up and learning to get along with others. But you need to make a distinction between healthy competition among children and bitter jealousy. Use the intensity and frequency of their quarrels as your guide

Unless there's real danger of a child getting hurt, Nancy Stevens, Extension home economist, Montgomery County, says it's best not to interfere with your child's squabbles. With very young children, a quarrel is often over and forgotten within a matter of seconds.

Mrs. Stevens has included information on developing family relationships in a learning packet called "Toddler Topics." The packet is designed to help parents of preschoolers in rearing their children and include information on children's fears, parent/child communications, budgeting, health and other timely topics.

To get your free copies of the learning "Toddler Topics," call or write the Montgomery County Penn State Cooperative Extension Service office, 400 Markley Street, Norristown, Pennsylvania 19401. (272-0574)

REDLAND VARIETY

THE UNCOMMON RED CLOVER.

Disease resistance keeps REDLAND producing after other varieties fail.

- New, improved red clover variety
- Yields better than Kenland, Lakeland and Dollard
- Greater stand life than Kenland, Lakeland or Dollard
- Resistance to Southern Anthracnose
- Tolerance to Northern Anthracnose
- Greater resistance to leafhopper yellowing than commons

Ideal for grassland renovation!

Your RP Seed Dealer has all the facts on new REDLAND variety red clover See him today

Rearing up is Underdog, the tractor of Harold Stauffer, of New Holland, in major competition among top pullers from throughout the nation at the Indy Super Pull.

Sneeki-Pete tugs its way down the track of the first major tractor pull of the year, the Indy Super Pull, with Tony Stauffer, of New Holand, at the wheel.

4 drivers in Super Indy pull

INDIANAPOLIS — Tractor pullers from Lancaster and Chester counties competed against the nation's top drivers recently at the seventh annual World Series of tractor pulling, the Indy Super Pull.

Competing from Lancaster County were Tony and Harold Stauffer, of New Holland.

Driving his "Sneeki-Pete" tractor, Tony Stauffer finished second in the 7000-lb. super stock class. He has been competing for six years. Harold Stauffer finished 13th in the 9000-lb. super stock class and 20th in the 7000-lb. super stock event.

Chester County competitors included Dale Smoker, of Cochranville, and Harry Greist, of Coatesville. Smoker finished 15th in the 5000-lb. super stock class, while Greist captured 17th in the 12,000-lb. unlimited class and 19th in the 12,000-lb. super stock class.

In the Indianapolis pull, they competed against more than 100 other National Puller Association champions for prizes in the richest purse in tractor pulling.

Attending the first major pull of the 1980 season held in the Indianapolis Coliseum was a large number of fans from across the country.

The NTPA circuit during the coming year is expected to feature hundreds of top competitors in some 500 events, which will attract a total of some two million spectators.

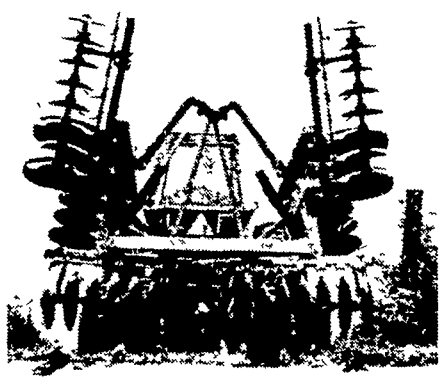
RHINO FLEX 90B



Spring Gang Hangers with Tapered Bearings

11' Transport Width The Flex 90B will follow inside most tractors with dual wheels making it easy and safe to go from field to field through narrow gates and over narrow bridges You can have peace of mind regardless of who is at the wheel! Takes less storage space also! The narrow transport width is made possible because the heavy wings pivot 16" inside the base gangs' outer disc This design feature also contributes to the 90B's plowing ability The heavy wing structures provide the weight needed to make wings penetrate like the center frame gangs This allows the wings to "flex-up" without lifting the center unit when the inside wing gang strikes a rock or stump, thus reducing shock loads to all components The Flex 90B is designed to save you money in the field and on the road

FOLLOW THE LEADER

91 tons per hour* now that's capacity!

It's the largest capacity forage harvester available today — the Gehl 1200 Yet it's a light running, efficient machine that works with tractors ranging from 80 to 225 hp

If you've got a big job to do, the 1200's for you It cuts through the heaviest windrows and the tallest corn to deliver uniformly cut feed

The 1200 is built for big performance With nine hard working knives, and our unique built-in hydraulic knife sharpener A giant 25½ inch cylinder A full 129 square inch throat area And our patented 24 inch spinner that moves material to the blower at nearly 40 mph with no cross augers to plug

Add capacity matched attachments 2 or 3 row corn heads, hay pickup snapper head

Then tackle your biggest harvests at up to 91 tons per hour! See the 1200 — the leader in forage harvesters — at your Gehl dealer

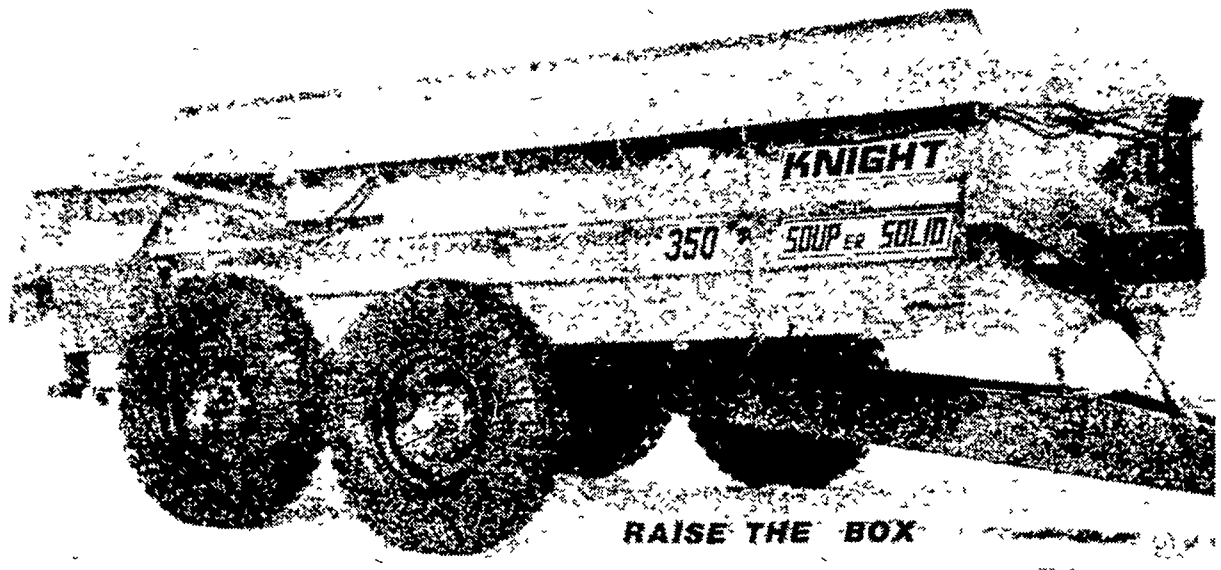
KNIGHT HAS THE FEATURES THE COMPETITORS WISH THEY HAD!

KNIGHT

350 SOUP-er-SOLID Manure Spreader



RAISE THE BOX

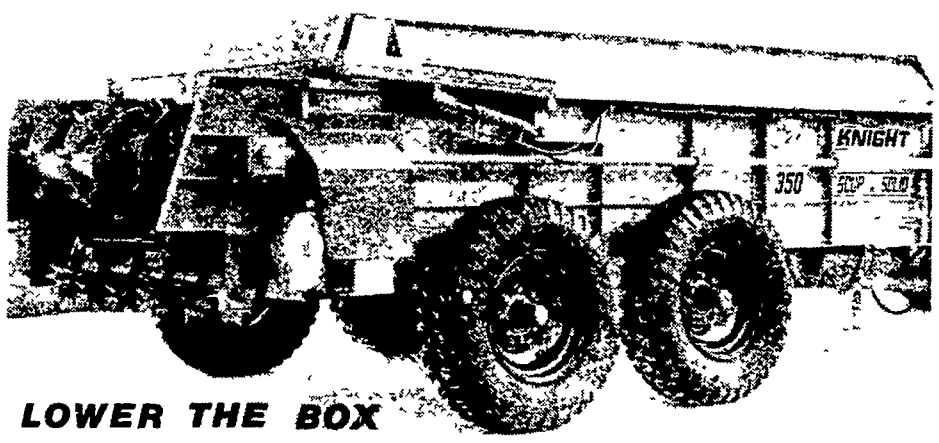
AND SPREAD YOUR SOUPY MANURE FAST !

All bodies made of copper bearing steel, welded into one unit - ward off rust and corrosion from weather and manure acids.

Heavy auger style beater with alloy steel "ripper" teeth makes easy work of spreading frozen and solid pen manure.

Sides are Curved in To Prevent Sloppy Manure From Running Out

One Spreader To Haul and Spread Most Types of Manure



LOWER THE BOX

AND SPREAD YOUR SOLID MANURE

A unique spreader with a tilting design that lets you haul and spread your soupy manure fast, and haul and spread your solid manure with the same unit.

With over 30 years of experience, Knight gives you strength and durability in this quality unit. It's based on the design of the very popular 350 Knight Manure Spreader.

You can depend on a Knight

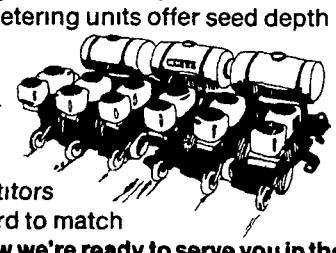
THE LAND, THE MAN & WHITE

You're invited ..to our Open House Come in and see why 1980 is the year of The Land, The Man and White® And what you'll see in the way of new service and products will make you a firm believer in White

See the two new additions to the growing line of White Field Boss® Tractors. The new 60 hp 2-62 and 43 hp 2-45 are the Utility Field Boss Tractors that have many of the standard features you'd expect to find on our larger horsepower tractors They're the newest additions to the performance you'll find in our full line of 27 to 181 horsepower Field Boss Tractors

See how you can increase your planting accuracy and your yields with the new White 5100 Seed Boss™ Planter. It's new exclusive walking-beam dual depth guage wheels and pressurized seed metering units offer seed depth and in-row consistency our competitors find hard to match



See how we're ready to serve you in the 80's through the film, "The Man, The Land & White" We'll present a very serious outlook at the Land farming The Man you, the farmer And White the progressive farm equipment company geared for the 80's Please join us!

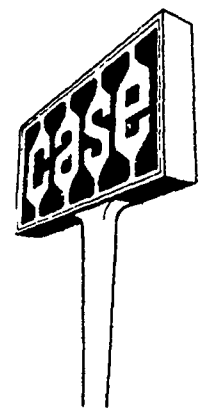
The Tractor Specialist sells more "up-time"



When the farmer is ready, his tractor had better be. That's one reason a Case dealer franchise makes extra good sense.

As a Case dealer, you're the Tractor Specialist. You sell and service the best in farm tractors. And you are backed by an industry first: Assured Availability. It means that, during warranty, if a tractor bought from you isn't ready to go you can offer your customer free use of a replacement. And Case will back you up. Proof that when a Case dealer needs help, we do something about it.

You could be planning a bright future as your area's Tractor Specialist.
You could also consider our light construction equipment line. Write or call for full information on the Case dealer franchise.

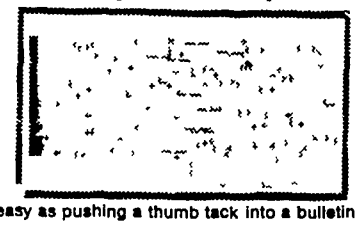
The ATTA GLANCE COW DIARY
The simplest, most economical dairy breeding record available, keeps your entire herd s yearly breeding record constantly available
Atta Glance
50 cow size
costs $44 95
is 24' x 42 , has mounting straps and can be wiped clean



Keeping records is as easy as pushing a thumb tack into a bulletin board
Each cow s name or number is placed in the left margin on any of the 50 horizontal lines using embossing tape (shown above) or use felt tip or grease pens Color coded pins are then placed on that line to record the dates of breeding and freshening
In Lancaster area call (717) 426-3689

MANURE SYSTEMS

Manure - Liability or Asset?

We have the equipment and experience to convert what is often a major liability into a valuable asset.

- Mechanically automated manure scraping equipment
- Transfer systems to move manure to storage or field
- Processing equipment to remove odors from stored manure
- Separators and dryers for easier handling and sale of finished manure products

Let us convert your manure liability into a manure asset.

YORKSHIRE SERVICE BOARS
15 Boars for March Service
$275 & up
Our boars have proven they are high in economic values. Our SPARTAN boar received the sire of the year award Our KICK boar produced the most efficient pen of purebred hogs, spring test (1976) 2.96 lbs feed per/lb. gain. 1979 our HUSTLE boar sired the highest indexing boar, highest indexing pen of Yorkshire, the highest selling, the leanest, most efficient pen of Yorkshires (2.63 per lb. gain,) the soundest pen with an average score of 7.4 and had an average daily gain of 1.92. These pigs were all put on feed as small pigs and were in competition with hogs of all other breeds.

A very successful sales pro is about to be even more successful...
Here's a chance for a very good ag salesperson to get even better. We have a sales position challenging enough for the most highly motivated, enthusiastic and intelligent sales pro in agriculture. And we reward success immediately and generously.
How successful would you be selling a product that really benefits your customer...with top service...and advertising and promotion backup that far exceeds your competition? And how important to you is a job with the potential to make what you're really worth?
You'll find it with us, representing A.O. Smith Harvestore Products Inc. we'll get out of your way and let you go as far as your ability and drive can take you. Write and tell us why that's going to be a long way.
An Equal Opportunity Employer.

BUYING A TRACTOR OR SELLING A FARM...

both have more in common than first meets the eye. When you are purchasing farm equipment, you compare various makes and models, as well as the service of the dealer and the reliability of the manufacturer to make certain that you are getting the most value for your dollar. Likewise, when selling a farm, you want to make certain that you are getting the most value for the commission dollars you are spending. AT KISSINGER, LEONARD & ASSOCIATES Farm and Land Department, we invite you to compare the complete line of services provided including a comprehensive advertising program and full time sales associates who sell only farms and land and are thoroughly knowledgeable with the most modern farming practices and agricultural lending requirements. There is a difference! If you would like more information without any obligation, please call any of the Farm and Land Department Sales Associates listed below.

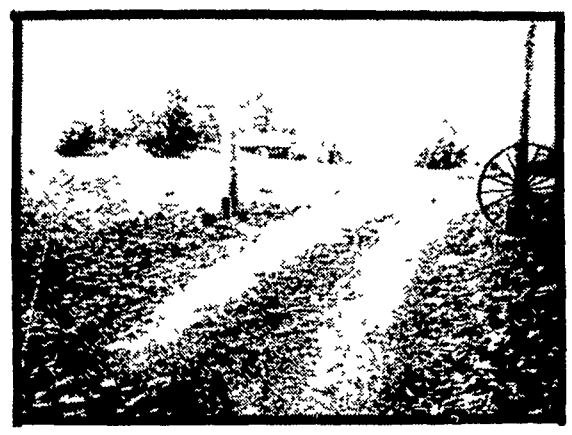
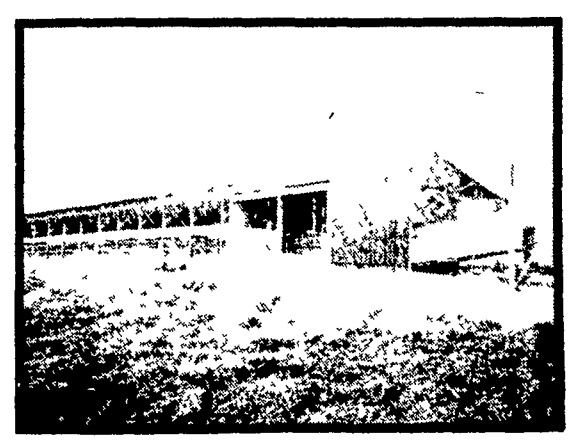
When The Owner Reads This, He May Decide To Keep It Himself . . .





Look at the approach to the home, sit up to dinner and view your own private setting. First your eyes fall on the small beef barn, the cattle roaming inside a 4 strand barb wire fence around the rolling pasture....

Look a little further and you see 2 pretty ponds in front of your modern hog setup and sitting a little higher, the Nebraska hog finishing building.

Your own lane going from your house past all this and even beyond out to a twp. road. Your eyes come across the property line which breaks the horizon. As you look back to the house you see a nestled corner of pines.

All this is pretty, BUT! . . .the big thing is, it includes two 20-crate farrowing houses, 250 head nursery, 600 head Nebraska finishing house, 5000 sq. ft. equipment building, a 2-story barn with additions, feed bins to all buildings, 2 ponds, a small cattle barn, a real nice rancher with modern cherry kitchen, stone fireplace, and all on 128 acres near Myerstown, Berks Co., Pa. The best part . . yes, only $425,000!

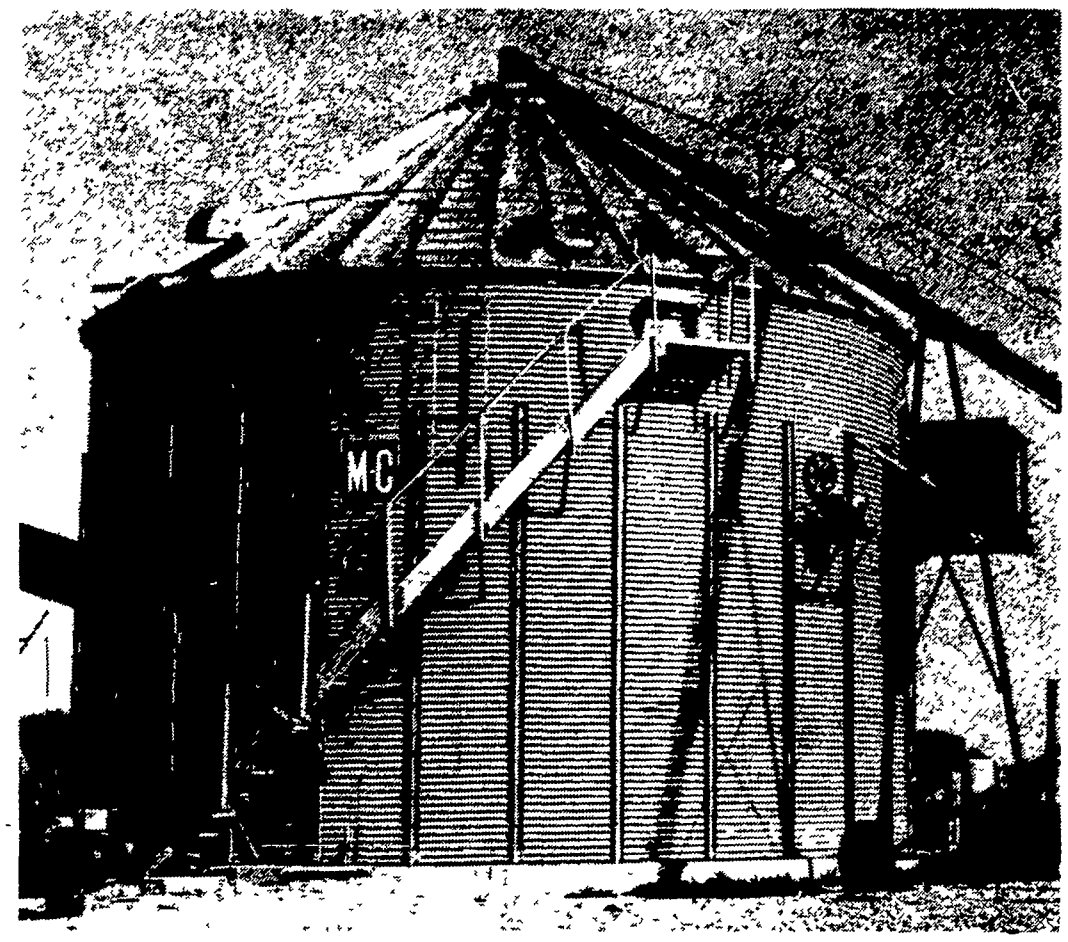
M-C DRYBINE™

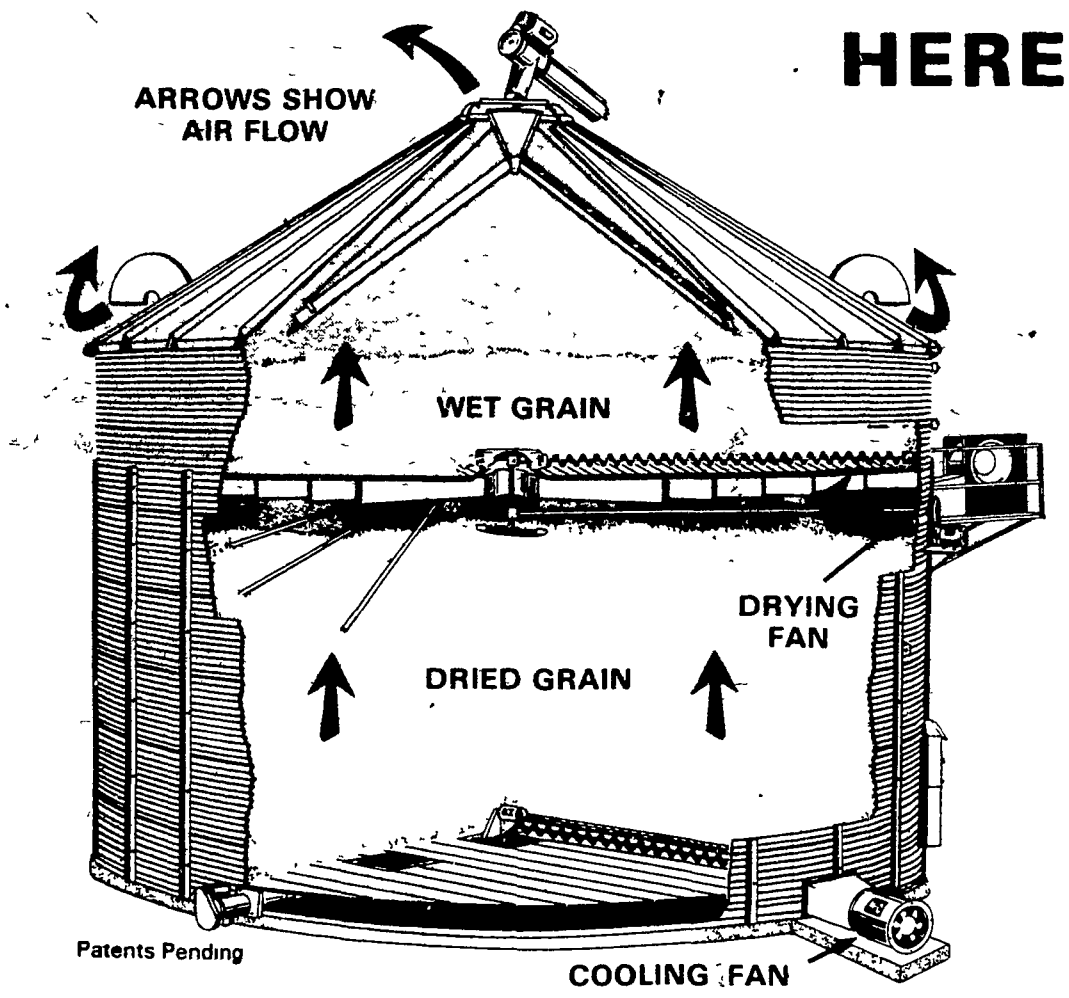
MATHEWS COMPANY

The ENERGY SAVING IN-BIN DRYING SYSTEM

The new Mathews Continuous In-Bin Dryer is a combination storage drying and cooling bin designed to save you money. It is efficient, fast, easy to manage and costs less to operate. The drying process is fast, while the cooling process is slow, eliminating stress cracks and damage caused by fast cooling. There is nothing else like it on the market. The Mathews design requires no wet holding bin or separate bin for cooling.



- **Saves energy** for profitable operations.
- **Proven** high capacity results (357 bushels per hour).
- **Eliminates** the most common problems found in other in-bin dryers.
- **Low** per bushel costs.



HERE'S HOW IT WORKS...

As wet grain enters the top of the bin, it flows into the upper drying chamber as harvested, with no need for a wet holding bin. This upper chamber holds up to 4 feet of wet grain (2250 bushels).

Every seven minutes, a continuous flow auger makes a complete revolution around the upper drying floor, drawing the dried grain into the lower cooling area.

Hot air is introduced under the upper floor to dry the wet grain and to heat the surface of the grain that is distributed into the lower cooling chamber. The air that is used for cooling the grain picks up heat during the cooling process. This heated air is then used again in the drying process, saving on fuel costs.

When not being used for drying, the bin will store 8500 bushels of grain.

BIN DRYER TEST FOR FALL OF 1979

Ambient Temperature	43°

Only female ag teacher in Pennsylvania

Sonia Shaner makes understanding ag elementary

BY SALLY BAIR
Staff Correspondent

Sonia Shaner has a unique distinction: She is the only agriculture teacher in Pennsylvania hired exclusively to teach elementary education.

Sonia, a teacher in the Eastern Lancaster County School District, is one of nine teachers in the vocational agriculture department there. Sonia's days are divided among five elementary schools where she spends one hour per week with each sixth grade class, with a total of 208 students. She also meets once each week with seventh grade ag clubs, and she meets with kindergarten through fifth grade as her time permits.

Sonia estimates that before the year is over she will have contacted approximately three quarters of the whole elementary school population through her teaching efforts. She points out that other districts have sixth grade programs but all are taught by regular vocational agriculture teachers.

The purpose of providing a program to elementary students, Sonia states, is "to get them interested in agriculture. I definitely think it is advantageous to the students. They get a taste of all kinds of agriculture. It is something students can take home and put to use there. Things like hunter safety and reptile safety are something they can relate to and use throughout their lives."

Sonia noted that in the Eastern Lancaster County District many children do not go to school after the eighth grade for religious reasons. And many children attend public elementary school, but at seventh grade prefer to attend parochial schools. Therefore, she says, "They need the science aspects and the safety before they leave school."

The program, while innovative, is not new. Sonia points out that it was started under the direction of Department Head, Robert Herr, 13 years ago with total government funding as a pilot project. Herr taught the program for nine years, and it was first taught only in the rural schools of the district. However, pressure from parents in the borough of New Holland soon had the program in those schools as well. The project is now funded by the district.

In the classroom, Sonia said there are three areas of interest which they study: science, safety and conservation.

"One project we do is 'safety through art,' where children draw a poster which shows safety in one of the areas studied. We study safety on the farm, with machinery, in the street, in the school and throughout agriculture. We give five ribbons in each category in each school and then choose a grand and reserve grand champion from each school. The winner gets a trophy. It is a good way to get students involved in competition," Sonia concludes.

She added, "We also study the science and safety of rodents and the damage they do. I tell them how destructive rodents can be."

A popular unit with students is the science and safety of reptiles. "I take a poisonous and a non-poisonous snake into class, and let them handle the non-poisonous one."

Although she talks about the reptiles calmly, she recalls the day she was bitten by a non-poisonous snake as a class of second graders looked on. She said she was startled by the bite, but "I couldn't show any fear. It bled and it left its teeth in my hand." She laughs about it now but it was a test of her courage that she continued to talk with the students about the snake.

Another part of the sixth graders' education in hunter safety. "I never hunted, but I come from a long line of hunters, so I got my certification to teach the course." There are six weeks of classroom instruction and then students have the opportunity to fire a gun at the firing range.

Sonia's favorite animal is a pig and she even owns one registered Yorkshire pig which lives on a farm with a friend. So it is natural that one of the projects done by the students is to raise three pigs, hypothetically. They are given all costs of raising a pig, including feed, beeding, trucking, show costs and earnings, and pig weights. Students must write a story on how they raise the pigs and how they get them ready for showing, and they draw a diagram of how the pigs are housed. A small project book is completed.

Field trips are an integral part of the program, and to facilitate trips and reduce bussing costs, Sonia has learned to drive a school bus. She points out that there are two main agricultural industries in the New Holland area: Victor S. Weaver Poultry and Sperry-New Holland Manufacturing. In the course of the year, students take a field year to each place.

One of the special field trips of sixth graders each year is a trip to the Pennsylvania State Farm Show. Sonia said, "It gives them another taste of agriculture. They get to see the dealers and the farm equipment and it is inspiring for them."

In addition to classroom work, Sonia offers the students volunteer projects. Last year she had 88 of these projects. "Lambs are becoming more and more popular," she said. Students who choose a sheep project learn to care for their sheep, how to clean and worm them and how to show them. She said the students had projects last year which were shown at four different area shows. Students also keep miniature record books to show how their project is doing.

Smaller projects like hamsters and guinea pigs are popular, and Sonia said many girls are interested in raising plants.

A helpful by-product of these projects is that Sonia visits the homes of the students and works with the parents. Sonia is employed for 35 days in the summer, so she visits students during that period as well.

"I get to know the families, and that is an advantage in discipline because the students know that I know their parents. It is also an advantage in the community," she added.

Sonia conducts water testing with sixth graders who are not on borough water. During her free morning each week she takes three or four students to their homes to collect water samples, which are subsequently tested. "We discuss the results in class and they learn about the process involved," Sonia explains.

The students learn how to take soil tests which are mailed to Penn State for results. They study lawn care, gardens and flower beds. Forestry and wildlife are also studied, including bringing in live wild animals for the students to see.

Sixth graders also sell onions to the community, and then have the opportunity to bring in their largest onions for judging in the Fall. The ten largest get a garden award plaque.

A program on pets is offered in conjunction with FFA members, who bring in pets and talk about them with the students.

In conjunction with the FFA, Sonia is working on the national FFA "Food for America" project which is geared to the fourth and fifth graders. "We are simplifying our program and will have fifteen minutes at each station for the children. They will pop corn and learn to candle an egg and see some animals. Basically it's designed to teach children where food is coming from," Sonia states.

As time permits, Sonia schedules herself with younger classes. Currently she has a miniature "Food for America" project with first and second graders. By using a bag of groceries, she tells them about the four basic types of farms and helps them learn where products are grown, how they grow, and where all the ingredients come from.

A graduate of Delaware Valley College, Sonia wanted to be a veterinarian. She was born on a dairy farm near Phoenixville, Chester County, but her parents moved off the farm. Her grandparents stayed and her interest in agriculture was strong.

Although not reared on a farm, she worked for two and a half years on a farm on weekends and in the summer. "I milked and fed cows, gathered eggs and worked in the vegetable garden. I learned more working on the farm than in college and I can relate stories to the children about my experiences."

When she felt her grades were not high enough for vet school, she decided she wanted to work in research with drug testing on animals. That field was swamped but she learned there was a need for ag teachers. At that point, she went to Penn State to start working toward certification, and in September, she took a 6-month position at Shippensburg High School, replacing a teacher on sabbatical leave. Before she concluded there, she learned of the position at Elanco, and was hired to begin work as soon as she finished at Shippensburg.

(Turn to Page C4)

Sonia reviews her work plans for the week at her desk at the Union Grove School, Blue Ball. Most of her time is spent working in the elementary classrooms of the district.

Learning to judge dairy cows takes a lot of effort. Here Sonia works with students in her agricultural club in the seventh grade and points out things to consider in judging cows.

Sonia Shaner

(Continued from Page C2)

"I like working with kids," she says, "I came from a big family so that helps. I really love it a lot. The kids are so inspiring."

She said being female is probably an advantage because the girls really relate to her and many would like to be veterinarians. She said the children frequently bring in articles they think she is interested in, and "they always want to share their stories."

Sonia is very happy with her position and feels the program is beneficial to her students. She hopes to continue building up her resource program with the young grades and to expand participation by FFA members. "It is a blending of the total agriculture program," she says.

Showing her love of children, Sonia is an assistant Girl Scout leader in her spare time.

One of the best parts of the job, according to Sonia, is the diversity that comes every day. Each day and each classroom brings a different experience for her. And for the elementary students of the Eastern Lancaster School District, each class with Sonia brings them to a better understanding of the agricultural industry so important to Lancaster County.

Winners announced in ag speaking contest

UNIVERSITY PARK — Champions were announced recently in the 27th annual Guldin Public Speaking Contest of the College of Agriculture at the Pennsylvania State University. Taking top honors was Laura L. Weinberger of Clinton, junior in animal bioscience.

She won $175 for her speech entitled, "Agricultural Experiment Station: A Child of the American Spirit." She is the daughter of Mr. and Mrs. Donald N. Weinberger of R. 1, Clinton.

Second place went to Jeffrey L. Harding, junior in dairy production. He won $150 for his speech entitled, "Hey Mom, How Come My Milk Tastes Funny?" He is the son of Mrs. Janet F. Harding of R. 4, Brookville.

Third place was won by Wendy S. Reimold of Fredonia, junior in environmental resource management. She received $100 for speaking on "Development of Agriculture in Third World Countries." Wendy is the daughter of Mr. and Mrs. Robert Reimold of R. 2, Fredonia.

Tracey K. Higgins of Chadds Ford won fourth place and $75. A senior in animal production, her speech was entitled, "Women in Agriculture." She is the daughter of Mr. and Mrs. Vincent J. Higgins of Box 226, Chadds Ford.

In fifth place was Lori A. Sollenberger of Everett. A junior in dairy production she won $75 for her speech on "A Lesson from the Past." Lori is the daughter of Mr. and Mrs. Ray Sollenberger of R3, Everett.

Thomas R. Palchak of Trafford won sixth place and received $75. His topic was "Botulism from Processed Food" and he is a senior in food science. He is the son of Mr. and Mrs. Edward Palchak of Trafford.

In charge of this year's contest was Ann Marie Neiderriter of Erie, senior in environmental resource management. The Guldin Public Speaking Contest is sponsored by Coaly Honor Society in the College of Agriculture. Funds were established by the late Paul R. Guldin, former faculty memeber.

The judges were four faculty members in agriculture and two students in speech communications Faculty judges were Donald M. Crider, Mark D. Shaw, Joseph D. Harrington, and Glenn R. Kean. Student judges were Pamela R. Pinto, senior from Moscow, and Kerran L. Sanger, graduate student from Morrisonville, NY.

Grange family cookbook available

WASHINGTON, D.C. — The new National Grange Family Cookbook from Country Kitchens features family-tested recipes from the kitchens of Grange members and rural friends all across the country.

The book promotes the use of American agricultural products by offering recipes from "scratch".

"If you like country cooking and you're tired of packaged mixes and frozen dinners, then this cookbook is for you," says Jenny Grobusky, Director of Women's Activities for the National Grange.

The 304 page book includes recipes from appetizers to desserts and has special sections for men, children and diabetics. The ront section features a variety of dishes from Grange "Friends on Capitol Hill" including a cheese ring from Mrs. Jimmy Carter and a chocolate upside-down cake from Mrs. Walter Mondale.

"One of the best features of the book," said Grobusky, "is that most of the ingredients needed for each recipe are probably on your shelves or in your refrigerator." The book has many color photographs, lies flat when open and is easy to read.

This is the second cookbook published by the National Grange. The first one, National Grange Bicentennial Year Cookbook, sold over 185,000 copies and is no longer available

Individual copies of the new cookbook are available at each local Grange for $6.00 or may be purchased by mail for $7.00 by writing to Country Kitchen Cookbooks, National Grnage, 1616 H St. NW, Washington, D C 20006.

York 4-H meets

AIRVILLE — The York County 4-H Horticulture Club met February 18th.

Barry Plowman from Shiloh Nurseries presented a program on the many types of soils and how they affect the growth of a plant. Plowman recommended using soiless mixture such as perlite of vermiculite to start seeds so there will not be a disease problem.

Following the program, a plant exchange was held and each member went home with a new plant.

The club is planning a trip to the Philadelphia Flower Show on March 11. Strawberry members were asked to order their plants through the 4-H Office by March 5.

The next meeting will be June 2 with a Strawberry Roundup and flower planting at the 4-H center.

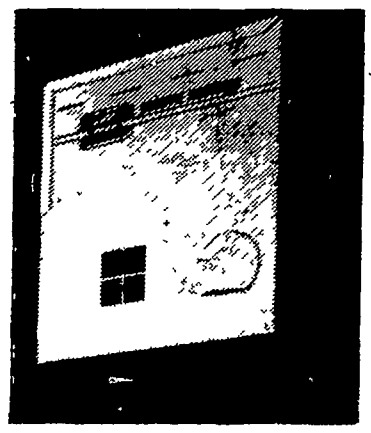
White Heaters offer

CLEAN, ECONOMICAL HEAT FOR FARMSHOPS



Solve those odor problems and cut the costs of heating your farmshop with a White Heater

White Heaters are clean burning gas heaters There are no odors or irritated eyes caused by oil space heaters You work in complete comfort

And White Heaters are safe for farmshops like yours They meet fire and emission standards for ventilated buildings

With a White Heater you save money in fuel, maintenance and in purchasing

Compare fuel bills from a White direct-fired heater to other gas heaters You'll find savings of about 20%

Maintenance costs are also lower There are no heat exchangers to clog, no nozzle to foul

Shop around and compare gas heater prices You'll be surprised A White Heater can save you 33% to 50% in price alone

Come in and see us We'll show you how to heat clean and save money

Farm Women Societies

Berks Co. Society 1

Society 1 held their February meeting at the Oley Legion Diner.

Easter candy chairlady, Ruth Walters, announced February 25 as the first day for candy making and orders can be given to any member in the group.

Plans were completed for the Annual Spring Rally on May 1, 1980, at York and the 40th anniversary celebration of Group 1 on April 30, 1980 at the Vocational Agriculture center in Bernville.

Valentines which members made for their husbands were displayed.

The next meeting will be held at Ella Richard's home in Oley oin March 12, 1980. The program will be slides of her visit to Europe.

Berks Co. Society 6

Members of Society 6 met at the home of Mrs. Richard Schlegel.

The Sunshine Committee reported that they sent planters to Mrs. Mary Youse in the Reading Hospital and Medical Center and Mrs. William Koch who just had a baby. Get Well cards were went to people in the community.

The group has received an invitation to attend the 40th anniversary celebration on April 30th for Group 1 at Berks County Agricultural Center.

Several of the members will be attending the Spring Rally Thursday, May 1, at York Fair Grounds, Memorial Hall.

A donation was given to the March Of Dimes. Two cases of bed pads will be given to Berks Heim.

The next meeting will be held at the home of Mrs. Harold Snyder, R.D. #1, Oley, on March 18. The ladies are making their own Easter Bonnets, to be judged at the meeting.

Cumberland Co. Society 20

Society 20 met February 20th at the home of Pat Tack, Carlisle.

Donations were approved to the Claremont Farms Auxiliary and the Dairy Princess Contest in Cumberland County.

Plans were made for a trip to be made in the fall but the destination will be decided at a later date.

The program for the evening was a Player Piano Sing-a-Long.

The March meeting will be held at the home of Evelyn Weber. This will be a party to celebrate the 16th anniversary of our organization. Secret Pals for the past year will be revealed at this meeting.

Dauphin Co. Society 16

The February meeting of Society 16 was held in the home of Marthae Hertzler.

Trooper Breen of the Harrisburg State Police presented the program, "Lady Beware". After a short film, he answered questions and stressed the prevention is the best defense against attack.

Next month, papers will be distributed, and we will compile a "Sunshine Book" for shut ins.

The March meeting will be held at the home of Linda Brandt. Bedding plants for the garden will be discussed.

Lancaster Co. Society 2

Society 2 met at the home of Luella Low, Manheim.

Members responded to roll call by naming the first sign of spring, and a few ladies reported sighting robins.

The Sunshine Committee reported sending 8 cards and one fruit basket. The Ways and Means Committee will entertain Society 24 at the Lancaster Farm and Home Center.

The spring banquet will be held at the Brickerville Fire Hall on March 8 at 6:00 p.m. At this banquet, ladies will entertain their husbands.

Six members will go to Lancaster to stuff letters for Easter Seals. The project for 1980 is to have Society member's children and grandchildren create something to be judged at a later date.

Ten members signed up for the Spring Rally which will be held at the York County Fair Grounds Memorial Hall on May 1.

March 22, six member ladies will be going to Harrisburg to assist with the art show sponsored by LARC.

Lancaster Co. Society 3

Society 3 met February 16 at the home of Sallie Snyder.

Alice Trumbaurer hosted members at her home Tuesday, February 19, to make bed pads and cancer pads.

Applications for the Society's scholarship will be taken to Ephrata, Warwick and Cocalico High Schools.

Nine lap robes have been completed and presented to patients at Maple Farms Nursing Home. Medication expenses also were paid for a needy person.

Family night will be held March 7, at 6:30 at the Mt. Airy Fire Hall. Program for the meeting was a presentation by the Lancaster County Poultry Queen.

The next meeting will be at the home of Barbara Stauffer, March 15, and will feature Rose Anne.

Lancaster Co. Society 4

James B. McMullin, a Lieutenant on the Lancaster Police force and an avid traveler, was guest speaker Saturday evening at the

Farm Women Societies

(Continued from Page C5)

Guest Night banquet held by Society 4.

McMullin showed slides and related his experiences on a tour of Africa which included the countries of Kenya, Tanzania and portions of Uganda. He brought along two souveniors for display: a spear with a hand carved ivory handle and a bracelet made from the hairs of an elephant's tail.

During his slide presentation, McMullin played tape recordings of the singing of Masai natives as they danced; night sounds at a watering hole; and a song sung in Swahili by his tour guide.

The group will be entertained on Saturday, March 8, by Society #13 with a luncheon at 1:00 P.M. at the Farm and Home Center.

The March meeting of Society 4 will be a luncheon meeting at 12:00 noon on March 20 at Willow Valley Restaurant. A visit to the home of Jay Evens for a candy making demonstration will follow the luncheon.

Lancaster Co. Society 8

Farm Women's Society #8 met in the home of Kathryn Heisey, February 16th at 2:00 p.m.

Poetry was the special feature of the afternoon and was presented by Edith Herr.

Refreshments were served attractively with seasonal touches and were enjoyed by all. Hostesses were Kathryn Heisey, Kathryn Erb, Mary Reist and Lillian Eby.

The next meeting will be held at the Lutheran Church, Maytown on March 15, 1980 at 2:00 p.m. Christine Erb, a return IFYE from Japan, will be the speaker.

The Spring Rally will be held May 1, 1980 in the Memorial Hall at York Fair Grounds.

Lancaster Co. Society 18

The February meeting of Society 18 was held at the Farm and Home Center.

The speaker for the afternoon was a representative from the Bell of Pa.

Roll call was answered by giving a bible verse with the word heart in it.

The next meeting will be held March 15, at the home of Mrs. Warren Weaver.

Lancaster Co. Society 21

Society 21 met at the home of Libby Steinberg.

A donation of $25 was made to aid heart research. Quarryville Library requested donations of books, magazines, puzzles and patterns for a book fair in April.

The three entries from Society 21 in the crafts division of the state Youth Project were: Delinda Tindall, Michelle Groff and Tiffany Rohrer. Tiffany's project, a basket of stuffed animals with an accompanying essay was the county entry in the craft division. Certificates of recognition were given to the girls.

A white elephant sale was held with Libby Steinberg serving as auctioneer.

Lebanon Co. Society 5

Tuesday evening, February 12, members of Society 5 and their husbands enjoyed a family style meal at Zoar's Fellowship Hall at Mt. Zion.

The group was entertained by Gary and Joy M[illegible]r of Shirksville who played several numbers on the piano and harmonica.

Neil Grimes of Fredericksburg told the group about plans for a medical center to be built in that town. In particular, he asked for volunteers to solicit for funds for the project.

Next meeting will be at the home of Hilda Blatt in Jonestown. Hilda will show a film on her trip to China. There will be a cookie exchange.

Lebanon Co. Society 14

The February meeting was held at the home of Rosie Gingrich.

The group attended the good neighbor bazaar which was a sell out.

Baby layettes are being sewn by members as a club project.

York Co. Society 7

Mrs. George Spahr was hostess for the February 13, 1980 meeting of Society 7 held at the East Manchester Township building.

The Society will sponsor a refreshment stand at the public sale of Lottie Bear on April 19. In addition, donations were given to the Steve Shelly family, the Four Diamonds Fund, and Contact, York.

In observance of her 50th wedding anniversary, a gift was presented to Mrs. Victor Aldinger.

A movie shown by representatives of Goodling Oil Co. on energy conservation rounded out the program.

Next meeting will be held at the East Manchester Building, Tuesday, March 11th at 7:00 p.m. Members are asked to bring items for a silent auction.

York Co. Society 2

Society 2 held its February meeting at the home of Grace Ferree in Jacobus.

The group will donate small purchases to shut-ins. Also, society's birthday party will be April 9.

The program consisted of readings of an article on George Washington and one on the night after Christmas.

The March meeting will be held at the home of Donna Cunkelman.

FWS Calendar

Saturday, March 1

Lancaster Co. Society 10 meets at 1:30 p.m. at the Neffsville Fire Hall. The program will be Scott Riddle, the magician.

Lancaster Co. Society 6 meets at 2:00 p.m. at the home of Norma Baum. Thumbprint stationery will be made.

Thursday, March 6

Lancaster Co. Society 17 meets at 1:00 p.m. at the home of Marian Lefever.

Friday, March 7

Lancaster Co. Society 3 holds their family night.

Saturday, March 8

Lancaster Co. Society 19 meets at 1:30 p.m. at the home of Mary Hollinger. Ruth Hepler will conduct a health program.

Lancaster Co. Society 25 meets at the home of Shirley Henderson. The program will be on hydroponics.

Tuesday, March 11

Lancaster Co. Society 22 meets at 12:30 p.m. at the Willow Street UCC Church. Society 13 will be entertained with slides from Africa.

Wednesday, March 12

Lancaster Co. Society 21 meets at 7:30 p.m. at the home of Jean Risk. This is a craft night workshop for fall homemakers day.

Thursday, March 13

Lancaster Co. Society 9 meets at the home of Mrs. Russell Raush.

Lancaster Co. Society 21 meets at 7:30 p.m. at the home of Jean Risk.

Lancaster Co. Society 19 meets from 9:00 a.m. to 2 p.m sewing at the Lancaster General Hospital

Ida's Notebook

Ida Risser

Ordinarily, I think of myself as a "homebody." One who is satisfied to stay home and wash clothes, bake cakes and pies, clean house, tend my houseplants and keep the Farm Account Book up to date, etc.

But once in a while, I do get "cabin fever" and have a great urge to get out into the world.

So when our church had a day assigned to go to the Lancaster General Hospital and sew for them, I signed up to go provided there wasn't a big snowfall. After finally finding a parking place, walking a few blocks and riding an elevator to the basement, I finally arrived at the sewing area.

Usually I don't like loud radios blasting their songs at me, but this particular day, the sound blended with other machines nearby and was lost on me.

When I investigated the hissing sounds, I discovered a large piece of machinery with canvas belts that was folding bed sheets. Another noisy machine was ironing patches on clothes and was automatically timed for 12 seconds. Checking these out gave me a respite from my sewing machine.

My assignment was putting hems in large, heavy, grey-green operating room sheets. Only a few women spent the day there but I was told that other churches and farm women's groups also only send a few people.

On another day, I also planned to get out of the house and attend a Bible Study preceded by a meal. I was looking forward to eating out and so prepared nice steak meal for my family but ate none of it.

Well, when I arrived at the designated place there were no cars in the parking lot and the building was dark. I realized that I must have come the wrong day but only later did I find out that I was one month early!

Ashamed to go straight home, I proceeded to a nearby shopping center and hunted for a pair of shoes which I needed for square dancing.

Then, unable to postpone any longer admitting my stupidity, I drove home again.

Franklin Co. wins 4-H conservation program

CHAMBERSBURG — Franklin County has won top Pennsylvania honors and a cash award for its outstanding program in conservation of natural resources.

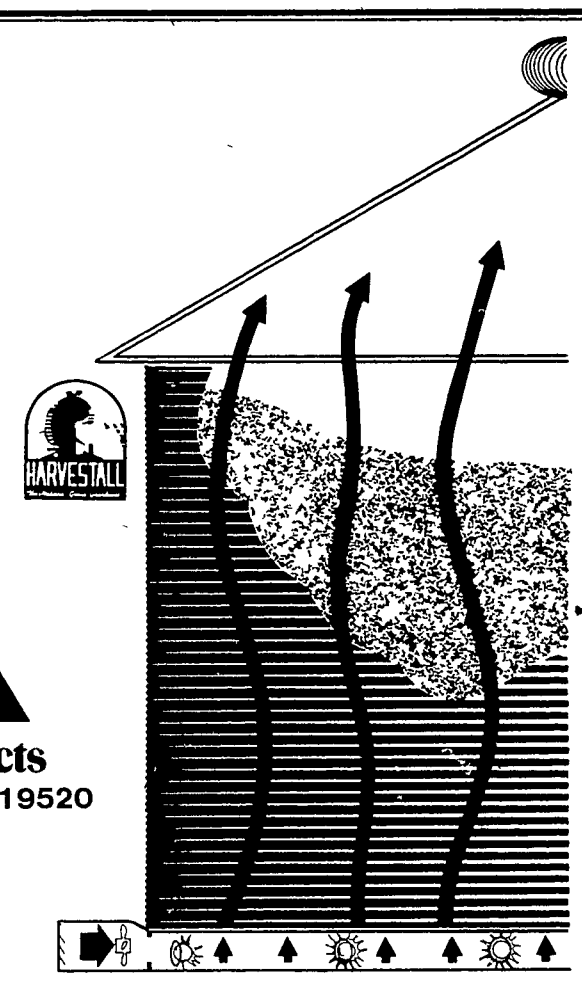
County Extension Agent, Robert J. Kessler, received a $50 check donated by John Deere, sponsor of the national 4-H conservation program.

The cash award will be used for the advancement of countywide 4-H activities in conservation. Franklin County was among 16 counties nationwide selected by the Cooperative Extension Service to receive conservation awards, arranged by National 4-H Council.

Franklin County 4-H'ers concentrated on soil and water conservation practices. They took field trips to water sheds, a water treatment plant, a state part and a land fill. They also made exhibits and posters sharing their knowledge with school and community groups.

YOU'VE HEARD THE TALK.

There's a better way to dry grain. It's called CHILLCURING™ because it means CURING without heat. Here's what the talk is all about.



THE GRAIN

Every kernel of grain is alive when it comes out of the field. It is a seed, able to grow because it has the ability to take on moisture. Likewise, it can be kept in a state of preservation by removing the moisture already in it.

But by heating the grain to dry it, the seed life is destroyed.

By *removing* heat and moisture from the grain, it becomes dormant, and stays alive. Then it can ripen to full weight, losing only water while keeping valuable protein, starches and sugar.

THE SYSTEM

It's simple. Grain goes from the field right to the bin. With the unique AIRFRAME™ and AIRFLOOR™ the grain rests on a solid bed that allows maximum ventilation.

Clean dry air is the best curing medium for the grain. GRAINLAMPS™ provide electric sunshine, cleaning and drying the air beneath the floor, before it passes through the grain.

Fans force air under the floor Rising through the grain, this dry outside air carries away moisture and heat.

At the peak of the bin a jumbo 40" turbine, the WHIRLCOOLER™, puts nature to work for you. Wind and rising air keeps it turning, venting the system naturally.

A special HARVESTAT™ Control System monitors the curing process. A simple setting controls the GRAINLAMPS™ to make use of free, natural air.

Advanced Ag Products
RD 2 Box 174 Elverson, Pa. 19520
215-286-9118

THE FACTS

1. You can't beat Nature. HARVESTALL GRAIN CHILLCURING™ uses the same elements that ripen and preserve grain if left to itself: free flowing air and infra red rays (sunshine).
2. CHILLCURING™ has been tried and proven in 17 states on over 3000 farms. The research is in: CHILLCURING™ WORKS!
3. The CHILLCURING™ system uses only the electricity to power fans and lights, using about 1½ KW hrs. per bushel. Compare that cost to other systems that use increasingly expensive fuels to get disappointing results.
4. The grain goes from the field to the bin and stays there till you need it. Save time and money at harvest with the one step HARVESTALL CHILLCURING™ and storage system.
5. If you're in the market for grain storage, you owe it to yourself to look further into HARVESTALL GRAIN CHILLCURING™.

Culture a new friendship with sourdough

The term sourdough brings with it all the color and romance of cooking from days gone by.

Out on the trail, the camp cook guarded the sourdough starter with his life. Without that starter, the pancakes would be tough, the muffins would be flat, and life would not be worth living for the cook who had to satisfy the appetites of surly, hungry cowpokes.

In today's use, sourdough brings cooking to the top as an artform. The starter must be lovingly cultured, fed frequently, and always provided for like a cherished family guest.

Included in this week's selection, are recipes for the starter and tips for handling and feeding it as well as recipes for the finished products

What better time than now on the eve of Spring to learn a new form of baking or to get reacquainted with an old friend.

When working with sourdough, it's necessary to remember you are using live bacteria as leavening. Therefore, your success is determined by handling the starter cautiously at all times to prevent killing the bacteria.

Always use clean stoneware, plastic or glass containers and utensils. Never use metal, as metal will kill the bacteria.

Handle the starter in a clean environment so that the bacteria you culture do not have to compete with bacteria you introduce accidentially.

It's equally important to remember that these living organisms need to be fed. If the starter isn't used within ten days, feed it by adding 1 teaspoon of sugar. Repeat this procedure every ten days.

SOURDOUGH STARTERS

1 package active dry yeast
½ cup warm water (110 degrees F.)
Soften the dry yeast in the warm water.
2 cups warm water
2 cups all-purpose flour
1 tablespoon sugar

Stir water, flour and sugar into the yeast and beat until smooth.

Cover with cheese-cloth and let stand at room temperature until bubbly, 5 to 10 days. Stir 2 to 3 times each day. A warmer temperature speeds fermentation.

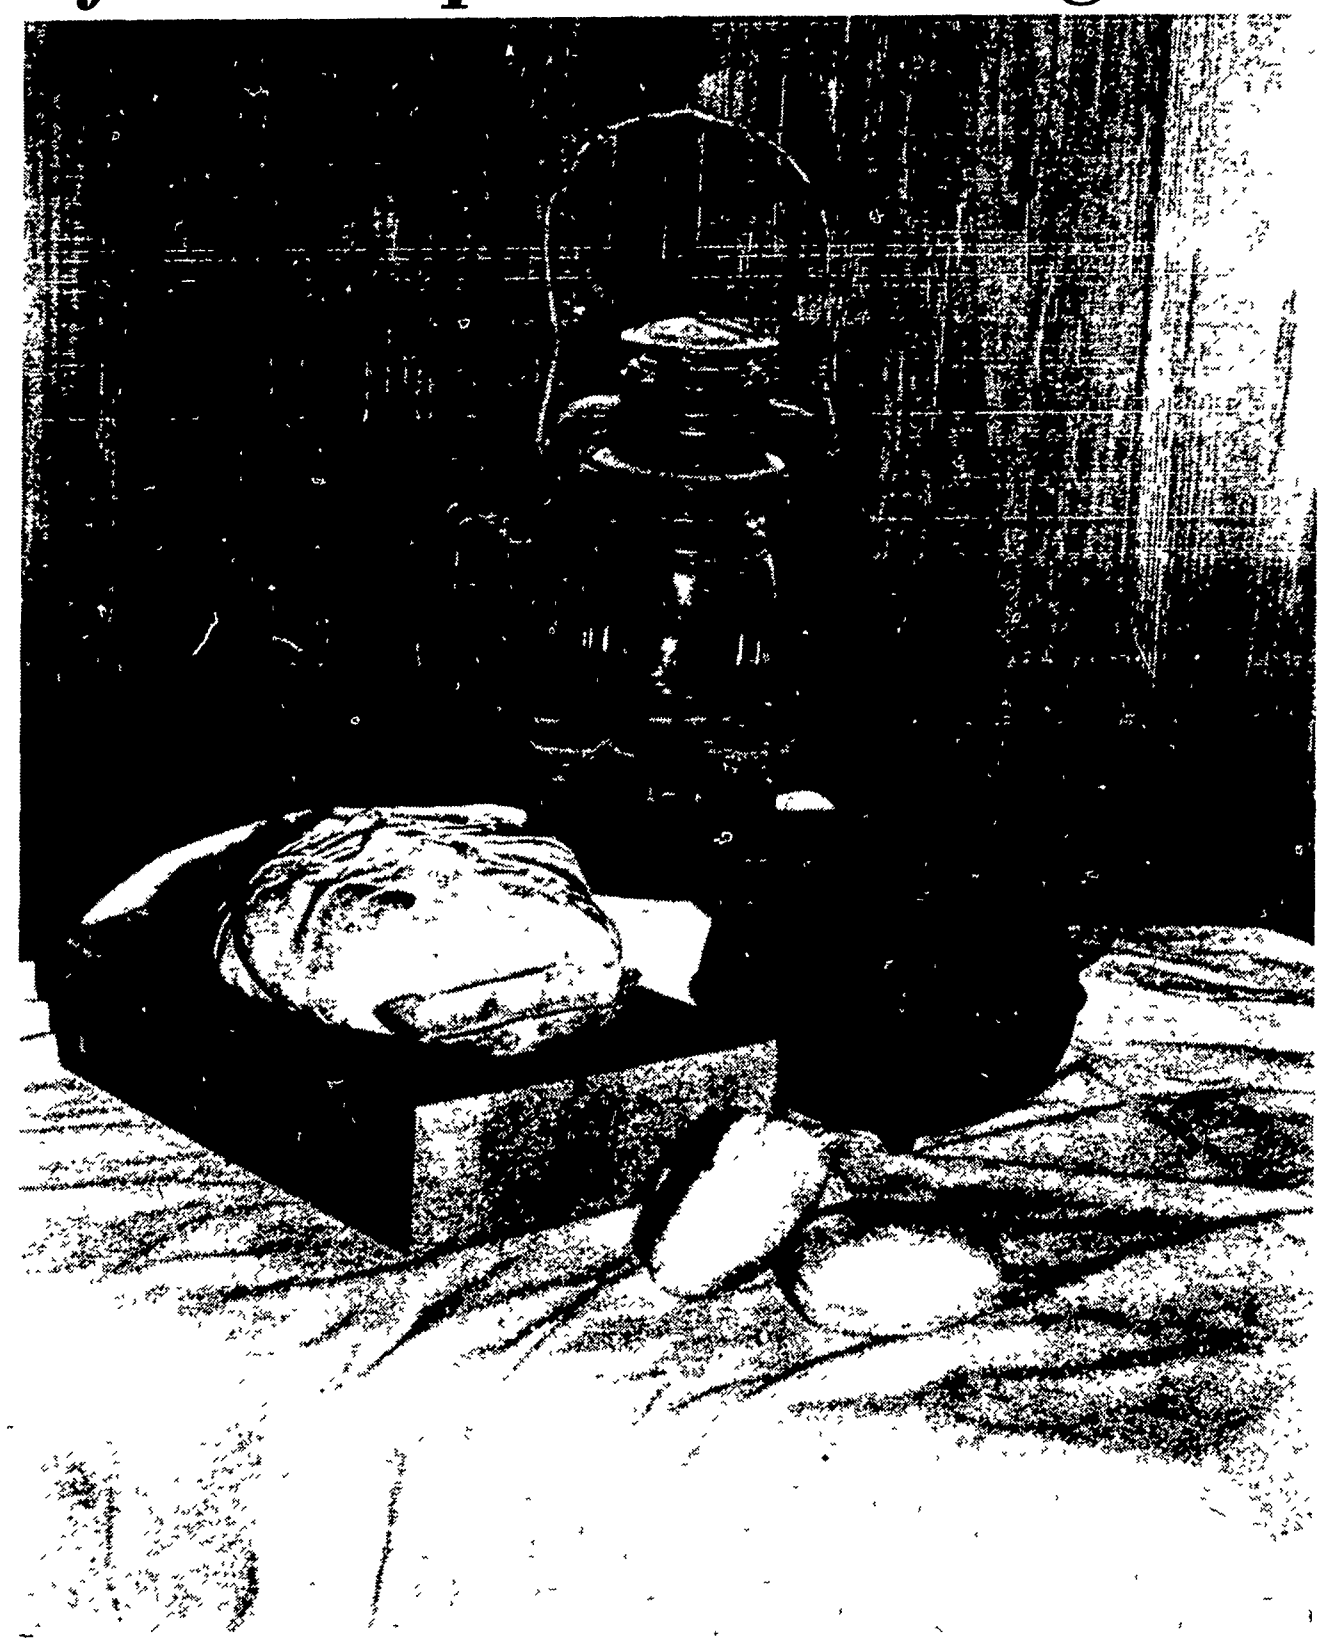
Store covered in refrigerator. To use, bring to room temperature.

Mrs. Glenn Love, East Waterford
Mrs. Carol Krout, York

1 tablespoon dry yeast
2 cups flour
1 teaspoon sugar

Mix all and let stand at room temperature for 12 hours, then refrigerate.

Mrs. Verna Foster, Huntingdon



Sourdough bread transports family meals into an era long past and is an ideal addition to a winter menu of warm soup enjoyed by the light of a lantern.

WANTED: RECIPES!

Home on the Range is your recipe column! We need recipes for the following themes which will be features in the coming weeks. Send your recipe to Lancaster Farming, Home on the Range, Box 366, Lititz, Pa. 17543

MARCH

8	Maple Sugar Recipe Deadline February 29
15	Hearty Soups Deadline March 7
22	Easter Candy Deadline March 15
29	Ham Recipes Deadline March 22

2 yeast cakes or 2 packages of dried yeast
2 teaspoons sugar
2 cups lukewarm water; or ½ cup milk, scalded and ½ cup water
4 cups flour

Add everything but flour and stir until smooth. Sift the flour twice, add all at once, and beat to smooth the batter.

Keep in a warm place for a day and a half when it should be yeasty and fermented. The first bubbling may calm down, but it is still good.

Syl Ruoss, Blain

After using some of the starter, replenish it by feeding by one of the following methods.

¾ cup flour
¾ cup water
1 teaspoon sugar

Stir into starter and let stand at room temperature until bubbly, at least 1 day.

Mrs. Glenn Love, East Waterford

1 cup flour
1 cup milk
½ cup sugar

Take out what starter is needed before feeding Feed it every week or it will die. Never let the dough get down to less than 1 cup Do not use it the same day you feed it or it will die Stir once each day

Verna Foster, Huntingdon

SOURDOUGH PANCAKES

2 cups flour
2 cups lukewarm water
½ cup starter
1½ tablespoons sugar or honey
1 teaspoon salt
½ teaspoon baking powder
3 tablespoons cooking oil
2 eggs slightly beaten
½ teaspoon baking soda dissolved in 1 tablespoon water

Mix flour, water and starter in a glass bowl. Cover with a towel and let stand in a warm spot overnight.

Next morning, add other ingredients and cook pancakes on a lightly greased griddle. This makes a thin type of pancake with a delicious sourdough taste.

Peggy Horner, Hampstead, MD

SOURDOUGH BISCUITS

1 cup starter
1 cup flour
¾ teaspoon soda
¼ teaspoon salt
⅓ cup oil

Mix and drop by teaspoonfuls on greased baking sheet Bake 10 to 12 minutes at 350 degrees F. Makes 1 dozen

SOURDOUGH BREAD

2 cups starter
2 tablespoons sugar
1 teaspoon salt
2 tablespoons shortening, melted
8 cups flour
¼ teaspoon soda
1 tablespoon boiling water

Put the starter into a medium size prewarmed bowl. Add to it the sugar, salt and shortening. Stir just enough to combine ingredients.

In a large bowl, sift 4 cups of flour and make a well in the center. Pour the batter into it and work the batter with your hands, drawing in the flour little by little until the mixture forms a workable ball of dough.

On a floured board, knead into the dough enough flour so that is workable but not stiff. The dough should be smooth and elastic.

Grease a large bowl well and put the dough in, turning so the entire surface is well greased to prevent a crust from forming. Set aside in a warm place overnight.

Dissolve the soda in boiling water, add to the dough and knead well (about 20 minutes). Set aside to rise until doubled in bulk (about 2 hours). Form dough into 2 or 3 loaves in pans and let rise again for 30 minutes.

Bake at 400 degrees F. for 10 minutes, then reduce heat to 375 degrees and continue baking for 40 minutes. Remove from oven and cool completely on wire racks.

Ruth Ruoss, Blain

BLUEBERRY SOURDOUGH PANCAKES

1 cup starter
2 cups lukewarm water
2½ cups flour
2 eggs
2 tablespoons sugar
⅓ cup milk
1 tablespoon shortening
½ teaspoon salt
1 teaspoon baking soda
½ cup blueberries

Combine the starter, water and flour. Let stand in the bowl overnight. Stir in the rest of the ingredients and beat thoroughly. Let the mixture stand for 10 minutes, then fry on a lightly greased griddle.

Mrs. Leon Rex, Slatington

PEPPERNUT COOKIES

½ cup margarine
1 cup brown sugar
½ cup white sugar
2 eggs
1 cup starter
¾ teaspoon soda
½ teaspoon cream of tartar
2½ cups flour
2 teaspoons nutmeg

Sift together soda, cream of tartar, flour, and nutmeg. Mix with remaining ingredients and drop by teaspoonfuls on greased cookie sheet. Sprinkle with sugar and top with a raisin. Bake at 350 degrees F. for 12 minutes.

Verna Foster, Huntingdon

SOURDOUGH WAFFLES

1 cup starter
1 cup flour
¾ teaspoon soda
¼ teaspoon salt
2 tablespoons sugar
1 teaspoon baking powder
⅓ cup oil
2 eggs
½ cup milk

Mix all together and bake in greased waffle iron.

Mrs. Kenneth Zimmerman, Frederick, MD

SOURDOUGH HOTCAKES

2 cups starter
2 eggs
2 teaspoons sugar
2 tablespoons oil
½ teaspoon salt

Cream eggs and oil, add salt, sugar and starter and beat well. Let batter stand a few minutes. Cook on a hot, lightly greased griddle. Serve hot.

UNIPEL® 13-34-10
fertilizer can get your corn crop off to a super start:

It has a high concentration of water-soluble Phosphorus that gets to young seedlings quickly Helps plants establish a good root system – the starting point for top yields Its quick-acting and long-lasting Nitrogen team up to feed the young plants for full yield potential, continually from sprouting to harvest

This is the Starter Special that corn growers know from good experience It's highly effective as a banded starter. And it's SAFE no chance of ammonia damage to tender, young seedlings when used as a "pop up" and applied directly with the seed at 50 lbs /acre

How can we fit UNIPEL 13-34-10 into your corn fertility program?

SOURDOUGH DOUGHNUTS

½ cup starter
½ cup sugar
2 tablespoons shortening
2 cups flour
1 teaspoon baking powder
2 egg yolks or 1 whole egg
½ teaspon nutmeg
½ teaspoon baking soda
½ teaspoon salt
⅓ cup sourdough milk or buttermilk

Sift dry ingredients, stir in liquids. Roll out and cut. Heat oil to 300 degrees F. and fry. Makes approximately 17 doughnuts.

Carol Krout, York

HERMAN CAKE

2 cups starter
2 cups flour
1½ teaspoons cinnamon
1 cup sugar
⅔ cup oil
1 cup raisins
½ teaspoon salt
½ teaspoon soda
2 teaspoons baking powder
2 eggs
1 cup nuts

Mix well and pour into a greased, and floured pan 15 x 10 x 1. Add topping.

1 cup brown sugar
1 tablespoon flour
1 teaspoon cinnamon
¼ cup melted butter

Bake at 350 degrees F. for 30 to 40 minutes.

Mrs. Glenn Love, East Waterford

CINNAMON BUNS

1 cup starter
2 cups flour
4 tablespoons oil
1 teaspoon baking powder
1 teaspoon salt
1 package yeast dissolved in ½ cup warm water

Put all ingredients into a bowl and mix. Cover and let stand about 1 hour. Knead down in the bowl, adding enough flour so dough is not sticky. Let rise again for about 1 hour.

Roll onto a floured board to ½ inch thickness. Spread with margarine, brown sugar and cinnamon. Roll up and cut into pieces ½ inch thick.

Make a syrup using:
1 cup brown sugar
3 tablespoons water
4 tablespoons margarine

Cook until sugar melts, then pour syrup into pans. Put cut pieces of dough into pans and let rise about 45 minutes. Bake at 350 degrees F. for 20-25 minutes.

Dorothy Whitenight, Danville

NO-KNEAD SOURDOUGH BREAD

1 cup water
½ cup milk
5 cups flour
2 teaspoons salt
2 tablespoons sugar
1½ tablespoons butter
1½ cups starter
2 tablespoons corn meal

Bring water to a boil. Mix in milk and cool. Mix flour with salt and sugar in large bowl. Make a well in flour, mixing liquid with starter and pour into well. Add melted butter and blend to a soft dough. Do not knead.

Cover, let rise in warm spot for 2 hours and place on a floured surface. Roll half the dough into a large rectangle. Roll up like a jelly roll. Repeat with second half of dough.

Sprinkle corn meal on aluminum foil. Place loaves with smooth side up. Cut diagonal slits every few inches across the top of the loaves.

Cover the loaves and let double in size (about 1 hour). Bake in 375 degree F. oven for 15 minutes. Reduce heat to 350 degrees and bake for 30 minutes until bread is golden brown.

B. Russell, Pine Bush, N.Y.

Country cooks 4-H cheers elderly

FLEMINGTON, N.J. — on Valentine's Day, the Country Cooks 4-H Club took little red and white heart shaped baskets filled with cookies and candies to guests of the Foothill Acres Nursing Home in Neshanic.

The senior members made heart shaped mints and weaved the baskets at their meeting, and the junior members made decorated heart shaped cookies at their meeting.

Donna and Karen Cole played the piano and Bobby Ludden played the violin to entertain the guests. Each member handed out baskets to the guests. The guests seemed to enjoy the contact with the 4-H members and really enjoyed receiving the homemade goodies.

On February 19 the Country Cooks senior group held a breakfast for their fathers to complete their second unit in cooking at the Three Bridges Reformed Church Chapel.

The group served scrambled eggs, bacon, blueberry muffins, coffee, hot chocolate and orange juice.

Junior Cooking Edition

From sweet cheese to monster cookies, our recipes this week are a sampling from the cupboards of our young cooks.

The recipes range from simple such as the Michigan Rocks to more complex as in the Potato buns and cooking them should be a relaxing activity for a weekend or after school.

SWEET CHEESE

1 gallon milk
3 eggs
1 pint buttermilk

Bring sweet milk to a boil. Remove from heat. Add 4 eggs with 1 pint buttermilk and stir until it curdles. Pour into cloth and drain off whey. Yields between 1 and 2 pounds.

Mary Ann Martin, Age 6, New Holland

FROZEN BERRY FLUFF

2 cups (1 package) crisp graham crackers
5 tablespoons butter
2 egg whites
1 tablespoon vanilla
1 1/2 cups sugar
2 cups fresh berries (strawberries, raspberries or blueberries)
1 cup heavy cream, whipped

Mix cracker crumbs and butter. Press into buttered 9 x 13 inch pan. Bake at 350 degrees F. for 8 minutes.

Beat egg whites and vanilla slightly in large bowl. Gradually beat in sugar and berries. Beat at high speed 12 to 15 minutes until mixture is fluffy and has large volume.

Fold in whipped cream and spread over crumb crust. Freeze overnight. Cut into squares or wedges to serve. Makes 13 x 9 inch pan full.

Barbara Fisher, Age 11, Paradise

POTATO BUNS

2 packages yeast
1/2 cup warm water
3 eggs
3/4 cup sugar
1/2 cup mashed potatoes
1/2 cup butter or margarine
3/4 cup warm water
1 teaspoon salt
6 cups flour

Measure flour into large bowl. Dissolve yeast in ½ cup warm water. Mix all other ingredients together except flour. Add yeast to the mixture.

Pour mixture over the flour and mix well. Cover and let rise in a warm place. Knead a little and shape into buns.

Place onto greased cookie sheets. Bake on middle shelf at 375 degrees F. for 10 minutes. Serves 25 to 30.

Susie Stoltzfus, Age 13, Trout Run

VINEGAR CANDY

2 cups sugar
1/2 cup vinegar
2 tablespoons butter

Combine ingredients and cook until mixture is brittle when dropped into cold water (270 degrees F.) Pour onto buttered plates. Mark into squares while warm or roll into small balls.

Arlene Zeiset, Age 11, Narvon

MICHIGAN ROCKS

1 1/2 cups granulated sugar
1 pound fine cut up dates
1 1/2 teaspoons soda
5 teaspoons hot water
1 cup melted margarine
4 beaten eggs
3 cups flour
1 teaspoons cinnamon or vanilla
3/4 cup fine nuts

Mix sugar, dates, soda and hot water. Add shortening and eggs and mix. Mix flour and flavoring with other ingredients, then add nuts. Bake at 350 degrees F.

Rachael Stoltzfus, Age 13, Witmer

MONSTER COOKIES

12 eggs
2 pounds brown sugar
4 cups white sugar
1 tablespoon vanilla
1 tablespoon molasses
8 teaspoons soda
1 pound butter (do not substitute margarine)
3 pounds peanut butter
18 cups oatmeal
1 pound chocolate chips
1 pound M & M's

Preheat oven to 350 degrees F. Mix in a dishpan in the order given.

Drop by large tablespoonfuls and flatten. Place about 6 on each cookie sheet. Bake for 12 minutes. Do not overbake. (This recipe does not call for flour).

Marlene Zimmerman, Age 18, Millmont

Feathered Friends meets

FLEMINGTON, N.J. — The Feathered Friends 4-H Club met at the home of Mrs. Marty Woske in Stanton in February.

The club purchased a scrapbook for the committee to work on the rest of the year and members brought in pictures of their project for the scrapbook.

A new waterfowl record book was passed out to members for their use.

David Plum gave a demonstration on Raven Ducks.

The 4-H Window Display Committee is working on their theme, which will be ready for setup by March 1.

The next meeting will be held on march 10 at the home of Mrs. Woske. The topics for discussion will be demonstrations and club by-laws.

Is that sale blanket a bargain?

WEST CHESTER — Check end of season sales before buying a new blanket. There are a variety of styles, fibers, patterns and colors to choose from.

Nap is one of the most important features to check in selecting a blanket, because it contributes to warmth.

Air and heat from the body are trapped by the air cells in the nap of the blanket to provide a layer of warmth next to your skin. A densely-napped blanket will be warmer.

You can test the quality of a blanket by taking a tiny pinch of the blanket, catching only the nap. Then lift the blanket slightly. If the nap doesn't pull loose, the blanket should be durable.

Check the blanket lining. Nylon is usually recommended because it's colorfast and wears well. Raw edges of binding ends should be turned to prevent raveling. Binding is usually more durable if attached with a zig-zag stitch.

Many fibers are used for blankets. The most common and their general characteristics are:

Acrylic–mothproof, non-allergenic, lightweight, very warm, resists shrinkage and distortion, long wearing, tends to pull and may generate static electricity unless controlled by a finish, machine washable and dryable.

Rayon–relatively warm and lightweight, moth resistant, will shrink or stretch unless carefully handled in washing, has limited wear.

Polyester–warmth without weight, machine washable and dryable, non-allergenic, moth resistant and mildew resistant, will pull or generate static electricity unless a special finish is applied.

Cotton–lightweight, wears well, moth resistant, may shrink unless treated, doesn't take as high a nap as some other yarns.

Wool–very warm, takes high nap, long wearing, needs special finishes to control shrinkages and moth damage, more expensive than some synthetics.

Careers for women discussion slated

MILFORD, Del. — The Ag College Council of the University of Delaware, will sponsor a program on "Women in Agriculture" from 6:00 to 8:00 p.m., Monday, March 3, in the Bessie Collins room of the Student Center.

A panel of five women graduates from the University's College of Agricultural Sciences will speak on their present careers and answer questions from the audience.

The panel includes a soil conservationist, a veterinarian, an entomologist, a farm loan officer, and a laboratory researcher with a major chemical company.

The program is being presented in cooperation with the Office of Women's Affairs. It is designed to provide information for women interested in knowing more about career opportunities in agriculture. There will be a question and answer session.

Recipe Swap

Butter your pans, draw straws for spoon licking privileges, this week we have two fudge recipes.

Using either dairy sour cream or peanut butter, why not try one of the following recipes or try both and choose your favorite.

WHITE FUDGE

2 1/4 cups sugar
1/2 cup sour cream
1/4 cup milk
2 tablespoons butter
1 tablespoon light corn syrup
1/4 teaspoon salt
2 teaspoons vanilla
1 cup coarsely chopped walnuts (optional)
1/3 cup quartered candied cherries (optional)

Combine first six ingredients in a heavy 2 quart saucepan. Stir over moderate heat until sugar is dissolved and mixture reaches a boil. Boil over moderate heat 9-10 minutes to 238 degrees F. (soft boil stage).

Remove from heat and allow to cool to lukewarm (110 degrees F.) Add vanilla and beat until it just begins to lose gloss and hold shape.

Quickly stir nuts and cherries into mixture and turn it into buttered pan. Makes about 1 1/2 pounds.

Mrs. Charles Shushenick, Lake Ariel

WHITE FUDGE AND PEANUT BUTTER

3 cups sugar
3 tablespoons light corn syrup
1 cup milk
2 tablespoons butter
1 teaspoon vanilla
1 cup peanut butter
8 to 10 ounces of marshmallow creme

Cook sugar, corn syrup, milk and butter to soft ball stage. Add remaining ingredients and stir well. Put into buttered pan, 13 x 9 inches.

Jane Blymire, Windsor

Question: I would like a recipe for Pumpernikel Bread.

Mrs. Betty Miller, Penn Yan, N.Y.

Red meat production slips slightly

HARRISBURG — Commercial red meat production in Pennsylvania during January totaled 88.5 million pounds, down three percent from January 1979.

Cattle slaughter at 62,200 head was down 13 percent while calf slaughter at 24,400 head was two percent less than last year.

Hog slaughter at 300,800 head increased eight percent from a year ago. The number of sheep and lambs slaughtered totaled 12,600, up four percent from January 1979.

Nationally, commercial red meat production during January totaled 3.39 billion pounds, up three percent from January 1979.

Beef production at 1.88 billion pounds was down nine percent while veal production at 33 million pounds decreased 20 percent from a year ago.

Pork production totaled 1.45 billion pounds, up 26 percent from January 1979. The 8.42 million head slaughtered was up 26 percent and was a record number slaughtered for the month of January surpassing January 1952.

Is a new strain coming?

Tobacco growers warned to spray for blue mold

COLLEGE PARK, Md. — To head off a possible blue mold epidemic this year an extension plant pathologist at the University of Maryland is urging tobacco farmers to start spraying their plant beds as soon as the seedlings emerge this spring.

Recommended chemicals for this purpose include ferbam, zineb, maneb and Polyram, says Omar D. Morgan, extension tobacco disease specialist and professor of botany at the College Park campus.

Morgan reports that blue mold is a fungus which attacks all types of tobacco and related garden plants, such as eggplant. Last year, he noted, the disease caused an estimated loss totaling more than a quarter of a billion dollars to the U.S. and Canadian tobacco crops.

In southern Maryland, losses are estimated at more than $5 million.

Morgan believes blue mold will return again in 1980 if the weather is cool and damp.

There is now the added worry that this may be a new strain of blue mold.

"But it's really too early to tell," the Maryland Extension specialist said recently. Backing up his concern were some unusual developments during the 1979 blue mold epidemic in southern Maryland.

"Last year was the first time that blue mold was found in the fields. The disease also went systemic, attacking tobacco plants internally. When this happens, chemical measures are ineffective," Morgan noted.

New this year will be a national blue mold early warning system. Dr. Morgan will be the liaison person for Maryland. Tobacco farmers should report any suspected cases of blue mold infestation to their county Extension agent, who will notify Morgan immediately.

Blue mold has occurred sporadically in southern Maryland tobacco plant beds since 1931. But until last year it had not proved serious for over a decade. The fungus disease usually starts each spring in the South, and the spores are blown north by prevailing winds.

The disease thrives in cool, moist weather. Prolonged temperatures above 86 degrees will stop spore formation, which spreads the disease.

In tobacco beds, blue mold attacks the upper surface of damp, young plant leaves. Here the spores germinate, with the fungus eventually boring through to the underside of the leaf, causing it to yellow and wilt.

Courses offered in draperies and wallpaper

WEST CHESTER — The Chester County Extension Service is offering classes in Draperies and Wallpapering.

The Draperies Course will be held on Thursdays, March 6, 13, 20, 27, April 10 from 9:30-11:30 a.m.

The series of five meetings is concerned with fabric selection, how to measure and construction techniques. A variety of top of the window treatments will also be included. The instructor will be Doris Hoag. Registration is due Monday, February 25, 1980.

The Wallpapering course will be held on Mondays, March 10, 17, 24 at two different times of day from 1:00-3:00 p.m. and 7:00-9:00 p.m.

Learn the basics in the process of papering your walls. Instruction will include measuring and selection; patching walls and preparation; actual application; materials needed and their use. There will be an opportunity to practice the techniques for the wallpapering process. The instructor will be Linda Heim. Registration is due Monday, March 3, 1980.

The classes will be held at the Extension Office, 235 W. Market Street, West Chester, PA 19380.

There is a small fee for each course. For further information write or call the Extension Office at (717) 696-3500.

Penn Manor FFA's farm tour a hit with city youngsters

BY SALLY BAIR
Staff Correspondent

MILLERSVILLE — The Future Farmers of America's Penn Manor Chapter took advantage of FFA week to share the story of farming with some very young consumers.

Seventy-two second graders from Price Elementary School in the Lancaster City School District were bussed to the Melvin Shertzer farm, Walnut Run Road, Millersville, for a visit which proved to be educational to both groups of students.

The youngsters, and their teachers, were obviously delighted. It was a mild, sunny winter day which was perfected for romping on a farm. Madge Bradigan, one of the teachers, said, "A few of the children have been to farms, but most have never had the chance to touch cows and other animals." She added that while the children are not currently studying agriculture, a unit on it will be coming up before the end of the school year.

According to Kay Shertzer, assistant vice-president of the Chapter and one of the organizers of the second grade visit, the group purposely decided to invite a city school instead of one in the district as they had done last year. About 25 FFA members helped, and Kay said they all arrived an hour ahead of the youngsters to get in position and understand how the group would rotate positions.

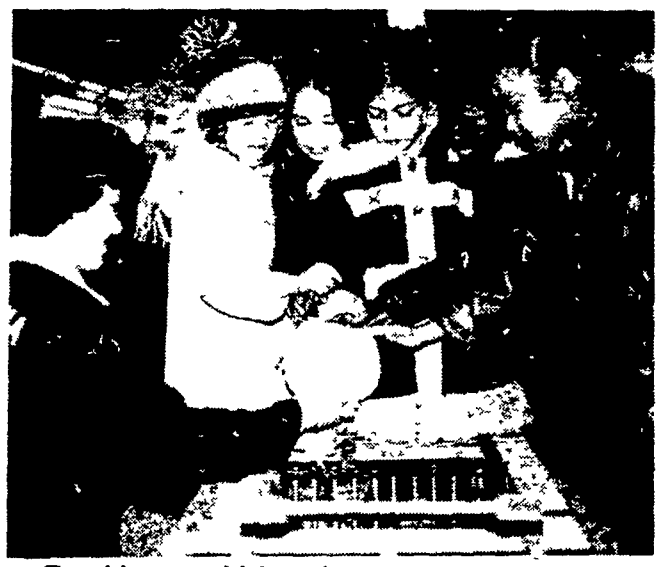
The close organization paid off, because the morning's activities went smoothly. With FFA members escorting the groups, the children were encouraged to touch the animals and to ask questions. Basic, simple information was provided on each animal.

Kay, whose farm they were visiting, led her Holstein heifer, Oneida and explained, "She is 18 months old. I walk her and brush her every day." The she encouraged the children to pet Oneida, who cooperated splendidly as the little hands shyly reached up to pet her.

An Angus-Hereford crossbred steer was a little less willing to be touched, but the children learned that he weighed 700 pounds and would someday be made into roasts, steaks and hamburgers. There were many giggles as the steer provided its own entertainment by bawling loudly.

Three FFA projects were imported to the Shertzer farm for the occasion.

(Turn to Page C17)



Touching a chicken is not an everyday experience for most city children. Here second graders from Price Elementary School take advantage of their first chance. The only question was, "Why doesn't she lay an egg?"

A wooly lamb is a delight to dig your fingers into. These second graders patted and felt, while learning that the ewe will give up her wooly coat to make wool for sweaters and other clothing.

Kay Shertzer holds one of her project heifers while some second graders from Price Elementary School gently pet "Oneida"

Penn Manor FFA

(Continued from Page C16)

leghorn chickens, which the children eagerly reached for; some small pigs, which few dared to touch; and a sheep which was the star of the day. The children eagerly dug their fingers deeply into its woodly hide, while patient FFA members explained that it is sheared for its wool which is, in turn, turned into sweaters and other warm items which the children might wear. Of special interest to the children was why the ewe appeared to be breathing so hard. It was explained that the sheep was accustomed to being outside and not held in a barn. Delia Ruiz, 8, said the sheep was her favorite animal.

The baby calves were the object of much interest, but the cows receiver a longer explanation. The children were told that the cows drink about 40 gallons of water daily and eat up to 70 pounds of feed. They were also informed that cows milk up to 90 pounds of milk and are milked twice daily, and that they calve once a year. The plastic pipeline was pointed out.

Seven-year-old Brett Lindemuth noted, "The fat and big cows are the best. Sara Rohrbach, 8, said she had been on a farm before, but added, "I am surprised how big the cows are."

It was not all new information for the children. Nilda Roman, 7, said it was her first time on a farm, but said that she had known where milk came from before the visit.

When they came to the milk house, Shertzer told the children that the bulk tank was used to cool the milk to 36 degrees and hold it until the milkman picks it up daily to take it to the processing plant.

Jay McMichael, chapter sentinel, told the children what they could expect before they left the bus, including the fact that the Shertzers farm 270 acres and milk about 70 dairy cows. They also have 30 heifers and about 35 head of beef cows.

The children remained enthusiastic throughout the morning, and many little girls became attached to the patient young men and women who tried to answer all their questions. They were given a brief look at the haymow and into the tobacco shed.

Chanon Brinson, 7, was one of the few children who was allowed to sit on the tractor. It was a new experience for him, and one he obviously relished.

Ronald Morris, 8, and Jim Sumner, 7, agreed that the best part of the visit was "petting the animals." Candy Riegel, 8, was one of the few who said she liked the pigs because they were cute.

Despite their enthusiasm for the animals, it couldn't match the enthusiasm shown by the youngsters when they got to the last part of their visit and were treated to cookies supplied by the FFA Chapter, and milk, supplied by Shertzer. They were thrilled with the treat.

Chanon Brinson, 7, was thrilled to sit on the huge tractor at the Shertzer farm. It wasn't his first visit to a farm, but it was the first time he took the wheel of such a large tractor.

As they boarded the bus for the return to Lancaster, Chapter members presented each child with a nine-page booklet of mimeographed farm scenes and farm animals to crayon.

Jeff Burkholder explained the FFA members feelings, "It is a special day for the children. It shows the city kids what the farm is like."

Mrs. Peggy Rill, one of the teachers, said, "Two years ago they came to the school with animals, but this is really a super thing they are doing. It is really interesting."

CERTIFICATE OF MERIT HERDS

Atlantic Breeders was pleased to honor these herds at our recent membership meetings. All had 1979 DHIA herd averages that were at least 15 percent above the state average for milk and fat production, and consisted of at least 65 percent Atlantic-sired cows.

Farm groups sound alarm on budget gaps

WASHINGTON, D.C. — The National Council of Farmer Cooperatives and a coalition of farm groups are urging stronger congressional support for agricultural research and development with a minimum 13 percent increase for the 1981 USDA research budget.

Increasing farm and food production and marketing efficiency, they stressed, is crucial in dealing with our most urgent national problems such as security, inflation, and international trade deficits.

In a letter to members of the House and Senate Committees on Appropriations, Agriculture, and Budget, the farm groups noted their request is equivalent to the 13 percent increase for all government-sponsored research and development recommended by the Carter Administration.

The coalition pointed out the Administration has recommended a 1980 agricultural R&D budget increase which is less than half the average increase proposed for all types of research

The farm groups said that agriculture is being treated inequitably when compared to budget requests calling for an 18 percent increase for the National Science Foundation, a 38 percent increase for labor R&D, and a 17 percent average increase for 17 smaller federal agencies.

One of the critical problems facing agriculture, according to the coalition, is a drop in productivity growth after outdistancing other segments of the economy for many years.

"During the last decade, we have seen a 40 percent drop in the rate of increase in agricultural productivity," said NCFC President Kenneth D. Naden "This trend must be reversed."

Naden said basic agricultural research and related extension and teaching activities by USDA and state land-grant institutions have been major contributors to the tremendous success of American agriculture during the past century.

"However," he added, "federal funding for these programs hasn't kept pace with inflation or needs in recent years. It's vital that we act to correct this alarming decline."

The farm groups said increased agricultural research and development should be high on the agenda of national priorities because: 1) An increasingly efficient food production and distribution system is critical to U.S. security and to our fight against inflation; 2) One of every five jobs in the U S is involved in the food and fiber industries; and 3) Exports of more than $30 billion in farm products are the largest single positive contribution to our U.S. international balance of payments.

Naden pointed out research efforts in such prominent areas as alternate energy sources, photosynthesis, conservation tillage, distribution efficiency, integrated pest management and nitrogen fixation are widely recognized as being among our most urgent national needs.

Noting the nation's vital interests are at stake, the coalition concluded with a strong plea for long-term strengthening of federal support for agricultural research It is the only way, said the coalition, to help agriculture keep its edge and halt the decline in growth of productivity in our food and fiber industry.

Farm groups signing the letter were: National Council of Farmer Cooperatives, National Grange, American Soybean Association, The Fertilizer Institute, National Broiler Council, National Cattlemens Association, National Cotton Council, National Milk Producers Federation, National Association of Wheat Growers, Poultry & Egg Institute of America, Rice Millers Association, and United Fresh Fruit & Vegetable Association

Penn State to release new varieties

UNIVERSITY PARK — New varieties of plants and seeds available this year include three developed by scientists of the Agricultural Experiment Station at the Pennsylvania State University.

The three are Nittany apple, Pa6203 hybrid field corn, and Penneagle bentgrass.

They're a part of the 205 varieties that have been bred, tested, and released over the past 68 years by Penn State researchers, says Guy W. McKee, secretary of the Experiment Station Seed Committee at University Park.

Nittany is a York Imperial type of apple with excellent qualities for the food processing industry, its developer noted. Fruit of Nittany has been free of "corking," a serious disorder of most varieties developed from York Imperial.

The flesh of Nittany oxidies very slowly and imparts a highly desirable color to processed products, it was pointed out.

Trees of Nittany apple are being produced by several nurseries in Pennsylvania. The variety was developed by R.F. Stouffer, G. M. Green, and C. M. Ritter of Penn State and by J. G. Barrat of West Virginia University.

The new Pa6203 hybrid field corn is a medium late maturing variety. It has yielded well in tests throughout the state, McKee said.

Stalk strength of Pa6203 has been excellent, he added. Pa6203 has been double-cropped successfully after winter barley in southeastern Pennsylvania. The variety was developed by M. W Johnson. It is a three-way cross of (Pa763 x Oh545) x A632Ht.

Penneagle bentgrass was developed with one particular objective being to produce a bentgrass free of the common tendency to segretage into a turf dominated by a few plants. Penneagle bentgrass was developed by J. M. Duich.

In various long-term test, Penneagle has consistently produced top quality turf, resisted annual bluegrass invasion. and has been highly resistant to common turfgrass diseases–including several races of leafspot and dollarspot.

Golf course superintendents have tested Penneagle bentgrass on two 18-hole and four 9-hold courses. It has been used additionally on golf courses for nursery trials, practice green, and tees--and for reseeding greens, trees, and fairways. No negative results have been reported to date. Use of new greens in about six weeks was reported by golf course superintendent cooperating on tests.

Seeds and plants of these new varieties are available commecially but not from Penn State, McKee said.

Cumberland Farmers Assn. sets meeting plans

CARLISLE — The Cumberland County Farmers' Association held their monthly board meeting Thursdav at the home of Marlin Miller, Carlisle. President Rodger Hoke conducted the meeting with 11 members present.

There was discussion by each chairman of the membership, insurance, and safemark committees.

The Advisory Council Chairman announced another council getting started in the county. This will make five active councils.

The Local Affairs Committee reported plans are being made for them to be more active this year in the community and a meeting will be held March 4, 7:30 P.M. at the home of the Rodger Hoke.

The Political Education Program held a meeting at the Penn Harris on February 19 and 20. Workshops were held and they were given the opportunity to measure the candidates by hearing them give speeches and being able to ask them questions.

There were 14 candidates running for senator and three for Attorney General Bipartisan present. Everyone is encouraged to register and vote during the elections.

The Woman's Committee Chairwoman, Betty Garman presented their budget and it was approved. She told of plans for a Ladies Day Out on April 2 at the McAlister U.M. Church 11:00-3:00. A turkey dinner will be served and an interesting program will follow. Price is $2 per person and anyone interested may contact Betty at 717/243-4505 before March 24.

The Fifth Annual Spring Meeting will be held March 24, at 7 p.m. at the South Middleton Firehall. A family style ham dinner is being served.

Congressman George Goodling will be the speaker and Connie Harness will have the entertainment. Cost is $3 for adults and $1.50 for 12 and under.

Contact any board member before March 17 for tickets.

They are: Pres. Rodger Hoke 717/766-9597, Fred McGillvray 717/776-7312, Robert Jamison 717/776-7656, Clyde Barrick 717/776-3098, Donald Heishman 717/776-5280, Lee Davidson 717/423-6626, Michael Berkheimer 717/697-8004, Harold Myers 717/776-7451, and Marlin Miller 717/243-3863.

The next board meeting will be held at the home of Harold Myers on March 20 at 8 p.m.

Lehigh Baby Beef Club elects officers

SLATINGTON — Recently the Lehigh County 4-H Baby Beef Club elected officers for 1980.

Officers are as follows: Diana Krause, President; Kenny Ruch, Vice-President; Jane Sikorski, Secretary; Paul Drissel, Treasurer; Debra Krause, News Reporter; Becky Young, Photographer; Willi Wilson, Custodian; and Ralph Danner and Willi and Wilson, County Council delegates.

The next meeting will be held on March 10 at the Krause Farm, 7:30 p.m. A Showing and Fitting Demonstration will be given by the Senior members.

NFU Convention to focus on farming, new leadership

DENVER, Colo. — Farmers from thoughout America will gather in Denver on March 2 through 6 for the 78th annual convention of the National Farmers Union to choose new leaders for the family agriculture organization and to set policy for the next year.

Tony T Dechant, NFU President since 1966, will retire at this convention. Announced candidates to succeed Dechant are George Stone, President of the Oklahoma Farmers Union, and John Stencel, President of the Rocky Mountain Farmers Union.

Announced candidates for Vice President are Stanley Moore, President of the North Dakota Farmers Union, and Dale Lyon, President of the Kansas Farmers Union.

The election and policy debate will be foremost on the minds of delegates during this historic convention. However, an impresive lineup of national and international speakers will be on the agenda.

Some of the convention highlights include:

Two U.S. senators will address the delegates on Monday. They are Senator George McGovern of South Dakota, who will discuss the rural transportation situation, and Senator Birch Bayh of Indiana, Chairman of the National Alcohol Fuels Commission, who will discuss energy for the 1980s.

Tony T. Dechant, NFU President, will address the delegates Monday night. Tuesday night will be devoted to a tribute to Dechant, and he will be presented the award for meritorious service to Farmers Union and agriculture.

W. Dobson Lea, the new president of the Canadian Federation of Agriculture, will discuss the importance of cooperation among grain producing nations Thursday afternoon. Lea is a grain farmer and has been active in Canadian agricultural issues for many years.

Thomas R. Donahue, Secretary-Treasurer of the AFL-CIO, Washington, D.C., will be the banquet speaker Thursday night. Donahue, a long time friend of the Farmers Union, took office when the late George Meany retired and Lane Kirkland, former secretary-treasurer, became AFL-CIO President.

Highlight of the Tuesday afternoon program will be a panel titled "Energy for People." Panelists will include Denis Hayes, Director of the Solar Energy Research Institute at Golden, Colorado; Dr. Barry Commoner, Director of the Center for the Biology of Natural Systems at Washington University, St. Louis, and Jerry G. Tvedt, President of CENEX, the St. Paul, Minnesota based farm supply cooperative.

Jerome Waldie, Director of the 1981 White House Conference on Aging, will speak Sunday night along with Carl A. Larson, newly appointed executive vice president of Green Thumb, Inc.

Jim Williams, Deputy Secretary of Agriculture, Washington, D.C., will discuss farm programs for the 1980s during his speech Monday afternoon.

Randal Torgerson, Deputy Administrator for Cooperatives in USDA's Economics, Statistics and Cooperatives Service will address a special co-op breakfast Wednesday.

Candidates for president and vice president of the National Farmers Union will be nominated Tuesday morning. Delegates will have an opportunity to meet the candidates informally Wednesday evening.

The election will take Thursday morning. The Elections Committee will report the results Thursday night. James G. Patton, President Emeritus of NFU, will install the new president and vice president during the Thursday night banquet.

The convention will be held at the Denver Hilton Hotel.

Cattle on feed off nine percent

WASHINGTON, D.C. — Cattle and calves on feed February 1 for slaughter market in the seven states preparing monthly estimates totaled 7.96 million head, down nine percent from a year ago and eight percent less than February 1, 1978, according to the Crop Reporting Board.

Marketings of fed cattle during January totaled 1.70 million, down nine percent from last year and three percent less than January 1978.

Placements of cattle and calves on feed in the seven states during January were 1.37 million, down 13 percent from a year ago and off 17 percent from January 1978.

Net placements of 1.20 million were down 13 percent from last year and 16 percent from 2 years ago.

Other disappearance totaled 166 thousand compared with 198 thousand in January 1979 and 212 thousand in 1978.

Trouts use their beans to succeed in farming

BY JOYCE BUPP
Staff Correspondent

STEWARTSTOWN — Charles and David Trout, Stewartstown R3, are sold on soybeans. This operation was one of York County's first to go out on a limb a dozen years ago and plant the crop, little known in the East and with limited markets.

Trout liked what he saw in beans. He expanded the plantings, and experimented with new planting and cropping techniques. Today, nearly half of the 500 acres in the operation goes into beans. The rest goes into corn, rotated yearly with the soybeans, with some barley and wheat doubled cropped into beans.

With the ever-soaring costs of seed, fertilizer and crop chemicals, grain farmer profits hinge on good management and weather.

While little can be done about the weather, and irrigation is impractical on the rolling hills, Trout is quick to look for extra insight into making management decisions.

The partnership hires the services of Fertility Associates, Whiteford, Maryland, which specializes in computerized soil management. Field samples are taken by the firm annually with emphasis on checking for tract micronutrients.

In mid-summer, Fertility Associate's technicians are back to the farm, both on the ground, gathering plant samples for tissue culture and scanning for insect infestations, and in the air, snapping infrared photographs. Each photo encompasses about a hundred acres and tattletales on the growing crops in brilliant color.

"If there's any problem at all, it'll show up in uneven color on the prints," explains son David. "We terraced some fields and the heavy equipment running over the soil had compacted it. 'Patching' in the coloration showed up right away. Weed infestations are also visible."

Mulching left on a field that grew a good crop of beans makes a perfect seedbed for no-till corn according to soybean enthusiasts Charles and David Trout. Beneath the cover of shredded stems and pods, the soil in this field adjoining the Trout Valley farmstead was soft and loose.

In spite of heavy rains that deluged neighbors in all directions, much of the Trout-Valley acreage never got an inch of rain through July. Thus, this year's yields ranged anywhere from 75 bushels down to near 20 in fields double cropped after wheat. Average yield per acre was about 45 bushels.

Contrary to traditional planting techniques, Trout sows beans with a seven-inch-row grain drill. He warns that for this purpose a drill should be equipped with depth bands to hold bean placement at one and one-half inches beneath the ground.

Deeper beans may not germinate in dry periods and shallower ones are more subject to herbicide damage

"Closer rows, but greater distance between the seeds, can best utilize the sun," he says.

"Plantings average to about two and a half or three beans per row foot, with less crowding and shading to tiny plants. As the beans grow, the more equal spacing helps to shade weeds and save moisture.

As drilling beans gains in promise and popularity, Trout sees the development of equi-distant planters for more exact seed placement. Some researchers project that equi-distant planting can increase yields up to thirty percent per acre.

Broadcasting nitrogen on a crop that is famous for producing its own nitrogen isn't a waste but a necessity, stresses David. Beans don't form their nitrogen-fixing nodules until they reach a heighth of 6 to 12 inches.

Early access to an extra shot of N makes for a stronger plant with a stiffer stem to keep the pods off the ground. Fields that gave the best yields showed high levels of phosphorus and potash, and a pH level of about 6.2

As sales representatives for Asgrow seeds, the Trouts plant their own brand as well as run a test plot of some of the company's assorted varieties

Field yield was highest with the variety 4268, while variety 3860 won the test plot trials. Charles emphasizes the importance of using bean types with sturdy stalk characteristics, since a strong stalk is likely to produce twice as many beans as one with a weakened stem.

"There isn't a plow on the place," notes Trout, a minimum-tillage supporter A disk is run over the stalk fields as needed to loosen the ground for bean planting.

This year's weed chemical combination will be Lorox and Dual, since a bit less of the Dual can be used while still getting better control of nutsedge.

When the bean acres rotate into the corn the following year, a regular planter is used to no-till the corn into the nearly-perfect seedbed left by the bean crop.

Bean stalk residue, mulched evenly with a straw chopper on the combine, not only leaves the ground ready for spring planting, but adds a pound of nitrogen per bushel of harvested beans as well.

Crop scientists across the country are closely studying the beans-corn rotation benefits. Western universities research studies show corn yields up 17 bushels to the acre on land in beans the previous. And, bean yields increase, but not as dramatically, on last year's corn ground.

Soil tests on the rotation

(Turn to Page C24)

Charles and David Trout examine a soybean sample for signs of problems, like wrinkled beans.

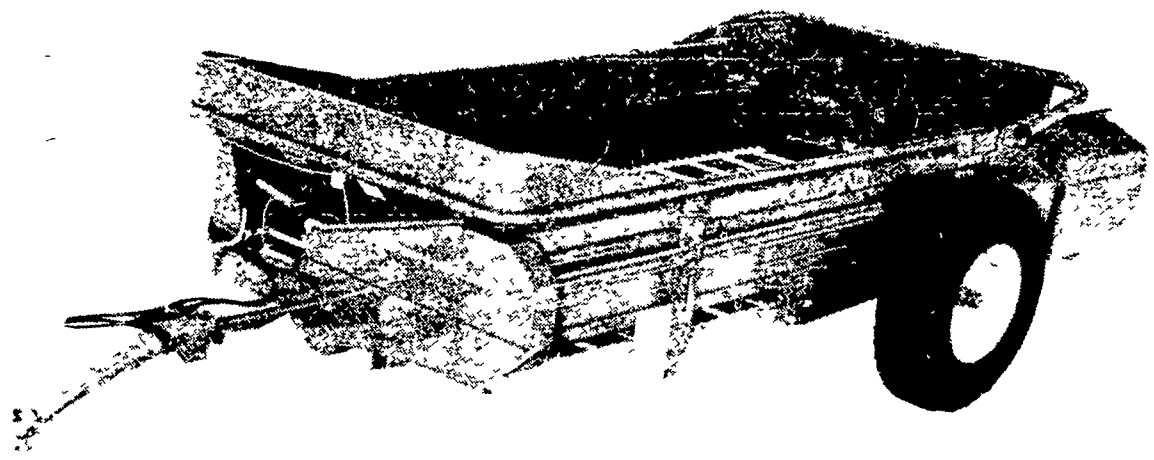
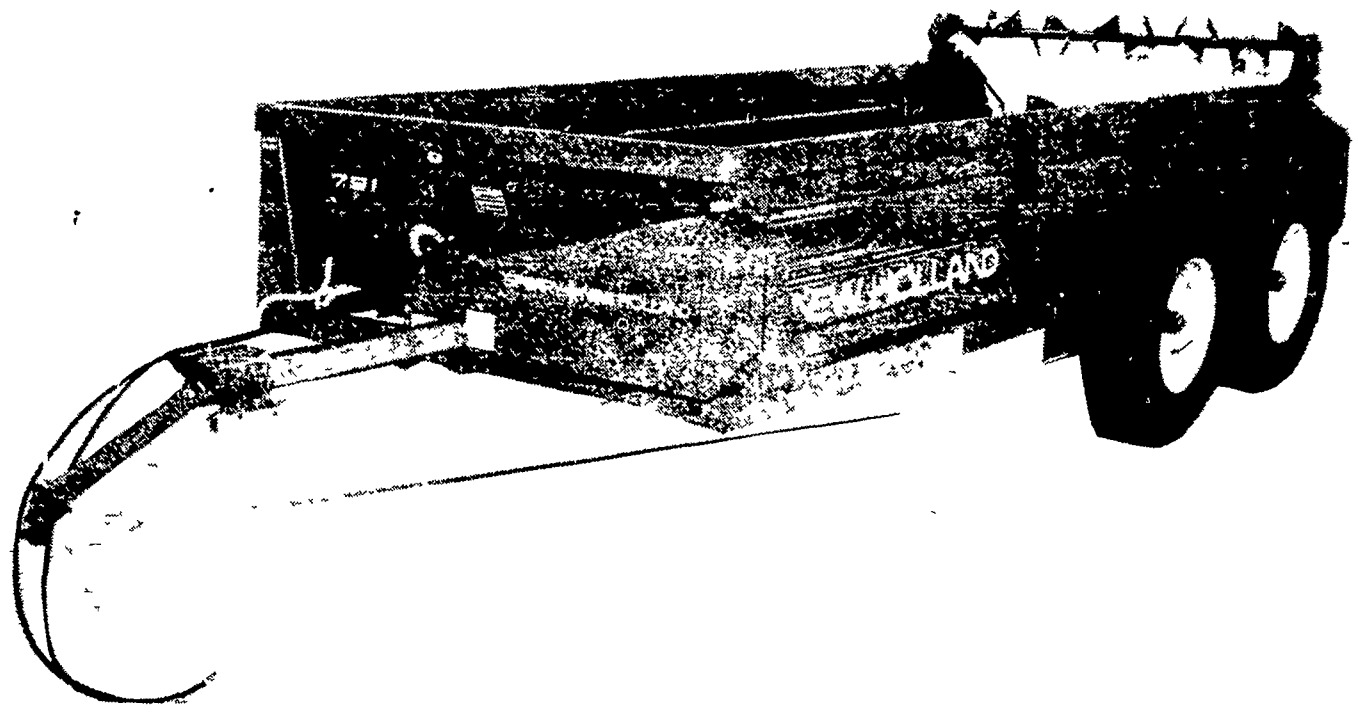
Special spreader clearance

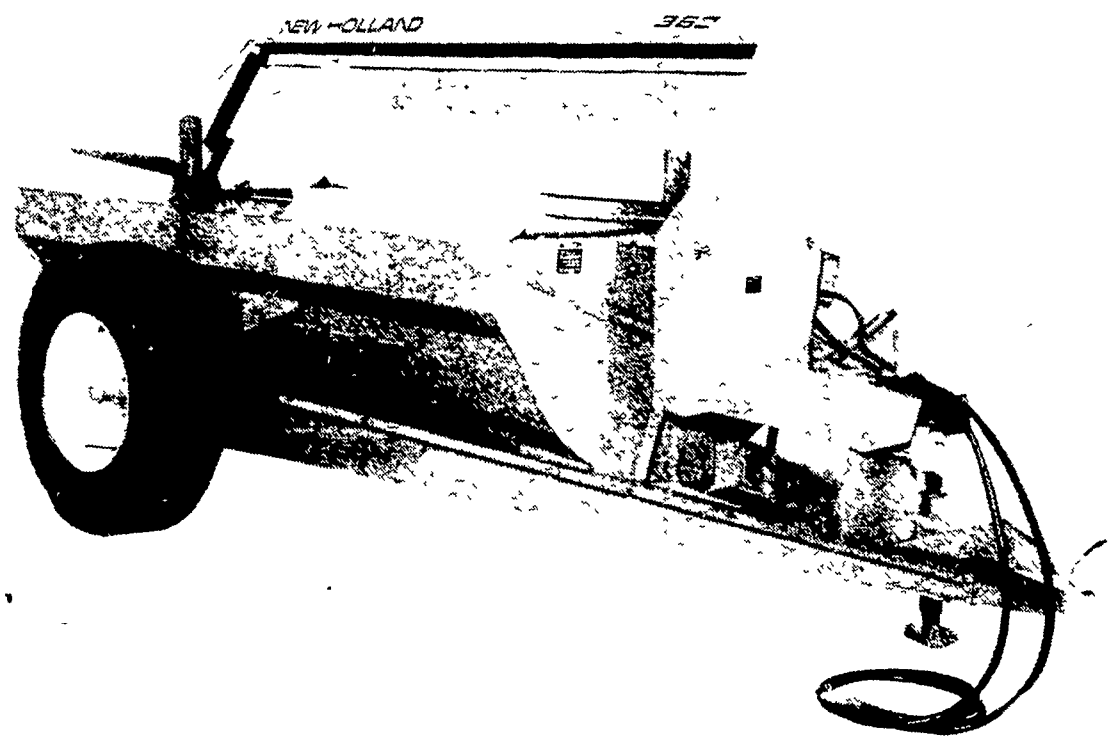
WITH $ $ $ BONUS



- Hydraulic endgate (on four largest models) works with upper beater installed.
- Worm gear drive is standard on four largest modesl. Practically elimi-nates need for adjustments.
- BONDED PROTECTION! You get new sides free if they ever rust through while the rest of the spreader is still operational.



- Beefed up frame and side joints take pressure off peak loads, rutted fields.
- The country's No. 1 spreader line: 6 box-types and 5 tank-types.



Here's the spreader we'll stand behind! No drip! No trail!

Plus, Sperry New Holland spreaders have a solid warranty.

- Liquid-tight steel tank!
- All-weather operation!
- 145- to 350-bu. size!

MAKE YOUR BEST DEAL WITH YOUR SPERRY NEW HOLLAND DEALER, THEN, SPERRY NEW HOLLAND WILL SEND YOU A "BONUS" OF $120 TO $550 FOR ANY NEW MANURE SPREADER FROM SPERRY NEW HOLLAND. BUT HURRY - IT'S FOR A LIMITED TIME ONLY.

SPERRY NEW HOLLAND

Poultry

Improvement plan to be amended

WASHINGTON, D.C. — Certain portions of the National Poultry Improvement Plan will be amended to make the plan more in line with industry practices and needs, according to Pierre A. Chaloux, deputy administrator for the Department of Agriculture's Animal and Plant Health Inspection Service.

The amendments were recommended by the voting industry delegates from all states represented at the 1978 NPIP conference.

The following amendments will become effective 30 days after publication in the Federal Register:

Permit smaller size samples of breeding chickens to be tested for official M. gallispecticum and M. synovias classifications;

Provide for recognition of a state when certain conditions are met in the control of M. gallisepticum in turkey breeding flocks;

Restrict the feeding of certain drugs which would mask serological tests during the 21 day period prior to a qualifying test;

Permit alternative sanitizing practices for certain hatching eggs; and

Provide for the election of a member-at-large to the General Conference Committee.

The amendments should aid in reaching the goal of eradication of Salmonella pullorum and gallinarum by 1990 as well as greatly reducing the incidence of Mycoplasma in poultry

300 register for wheat referendum

WASHINGTON, D.C. — Over 300 manufacturers of wheat-based foods have registered to vote on whether they want to assess themselves to fund a nationally coordinated wheat research and nutrition education program.

Assistant Secretary of Agriculture Bobby Smith announced the registration results last week. He said ballots will be mailed to those who have registered to vote in the March 17-28 referendum. A complete list of registrants was published in the February 14 issue of the Federal Register.

Firms are eligible to vote if they registered with the U.S. Department of Agriculture during the Jan. 8 to Feb. 21 registation period and if, in 1978, they used at least 2000 hundredweights of processed wheat in the production and wholesaling of assessable end-products.

The eligibility of any end-product manufacturer to register and vote may be challenged by anyone. Any challenge of an end product manufacturer's eligibility must be made prior to the end of the voting period. Specific reasons for the challenge must be given.

Manufacturers who registered for the referendum and who have not received ballots of March 20 should contact USDA's Agricultural Marketing Service.

Smith said the proposed program will be established if it is approved by at least two-thirds of those voting or by a majority which represents at least two-thirds of the volume of processed wheat used by all voters in assessable end-products.

The program would be developed and administered by a 20-member wheat industry council composed equally of wheat producers, processors, end-product manufacturers and consumers. Financing would come from assessments on processed wheat purchased by certain manufacturers of products such as bread, cake, cookies, cereal or pasta.

During the first two years, the assessments would be up to one cent per hundredweight of processed wheat purchased. After that, the council could recommend that assessments be increased up to a maximum of five cents per hundredweight. Those who do not wish to support the program could get refunds.

Referendum rules stipulate that a corporation, regardless of the number of its subsidiaries, has one vote. At least half of the registered end-product manufacturers must vote for the referendum to be valid.

Trouts

(Continued from Page C22)

program show higher nitrogen levels, less weed control problems, and the added advantage of breaking up cycles of pests like the corn rootworm.

Some insects, like stalk borers and Japanese beetles, will readily inhabit both crops. Another pest that's given the soybeans trouble in the past is the green clover worm, a pest that the Trout's say "can devour a field in just a few days."

But while beans might be beneficial to the corn crop and enrich the soil, the papers spread across the Trout kitchen table tell the main reason for the bean boom. The sheets are filled with cost comparisons. Beans are winning.

After figuring in all the costs inputs on producing a reasonably good yield at $2.90 a bushel, Trout's pencil pushing says there's $23 profit per acre with corn. Beans cost 40 cents more to plant and yield less than half as many bushels; but at $6.90 per bushel, there's still a profit of $187 per acre.

But, going one step further, Trout grins and points out the figures that show he could make $180 per acre by selling the cropground and investing the cash at 12 percent.

A copy of the Wall Street Journal, with its detailed market and futures prices, is daily reading for the Trouts. About one third of the crop is forward contracted. Trout believes it's one way to guarantee a decent profit at least on part of the crop, most of which is sold through the Baltimore terminal of Indiana Grain, and ends up on ships headed for Europe and Russia.

While soybeans don't calve in the middle of the night, break down gates or run through the neighbor's yards, David Trout attests that they still keep a farmer on the alert.

"Sometimes Dad makes us walk the fields and cut the volunteer corn out," he teases. "Beans are like livestock - you have to watch them constantly."

Watching beans, though, is what the Trout's prefer. They follow in the footsteps of earlier family members, who arrived from Germany in 1760, obtained an original land grant and settled down on the rich York County soil.

Every inch of that family soil is precious and the Trout's work with the Soil Conservation Service to keep it. In fact, they were the first in the county to establish a new type of piped terracing for run-off.

All terraced areas are farmable and designed in gently sloped dammed areas that hold cloudburst run-off until the soil settles back into the ground.

Those terraces drain into an underground system of nearly two miles of pipes, which carries excess water as far as 1600 feet and empties it into a stream. For these innovations, the Trout's were chosen the 1978 outstanding conservation cooperator in York County.

Sure, maybe there would be as much profit in selling the land from their century farm as there is in planting and harvesting it. But for the Charles and David Trout families, beans are better

Experts see bright prospects for soybeans

OCEAN CITY, Md. — Soybeans should continue to be one of the United States' best sellers in world markets in years ahead, but the vigorous pursuit of foreign markets will be crucial to our sales success, Foreign Agricultural Service General Sales Manager Kelley Harrison told over 1000 soybean growers attending the Delmarva soybean meeting.

"Soybeans rank as the shining success story in our agricultural export trade over the past decade," said Harrison, pointing out that soybeans are now the nation's No. 1 export crop with overseas sales totalling nearly $8 billion in 1979.

"It is no coincidence that the spectacular gains in soybean exports have paralleled a steady increase in the emphasis on market development by the American Soybean Association and its local organizations such as the Mid-Atlantic Soybean Association," he said noting that farmers in Maryland recently voted to invest in market development through the state's newly implemented grower investment program.

American Soybean Association Chief Executive Officer Kenneth L. Bader said world demand for soybeans and soybean products will continue to climb throughout the decade of the 80s.

"Current ASA activities in market development and research funded by the grower investment checkoff programs are important to maintaining profitable soybean production," said Bader adding that the investments are especially important since the embargo of grain and soybeans to the USSR has taken away one of the most promising future markets for U.S. soybeans.

Pointing out U.S. soybean exports had gone from $1.8 billion to over $8 billion in just 10 years, Bader congratulated Maryland soybean growers on passage of the soybean checkoff program and urged producers in Delaware, New Jersey and Pennsylvania to continue their efforts to establish a grower investment program in their states.

He also challenged producers and industry representative participating in the meeting to join the effort to increase ASA membership in the coming year noting that membership is the "glue that holds the soybean industry together" and that membership numbers are important to support ASA government relations activities.

James Dunphy, associate professor of soybean production at North Carolina State University in Raleigh reported on his extensive work with narrow row spacing for soybeans in the South.

Pointing out that weed spacing is the biggest challenge in any narrow row planting, Dunphy related that his research had shown that the main yield increases came with later planting dates.

Dunphy reported that one of the most significant findings in his research was that when plants lapped the middle of the row at the time flowering started they almost invariably outyielded plants in rows that were too far apart to establish a complete canopy.

Extension Entomologist Lee Hellman of the University of Maryland reported on insects causing significant losses in the Delmarva area during the past year.

He urged producers to monitor fields closely for signs of insect damage, but not to take action until soybeans are 30 to 40 percent defoliated since beans can survive a certain amount of defoliation without economic losses.

Henry Wilson of the Virginia Truck and Ornamentals Research Station in Painter, Virginia, reported on research conducted with various herbicides and herbicide combinations.

He explained the type of incorporation equipment used and the number of passes over the field have a direct affect on the success of the incorporation process.

In a session following the noon luncheon provided courtesy of nearly 50 exhibitors and sponsors, producers heard a presentation on safety precautions for handling chemical herbicides and pesticides. Engineering specialist Ron Jester of the University of Delaware and Gary L. Smith of the University of Maryland noted that over 40 percent of the farm injuries caused by agricultural chemicals were preventable if farmers used available personal protective equipment.

In the Mid-Atlantic Soybean Association annual meeting presided over by William S. Bradley of Salisbury, Maryland, the following officials were elected: William S. Bradley of Salisbury was re-elected president; Homer Torbert of Frederick, Maryland, was re-elected vice president; William H. Henderson of Georgetown, Delaware was re-elected secretary; and Philip S. Norton of Crumpton, Maryland, was re-elected treasurer.

Board members elected were: Maryland – Sewell Spedden, Dr. James Johnson, Howard Krastel, William A. Bradley, John Payne and Leon H. Schmick; Delaware – Clark Calloway, Paul Mitchell,

Soybean intentions level off, price outlook bearish

WASHINGTON, D.C. — Farmers' planting intentions, taken just before the suspensions of sale to the Soviet Union, indicated 1980 soybean plantings at about last year's level.

Soybean prices dropped immediately after the suspension but then recovered, and in February were above presuspension levels. About a million tons of soybeans sold to the USSR will not be shipped, out of two million tons originally ordered.

Since the survey of acreage intentions was made, cottom prices have strengthened. Further, prospects now look good for the Brazilian soybean crop. So this is a particularly good time to take another look at the situation.

Here are some of the basics:

The supply-demand situation is anything but bullish. Although U.S soybean supplies are up 20 percent, potential demand is up only eight percent. This means the carryover next September will be record high—2-1/2 times the level of starting stocks.

Soybean supplies in 1980/81 will likely rise futher to a new nigh--mainly because of the huge prospective beginning stocks next fall.

Total U.S. output of all oilseeds this marketing year is 72 million metric tons, up 24 percent from last season. And world production may reach a record 180 million tons, up 14 percent.

World supplies of oilseeds and products exceed potential demand, pushing prices down and building stocks up.

Soybean prices may be under pressure again this spring and summer if the 1980 South American soybean crops come in at the current [illegible] 34 percent more than last year.

Crop production costs, on average, in 1980 will rise by more than a tenth, but soybean costs may not rise as much as corn and cotton costs.

Despite record marketings of soybeans so far this season, farm prices during harvest dropped. Supplies were too heavy relative to demand. Soybeans fell from $6.35 per bushel in October to $606 in January, about 50 cents below a year earlier.

The USDA loan rate for 1979-crop soybeans is $4.50 per bushel.

Farmers are storing more soybeans than ever. As of January 1, they owned or controlled about three-fourths of the total 1.77 billion bushels of U.S. soybean stocks.

This has helped maintain prices.

Moreover, if soybean marketings continue orderly, prices may strengthen some--at least until South American crops are harvested.

Although the United States dominates the world market for soybeans and products, South America has become a formidable competitor as output expands in Brazil, Argentina, and Paraguay.

Brazil, second only to the U.S. as a soybean producer, increased output from about eight million tons in 1974 to over 12 million in 1977. Then two successive seasons of poor growing weather reduced the crop to 10 million tons in 1978 and 1979.

The crop to be harvested during March-May is tentatively forecast as 14.5 millions tons, a new high. They'll crush nearly 85 percent of the crop and export about 10 percent as beans.

The soybean/corn price ratio in mid-February and the November 1980 ratio (based on Chicago futures prices) was 2.4 to 1.

Last March, when farmers were planning to expand 1979 soybean plantings a tenth, the price ratio was 3 to 1. Although 1980 production costs will be higher for soybeans, corn, and cotton, costs for the last two will increase relatively more because of heavier fertilizer use.

Soybeans

Alan Mallo, Gary Coughlin, George Adkins, Olin Gooden and Frank Reed; Pennsylvania – Walter Wagner, Mark C. Hershey, Harvest P. Sunday, Charles Lownes Jr.; New Jersey – Fred Pew, Wallace Johnson, Preston Ware, Ray M. Atkinson, James Justin, Bradford L. Simpkins, and Phillip D. Prickett Jr.

Executive officers are: Ronald Wade, David Woodward, Frank Webb, Ted Palmer Jr., Robert G. Miller and Richard A. Bailey.

Jerry Kennedy, new ASA district manager serving the northeast states including Delaware, Maryland, Pennsylvania, New Jersey and Virginia, was introduced as the successor to Emory Murphy who will now concentrate his activities in the southeastern states. Kennedy's office is located in Salisbury, Maryland.

Cow/calf conference to be held

UNIVERSITY PARK — Both reproductive efficiency and management practices will be featured during the Beef Cow/Calf Conference, March 12-14, on the University Park campus of Penn State.

Conference topics will emphasize proper nutrition, herd health, artificial and natural breeding programs, and sound management practices, says Clair C. Engle, Extension animal scientist.

Penn State faculty and staff will conduct demonstrations on routes of administering drugs, eye medication, internal and external parasite conrol, tattooing, ear tagging, freeze branding, castration, dehorning, and implanting estrus detection, k-mar techniques, cow management and facilities.

The program is being made possible by tuition fees and the financial support of several Pennsylvania beef related industries.

A banquet will be held at Gatsby's, State College, Thursday, March 13, for conference participants to socialize and exchange ideas.

Making reservations before the Conference helps sponsors plan a better program. For further information contact Agricultural Conference Coordinator, 409 Keller Bldg., University Park, PA 16802, telephone (814) 865-9547.

Sheep producers fight proposal to eliminate control

SALT LAKE CITY, Utah — R. J. Rich, chairman of the National Wool Growers Association, has accused the U.S. Department of Interior of attempting to use administrative edict to eliminate the animal damage control program.

According to Rich, the November announcement by Secretary of Interior, Cecil Andrus, may invalidate over 600 long-standing animal damage control agreements throughout the United States.

Rich, a sheep rancher from Burley, Idaho, said he was not satisfied with the earlier Andrus proposal, but amazed that the government would use this means to avoid protecting livestock from predators.

The wool growers' concern stems in joint administrative between federal, state and local entities dubbed "master project agreements." These agreements and their attached documents called for "joint commerce" between the cooperating entities to provide stipulations to insure effective and environmentally rational animal damage control programs.

Through the original agreements, the federal government empowered to carry out predator control programs in various states in cooperation with state agencies and county governments.

The recent USDA proposal for the future animal damage control program violated segments of these agreements," Rich said, "and has jeopardized the working relationships between state entities and the U.S. Fish and Wildlife officials."

A survey by the National Wool Growers Association revealed that none of the cooperating parties had been asked for their concurrence on the proposed program.

In effect, the Andrus' memorandum has arbitrarily severed the agreements, the sheepman said.

Rich said the absence of the joint memorandums would result in hodgepodge, uncontrolled predator programs that would disgrace Interior professionals.

"We've worked hard for a reasonable animal damage control program," said Rich, "and now we've been bushwacked."

National nutrition week grows to a month

SOUTHAMPTON — National Nutrition Week activities, sponsored by the American Dietetic Association have been expanded to a full month, beginning in March.

The theme of this year's program is "TO HIT YOUR STRIDE...EAT SMART." Activities developed around this theme should provide the general public with the latest information about fitness, nutrition, and food selection for health.

Both the ADA and Dairy Council Inc., Southampton, Pa., underscore the fact that you can eat heartily provided you burn up the extra calories with the exercise of your choice.

Cost of food is a matter of concern these days, says the Dairy Council, but it doesn't have to cost a lot of money to eat properly if you know what you're buying.

Our food supply has an abundance of nutrients, so it pays to eat a variety of foods. The basis of a sound diet are the four food groups, with minimum servings. The daily essentials are: Milk and milk products, skimmed if preferred–2 servings; meat or an alternate, chili, frijoles, black-eyed peas, eggs, poultry, or fish–4 to 5 ounces; fruits and vegetables, one deep green or yellow, one a source of vitamin C--4 servings; enriched or whole-grain breads and cereals–4 servings.

Both and ADA and Dairy Council work to improve the nutrition of the community and emphasize the four food groups as the basis of their nutrition education programs.

Michelle graduated from Millersville State College with a degree in art. She and her husband Gary live in Lancaster.

Executive says rail loss will hurt fertilizer supply

WASHINGTON, D.C. — Unless the Rock Island rail line is kept in operation for at least 90 more days, a shift to alternate transportation modes will substantially increase the regional cost of fertilizer and ultimately the cost of food, an industry spokesman said Wednesday.

In testimony before the Senate's Surface Transportation Subcommittee, Edwin M. Wheeler, president of The Fertilizer Institute, said his industry would support any legislation to keep the Chicago, Rock Island and Pacific Railroad Company viable for 90 more days.

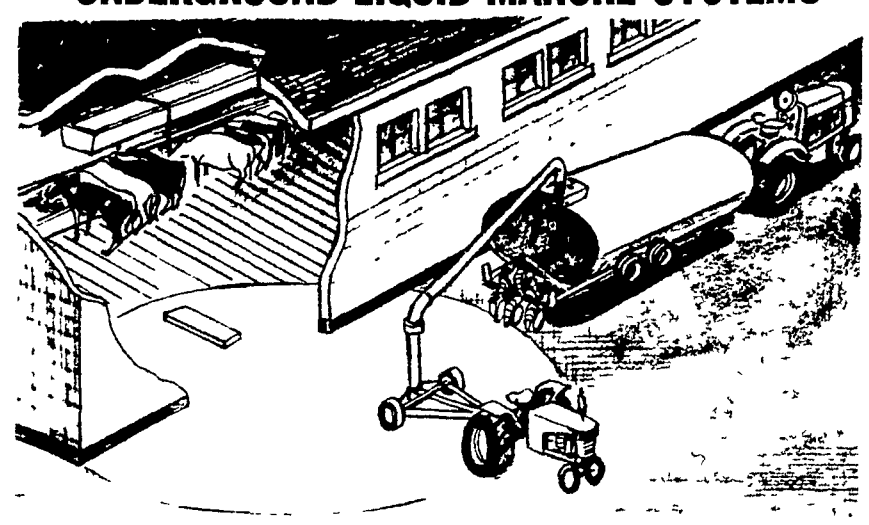
This, he said, would permit an orderly transition to other purchasers and operators.

Were service to be abruptly discontinued, he said, "Loss of fertilizer to the Rock Island serviced states would cost farmers a minimum of 18.8 million tons of 1980 agricultural production, or a loss of $2.85 billion, were it not delivered by any other mode."

As a practical matter, the industry association president continued, such an immediate switch is not possible because sufficient truck numbers are not available to handle shipments during the peak fertilizer consumption season from March to June.

"The loss of Rock Island service this spring simply will lead to a loss of fertilization of crops," he said. "This means a loss of sales dollars to the fertilizer dealer, a loss of production to the farmer and ultimately an increase in food costs to the consumer

UNDERGROUND LIQUID MANURE SYSTEMS



* Eliminate manure stacks for cleaner and neater appearance
* Eliminates breeding places for flies and insects
* Eliminates odor with underground manure storage

DON'T WASTE MONEY ON NITROGEN

They say there are 26 tons in the air over an acre Soil bacteria transfer it into the soil according to the creators plan If you intoxicated yours use our good sturdy prolific BX bacteria They are not so sensitive as some others on the market which work sometimes and sometimes not With manure and BX only for nitrogen our customers are getting big crops

DON'T WASTE MONEY ON POTASH

Our customers are proving that Carey Reams is right in saying it is best to keep potash low in ratio to phosphorus Livestock farmers are usually excessive in potash and some non livestock farmers also Our soil testing shows it

DON'T WASTE MONEY ON PHOSPHORUS

Ours is only half price Because livestock farmers don't need to buy nitrogen and potash then they can use soft rock phosphate direct from the mines by rail car unblended which is only $80 per ton plus spreading $90 in bags Taking materials in and out of a fertilizer plant to blend it ups the price terrible on account of labor You can save all that

DON'T WASTE MONEY ON PESTICIDES

The above program produces crops so loaded with minerals (soft rock phosphate has lots of it) and sugar that the bugs don't like it They get drunk on sugar They are scavengers to destroy crops that are not fit to eat But man kills the bugs and eats the crop anyway Wise man farms organic and the bugs don't stay They fly away again No kidding

DON'T WASTE MONEY ON PROTEIN

Our program increases protein not just a little and it is a healthier protein Soybean processing is not a healthy process

DON'T WASTE MONEY ON FEED

Our customers tell us their cows eat a lot less feed than they used to It is naturally loaded with nutrition that satisfies

DON'T WASTE MONEY ON MEDICATION

Organic farmers say the vet thought they got another vet because they didn't call so long

DON'T WASTE MONEY ON FUEL

The soil plows easier and prepares quicker when treated with National Ag Soil Treatment liquid spray It is cheaper and better than chiseling Some say they can plow in a higher gear

DON'T WASTE TIME IN TRYING TO HARVEST IN WATER LOGGED SOIL

or waiting till it dries off when it is high time to harvest National Ag Soil Treatment breaks hardpan and lets the water down decreases erosion dries off considerable faster Also it is fit to plow earlier in spring Price is only $48 per gallon which does 10 acres Money back guarantee if we can't see a difference in the soil

DON'T WASTE TIME IN PICKING LODGED CORN

Our customers report a big difference in the corn standing side by side with chemical grown corn A Berks Co farmer reported it stood a twister with BX and soft rock phosphate It makes huge roots strong stalks but no home for the stalk worms to weaken the plant

A DOLLAR SAVED IS A DOLLAR EARNED

Your profit is your income minus your expense if you farm for profit rather than exercise and disappointments quickly ask us for literature prices and have your questions answered Our materials should be applied early for best results Why not prove our program on a certain acreage then you know for 1981 when expenses will be much worse? There would be much more to say about our unique simple profitable economical story but that is why we have our literature to mail out Or maybe I could stop in to see you if given good directions

ORGANIC CENTER

217 S. Railroad Ave., New Holland, Pa. 17557

Last farmer in the township: it's no picnic

By DICK WANNER

TROOPER— How would you like to be the last farmer in your township?

Take it from Ronald Markley, it could be a very unpleasant experience.

Markley is a 61-year-old Norriton Township resident, and he said this week that he is the last farmer in his township. His 55 acres have been in the Markley family for three generations, ever since his grandfather bought the land in 1865.

The village of Trooper now looks more like a long and skinny combination fast food restaurant and used car lot than the country town it must have been when the first Markleys moved to the area.

All of Norriton Township, in fact, has been in buffeted by the winds of change for the past two decades, ever since industrial, commercial and residential development began eating up the farmland around Valley Forge, King of Prussia and Plymouth - all suburban Philadelphia areas.

Markley's problems began about 20 years ago. His brother, a dairyman, was still alive, still farming the land, trying to build a solid Holstein herd. The township first wanted to put a drainage ditch through one of the Markley meadows, emptying into Markley Pond, a feature on maps of the area dating from before the turn of the century.

It was to be a carefully banked, sodded ditch, with a concrete bottom to prevent erosion. The township was to maintain the ditch at its expense, it was to install grates to prevent the flow of debris into Markley's pond.

It seemed almost inevitable that the ditch would come to look as it does today, overgrown with weeds, clogged with debris and an eyesore in an otherwise well-manicured meadow.

Later, a sewer system came to Norriston Township, and Markley had the misfortune to have 1000 feet of frontage on the road where the sewer passed. It cost him $10,000 in the days before there was legislation that would have prevented that charge.

"It would have been so much easier to sell," Markley said, "but we've been here for three generations. This is my home. When I stand up in township meetings and say I want to keep this place open and green, I hear nothing but applause. But I fight these battles along."

One battle Markley knew he was going to lose was with the county tax assessor. With development lapping at his front doorstep, he knew his property values were going up, and his tax bill would soon follow suit. He built a swim club on ten acres, both to provide a livlihood and a way to pay the tax man in the days before Clean and Green legislation.

The other 45 acres has been turned over to the care of a tenant who raises some 8000 bales of timothy hay a year on it.

The swim club is working well for Markley, but he still thinks of himself as the steward of a family farm. He could think of himnself as a millionaire. He is surrounded on three sides by a housing development, and would have no trouble, he's sure, getting $10,000 to $15,000 an acre for his property.

"But I just don't want to sell," he said, "I just don't want to move."

Actually, the offers from developers who want his land are the least of his pressures. Since the development started going up next door some six years ago, Markley has found himself in a constant battle to protect his property rights.

It's a battle he's had to fight without the help of the township officials and without the protection of the environmental laws that were designed to prevent such things as the silting of his pond.

The developer, according to Markley, has resisted his pleas to install proper drainage facilities and to prevent contractors from encroaching on his property. But the pleas have fallen on deaf ears.

When the development began, Markley put up a chain link fence around his entire property, with a perimeter of almost a mile. Today the fence could easily cost $50,000 to replace. Still, the fence has had asphalt and dirt heaped against it, the ground has been dug out from part of it, and the earth has been removed from beneath it.

Last February, Markley and his lawyer, who has collected thousands in legal fees, secured a court injunction against the builder. The injuction came after the builder had been notified by the Pennsylvania Department of Environmental Resources that he was in total violation of the erosion control plan he had filed with DER.

According to the plan, the developer, Oakland Estates, was to control sediment; install catch basins, install retion basins and storm trenches to catch sediment; control erosion by seeding and mulching, and put stone filter trenches across roads.

Twice, in May of 1977 and again in October of 1978, DER wrote to the developers to inform them that they were in total violation of their plan, and to get in shape.

But DER, Markley said, has neither the staff nor the funds to back up their demands, and very little has changed.

"We used to have a clean pond, and we were famous in the winter as a place to ice skate. But in the past few years, there's been so much silt in the pond, that the ice is no longer fit for skating.

"I did get a court injunction to stop the building. The basis for my argument was that the builder was in violation of DER regulations.

Agencies request food, feed be checked for PCB problems

WASHINGTON, D.C. — Three federal agencies Tuesday asked food manufacturers and related industries to take voluntary steps to help prevent accidental contamination of food with the chemical PCB.

The agencies requested that food, animal feed, fertilizer and pesticide companies check their plants immediately for electrical equipment containing PCBs and remove the equipment when special EPA-approved incinerators are available to dispose of the chemical.

The agencies are asking the companies to take these initial actions voluntarily to protect the public until regulations, now under consideration, can be issued that may require replacement of PCB-containing equipment.

PCBs (polychlorinated biphenyls) are a class of chemicals often used as insulating fluids in electrical equipment. Studies on laboratory animals have shown that PCBs can cause tumors, reproductive failure, stomach and skin disorders and other health problems.

The agencies that made today's request are: the Environmental Protection Agency, which regulates PCB production and use under the Toxic Substances Control Act; the Food Safety and Quality Service of the U.S. Department of Agriculture, which regulates meat, poultry, and egg products; and the Food and Drug Administration, which regulates all other food.

The agencies' request was the result of a recent incident in the northwestern U.S. in which PCBs from a transformer stored at a Montana meat packing plant accidentally contaminated animal feed ingredients being made there.

As a result, PCBs entered the food supply and contaminated animal feed as well as chickens, turkeys and hogs, which ate the feed, and food products made from these animals. No injuries were reported from people who consumed contaminated products, but large amounts of food had to be destroyed.

"Because of this incident, we are extremely concerned over the continued use of equipment containing PCBs in such establishments," EPA Administrator Douglas M. Costle said. "We want to do all that we can to prevent accidents like this from recurring."

Jere E. Goyan, Commissioner of Food and Drugs, said; "Because of their use over many years, PCBs have become a widespread contaminant in our environment. We cannot continue to take unnecessary risks with this dangerous chemical. PCB's have no place in food production or related facilities.

"We are confidant that the companies will take necessary steps to remove equipment containing PCBs as quickly as possible," Goyan said.

Assistant Secretary of Agriculture Carol Tucker Foreman said, "The most effective way to control the hazards of contaminated food is to remove, as much as possible, the source of the contamination. Here is a clear opportunity to help stop future incidents of PCB contamination before they start."

FDA in 1973 restricted the use of PCBs in processing facilities for food, animal feed and food packaging materials to totally enclosed electrical equipment.

Similarly, EPA banned production and some uses of PCBs in 1979 but the ban did not apply to the use of the chemical in totally enclosed electrical equipment already manufactured at the time.

Because PCBs are so dangerous, they must be disposed of under tightly controlled conditions. Suitable incinerators are now under evaluation by EPA for possible approval late this spring.

The request to the companies and list of contacts for information on the availability of incinerators is in the form of a booklets, "Polychlorinated Biphenyls: An Alert for Food and Feed Facilities." Copies are available from the EPA Industry Assistance Office at (toll free) 800/424-9065 or, in Washington, D.C. at 202/554-1404, or by writing to John B. Ritch Jr., Director, Office of Industry Assistance, Office of Toxic Substances, Environmental Protection Agency, Washington, D.C. 20460.

Copies are also available by writing to: Nathaniel Geary, Director, Intergovernmental and Industry Affairs Staff, Office of Regulatory Affairs, Food and Drug Administration, Rockville, Maryland 20857, (Phone: 301/443-1583).

Copies also may be obtained from Maxine Grant, USDA-FSQS Information, Room 36125, Washington, D.C. 20250, 202/447-5223.

xxx

The greatest concentration of hydro-electric power in the world is located at Niagara Falls. The Canadian and United States power plants have a combined installed capacity of more than 4,000,000 (million) kilowatts. This is enough electricity to keep 40 million 100-watt light bulbs burning around the clock when the plants are producing at full capacity.

Visitors' facilities are provided at the Power Vista of the New York State Power Authority near Lewistown, downriver from the Falls. Tourists are able to obtain a clear picture of how Niagara River water helps power industrial plants and homes in the northeastern United States and southern part of Canada.

Last farmer

(Continued from Page C29)

"I had letters from DER and all the proof I needed. But to make the injunction good, the judge said I'd have to put up a $500,000 bond. And the case could have dragged out in court for years.

"I figured what's the use? What if we go to court and I lose? I'm not sure where I go from here, but I know I'll keep on fighting," Markley says.

District 6 breeders honor top members

DOVER — Nine area dairymen were honored at the 16th annual District 6 Meeting for Atlantic Breeders Cooperative members held February 21 a the Dover Fire Hall.

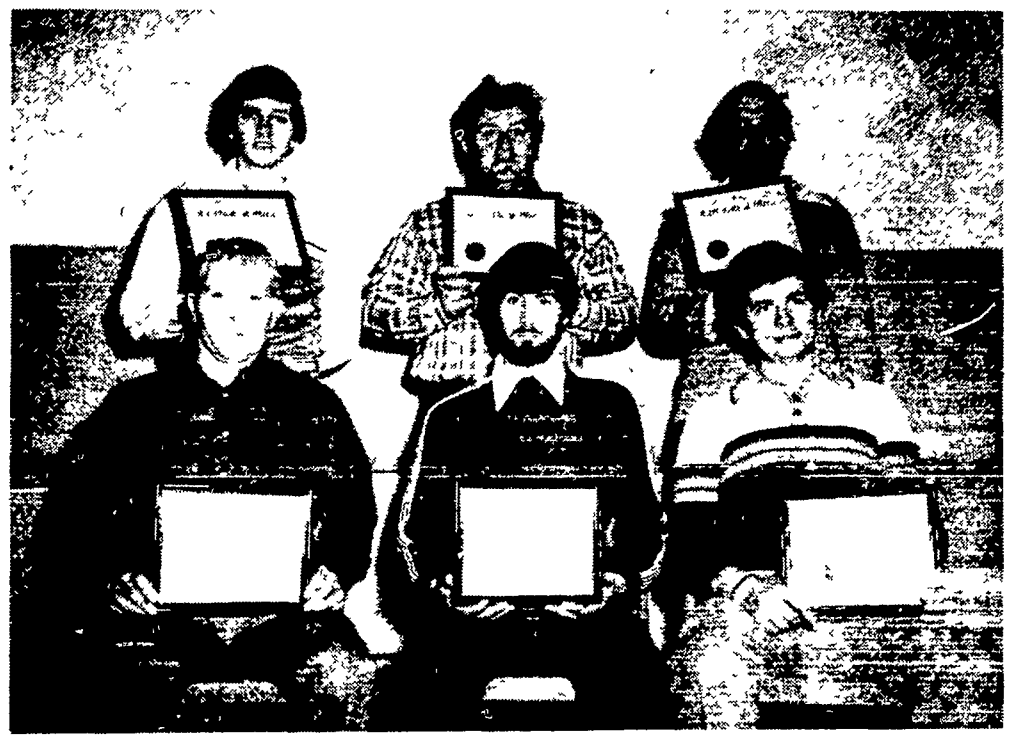
These dairymen received Certificates of Merit for having top DHIA herd averages last year. They had to have at least 15 percent above the state average for milk or butterfat, and a minimum of two-thirds of their cows sired by Atlantic bulls.

Robert Keller, Atlantic's field Supervisor for this area presented certificates to the following: David Stewart, Delta; Sinking Springs Farms, Inc., York; Lynn Wolff, Abbottstown; Smysers Richlawn Farms, York; Beshore Farms, New Cumberland; Robert R. Stewart, Airville; Wayne B. Mummert, East Berlin; Galawn Farms, Dillsburg; and Paul R. King, Delta.

A report was then given by District 6 Director Norman Sollenberger of Fayetteville.

Sollenberger stated that 1979 was the most successful business year in Atlantic's history. Service Technicians provided 308,000 services, and semen sales increased to direct-herd breeders and through domestic and international distributors.

Management representative, Harry Roth, Lancaster, then reported that Atlantic sires maintained their rating among the nation's best for transmitting profitable traits. The Atlantic Co-op currently has 52 bulls that are +1000 milk or more, 38 bulls +$100 or more and 47 that are + predicted difference in type. Atlantic members also proved 36 young Holstein bulls last year.



York area dairymen honored for dairy herd production included, front left, Wayne B. Mummert; Wayne Myers, Galwan Farms; and Rodney Smyser, Smysers Richlawn Farms; second row, left, Jed Beshore, Beshore Farms; Lynn Wolff; and Dennis Kauffman, Sinking Springs Farms, Inc.

Members present also voted for district representatives for the coming year. Election results will be announced in the future. - PG

State egg output up dramatically

HARRISBURG — January 1980 egg production in Pennsylvania totaled 378 million, according to the Pennsylvania Crop Reporting Service.

The January production was 18 percent above the 319 million eggs produced in January 1979. The January average of 16.8 million layers was 14 percent higher than a year ago.

Egg production per 100 layers was 2257 compared with 2164 in January 1979.

The nation's laying flocks produced 6.04 billion eggs during January 1980, three percent more than a year ago. The number of layers during January averaged 294 million compared with 292 million a year earlier.

Egg production per 100 layers during the month was 2052 compared with 2,019 a year ago.

Senator wins 1980 Del. ag award

NEWARK, Del. — State Senator Thurman G. Adams, Jr., has been named 1980 recipient of the University of Delaware Agricultural Alumni Association's George M. Worrilow award. Presented annually, the award recognizes outstanding service to Delaware agriculture by a University of alumnus.

Adams now serving his third term as state senator, holds a B S in agricultural education from the University's College of Agricultural Sciences Besides his legislative responsibilities, Adams is active in the family business, T. G. Adams & Sons, Inc., of Bridgeville—grain brokers They also [illegible]

First elected to the Delaware senate in 1372, he has served on a number of important committees. Now chairman of the senate agriculture committee, as a long-time member he has introduced numerous legislation on behalf of Delaware agribusiness. As chairman of the public safety committee, he introduced a number of changes in the motor vehicle code, including the one which permits motorists to turn right on a red light.

As a member of the state Highway Commission from 1961-1970 he worked toward higher appropriations for dirt road surfacing around the state.

Among his various civic commitments, Adams serves as director of the Milford Memorial Hospital and director of the Delaware State Fair. He is also a director of the Baltimore Trust Company, member

Thurman G. Adams, Jr.

and past president of the Eastern Shore Grain and Feed Dealers Association, [illegible] director of the University of Delaware Alumni Association, and president of the Harrington Raceway. From 1961-1970 he served on the state Highway Commission.

Announcement of the award was made during the Agricultural Alumni Association's annual banquet, held at the Seaford Golf and Country Club.

The award is named for the late George M. Worrilow, former University vice president asnd former [illegible] of the College of Agriculture Sciences. Presented every year since 1970, it honors individuals who have made outstanding contributions to the Delaware agricultural community

According to Donald F Crossan, current dean of the College, Adams has shown a good understanding of the needs of agriculture in the state as well as the contributions made by University programs in extension research and teaching to Delaware agribusiness.

New timothy variety introduced

The Stanford Seed Company of Buffalo, New York, and Pioneer Hi-Bred International, Inc. have jointly announced the availability of a new late maturing timothy variety which has been named Goliath.

Goliath was developed in northern Europe and has been widely tested in Canada and the northern United States.

Goliath produces a hardy, find stemmed leafy plant that heads a full week later that common timothy. This lateness gives the grower an extended season to harvest top quality, highly palatable forage for his animals.

Because of the nutrient quality of Goliath, animal intake should be greater than with most other timothy varieties. This permits animals to get a higher percentage of their nutrient needs from forage and less from higher cost concentrates.

Goliath is especially suited for use with North American types of alfalfa, birdsfoot trefoil and clovers.

The seed production characteristics of Goliath have been good, and it is expected to produce a more reliable seed supply than many other varieties.

DID YOU EVER SEE A TREE AFTER A FOREST FIRE

Top Adams County dairymen

Dairy Herd Improvement Association averages attained at three Adams County Farms where honored at the annual District 7 meeting for Atlantic Breeders Cooperative members at the Heidlersburg Fire House. Receiving Certificates of Merit were, from the left, Sam Stoner, of Stoner Bros. Dairy, East Berlin; Earl Noel, of Noel and Holmes, Hanover; and Larry Mummert, of Yellow-Buttercup Farm, East Berlin.

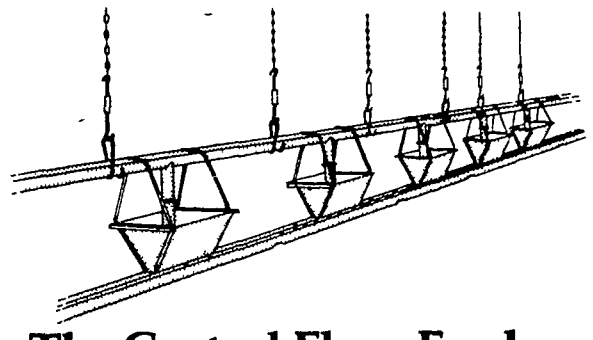
A Proven Feed Saver



The Control Floor Feeder by Northco®

It saves feed because measured amounts are fed 10 to 15 times daily.

It saves time because Northco's® hopper adjustment and time clock enable you to vary the amount of feed and feeding times for each pen.

Plus, hogs can't damage a feeder they can't reach. Valuable floor space is used to house more hogs, not for self-feeders.

For all your hog equipment needs contact:

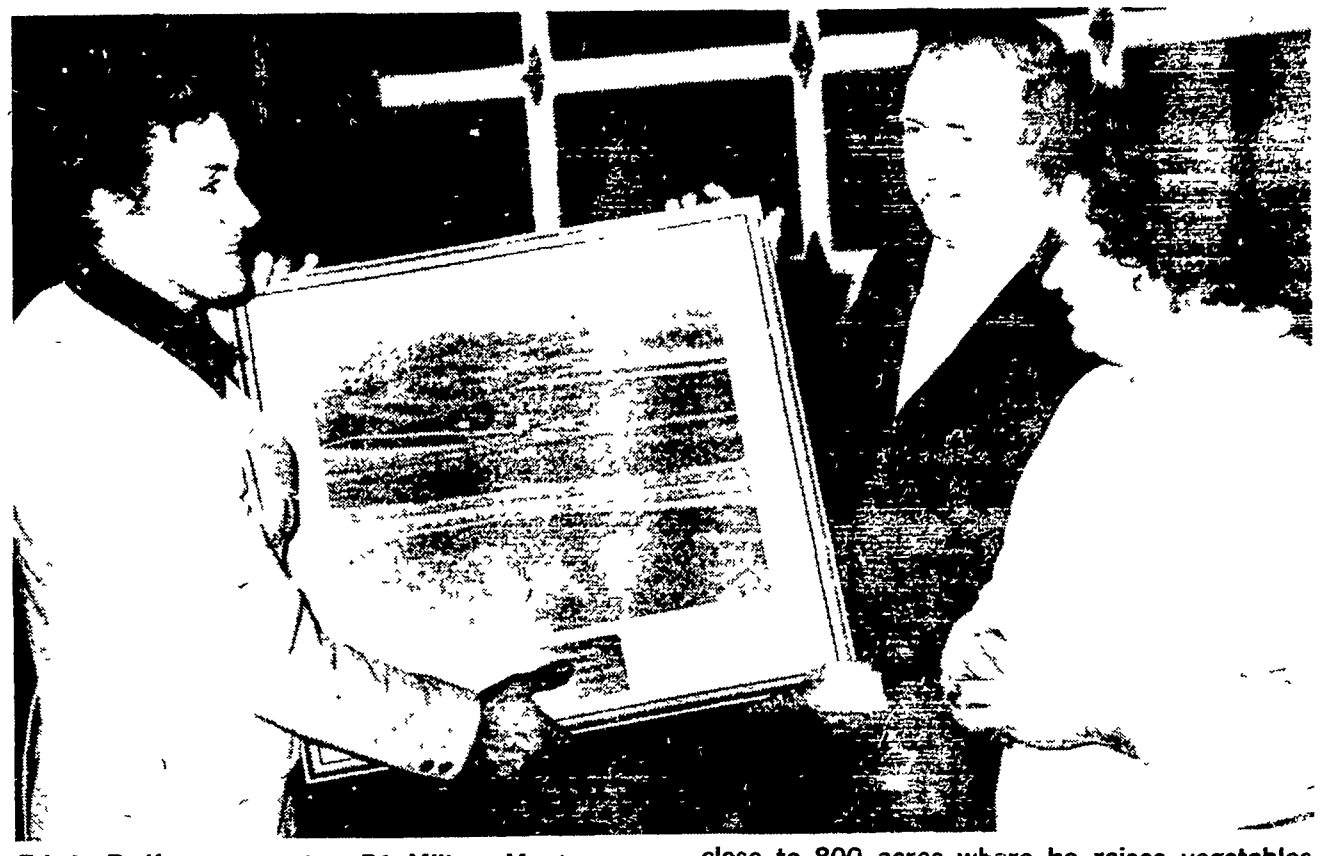
Experience You Can Trust



Edwin R. Kremer, center, R1 Milton, Montour County, was honored as conservation farmer of the year. Kremer serves the county as their first-term County Commissioner, along with farming close to 800 acres where he raises vegetables, grains, dairy cows and hogs. Presenting the award to Kremer and his wife, Viola, is Earl Harris, of the Montour County Conservation District.

Game Commission to consider license change

HARRISBURG — The Pennsylvania Game Commission is considering two changes from procedures used in the past in applying for antlerless deer licenses in 1980.

For many years, only one application could be made in a single envelope. This made it possible for the maximum number of individual applications to be considered when applications were submitted.

However, it also meant in some instances that only one person in a family or party might receive an antlerless license, while others would be left out. Or perhaps some persons in a family or party would receive licenses, while the remaining individuals would not.

To accommodate small family or party groups, this year the Game Commission is considering a proposal which would permit up to three applications for antlerless deer licenses to be submitted in a single envelope.

Action on the proposed changes will be taken at the meeting of the Game Commission in April.

energiblock

SOLID FEED SUPPLEMENT BLOCK

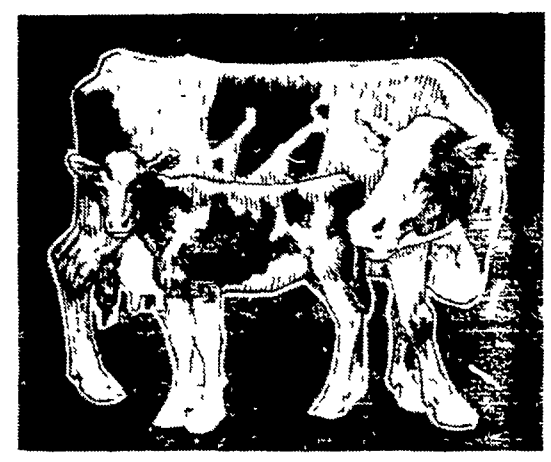
DAIRY CATTLE • BROOD COWS • BULLS • YEARLINGS • REPLACEMENT HEIFERS

With Energiblock, your stock eats everything but the profits! And it can be stored for long periods of time, safe and ready to use

ENERGIBLOCK is a liquid molasses feed supplement in solid form complete with protein, carbohydrates, vitamins, phosphorus, trace minerals and organic iodine. The molasses supplement is poured hot into a specially constructed, completely edible cardboard box where it hardens, ready to feed your stock

• Convenience No mixing necessary. Standard size makes it easy to calculate herd feeding requirements

• Reduced feeding time and costs Since the entire ENERGIBLOCK is edible, there's no complicated equipment needed for mixing or feeding ENERGIBLOCK to your stock Energy, protein, vitamins and minerals—all in a single, easy to use package



The solid feed energy supplement block specifically designed for dairy cattle

Industrial Molasses ENERGIBLOCK plays an important part in every phase of your feeding and breeding program.

- Heifers must reach two thirds of their mature weight by 15 months in order to calve as two year olds and rebreed ENERGIBLOCK can help your stock reach this goal
- Yearlings must gain through the wipter if they are to make the size and weight you expect during the grazing season ENERGIBLOCK helps provide your cattle with the energy protein vitamins and minerals needed for superior weight gains
- Dry Cows need the energy and nutrient balance of ENERGIBLOCK for ease of calving and growth of developing calves
- Nursing Cows need extra energy to recover from calving rebreed rapidly and keep milk flowing for nursing calves ENERGIBLOCK feed supplement provides the needed nutrients
- Bulls' requirements change due to the amount of service expected during the breeding season ENERGIBLOCK supplement formulas are specially designed with information about your forages and animals needs to help prepare your bulls for the breeding season

FOR THESE REASONS — AND OTHERS — IT MAKES SENSE TO MAKE ENERGIBLOCK AN IMPORTANT PART OF YOUR FEEDING PROGRAM!

Medication works more efficiently on stock in "sick" or "recovery" pens when administered in conjunction with an Industrial Molasses ENERGIBLOCK feeding program

Remember - ENERGIBLOCK contains no salt.

Potato growers co-op joins ag logo

HARRISBURG — The Pennsylvania Co-operative Potato Growers, Inc. will be using the new "Pennsylvania Agriculture -- We're Growing Better" logo to promote Pennsylvania potatoes to consumers.

"I am excited at the prospect of potato growers using the 'Pennsylvania Agriculture -- We're Growing Better' logo on their bags to promote the sale of home grown state products," said State Agriculture Secretary Penrose Hallowell.

"Pennsylvania's potato growers have come under increasing marketing pressures in the last few years. The new bags will mark the beginning of renewed interest in the marketing of Pennsylvania potatoes to Pennsylvania consumers."

The eight largest potato producing counties in Pennsylvania – Cambria, Erie, Lancaster, Lehigh, Potter, Schuylkill, Somerset and York – have all lost potato producing acreage in the last ten years.

"Potato production in Lancaster and York Counties provides 5.1 million dollars to the local economy," said C. Eugene Wingert, Regional Director for the Pennsylvania Department of Agriculture.

"By buying Pennsylvania potatoes we will be keeping valuable farmland in production and providing the local economy with much needed Pennsylvania dollars. We will also be assuring consumers of economical food, high in nutritional value, despite transportation problems caused by the current energy shortage."

Pennsylvania is the largest potato chip processing state in the nation. In the future Pennsylvania consumers will also be able to easily spot and buy Pennsylvania's potato chips marked with the new logo.

Last week Governor Dick Thornburgh declared February as "Potato Lovers' Month."

DHIA certificates presented

Certificates of Merit for top Dairy Herd Improvement Association averages were presented to 16 Lancaster County dairymen on Feb. 21 at the annual District 4 meeting for Atlantic Breeders Cooperative members. Among the group, from the left, were Mervin Sauder, Norman Hershey, Nelson Weaver, Earl Landis, Naaman Stoltzfus, Adam and Jerene Zimmerman. Others included Harold B. Good, Emanuel L. King, Earl R. Hursh, David L. Landis, J. Wilmer Conrad, Nathan E. Stoltzfus, Abraham Shelly Jr., Hiram S. Aungst, Christian Zook and Robert and Jean Book.

THE SECOND SEMINAR
"GASOHOL FOR THE FARM"
F. Horst & R. Kreider

Seminar Purpose *To give basic, practical training in the design, construction and operation* of small alcohol plants

Date: Monday, March 17, 1980

Place: Richland Banquet Hall, Richland, PA

Experience: We have spent considerable time and money in the design, building, and testing *of farm size, ethanol fuel producing equipment* Through this effort, we have gained valuable practical experience in the field

Course Description: This basic course will give those attending a practical understanding of alcohol production The fee for this seminar will include the essential test equipment enzymes and yeast needed to produce alcohol A light lunch will also be provided

TENTATIVE SCHEDULE

8 00-9 00 a m	Registration	1 00 p m	Fermentation & Testing
8 30	Introduction	1 20	Building of Fermentation Equipment
9 00	License & Permits		
9 30	Enzymes used to convert starch to sugar & Testing Procedures	1 40	Distillation & Testing Procedures
		2 30	Break
10 15	Break	2 45	Heat Efficiencies
10 30	Building of grain bins, augers, cookers, and enzyme tanks	3 15	Uses
		3 40	Questions & Answers
		4 20	Break
11 30 12 00	Questions & Answers	4 30	Tour of Famous Alcohol Plant
12 00	Lunch		

Equipment Handout will include:

- Alcometer with Test Jar (0-200 Proof)
- Dairy Floating Thermometer
- Starch Conversion Kit
- Saccharifying Enzyme
- 3 Scale Hydrometer
- Ph Paper
- Hydrolyzing Enzyme
- Yeast

Fee: $100.00 Per Person, includes 1 set of Test Equipment.
$160.00 For Two (2) Persons, includes only 1 set of Test Equipment.
Fee for registration must be received by March 10, 1980.
Class size will be limited; the seminar for February 1, 1980 was filled.

A confirmation, along with directions, will be mailed on March 11, 1980, or check will be returned

To attend, fill out the following form and mail form and fee to

How safe is your wood stove?

MILFORD, Del. — Econmics appear to be the main motivator behind the current popularity of woodburning stoves. Once something you used only if you were too poor–or an incurable romantic–wood heat suddenly has become a highly attractive alternative to increasingly costly petroleum-based fuels.

But there's a lot more to owning a wood stove than most folks realize. Unless you know what you're about when you install and use one, it can be a serious fire hazard. Check this week's fire reports in your community and you'll probably find at least one case that's wood stove related--probably more.

One mistake a lot of people make is getting a stove that's too big. This generates much more heat than can be dissipated throughout the house in most cases. As a result, they burn more wood than they need and end up with one uncomfortably warm room.

Structural problems in the modern home also need to be considered when you buy a woodburning stove, says Delaware extension engineer Ernest Walpole. Most floors are designed to carry a 40 pound per square foot load. A 600 pound cast iron stove on top of a brick pad and sheet metal may be more than your floor can support. Toss on a few armfuls of firewood, and your floor joists may just give out one day. It's actually happened in a few cases. To prevent this from occurring, you may need to provide some extra support for the joists before installing a stove.

More serious than this from a fire standpoint is how you go about venting the smoke from your wood stove. Many stove-related fires are caused by improper chimney installation or inadequate maintenance.

An efficient woodburning stove can be an economical alternative to gas or oil heat. But because of its efficiency, it is more prone to dirty chimney problems than a fireplace would be. This greatly increases the potential for fire.

Since more heat stays in the room, less goes up the chimney. With a lower flue temperature, certain flammable compounds in the smoke condense more readily inside the stove pipe and chimney. Known as creosote, these wood tars combine with soot to form a highly combustible mix. For this reason, says Walpole, it would be a good idea to use an insulated chimney if you've got one of the newer, airtight insulated stoves. He suggests putting vermiculite around the flue liner for insulation if you are building a new chimney.

Size and construction of a chimney have a lot to do with successful smoke dissipation. A large chimney can accommodate a greater volume of gases. Your chimney should be at least as large as the stove manufacturer calls for.

One problem in burning firewood in a stove or fireplace is getting a good draft. Increasing your chimney height, or adding a chimney cap, can sometimes help. If you do extend it, be sure to use materials designed for that purpose.

Another way to avoid a chimney fire is to burn only dry wood. This will give you a hotter fire in the firebox and more volatile tars will be burned off there, rather than going up the chimney.

As an added precaution, burn hardwoods as much as possible. Avoid coniferous woods, like pine or cedar, except as kindling. They generally have a much higher creosote content than hardwoods. They burn with a hot fire of short duration. And if dampered off, they will clog up your chimney very rapidly.

For safety, as well as fuel efficiency, build only a smal fire in your stove, warns Walpole. The firebox should never be more than half full. You want flames above the wood to remain inside the stove, not in the chimney or smoke pipe. Incidentially, it's easier to keep a fire going with smaller pieces of wood. Split large pieces to a maximum thickness of four to five inches.

When adding wood, open the draft until the moisture is driven off and volatile tars have been burned. This should take 10 to 15 minutes, depending on your stove.

Don't completely close the damper on an operating wood stove. Allow enough draft to keep combustion going. On cold days when more heat is needed, open the damper wider. At bedtime or when leaving the house, close the damper completely.

Once a day, build a small hot fire and let it burn. Split some of your best wood into one and one-half to two inch pieces for fast burning. Burn five or six of these sticks with the damper open. This will really heat up the smoke pipe and chimney and will clean out much of the soot and creosote starting to form.

Check smoke pipes about once a month and clean them as necessary, advises the specialist. Have your chimney cleaned once a year and make sure the ash pit is emptied. An accumulation of ashes at the base of the chimney could reduce or stop the draft through the stove.

Running a wood stove into the same flue as an oil burning furnace is a bad practice. You can get a back-up of combustible gases.

Consider small fruits for garden

NEWARK, Del. — Home gardeners who've had success with vegetables and who have the space should consider growing some fruit, too, says University of Delaware extension horticulturist Dr. Charles Dunham.

Fruits like strawberries, raspberries, blueberries and grapes are especially suited for the small home garden.

Plant raspberries, blueberries and grapes in a permanent location where they'll get full sun. The grapes will need a trellis for support. It's also advisable to provide support for raspberries.

All three of these fruits can be used to create a hedge or landscape boundary in the yard. They also do well along one side of the vegetable garden. Blueberries are by far the most attractive as a hedge. Incidentially, they need a soil acidified by the incorporation of peat moss at planting and should be continuously mulched.

Plant grapes 8-10 feet apart. Allow 5 feet between blueberry plants and 2-3 feet between raspberries.

Strawberry plants are less permanent than these other small fruits. It's best to keep beds for 2-3 years and then renew your stock and relocate the bed. This helps prevent disease problems. Set strawberries 12 inches apart in rows 24 inches apart.

Don't expect to harvest any fruit from any of these crops the first season. Strawberries and raspberries will bear the second year after planting. Grapes take 2-3 years and blueberries 3-4 years to mature enough for fruit production.

Also be prepared to apply chemical sprays on all these plants if you're after top quality fruit. Grapes will require the most spraying, blueberries the least.

Anyone growing fruit should send for the Delaware Cooperative Extension Service's bulletin on "Sprays for Home Fruit Plantings." This is available free from county extension offices in Newark, Dover or Georgetown.

Grapes, raspberries, and blueberries also require annual pruning, notes Dunham. Although the procedure is easily explained, it's best learned by practice.

He suggests you ask your county agent for extension bulletin No. 197, "Pruning in the Home Garden." This gives the basics on pruning fruit-bearing plants.

Plants for small fruits are best purchased by mail. There are several good fruit nurseries located on the Delmarva peninsula and their catalogues are available free on request.

In selecting varieties, it's usually best to stick to the standard ones that have proven satisfactory over a period of time, advises the horticulturist. When you become more knowledgeable you may wish to experiment with other kinds.

Choose varieties that are disease resistant where possible. This applies especially to strawberries. Everbearing raspberries that produce two crops a year are very satisfactory in Delaware. Just be sure to pick one, like Indian Summer, that produces an early second crop. Concord is still the standard blue grape for this area; Niagara is the standard white. Blueberries need more than one variety for pollination.

It's well to get your orders in early. It's also important that you request delivery for an early April planting. This allows plants to become well established in your garden before hot weather arrives.

USDA to assist Mexico with corn, sorghum sales

WASHINGTON, D.C. — The Government of Mexico Wednesday invited suppliers to bid for the sale of up to 500,000 metric tons of U.S. corn and up to 500,000 metric tons of U.S. sorghum and/or corn for delivery to Mexico during the first half of 1980.

Tom Hughes, administrator of the U.S. Department of Agriculture's Foreign Agricultural Service, said bids are to cover corn and sorghum to be delivered beginning in mid-February with shipments to be completed at the end of June.

"This purchase will be the first of the 1.7 million metric tons of corn and 1.0 million tons of sorghum included in the mid-January agreement between the two countries," said Hughes.

Agreements have been signed with three U.S. rail companies and the National Railways of Mexico to ship sizable portions of the corn and sorghum, using special unit trains, he said. The balance will move by ocean freight from the Gulf ports.

The USDA, through its Office of Transportation, will cooperate with Mexico in helping to coordinate the transportation logistics between the two countries.

These arrangements are in the context of the January 16 agreement between the two countries.

Inquiries should be directed to Alfredo Gutierrez Kirchner, Trade Office, Embassy of Mexico, 1101 15th street, NW, Suite 507, Washington, D.C., 20005, telephone 202/785-3214, or Glen R. Samson, deputy director for marketing, Grain and Food Division of the Foreign Agricultural Service, USDA, telephone, 202/447-4900.

Ag committee approves bill to extend emergency loans

WASHINGTON, D.C. — The Senate Committee on Agriculture, Nutrition, and Forestry Wednesday approved legislation to extend the authority of the Farmers Home Administration to make economic emergency loans to farms and to increase funding for such loans by $2 billion.

Reacting to tight credit conditions in many of the nation's agricultural areas, the Committee voted unanimously to extend the life of the economic emergency loan program through Sept. 30, 1981. The program is due to expire on May 15.

The Committee also voted to increase the total lending authority under the program by $2 billion – from $4 to $6 billion. All economic emergency loan funds have been exhausted.

In urging prompt action on the bill, Sen. Herman E. Talmadge the committee chairman, said many farmers are experiencing extreme difficulty in obtaining loans in order to plant their spring crops. He noted that planting has already begun in southern parts of the country and that "the need for fast action is urgent."

He said he would seek to bring the legislation to the Senate floor immediately and would coordinate his efforts with House agriculture leaders, who are moving a similar bill, "in an effort to get the gill to the White House at the earliest possible time."

"I hope this can become law within the next 10 days," Talmadge told the Committee.

Before approving the bill, the Committee adopted two amendments requested by the Carter Administration to peg interest rates for economic emergency loans to the private money market rates and to tighten requirements that limit this type of loans to farmers who are unable to obtain credit from sources other than FmHA.

The economic loan program was established by Congress in 1978 as a temporary measure to provide an additional source of operating credit to farmers and ranchers unable to obtain financing from normal sources due to national or areawide economic stresses, such as general tightening of agricultural credit, high production costs, and low commodity prices.

Armstrong to address Solanco Young Farmers

QUARRYVILLE — The Solanco Young Farmers will hold their banquet at 7 p.m. on March 28, 1980. The family style dinner will be served at Rhoads Restaurant, Quarryville.

The guest speaker will be Gibson E. Armstrong, representative of the 100th Legislative District.

Various awards will be presented to young farmer members. Door prizes have also been donated and will be given away during the banquet.

Anyone desiring tickets or more information can contact either A. Dale Herr 717/529-2971, or the ag department at Solanco High School 717/786-2151, extension 52.

PORK, DELICIOUS AND NUTRITIOUS FOR YOU AND YOUR FAMILY

FARMERS!
WEILER BROS., INC.

distributors of IM-PRUV-ALL, custom-blended feed and soil minerals, invites you to learn more about the health of your soil and your animals.

We are presenting a series of programs in March featuring Dr. Ron Wendlandt, Lexington, Kentucky.

MONDAY, MARCH 10
Time: 9:30 a.m. to 2:00 p.m.
Location: Canterbury House, Palmyra, Smorgasbord Lunch
Speaker: Dr. Ron Wendlandt
Topic: Soil Fertility and Animal Nutrition

TUESDAY, MARCH 11
Time: 9:30 a.m. to 2:00 p.m.
Location: Bird-in-Hand Restaurant Rt. 340 East, Bird-in-Hand
Family Style Lunch
Speaker: Guy Braxton "The Lasso Man"
Topic: Weed Control
Speaker: Dr. Ron Wendlandt
Topic: Higher Production and Better Reproduction

WEDNESDAY, MARCH 12
Time: 9:30 a.m. to 2:00 p.m.
Location: Akron Restaurant, Rt. 272, Akron
Family Style Lunch
Speaker: Dr. Ron Wendlandt
Topic: Soil Fertility and Animal Nutrition

THURSDAY, MARCH 13
Time: 9:30 a.m. to 2:00 p.m.
Location: Jo-Lyn Diner, Rts. 73 & 61, north of Reading
Family Style Lunch
Speaker: Dr. Ron Wendlandt
Topic: Soil Fertility and Animal Nutrition

Committee approves increase in feed grain target

WASHINGTON, D.C. — A Senate-House Conference Committee Tuesday reached agreement on legislation to increase target prices for 1980 crop wheat and feed grains by 7 percent – with a further increase possible in 1981 based on expected production cost increases.

The conferees accepted a Senate provision to increase 1980 target prices for wheat to $3.63 per bushel and corn to $2.35, with the target price for other feed grains to be adjusted on the basis of their relationship to corn.

For 1981, the bill gives discretionary authority to the secretary of agriculture to increase grain target prices above the new 1980 levels based on increases in production costs.

The 1979 target prices are $3.40 for wheat and $2.20 for corn. The House version of the bill would have affected 1979 target prices only, raising them to the level the bill now fixes for 1980.

The conference bill extends the disaster payment program for wheat, feed grains, cotton, and rice for an additional year, through the 1980 crops. But a $100,000 limit on the total amount of disaster payments a producer might receive was agreed to by conferees. (The Senate bill contained a $50,000 payment limitation while the House bill contained no limitation.)

Sen. Herman Talmadge, chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, said the bill would provide "a minimum measure of protection against the relentless rise in production costs that is causing havoc for many American farmers."

Under the target price system, producers receive deficiency payments from the government for the difference if average market prices for covered commodities fall below target prices.

"This is the very least we should do for grain producers, particularly in view of the additional financial burden they may have to assume as a result of the Russian grain embargo," Talmadge said.

The compromise measure also authorizes the secretary of agriculture to require producers of all target price crops to maintain normal crop acreages in 1980 and 1981 in order to qualify for program benefits. If further authorizes the secretary to increase target prices if he imposes such a requirement.

However, the conference bill would permit farmers in 1980 to continue to plant beyond their normal crop acreage and be eligible for the target price coverage provided under the basic farm law of 1977: $3.06 per bushel for wheat and $2.08 for corn.

The bill now goes back to the House and Senate for final Congressional action.

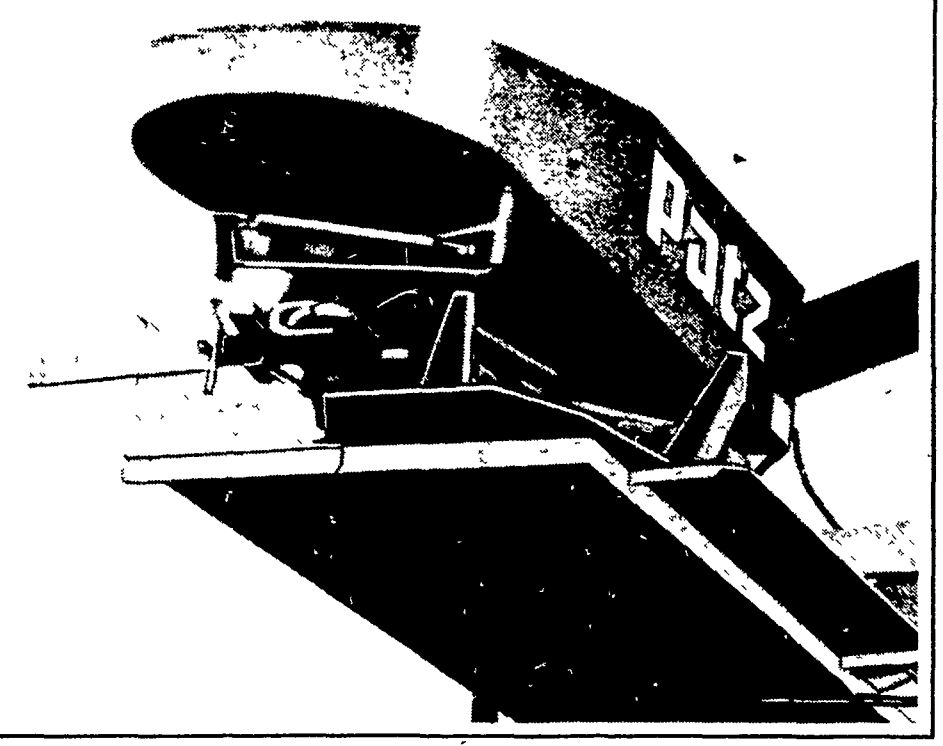
THE PATZ SOLUTION:
Rugged, Dependable Gutter Cleaners

Heavy-duty link (left) and extra heavy-duty link (right) for long chains and heavy loads

No tools needed to remove or replace Patz hook-and-eye links

Adapts to varied installation layouts



Your gutter cleaner has to work day after day, year after year. Better make sure you can depend on it.

Patz gives you over 30 years of quality and dependability in every gutter cleaner we make. *We're the ones with the proven forged steel hook-and-eye link . . .* the secret to Patz performance You can easily remove or replace links and flites without tools

Your Patz gutter cleaner becomes a wise investment for you over the years because it's built to last. The all-steel slide and one-piece steel flites with wear shoes are engineered to withstand the rugged wear of everyday operation. And Patz gutter cleaners are adaptable to many layouts.

Thinking of stacking manure? Consider a Patz Tripod Supported Stacker or a Swinging Slide Stacker. You'll save with Patz because one motor and reducer run both the gutter cleaner and stacker.

Talk to your Patz dealer. He'll show you how Patz performance means fewer problems for you. And that gives you more time to manage your livestock operation for greater profit.

Patz Pound, Wisconsin 54161 U.S A.
Performance Strong as Steel

Excesses cited in workmens comp

HARRISBURG — An expert in the field of workers' compensation told a State Senate committee Friday that "the practice of compensating employees for work-related injuries or illnesses is being carried to extremes."

Russell Guy, chairman of the workers' compensation committee of the Pennsylvania Chamber of Commerce, testified at a meeting of the Senate's labor and industry committee on a Chamber-endorsed eight-bill legislative package designed to reform the state's workers' compensation system.

Guy, who is assistant manager of safety and workers' compensation for Bethlehem Steel Corporation, said "Employers cannot be held responsible for the natural aging process." Describing the case of a 73-year-old cloth cutter who died from a heart attack on the job, Guy noted that "there was no accident or trauma, and the man had an existing heart problems.

"He could just as likely have suffered the heart attack at home, but because it happened on the job, compensation was paid."

Guy told the lawmakers that in the period between 1976 and 1978, workers' compensation benefit payouts had more than doubled.

"In addition," he said, "from 1974 to 1978, lost-time work injuries in Pennsylvania increased by 17 percent, and the total number of compensable injuries increased more than 87% in the same five years." He also said that workers' compensation insurance premiums have increased 265% since 1973.

Guy said the basic reason for the higher costs was "legislated increases in benefits and expansion of coverage."

He reported on the case of a retired person who had worked 31 years for a company, averaging $11,000 annually during his last five years. He became disabled, and qualified for monthly payments of $809 in workers' compensation, $450 in a company pension, and $410 in a Social Security disability award.

"The man's total annual income then exceeded $20,000," Guy said, adding that "no one checked to see whether the claimant was ever receiving workers' compensation."

Guy told the legislators that the law should be changed, in cases like this, to make Social Security the primary benefit.

"Employers and insurance carriers would then be more likely to check on the total amount of a claimant's award before making the workers' compensation payments," he said.

Which will it be: soybeans or corn?

UNIVERSITY PARK — For the first time ever, soybean production exceeded corn production in the United States in 1979 and Pennsylvania production shot up almost 30 percent. Farmers need a tool to help them decide which crop is most profitable and best suited to their needs.

With two crops competing for the same land a farmers most important tool is the profit margin of each crop. This, according to Penn State Professor of Farm Management Extension S. A. Dum, is determined by comparing the variable and fixed costs.

Variable costs are the charges made for items purchased and used mainly during the prodution period such as seed fertilizer, chemicals and fuel. Some variable costs should be kept low as possible while others are yield stimulating adding more profit than additional cost.

Fixed cost are the charges for committed capital or overhead resources. Examples include depreciation, interest on investment, rent taxes and insurance.

When making decision involving crop changes, it is not necessary to consider fixed costs unless new additional costs are necessary.

Budgeted variable costs plus additional fixed costs must be determined for each crop. The final comparison of profitability is dependent on the yield per acre and the projected selling price. Obviously there is less certainty in projecting these two factors than the costs of production.

Based on the budget projections and other factors such as available markets, attainable yields over a period of years and individual preferences the individual farmer can evaluate which crops are more profitable as well as desirable.

Poultry Federation chief offers outlook

Marketing, cholesterol scramble egg industry outlook for 80s

BY DICK WANNER

HARRISBURG — Of all the Northeastern states that once produced poultry, meat and eggs, only Pennsylvania has managed to retain a solid core of producers and allied industry.

In the fifties and sixties, southern states, with clear advantages in labor, feed and housing costs, dominated production and just about choked the life out of poultry production north of the Mason-Dixon line.

But the south's advantages began to crumble in the seventies as their labor and housing costs rose to match those in the north. Now, with transportation costs rocketing ahead, southern producers are beginning to find themselves at an economic disadvantage in competing with producers closer to the major urban markets of the northeast.

And while that is welcome news to Pennsylvania poultrymen, according to John Hoffman, executive director of the Pennsylvania Poultry Federation, there are still plenty of challenges.

The cholesterol issue, for example, has been plaguing the egg industry for more than a decade. Eggs are by far the richest source of cholesterol and have been indicated as a heart disease villian by some members of the medical profession. Other physicians, just as expert, have come to different conclusions about the role of dietary cholesterol, and see no reason for healthy people to limit egg consumption.

While the arguments are sometimes obscurely academic, their impact on egg producers' pocketbooks has been dramatic.

One bright note in recent months has been a slight increase in per capita egg consumption, but the cholesterol controversy has been burning slowly along That fire is about to be stoked to a white heat, though, Hoffman believes, by, of all people, the U.S Department of Agriculture.

USDA is ready to distribute a booklet in which it tells every member of the American public to limit his or her consumption of eggs to no more than three a week. The guidelines, an outgrowth of Senator George McGovern's Select Committee on Nutrition, will also be used in the government's institutional feeder programs.

"The nutritional challenge is the biggest one we'll face

Public attitudes on soil conservation are linked to gas pump

WASHINGTON, D.C. — In a survey conducted from October 19 to November 21, 1979, Louis Harris and Associates uncovered surprising public opinions on U.S. agriculture soil conservation.

Through personal interviews, which lasted an average of one hour and nine minutes, and cross-sectioned over 7000 Americans, the survey related the public's knowledge of soil conservation, belief in conservation, and income to their willingness to pay for it at the gas pumps.

The sample employed was substantially larger then those customarily utilized by the Harris firm. This was to assure that the attitudes of specific demographic subgroups—such as farm families and residents of rural areas - could be statistically analyzed with a high degree of accuracy.

The sample was weighted to guarantee that a minimum of 300 respondents would occur in each of the 16 cells representing the combination of geographical region of the country, East, South, Midwest, West, and type of place, urban, suburban, town, and rural.

The following are some more of the surprising finds made through the public survey:

Public attitudes toward resource conservation

More than eight out of ten Americans adhere strongly (28%) or moderately (60%) to an ethic of conservation. Americans value conservation and feel that the country should be moving in that direction. However, conservation is not equated with strict preservationism, which is rejected by a majority of Americans.

By better than 2-to-1, the public feels that we should be moving toward a country:

—that saves its resources to benefit future generations rather than using them to benefit the present generation, 60-24%. Farmers take a stronger pro-conservation position than does the public as a whole, while blacks, and especially rural blacks, are more pro-consumption oriented. This may reflect the greater incidence of poverty among minority groups.

—that conserves the natural productivity of the soil rather than emphasizes chemical fertilizers and farm technology, 61-26%; farm owners and managers take the same position, through by a less decisive 44-38%;

—that meets its energy needs though more conservation rather than more production, 58-26%; farm owners and managers also take this view, but by a stronger 66-18%;

—that believes that protecting the environment is more important than economic growth, 52-24%; while the young are the most strongly pro-environment on this question, even those 65 and older take this position by nearly 2-to-1, 45-24%.

The public, however, rejects the vision of a nation that preserves nature for its own sake, but rather, believes that nature should be used to produce goods which benefit people, 51-32%. Farm owners and managers (61-24%) are particularly of this mind.

Knowledge of conservation

The public is surprisingly knowledgable about soil conservation problems and practices. In large part, the public's information about soil conservation may be attributed to formal education, which appears as important as farm experience in predicting people's knowledge about most areas of soil and water problems and practices.

The public exhibits a good grasp of soil conservation issues. Forty-one percent of the public answered correctly at least 7 out of 8 questions posed which tested knowledge of conservation, while seventy-eight percent answered at least five out of the eight questions correctly.

Volunteered responses to an open ended question about the meaning of soil conservation evoked sophisticated responses, for example, thirty percent of the public volunteered crop rotation as a method of conserving the soil.

Both formal education and actual farming experience appear to be equally effective in raising knowledge about soil conservation. Fifty-seven percent of college graduates were rated high on the knowledge scale compared to sixty percent of farm owners or managers.

There are, however, some differences in knowledge of particular areas of soil conservation, between those with high levels of formal education and those with farming experience.

Farm owners or managers (74 percent) are more likely to understand the harmful effects of the conversion of agricultural land to other purposes than the college graduate (56 percent).

More college graduates (84 percent) on the other hand, are knowledgable about the harmful consequences of herbicides, pesticides and chemical fertilizers on water quality than farm owners or managers (71 percent).

Marketing

(Continued from Page C41)

in the 80's," Hoffman said. "Pennsylvania and the other individual poultry producing states will have to work just as hard as the national groups to combat this threat."

Hoffman sees a subtle movement underway which would eliminate not only eggs but other foodstuffs as well from the American table.

"If we don't fight back," he said, "the only commodities we'll have left are those which the government, by design or default, has allowed to survive.

"In the seventies, I don't think anybody would have said trade associations like the Pennsylvania Poultry Federation would be necessary to an industry's survival.

But groups like ours seem to be the only way for industry to fight back, and what we do in the Eighties may determine whether or not people in the year 2000 will be eating eggs, chicken and turkey."

Another issue Hoffman sees looming large in the next decade is the preservation of farmland, and the right to farm it.

"We helped draft a bill that would keep people from closing down farm operations that had been using good agricultural practices, and which had been going for more than a year," Hoffman said.

"Because of the concentrated numbers in poultry operations, our members are most vulnerable to nuisance suits and township ordinances. A legitimate complaint could still shut a farm down if it's endangering the health of people in the area, or if it's polluting water supplies. What we have to guard against is the threat of being shut down because somebody doesn't like the smell of chickens, or the look of a broiler house."

Another threat from without that could drastically change poultry economics would come from humane societies.

"In parts of Europe, humane groups have already had cage rearing outlawed. They don't like high-density animal rearing, for chickens or any other animal. Our job will be to help convince the public that their food bill will go up if the humane groups have their way," Hoffman said.

"It's not a big problem yet, but I can see it coming."

As the man on the firing line, Hoffman's job is to perceive the poultry industry's problems, to tell the industry about them, then to try and help the industry solve them. He has been with PPF for six years, and came not from within the poultry industry, but from another association, the Pennsylvania Medical Society.

Hoffman has seen the state's poultry industry strengthen in his six years at the PPF helm. The economic factors which pushed the industry along also helped the association double its membership to 530, and to triple its annual operating income.

After a long history as a primarily social organization, the PFA has come to be recognized by lawmakers, regulators and other farm groups as the voice of the Pennsylvania poultry and egg industry.

Public attitudes

(Continued from Page C42)

Public concerns with soil and water

Concern about conservation, though substantial, is less widespread than the immediate public concern with inflation in the cost of food, housing, and energy.

Nevertheless, there is a linkage between concern about inflation and concern about conservation, which may provide the basis of widespread political support for soil and water conservation measures as a long-term strategy for fighting inflation.

A fifty-three percent majority of Americans consider the loss of good farmland to be a "very serious" problem, while 50 percent consider the misuse of our soil and water resources as a very serious problem. Most critically, in terms of the farmland conversion issue, we find an extraordinarily high level of public concern.

The public indicates that its second highest priority for Federal actions (27 percent) is to "help make sure that our best farmland isn't used for other things." Some 51 percent of the public feel they benefit a great deal or a fair amount from Federal efforts to help make sure prime farmland isn't used for other purposes, but among farm owners and managers just 32 percent think they benefit that much.

This level of concern, though substantial, is clearly less than the more widespread concern with the cost of energy (82 percent), cost of housing (81 percent) and the cost of food (80 percent) as serious problems facing the country today.

Those who are most concerned with inflation, however, are also more likely to expect shortages of food and good land for producing food in the next ten years.

This may explain why support for federal spending for conservation increases with degree of concern about inflation, from seventy-two percent of those with low level of concern about inflation to eighty-two percent of those with a high degree of concern about inflation.

Priorities for land water

The public indicates a strong and consistent perference for allocating more scarce resources to agriculture then to competing household, industrial, energy and recreational uses. Food production is given priority in the allocation of land and water by every identifiable social, economic and demographic group in the survey.

Predictably, the farming constituency is particularly supportive of the agricultural uses of land and water. Geographically, people living in the rural Midwest allocate substantially more land and water to food production than people living in other areas.

The farm owner or manager is even more emphatic, allocating 63.1 acres of land and 38.7 gallons of water to food production - twice as much land and half again as much water as the general public.

The public is sensitive to the legitimacy of all of these demands on scarce resources. Every competing use is accorded some share of these resources.

In the specific case of allocating water for energy development or for agriculture in our water-scarce western states, some ninety-two percent of the cross-section allocate at least half of the available water resources to farming, while just eight percent allocate at least half of the available water resources to energy development.

Overall, the public nationwide would allocate, for the water-scarce West, three gallons of water to agriculture for every two gallons committed to energy development.

Hence the production of food is given priority in the allocation of soil and water resources by the American people, but clearly has no monopoly on them.

Synfuels and Gasohol

American exhibit a strong preference for gasohol over synfuels development as a means for increasing the supply of liquid fuels from domestic energy sources. Gasohol is seen as the more likely to help reduce foreign oil imports, to help keep down the cost of gasoline, and to do the least damage to the land.

Consequently, by better than two to one, the public prefers to see more federal support going to gasohol rather than synfuel development.

The gasohol alternative is perceived as the more likely to: — cause the least damage to the land used to produce the fuel (59-19 percent); — help keep gasoline costs down (50-19 percent); — more likely to reduce oil imports in the next five years (49-23 percent).

A plurality of the public is prepared to pay additional money at the gas pump to offset conservation costs stemming from additional agricultural production for gasohol. This willingness, however, is proportional to the expected costs of the program to the consumer.

Recognition of the benefits of gasohol for energy production and the desirability of federal support for gasohol development is most pronounced in the Midwest and among farmers.

Attitudes toward federal action

The public sees conservation as an area of joint public and private responsibility. Neither the owners property rights nor the government's claim of public interest is regarded as exclusively paramount.

Rather, the public would prefer conservation strategies that involve a partnership between government and the farmer, based upon their mutual interest in soil and water conservation.

Most tellingly, the public believes that we have yet to reach the point where we should be more concerned about holding down the costs involved in undertaking soil and water conservation programs than we should with completing the work that remains to be done (77 percent).

Indeed, some 39 percent take the position that protecting our water and soil is so important, the requirements and standards cannot be too high, and that continuing improvements must be made regardless of cost.

Overall two-thirds of the public (67 percent) feel that landowners and government should share the responsibility for deciding about the conservation of the land, while just 28 percent feel that private landowners should have sole responsibility and just two percent that the government should have the sole responsibility.

On the one hand however, by a margin of seven to one, the American people accept the propriety of Federal action to protect farmland from erosion and gullies (82-12 percent).

Yet, in terms of the question of whose rights are the more important, the farmer's right to decide how much care to take of the land, or the public's right to make sure that the land is properly cared for, the American people clearly take the side of the rights of the farmer, 61-29 percent.

These views are not inconsistent, but rather, are reflective of the non-ideological and basically pragmatic views which the public holds on this key issue.

On the one hand, the public

Public attitudes

(Continued from Page C43)

very much wants to see the conservation of the nation's soil and water resources carried forward. On the other hand, the public believes that the rights of private farmers and landowners must be respected.

The manner in which the public balances these competing claims involves the idea of an equitable distribution of the costs of soil and water conservation between the private farmer or land owner and the government.

Equity in Conservation policy

Mandatory programs which require the farmer to pay for the cost of conservation, exclusively, are viewed as fair to both partners by only a tiny segment of the public (12 percent). Consequently, only 4 percent of he public views this as the best approach to set a national soil and water conservation program.

On the other hand, a mandatory program involving loans and other financial help is viewed as fair to both partners by 56 percent of the American people; 26 percent see this approach as the best way to assure that the goals of a soil and water conservation program are met, ranking it second out of the eight approaches tested.

Support is almost as strong for a third mandatory program, one in which farmers and landowners who did not protect their soil and water would lose other help they now get from the government for their farms. This approach was judged to be fair to both partners by forty-one percent of the public, but only fourteen percent said they favored this approach over the other seven.

A program of loans and other financial help to farmers who volunteered to protect their water and soil, on the other hand, is viewed as fair to both partners by seventy-one percent of the public. Likewise, this approach is favored over the others as the best way to attain soil conservation goals by thirty-five percent of the public, ranking it first of the eight approaches tested. This represents the present cost-sharing program.

Voluntary conservation programs that would provide financial help to the farmer that need not be repaid are viewed as fair to both partners by only twenty-three percent of the public. Hence, just ten percent favor this approach to conservation as the best of the eight examined.

Financial bonuses to farmers and other landowners who voluntarily take good care of their soil, but none to those who don't, is judged as fair to both partners by forty-two percent of the public, but only nineteen percent select this approach as the best way to go.

Farmers and other land owners who take good care of their land would be permitted to pay lower taxes than those who don't by the forty-one percent who judged this approach to financing the equities of a soil and water conservation program as fair to both partners. Yet, just nineteen percent saw this approach as the best of the eight for assuring that soil and water conservation goals are met.

One-third of the public said it would be fair to both partners if the government provided information and advice but no financial help to protect these resources. A similarly large group, twenty-nine percent, saw this approach as fair to neither partner. Only ten percent selected this approach as their most-favored. Though seen as inexpensive, this strategy is regarded as not likely to be effective.

Public priorities for federal spending

By more then five to one the public feels that it is proper for the federal government to grant money to farmers and other landowners so that they can protect soil and water. (78-14 percent).

In terms of six major related problems, the clear preference of the public in federal spending is for programs that increase the supply food, lumber and clothing, for which they allocate $24.40 out of every $100 available federal dollars; increasing the supply of crops and farm wastes to produce energy receives $18.30; increasing the water supply, $17.10; improving water quality, $14.60; protecting fish and wildlife habitats, $13.30; and, reducing the damage caused by floods, $12.70.

Expectedly, farmers would allocate substantially more federal support to increasing agricultural products for both consumption and energy production than would the general public.

The farm owner or manager would allocate $30 to increase food, lumber and clothing, compared to $24.40 in the general public.

The farm owner or manager would allocate $25.00 to increase the supply of crops and farm wastes to produce energy compared to the $18.30 allocated by the general public.

The public accepts "need" as an important criteria in the allocation of soil conservation money to farmers and landowners, but need is not perceived as an entitlement.

Two out of three people (68 percent) feel that financial need should be a criteria for who should receive governmental assistance.

On the other hand, a substantial majority (59 percent) feel that only those farmers who agree to practice specific soil and water conservation measures for ten years should get financial assistance.

By 69-21 percent, the public does not favor targeting financial help only to farmers in high-erosion areas, but rather supports the idea of providing financial help to farmers with erosion problems regardless of where they live.

Public attitudes toward agriculture

Overall, the American people have a good grasp of the realities of contemporary American agriculture. They support the concept of the small, family farm and federal policies aimed at preserving and increasing the number of small family farms in this country.

On the other hand, the public supports the continuation of a production-based, rather than a needs-based subsidy system.

A majority of the American people understand the fundamental issues in modern American agriculture:

—by 72-22 percent they agree that most years farmers have a difficult time making enough money to stay in business.

—by 67-22 percent they agree that almost all new farmers are the children of farmers.

—by 51-33 percent they recognize that most of the food in this country is not grown on smaller, family farms.

A sizable majority (60 percent) of the public feels that we should be moving towards a country which has a relatively large number of small farms, while just 19 percent feel we should be moving toward a country which has a relatively small number of large farms.

The public supports new federal controls on farmland ownership to increase the number of small farmers in the country, 67-19 percent. Farm owners and managers take this position by 62-27 percent.

Despite this support for the concept of the small farm, the public does not limit its support for agriculture to small farms. By 51-33 percent they recognize that most food is grown on large farms. Almost half (48 percent) believe that all farmers, large and small, should get financial help for soil erosion problems.

Overall, a 45 percent plurality favor continuation of the production-based subsidy system, compared to 37 percent who favor a needs-based subsidy system.

Public Views of decision-making

The American people report a relatively low level of participation in the decision-making processes. Only one in three people recall having ever personally done anything to try

Public attitudes

(Continued from Page C44)

to influence policies or programs of the federal government.

Fully 70 percent of the public says they understand only a little or hardly understand at all how to go about trying to influence a decision being considered by the executive branch of the federal government, Just 29 percent say that they fully or mostly understand how to do this.

Nevertheless, the public highly values participation and the machinery for broad participation.

Eight-two percent rate direct representation as very important on decisions concerning the safety and quality of the food they eat.

By four to one the public chooses putting up with some delay in order to let people have a say in the big decisions, rather than getting things done quickly at the expense of citizen input.

Seventy-nine percent of the people feel that we should be moving toward a country with many chances for citizens to have a say in government decisions and which expects its citizens to give some of their time to politics; while just ten percent feel that we should be moving toward a country which doesn't have such expectations but which has few chances for citizens to have a say in government decisions.

The ability of government to increase citizen participation in the decision-making process has more to do with conveying a sense of the importance of participation to the citizen rather than making it more convenient.

Community vegetable gardens enhance civic pride

UNIVERSITY PARK — Community vegetable gardens are becoming popular again.

Hundreds of gardens have been planted in towns and cities during the past several years.

Such gardens make sense where many people find the essentials of life almost priced out of their market. And in many cases, they may not be able to purchase some vegetables they like because they are not available.

Neighborhood self-help is important, and vacant lots can be cleared of debris and become green again.

But developing community gardens is not always easy, says J. Robert Nuss, Extension horticulturist. Community gardeners must cope with roving dogs, rubble, poor soil, contaminants of various kinds, vandals, and, in some situations, bureaucrats.

While the production of fresh vegetables and small fruit is an important goal of community gardening, there are human values too. People learn how to do new and different things, thereby gaining confidence in themselves. Pride is contagious, and community gardening may be the first step in a neighborhood revival. Children can be helped by older citizens, thus helping to bridge the generation gap.

Ritter reviews Pa. fruit situation

UNIVERSITY PARK — The winter so far has been good for prospects of excellent fruit crops, said Dr. C. Marshall Ritter, Extension pomologist, Penn State.

Some of the problems of the last growing season included cool, cloudy, and rainy weather conditions, with the summer being several degrees cooler than normal.

Cherries were generally small.

The peach crop was less than expected, but quality was high, even though the total crop was less than average.

Last year was an excellent year for growing strawberries. However, in some areas, production was down, he noted.

The production of blackberries and other brambles was average. Lack of good fertilization and fundamental pruning practices were causes for low production in many instances.

Thorough renovation of the strawberry planting must be practiced if good strawberry crops are to be realized.

Pear production in Pennsylvania was troubled by worse than usual fire-blight. Fire-blight reached epidemic proportions with the help of a cool, wet, summer. Pear production was about average, but 1979 quality was not good.

Pennsylvania apple orchards produced a huge crop, reports Ritter, however, size was not as good as average. Trees were full of apples which didn't "pick out" as expected.

The Golden Delicious crop was rusty showing poor color. But there was nothing growers could have done about this, Ritter adds.

Orchardists are doing a better job of training their trees than they were ten years ago, Ritter said. During the past five years, our programs in pest management have given growers a greater comprehension of how spray programs can help to grow better crops, he added.

Based on leaf analyses, it appears that we are still applying too much nitrogen for top quality fruit production, he said. Increasing emphasis on levels of the plant nutrients has improved the firmness and keeping qualities of fruit.

Fruit trees went into this past fall in good shape, and there are no major problems so far this winter. The warm fall spell came too early to be of any effect on flower buds, explained Ritter.

The trees are in good shape so far, and barring undue cold snaps or extremely warm weather during the next few months, they have the flower buds to produce another good crop of fruit in 1980, he noted.

Orchardists are concentrating their plantings. More trees per acre are planted now than was the practice 10 years ago.

Growers now should start planting their new orchard establishments two or three years before they actually set the young trees. Planning involves getting the old trees out, site selection for new plantings, land renovation and ordering new trees.

Soil separation before the new trees are planted is important to assure that the new fruit trees get off to a good start, urges Ritter.

"ATTENTION" ALL A.E. STALEY CO WAXY-CORN CONTRACTS!

We still have plenty of waxy-seed available for the grain farmers and also Waxy Hybrids are great for cattle and hog feeders. In this area they should plant WAXY—MAIZ Hybrid seed-corn. College feeding trials show 10% better gains on 7% less corn with WAXY fed to cattle. We have several WAXY-MAIZ Hybrids for this area. They yield the same as yellow dent corn, but have higher energy starch. Hogs gain better and get to market faster on WAXY-MAIZ. We can show you how to boost cattle and hog feeding profits.

SATISFYING SIZZLING SAUSAGES

Sausage is a "natural" for winter menus.

You can serve it with eggs for a hearty breakfast or a light Sunday supper. From the mildest flavored pork sausage to the highly seasoned pepperoni – there's a sausage for every taste.

According to U.S. Department of Agriculture (USDA) marketing specialists, pork is in plentiful supply. So, now's the time to try many of these pork products.

Although there are more than 200 varieties of sausage on the market, many homemakers pass up these delicious meats because they don't know which items to choose or how to serve them. While the average American is familiar with only 8 to 10 varieties of sausage, the rich variety of recipes inherited from the diverse immigrants who settled this country makes many other types available to us.

Our mixed ancestry accounts for the exotic names by which these meats are known. Even the common ones like frankfurters and bologna still carry the names of the cities or regions from which they originated.

Fresh sausage and uncooked smoked sausage are the most perishable of all sausage products. Fresh sausage is made of meat which has not been cured or smoked. It should be refrigerated and used within two to four days after purchase, or it may begin to turn rancid.

Uncooked smoked sausage is made from either fresh or cured meat which has been smoked but not cooked. It can be stored under refrigeration for up to one week before using.

Be sure to take advantage of the plentiful supply of pork this fall.

ELECTRIC BLANKETS – ONE OPTION TO KEEP YOU WARM

With fuel costs going in only one direction – up – many families are giving new consideration to bed coverings.

Both comforters and electric blankets can help you reduce your electric bill by keeping warm enough to let you turn your thermostat down several degrees.

Several layers of blankets and well-chosen nightwear can achieve the same result.

One distinct advantage of the electric blanket is that it keeps you warm and cozy without weight and bulk.

Electric blankets are available in all four standard bedding sizes – twin, double, queen and king. You can purchase the larger-size models with single or dual controls. Look for controls that are easy to read and see in lighted as well as darkened rooms. Controls that don't clearly signal "on" in the daylight can too easily be left on all day.

Controls should be kept out in the open since they operate by sensing a room's temperature. If you don't want to give up bed-side table space, choose a blanket that lets you fasten the control to the headboard or side rail of the bed.

Look for the Underwriters Laboratory (U.L.) seal for electrical safety. Don't worry about shock if the blanket accidentially gets wet. Independent tests have shown no leakage even when the controls of totally immersed blankets were turned on.

Be sure to read the warranty, and check its duration and conditions as well as the operating instructions. An electric blanket is not a heating pad so don't expect it to get hot. (If it gets hot, something is wrong – so stop using it until it's checked out.)

Never tuck in the wired section of a blanket and never run the electrical cord under the mattress.

Another "never do" with electric blankets is drycleaning. With costs what they are, that may well be an advantage. All electric blankets are machine washable, and many can be tumbled dried. If you line dry, use two paralell clothes lines.

Dairy association tells why milk promotion pays

ROSEMONT, Ill. — Most people who've never lived on a farm think of dairy primarily as a "way of life." So do most dairy farmers, when they're in the milkhouse, the fields or the company of their families and friends.

But when a dairy farmer sits down at his desk or the kitchen table or wherever he does his books, he knows that dairying is a business. He knows his operation has to be run on sound business principles if his way of life is to be maintained. Good business practices mean a financially healthy operation, just as good milking practices mean healthy cows and a quality product.

Every American businessman or woman, from shoe salesman to steelmaker, banker to brewer, knows that the basis of a healthy business is consumer demand. People have to buy your product. No matter how good it is or how efficiently you produce it, if it doesn't sell, you're out of business.

So American businessmen stimulate demand through advertising. As part of good, established business practices, they make consumers aware of their produce and its benefits.

It's the same principle in the dairy industry. It has wholesome, good-tasting, nutritious products, but if nobody buys them, the dairyman isn't going to be able to make a living. So it becomes a sound business practice for the dairyman to promote his products.

Promotion, including advertising, generates consumer demand and allows the farmer to sell his milk at a profitable price.

The dairy farmer members of United Dairy Industry Association, through their member organizations, maintain milk markets with UDIA's total promotion program.

The program is made up of the advertising and marketing activities of American Dairy Association, the research development of dairy products and processing methods funded by Dairy Research Inc. and the nutrition research and education programs of National Dairy Council. UDIA has 20 member organizations and represents 70 percent of the milk marketed in the United States.

Such a dairy products promotion program is important in light of constant changes in the market place, the food industry and consumer preferences. Consumers can eat and drink many things besides dairy products.

Food processors and restaurant owners have many other things available to use with their foods or in their recipes besides dairy ingredients. Like all other American businessmen, the dairy farmer faces stiff competition.

During 1978, each American drank approximately 38 gallons of soft drinks . . . a little less than 25 gallons of milk. Per capita consumption of soft drinks increased 19.7 percent between 1975 and 1978. Per capita consumption of milk remained unchanged.

Soft drink makers spent more than $280 million for advertising in 1978. Non-brand milk advertising expenditures in 1978 totaled $20.5 million. For every dollar we spent, they spent more than $10.

And milk isn't the only dairy product with competitors. About 263 million pounds of synthetic cheese were produced in the U.S. in 1978. This amounts to more than 7 percent of all the real cheese produced in 1978 and is greater than cheese imported in 1978.

A wise businessman counters competition by keeping his product before the public's eye.

Keeping milk and dairy products before the public's eye and mind at the supermarket costs money, but so do all investments in a business' future.

Every year a dairy farmer makes numerous investments to keep his farm running. On the basis of practical business decisions, he invests in equipment, supplies, feed, livestock, breeding services and buildings. These expenditures are designed to improve his business, to provide the greatest benefits possible for the amount invested.

The dairy farmer's investment in milk promotion yields substantial benefits for the cost. The money he spends comes back to him multiplied many times in the form of greater sales and profitable prices.

A 1976 study of cheese advertising in four markets across the U.S. demonstrated that cheese sales in grocery stores increased 15 percent during the six months of an advertising campaign that was funded at a level of six cents per consumer.

The Cornell University study, widely known in the dairy industry, showed that

Two meetings scheduled on farmland

QUAKERTOWN, NJ — Two meetings are coming up in the next two weeks that will focus on the future of our farmland.

Theme of the Hunterdon County Soil Conservation District annual dinner meeting is, "Keeping Farms: What's Needed in the 80's."

Scheduled for Friday evening, March 7, at Quakertown, N.J. Firehouse, the district will present as its speaker, Paul Silver, a proponent of a viable agriculture and farmland retention. He is chairman of the Board of Supervisors of Buckingham Township in Bucks County, Pa. His title makes him "mayor" of this suburbanizing municipality, a community that's attempted various innovative approaches to keeping farms and farmers.

He'll share his experiences and provide what he considers to be the means to keep agriculture thriving in this area.

The program follows a 6 p.m. social hour and a 7 p.m. roast beef dinner. Tickets are available in the Hunterdon County Soil Conservation District Office in the Extension Center, Rt. 31, Flemington. Ticket deadline is March 3rd.

The second meeting focusing on the farmland issue will be the regular monthly meeting of the Hunterdon County Board of Agriculture, Wednesday evenings, March 5, at the Extension Center.

Board President Dave Buchholz has moved the meeting time up to 7:30 p.m. to accommodate brief, routine business items first. Then, at about 8:00 p.m. the Farmland Study Committe, with Ted Blew as chairman, will consider its mission to seek out possible means of farmland retention.

This committee is part of a large three-county regional study group tackling the farmland future question. Designed to bring together ideas, suggestions, and concerns of not only farmers, but non-farmer, but non-farm public as well, the committee will use the March 5 meeting opportunity to discuss, listen, share.

USDA reports grain reserve figures

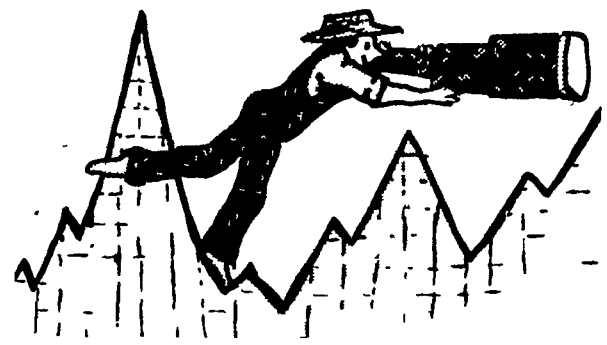
WASHINGTON, D.C. — There were 1,051 million bushels of barley, corn, oats, sorghum and wheat in the farmer-owner grain reserve as of February 8, Ray Fitzgerald, administrator of the U.S. Department of Agriculture's Agricultural Stabilization and Conservation Service today.

CROP	TOTAL IN RESERVE (bu.)	METRIC TONS
Barley	27,455,000	597,762
Corn	696,872,700	17,701,501
Oats	33,024,043	450,313
Sorghum	65,004,400 (36,402,464 cwt.)	1,651,999
Wheat	230,559,745	6,274,810
TOTAL	1,050,915,888	26,675,585

The following table obtained by a telephone survey shows new entries of corn, oats, sorghum, and wheat since January 7, 1980:

CROP	AMOUNT ENTERED IN RESERVE (bu.)	METRIC TONS
Corn	82,089,700	2,085,188
Oats	800,043	11,613
Sorghum	8,827,614 (4,943,464 cwt.)	224,233
Wheat	5,406,745	147,148
TOTAL	97,124,102	2,468,182

The grain reserve takes grains off the market for a period of up to three years, or until market prices reach state levels.



THINK AHEAD...
Read Futures Markets on Page 3.

Dairymen are honored

Among ten Southern Lancaster County dairymen who received Certificates of Merit for top Dairy Herd Improvement Association averages at the 16th annual District 5 meeting for Atlantic Breeders Cooperative members on Feb. 19 were, from left, Aaron E. Beiler, Robert L. Kauffman, Donald Ranck and John M. Harnish. Others included Glenn Burkholder, Melvin M. Groff, Jonas E. Zook, J. Robert Kindig, Henry Bledman and Curtis Akers.

Dairy assoc.

(Continued from Page C46)

raising the investment in milk advertising by 4.6 cents per consumer increased sales in New York City by three percent. This greater demand and the projected resulting increases in the farm value of milk meant that dairy farmers got back about $2.26 for every dollar invested.

A follow-up to that study, conducted January 1975 - June 1977, compared per capita sales of milk during periods of no milk advertising to sales when milk was advertised. In New York City, an 8.5 cents per capita expenditure for adveritsing resulted in milk sales that were greater by 143 ounces per consumer, or 4.9 percent, than during periods when milk was not advertised.

The farm value of th difference was 22.9 cents pe capita, which meant a ne return for the dairyma (farm value minus the pe capita cost of advertising) o 14.4 cents per capita.

This increase meant a ne return of $1.69 for th dairyman for every dolla spent for advertising at th 8.5 cents per capita rate.

There are very few i vestments that a dairyma can make that will yield suc substantial returns.

Through the soun business practice of dai products promotion dairyman is able, at minimal cost, to maintai and build the market for h products, increase hi potential for profits and invest in the future of his way of life.

The case of Farmer Jones and the 5¢ orange.

Farmer Jones had finished his shopping in town. Returning along Main Street with two dusty nickels in his overalls pocket, his eye caught a hand-scrawled sidewalk sign: "ORANGES ON SALE — 5¢ EACH!"

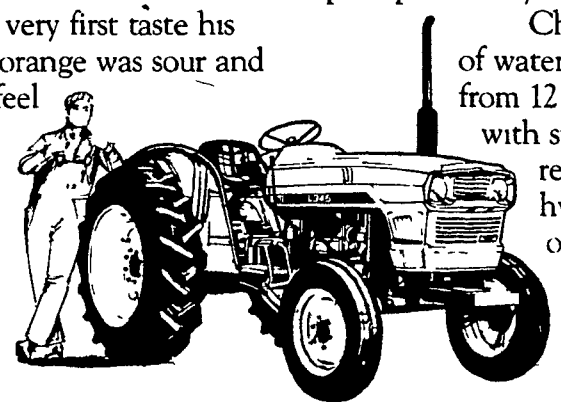
Feeling thirsty, it being a sizzling hot day, Farmer Jones plucked an orange from the makeshift stand... paid his nickel and continued whistling on his way.

As his fingernail bit into the rind, Farmer Jones' mouth watered at the succulent treat within. But at the very first taste his mouth turned dry. The orange was sour and flat. He suddenly didn't feel like whistling again.

Too late — for he was down to his last 5¢ — he remembered Ben's Country Store. Ben's oranges were the best in town. Plump, juicy, fresh. He'd built his business on quality and service, and people always came back for more.

So it is with Kubota.

Year after year — without fanfare — Kubota quietly remains number 1 in mid-size tractors. Engineered for lasting performance by Japan's largest manufacturer of agricultural equipment, Kubotas offer the ultimate in low-maintenance reliability. Backed by nationwide distribution centers that assure prompt delivery of any needed parts.



Choose from a full line of water-cooled diesel tractors, from 12 to 81 horsepower... with such equipment as rear PTO and 3-point hydraulic hitch *standard* on all models.

Pick yourself an orange Kubota. You won't be left with a sour taste in your mouth.

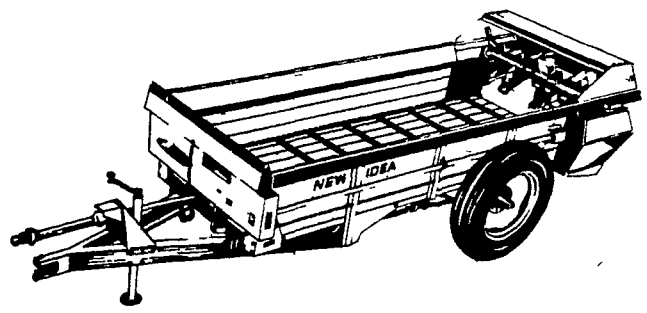
LOW COST WORK SAVERS!

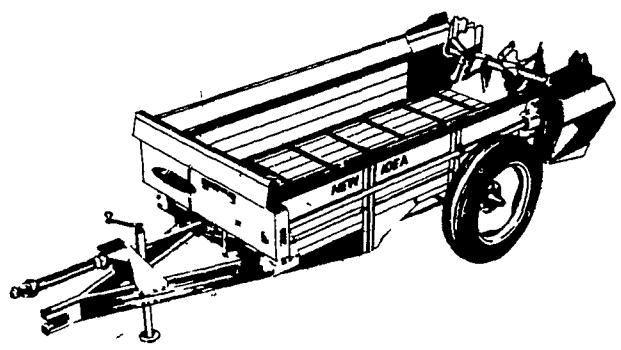
NEW IDEA FLAIL-TYPE SPREADER

Handle even hard-packed or frozen manure with this unique "undershot" flail design. It throws an 80" to 90" spread down and back where the wind can't break it up. Optional endgate available for handling sloppy loads.



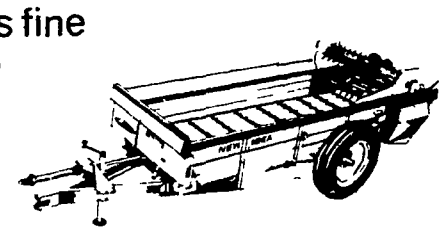
NEW IDEA SINGLE-BEATER SPREADER

Scientifically designed farm proven paddles that slice, shred, and spread. This value packed design is available in five sizes and with an optional endgate for sloppy loads.



CYLINDER—PADDLE SPREADERS

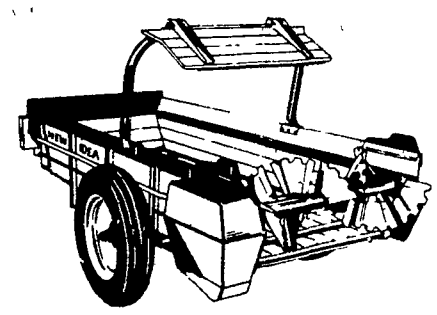
"The Widespread" shreds fine and spreads wide with 10 rows of blade-like, triple-staggered teeth. Choose the size and options you need . . . you'll get the quality features you want.



HANDLE SLOPPY MANURE!

DO IT QUICKLY AND CLEANLY WITH A NEW IDEA

Seal in liquids until you get to the field with the use of an optional hydraulic endgate. Available on any Avco New Idea PTO spreader.



RELIABLE, YEAR-ROUND PERFORMANCE

NEW IDEA CYLINDER—PADDLE SPREADER

Throw down the widest spread possible with "The Widespread." Choose from three sizes . . . each has the quality features you want. It shreds fine, spreads uniformly and with an optional endgate, handles sloppy loads. We've got a spreader that's just right for you!

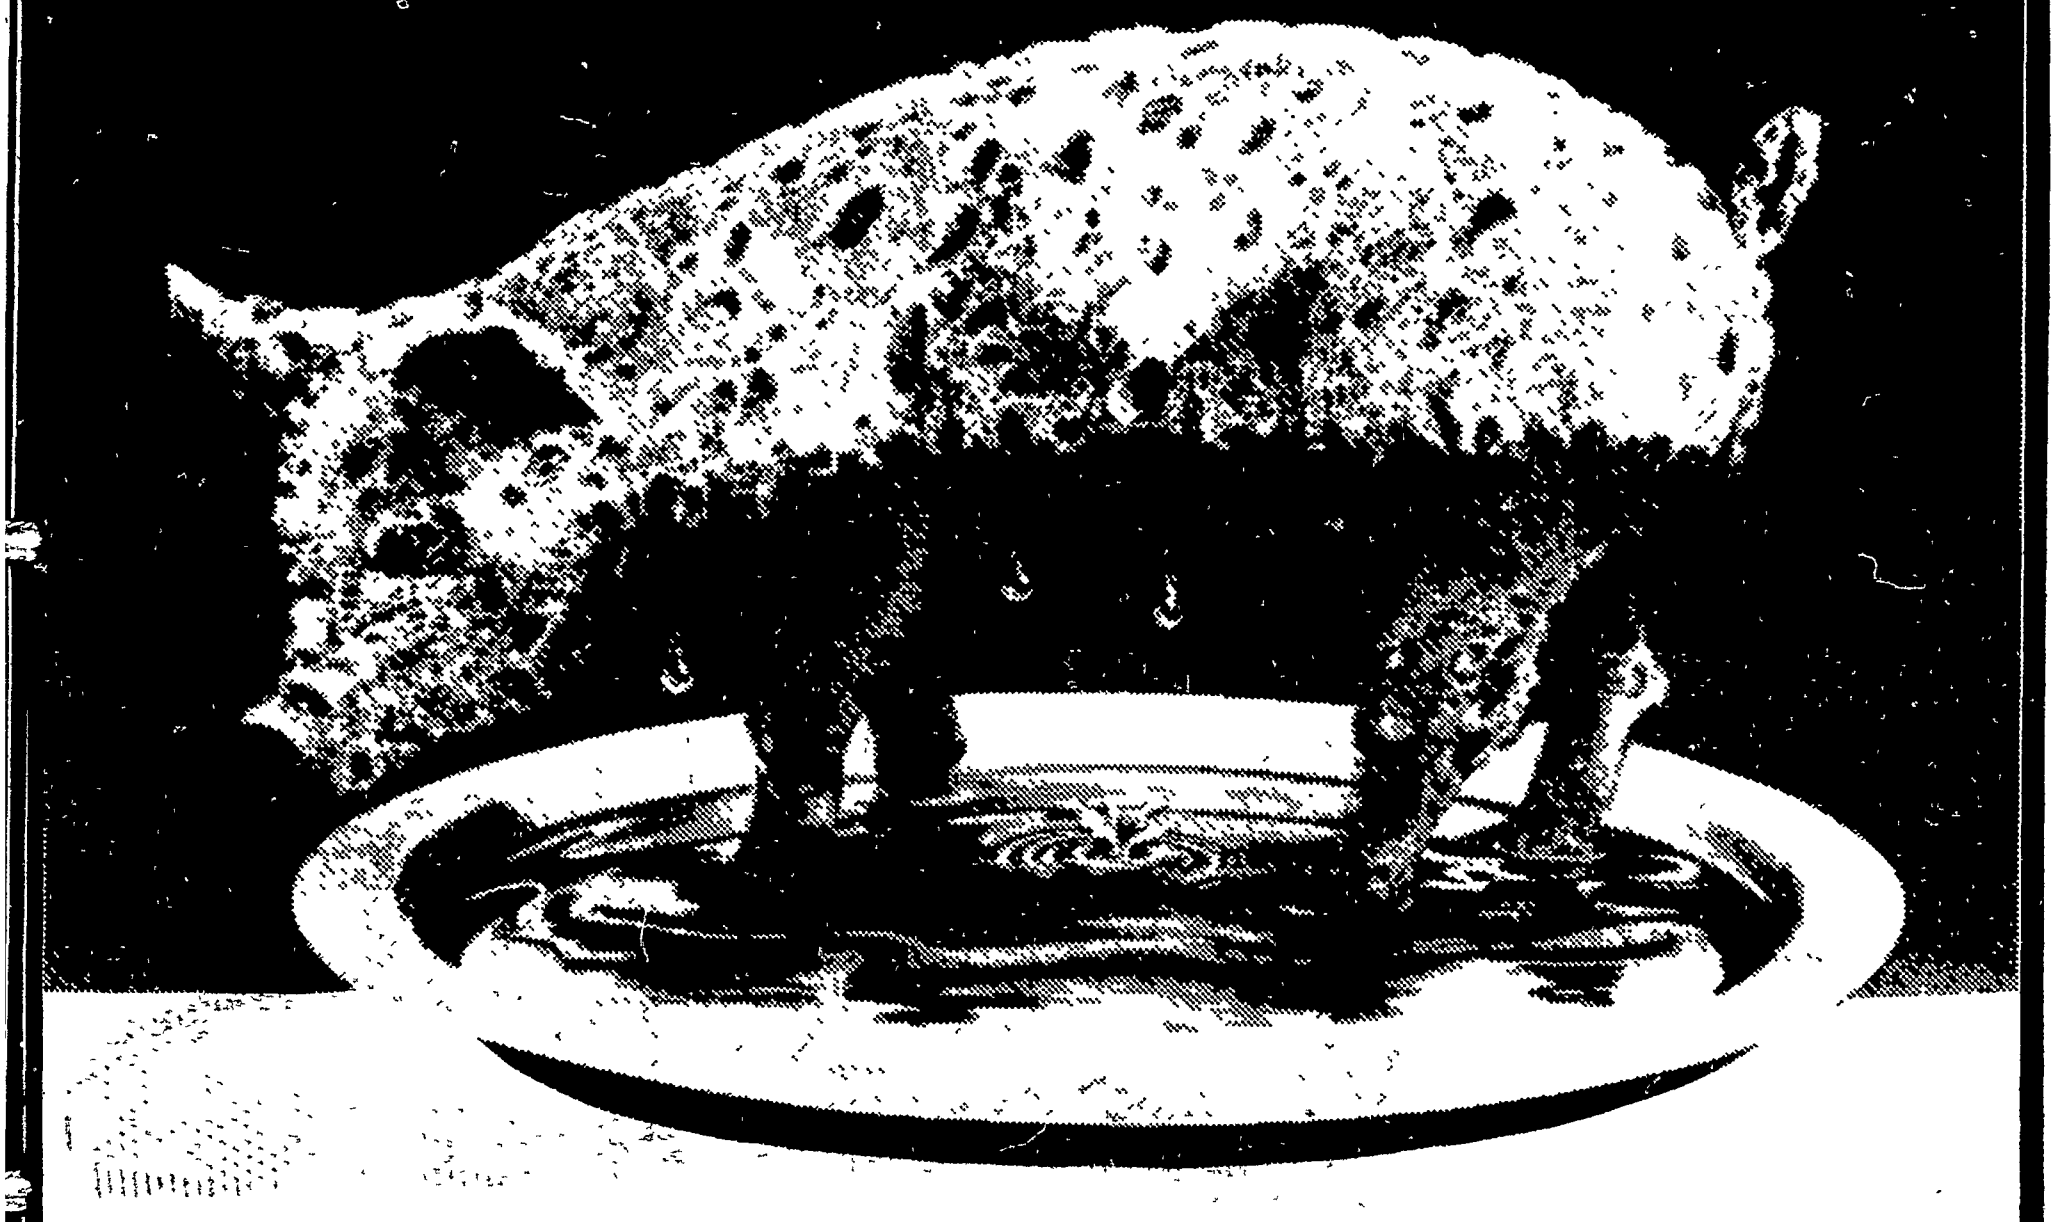
A pig can soak up amino acids like a sponge...and waste them.



Only Farmix proportions amino acids for maximum availability.

Only new Farmix® is formulated to provide the 10 essential amino acids in the available form at levels and proportions the pig needs for fast, efficient daily gains. This is far different from other concentrates which merely supply crude protein levels or a limited number of amino acid levels. Come in. Ask us how you can adapt Farmix to pigs of all ages and sizes with these Master Mix products:

Farmix Starter Pac for pigs from 18 to 25 lbs. contains essential vitamins and minerals for rapid gains, plus milk and sugar products for added palatability.

Swine Breeder Pac fortifies Farmix rations with vitamins and minerals in the correct ratios and amount important to fast gains in sows, gilts, boars.

Cumberland County DHIA
January 1980

Cumberland County Dairy Herd Improvement records show that 7959 7 cows in 133 herds were on production testing in January according to Duane G. Duncan, County Agent

Of the 105 Herds on DHIA, 59 herds had an average fat production of 1 50 pounds per cow per day for the month During the month 150 completed their 305 day lactation with 600 pounds of butterfat.

DHIA supervisors working with the dairymen to improve efficiency include Harold Boldosser, 130 Old Gap Road, Carlisle, Diane M. Cain, R2, Shippensburg, and Jay Zeigler, R1, Carlisle.

The following are the highest of actual butterfat in 305 days or less in the county during the month The age listed is her age at the time of freshing

Elanco farmers set finance meeting

TERRE HILL — The Adult Farmer Program of the Eastern Lancaster County School District will sponsor a Farm Finance Meeting on Wednesday evening, March 5 at 7:30 p.m. in the Union Grove School.

Speaker for the evening will be Ronald Bard, Assistant Manager of the Lancaster Office of Production Credit Association and Federal Land Bank.

Bard will discuss many aspects of the current financial situation as related to today's money market including: the short money supply, higher interest rates, and the problems these interest rates are creating.

Bard will also discuss what the farmer can do to help insure himself a continued source of money to operate his business on.

All interested persons are invited to attend the farm finance meeting to be held at 7:30 p.m. on Wednesday evening, March 5 in the Union Grove School. The school is located two miles north of Route 23 on Route 625. For more information contact Bob Anderson at 215/445-5041.

Franklin Guernsey breeders tour Lancaster County

MIDDLETOWN — What do a 10 roll of steel - a 5 year waiting period and a TMI locale have in common?

They all represent one part of a most enjoyable and educational tour taken by 42 members of The Franklin County Guernsey Breeders.

A Grand View Farm, owned by Norman Craig and Marvin Miller, sits on a picturesque bluff immediately across the river from Three Mile Island near Middletown. Norman Craig greeted the Guernsey Breeders and give a brief description on the farming operation.

The group was then led into the barn where some truly lovely Guernseys are housed. Tall, upstanding and strong and some of the adjectives one could use to describe the animals and many show champions stood in the milking line.

The most recent Grand Championship won by A Grand View Farm was the 1980 Pennsylvania Farm Show with a three year old, Rankin Farm Golden Brown.

Max Perry, herdsman at A Grandview Farm outlined the Holstein Herd's accomplishments. It was a real pleasure seeing so many good cows in one barn. The Franklin County Group was then shown the sales barn where sometime in the near future, sales of quality cattle will be conducted.

The group was treated to milk and donuts in the refreshment facilities which can be considered a part of the cow sale complex. A welcome to return to a Grand View Farm was extended by Norman and Max.

The Tour then proceeded to Atlantic Breeders Co-op in Lancaster.

The first stop here was a well designed ring where the semen from the bulls is collected. Atlantic samples approximately 20 to 30 young bulls a year. Semen production begins at about one year of age. After the first year of collection, the bulls are taken out of production and given a five year waiting period while a proof is being made on the cows sired. If after five years the proof is minus, the bull is sold for beef The plus proof ones are retained.

Only five or six bulls out of each group of 30 are retained. From the collection ring the Group went through [illegible] barns after which the laboratories where the semen is processed and prepared for distribution were toured.

The Trucking Terminal and Communication Center were the last stops at Atlantic Breeders Co-op

Sperry-New Holland Machine Company in New Holland, was the final stop for the Franklin County Guernsey Breeders. Upon entering the Visitors Center, farmers were swept back in time and history in the museum of early farming tools; hand tools, horse powered and engine powered.

The first product manufactured by New Holland was a sandstone feed mill in 1895. The Company grew out of a one man farm repair shop in 1895 to the international company it is now with 10 manufacturing plants throughout the world.

Only balers and grinder-mixers are made in New Holland. A NH Baler in France or England was made in New Holland.

Mower-Conditioners are made in Belleville, Pa., the combines in Nebraska, etc. Visitors are provided with hand held radio receivers so everyone can hear the guide's explanation of the manufacturing process.

The assembly line starts with huge 10 ton rolls of raw steel being cut and stacked automatically. One or two men control a complex control panel where the precision cuts are made. The sheets of steel go to the machine shop where giant presses and drills make short but accurate work of heavy steel parts. The forms move on to the welding shop where they are assembled and moved on down the line where thousands of nuts and bolts are inserted.

The final product looks like a skeleton, but is in fact, finished except for rubber wheels and paint. At the end of each of the five assembly lines, the balers or grinders are given a test run and checked out. They then go to a finishing area where tracks in the floor carries the machine into a three stage wash, the paint booths and then into a dryer. Equipment that goes overseas is primed with a special undercoating to protect against salt air corrosion. Decals are applied just before the equipment is crated for shipment. — Eileen Moore

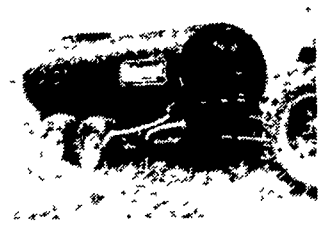
Maybe it's time you switched fertilizer tanks

Switch to a Calumet Liquid Manure Spreader

Compared to today's—and tomorrow's—sky-high fertilizer prices manure is just too valuable to waste A hundred cow dairy herd for example can save thousands of dollars every year in fertilizer costs

Take full advantage of this liquid gold with a Calumet liquid manure spreader teamed with a 4-shank soil injector Injecting can help retain four times the nitrogen that's usually lost with surface spreading—in addition to reducing odor and run-off problems

Calumet spreaders in



capacities from 1625 to 4500 gallons are engineered for efficiency and longevity Heavy duty steel alloy tanks are coated with epoxy to resist corrosion Double reinforced A-frames and support skids add strength for heavy loads All Calumet liquid spreaders are backed by a 12-month warranty

Make the best use of the fertilizer produced on your farm with a Calumet liquid spreader and soil injector

Call for information on the value of manure—and some good reasons why you should switch fertilizer tanks

Look For The Right One!

Swine breeding subject of adult farmer meeting

TERRE HILL — The Adult Farmer Programs of the Eastern Lancaster County School District are sponsoring a Swine Breeding Herd Management meeting on Tuesday evening, March 4, 1980, at 7:30 p.m. at the Union Grove School.

The speaker for the meeting will be Dr. John Hurtgen, Veterinarian from the University of Pennsylvania's New Bolton Center, where he is the swine reproduction specialist.

Dr. Hurtgen recently spoke at the Keystone Pork Congress on managing replacement gilts.

He will be talking on sow, gilt, and boar selection, and breeding herd management. One half of the program will be devoted to a question and answer period.

Dr. Hurtgen comes to Pennsylvania from the midwest where he has done extensive work with breeding herds in confinement type housing. His presentation will include "down-to-earth practical information" every breeder can use.

The Union Grove School is located near Terre Hill on route 625, two miles north of route 23. For further information contact either Donald Robinson or Robert Anderson at 215/445-5041.

Slump in cattle numbers appears to be ending

WASHINGTON, D.C. — Following four years of inventory decline, the liquidation phase of the 1979's cattle cycle has apparently ended.

This was the largest reduction in cattle numbers since records began.

From January 1, 1975 to January 1, 1979 the cattle and calf inventory declined 21.1 million head, a 16 percent reduction. The January 1, 1980 cattle inventory totaled nearly 111 million head, up only 100,000 head from 1979.

Beef supplies in 1980 are expected to decline another two to four percent from 1979 level, marking the fourth consecutive year of decline. However, pork and poultry supplies are each expected to increase four to six percent, more than offsetting declining beef supplies.

Total red meat and poultry supplies are expected to increase about one percent in 1980. Total supplies are expected to approximate the record levels of 1976 and 1977.

Recent changes in supply and demand factors have altered the 1980 outlook for the red meat and poultry sector.

Beef cow numbers were down slightly on January 1, 1980 to about 37 million head, despite a 30-percent reduction in cow slaughter in 1979. Cattle numbers have leveled off, but the expansion will not begin until increased numbers of replacement heifers enter the cow herd.

Producers indicated they were holding back 5.9 million beef replacement heifers on January 1, 1980, and eight-percent increase over 1979.

The January 1, 1980 cattle on feed report indicated a large number of heavy cattle were on feed. Fed cattle marketings in the first quarter are expected to be only about five percent below year-earlier marketings.

Increased slaughter weights may hold first quarter beef production near fourth quarter 1979 levels and only slightly below year-earlier levels.

The report also indicated sharply lower marketing prospects for the second quarter with the number of cattle on feed in the middle weight groups down 10 to 15 percent for a year earlier.

However, placements of heavier yearlings in the first quarter are expected to narrow this gap. Second-quarter beef production is expected to be two to four percent below 1979 levels and about nine percent below first quarter 1980 levels. Choice fed steer prices are expected to average in the upper $60's in the first quarter before increasing to the lower $70's in the second quarter.

Federally inspected hog slaughter during the first 6 weeks of 1980 was up 26 percent from ayear earlier Dressed weights during this period averaged 3 pounds above a year ago

Year-to-year increases in hog slaughter may taper off later in the quarter, so commercial pork production may be near 4.1 billion pounds in the first quarter, up 21 percent from 1979

Hog slaughter may decline slightly in the second quarter but should be 8 to 10 percent above year ago levels. Hog prices are expected to average in the upper $30's in both the first and second quarters

Average annual retail beef prices are expected to increase another 10 to 12 percent in 1980, about one-half the 1979 increase as large pork and broiler supplies help moderate the year-to-year increase.

Retail pork prices are expected to average about the same as in 1979, $1.44 per pound. Broiler prices are expected to increase only slightly this year.

Increases in total red meat and poultry prices may be greatest in the second half of the year as the general economic situation improves.

Wood stove safety seminar slated

NEWARK, Del. — Because more people in Delaware are using wood as fuel, a wood stove safety seminar is scheduled for Wednesday, March 5, 1980 at 7:00 p.m. in the Five Points Volunteer Fire Company Hall, located at 209 S. Maryland Avenue, Wilmington, Delaware.

The seminar is designed for interested consumers, especially wood burners and those thinking about using wood as a primary or supplemental source of heat.

Program topics will include basic considerations for the new or future wood burner, safe wood stove installation and operation, wood as a fuel, chimney maintenance and other fire safety considerations.

A wood stove retailer, fire safety instructor, and chimney sweep will share their concern in regards to wood burning. There will also be wood stove exhibits.

The event is sponsored by the Cooperative Extension Service in cooperation with the Five Points Volunteer Fire Company, the Delaware State Fire School and Delaware Department of Agriculture. There is no admission charge, but those desiring additional information are asked to call 738-2506.

TRI-COUNTY SWINE SYSTEMS

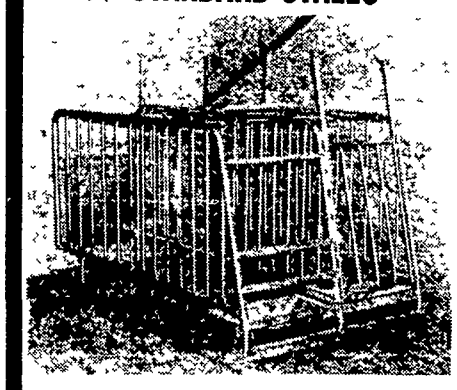
COMBINING MODERN CUSTOM BUILDINGS WITH "SILVER LINE" EQUIPMENT — FOR CUSTOMER SATISFACTION

"WHEN IT'S TIME TO BUILD, REMODEL OR REPLACE EQUIPMENT - IT'S TIME TO CALL TRI-COUNTY

GESTATION STALLS

"Silver Line" Gestation Stalls are solidly constructed of 1½" steel tubing and ½" pipe. Several basic patterns provide the versatility needed for installation in the variety of today's confinement systems.

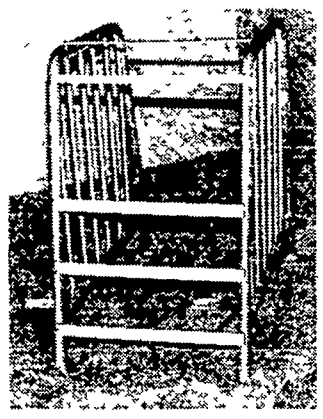
★ STANDARD STALLS



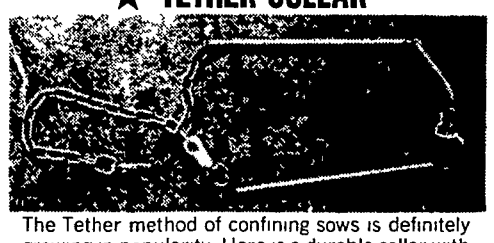
Tether systems provide some advantages worth considering
- Lower equipment costs
- Reduced amount of Floor Space needed per sow
- Simplicity no gates or pins to bother with
- A New approach to breeding

SPECIFICATIONS
- overall length 42'
- overall height 39'
- width variable

★ TETHER STALL



★ TETHER COLLAR



The Tether method of confining sows is definitely growing in popularity Here is a durable collar with simple swivel snap adjustments

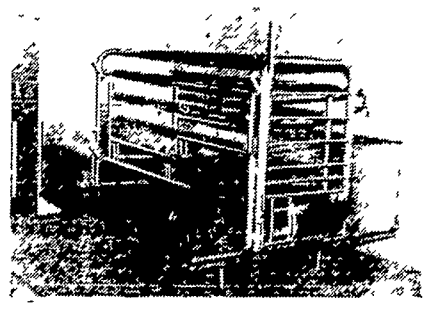
SPECIFICATIONS
- overall length 84'
- overall height 42
- width between stalls 21¼
- slotted floor anchor tabs

OPTIONS
- Recessed back leg support adaptable to various flush systems
- Front gate This makes an ideal breeding stall
- Choice of lift gates or hinge gates

FARROWING CRATES

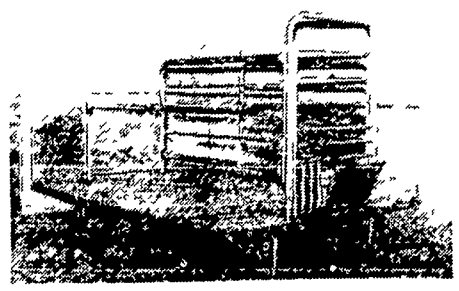
The "Silver Line" offers an up-to-date choice between the Quickside conventional crate or the New Tether crate. With either choice, convenience, durability, and economy are standard features

★ QUICKSIDE CRATE



- 1½ steel tubing & ½" pipe
- Heavy duty construction
- Unique 'Quickside' affords Maximum adjustment with minimum effort Width adjusts from 21½" to 25½ height adjusts from 9" to 11½'
- Assembles easily with 4 bolts and 4 clip pins

★ TETHER CRATE



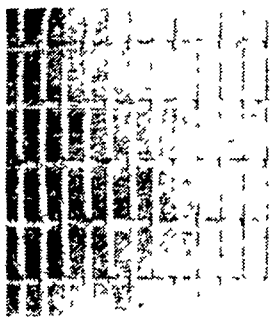
- Simplicity of design Quick Assembly, No adjustments necessary, No cumbersome framework
- Maximum access to sow as well as little pigs
- Constructed of heavy duty 1½" steel tubing and ½' pipe

STANDARD FEATURES

★ EZ-tilt Feeder - 14 ga. gal. ★ Creepwings assemble quickly without pins ★ Choice of water Bowl bracket or adjustable nipple bracket. ★ All Panels 16 ga. gal. ★ Choice of lift or hinge gates.

WOVEN WIRE FLOORING

Does a Superior Job At Our Economical Price



- 192 ga
- 207 ga
- Gal Before weaving for outstanding durability
- Minimizes Injuries and abrasions
- Stays dry - for maximum pig comfort
- Sanitary - Cleaner pigs, healthier pigs

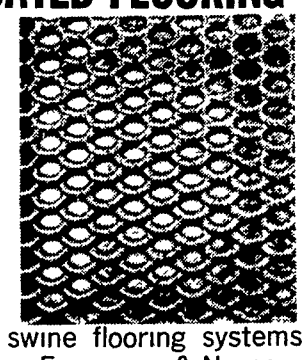
SIZES IN STOCK: 5x7, 4x8, 3x6

★ CUSTOM SIZES AVAILABLE AT NO EXTRA CHARGE

CUSHION COATED FLOORING

★ Cushion Coated Expanded Metal

★ Cushion Coated Woven Wire



The ultimate in swine flooring systems Used extensively in Farrowing & Nursery, as well as Breeding & Gestation Facilities
- Warmth minimizes mastitis and other sicknesses
- Traction - prevents injuries and abrasions
- Comfort - rounded edges are easy on feet and knees
- Healthy - non-porous - reduces bacteria - lowers mortality

SIZES IN STOCK: 5x7, 4x8, 3x6

SUPPORT FRAMES

(See Farrowing Crate Pix)
- 5x7 size
- 12" on center supports 1" angle
- 4 leg positions
- 2" Angle Main Frame
- Perimeter - 3/8x1 bar stock

Increase the number of pigs weaned/litter by elevating Farrowing Crates on a support frame, with woven wire or Cushion Coated flooring Tri-County provides what it takes to do it right; a heavy duty frame, and your choice of flooring

NURSERY CAGES

The "Comfort Cage" is another unique item in the Silver line
- SIZES - 3'x6', 4'x4', SINGLE & DOUBLE DECK
- GALVANIZED WOVENWIRE FLOORING
- THE NEWEST TROUGH DESIGN
- WIDE CAGE GATE
- SIMPLICITY OF DESIGN

Pax — quality built livestock feeding and watering equipment feed and grain handling and storage equipment

- Brower Equipment
- Nobbe Concrete Slats
- Magic Ray Catalitic Heaters
- Kane Feeders

Cattle scabies outbreak reported in 11 states

WASHINGTON, D.C. — Psoroptic cattle scabies continues to plague the cattle business, F.J. Mulhern, administrator of the U.S. Department of Agriculture's Animal and Plant Health Inspection Service, said today.

This past January, Mulhern said, there were 59 scabies outbreaks in 11 states. He listed the cases:

Arizona — one case in Coconino county.

Idaho — one case in Payette county.

Iowa — one case each in Cherokee, Dickinson, Mitchell, Palo Alto and Sioux counties.

Illinois — one case in Fulton County.

Kansas — one each in Hamilton, Hodgeman, Ness, Rush and Scott counties; two each in Edwards, Ford and Haskell counties; three in Meade county; four in Finney county.

Minnesota — two cases in Brown county.

Nebraska — one case each in Boyd, Box Butte, Dundy, Fillmore, Hall and Rock counties.

New Mexico — one case each in Colfax and Roosevelt counties.

Oklahoma — one case each in Beaver, Beckham, Cimarron and Texas counties; two each in Blaine and Major counties.

South Dakota — one case each in Aurora, Lincoln, Minnehaha and Turner counties.

Texas — one case each in Dallam, Donley, Hall, Hartley, Parmer, Potter and Swisher counties; four in Deaf Smith county.

January's 59 outbreaks compare with the same number reported in January a year ago, and 41 last December. Nationwide for fiscal 1980, the total stands at 126 cases reported, the same as for this time as last year

Scabies has long been a problem in some areas of the Southwest, said Mulhern, but now it is appearing at an alarming rate in many midwestern and south central plains states He said the only way cattlemen can keep scabies outbreaks down and prevent its spread is to check herds regularly and refrain from mixing newly acquired cattle with already established herds.

A tiny, parasitic mite causes scabies. The mite punctures the skin of cattle to feed on body fluids released from the wounds. The mites spread by contact between animals. They are killed by dipping infested animals in pesticides approved by the USDA under state or federal supervision.

Mites cause serious economic losses to cattlemen and feedlot operators but do not affect the wholesomeness of meat, said Mulhern. Therefore, he said, infested and exposed herds are placed under quarantine until the animals are treated and found free of the disease.

Three Delaware farmers put 13,600 bu. in reserve

DOVER, Del. — Three state farmers had placed 13,602 bushels of their 1979 corn crop under price support loan as of January 31, 1980, according to A. Palmer Corey, chairperson of the Agricultural Stabilization and Conservation committee. For the same period a year ago, 67,451 bushels of 1978-crop corn were under loan. The 1979 corn loans in the state totaled $29,652.

Placing grain under loan gives the farmers an opportunity to plan their management strategy and sell when the price is right. The loan provides operating cash while farmers look for better markets, he said.

Loan obligations are generally satisfied by repaying the money before the loan matures or by forefeiting the crop to the Commodity Credit Corporation if prices at loan maturity are below the loan rate.

Grain under loan is stored on farms or in commercial warehouses, and must be inspected regularly to keep it in good condition Until the loan is satisified, farmers are responsible for both the quantity and the quality of farm-stored grain, the ASCS official said. Deterioration, shortage, or contamination can cost farmers money when it's time to settle.

Other 1979 grain crops under price support loan at 6829 bushels of soybeans and 9958 bushels of barley.

Sale reports

A Public Sale of shop equipment and antiques was held February 23 by Christian E. Stoltzfus, between Ninepoints and Andrews Bridge, Lanc. Co., Pa.

A pair of peacocks sold for $70 each. Other items sold were: 12 gauage Gun $60, Anvil $360, Drill Press $200, Table Saw $250, Torch $410, Tire Bender $325, Electric Welder $180, Wash Stand $110, Flour Chest $170, Corner Cupboard $300, 2 China Dolls $17.50 each and Carnival Dish $40.

White House Family Forum seeks delegates

NORRISTOWN — Anyone can apply to be a delegate to The White House Conference on Families in Baltimore June 5, 6 an 7. An application must be received by one of the Forum offices on or before March 12.

Family members, as well as educators, agency representatives and policymakers are urged to send in their applications soon.

To apply, send your name, address and phone number to one of these addresses: PA Forum on Families, P.O. Box 2675, Harrisburg, PA 17120 or PA Forum on Families, 204 Weaver Building, University Park, Pa 16802.

President Carter created The White House Conference on Families "to see what we can do, not simply as a government, but as a nation, to strengthen American families," The White House Conference on Families will culminate in three conferences during June and July of 1980 in Baltimore, Minneapolis and Los Angeles.

Pennsylvania is allotted 81 delegates to the Baltimore convention. The state's activities in preparation for the Baltimore meeting included four regional hearings in Wilkes-Barre, State College, Philadelphia, and Pittsburgh.

In addition, anyone may organize a local family forum. Recommendations from these local forums or meeting in churches, schools, community centers will also comprise Pennsylvania's contribution to The White House Conference.

Groups, organizations, agencies or individuals wishing to sponsor a family forum can obtain resource material from the Montgomery County Extension Office, 400 Markley Street, Norristown, PA 19401. Forums can be held now through April, 1980.

OF EHMER'S BEST YORKSHIRE & COMMERCIAL GILTS

14 Bred Gilts, 20 Boars, 65 Open Gilts

Dutchess County Fairgrounds - Rhinebeck, New York

SATURDAY, MARCH 8

at 1 P.M.

Herd developed from 15 years of selective, large volume production.

No "sacred sows" - they produce or are culled! • Sows and boars on concrete - no bedding in warm months • Our financial records prove our herds productive merit • Our slaughterhouse evaluates our total market hog production. • Our large volume commercial experience has taught us how to select breeding stock - we have manure on our boots!

Interstate Hog papers will available.

VERSATILE AIR POWER AT A BUDGET PRICE

FL-3304 packs more than enough air power for the typical farm, estate, workshop, professional decorator and jack-of-all-trades. You'll find them wherever there is intermittent need for an ample capacity compressor - painting rooms, buildings and equipment; sand blasting rust; powering small air tools.

FL-3304 1 hp twin cylinder compressor with 15 gallon tank. Delivers 5.8 scfm at 40 psi.

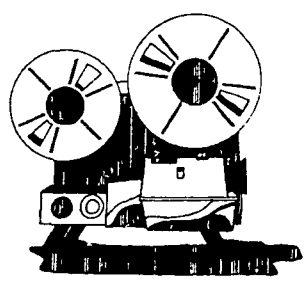
YOU'RE INVITED TO ATTEND OUR

THE LAND, THE MAN & WHITE OPEN HOUSE

You're Invited . . . To Our Open House.

See How We're Ready To Serve You In The 80's . . .



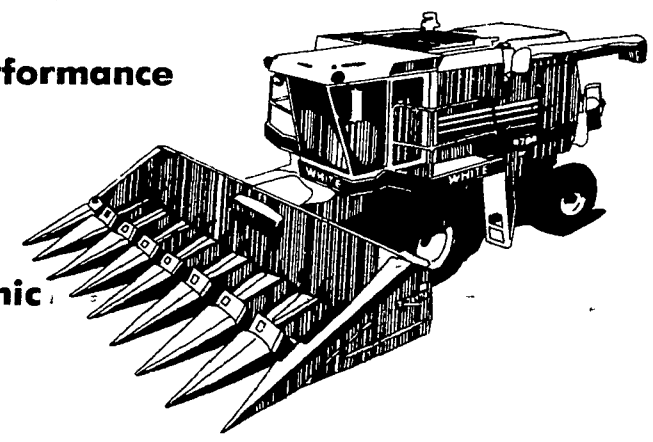
through the film, "The Man, The Land & White." We'll present a very serious outlook at the land... farming. The Man...you, the farmer. And White... the progressive farm equipment company for the 80's. Please Join Us!

AFTERNOONS AT 2 P.M.

Come in and see why 1980 is the year of the Land, The Man and White® . And what you'll see in the way of new service and products will make you a firm believer in White.

See the two new additions to the growing line of White Field Boss® Tractors. The new 60 hp 2-62 and 43 hp 2-45 are the Utility Field Boss Tractors that have many of the standard features you'd expect to find on our larger horsepower tractors. They're the newest additions to the performance you'll find in our full line of 27 to 181 horsepower Field Boss Tractors.

See how the performance of the new White 9700 Axial Harvest Boss® can match the dynamic farming of the 80's.



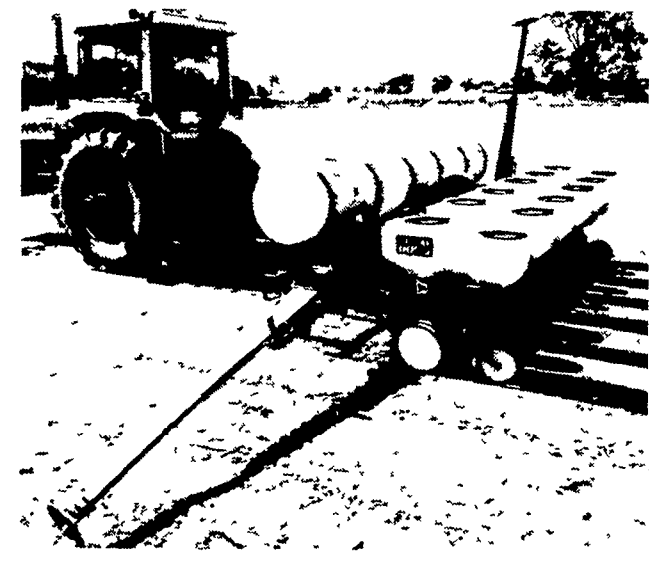
It's the first combine that gives you the potential to replace two conventional 45-inch cylinder combines . . . that's the capacity that can match your growing needs of the future.

WHITE Farm Equipment

NEW TOYS FROM WHITE

★ See Our Full Line Of White Farm Toys In Stock.

See how you can increase your planting accuracy and your yields with the new White 5100 Seed Boss™ Planter.



It's new exclusive walking-beam dual depth gauge wheels and pressurized seed metering units offer seed depth and in-row consistency our competitors find hard to match.

Extended Pedigrees announced at sale time.

All cows bred to best bulls in Eastern A.I. units. Quite a few cow families in this herd. Sires of all grade cows known and DHIA records. Some cows milking 100 lbs. per day. Real uddered cows. Some could be classified very good. We sold quite a few good herds, but this is one of the best with good bloodlines and records 17,000 to 23,000 lbs. milk.

If you need cows that milk 70 lbs. to 100 lbs. per day don't miss this sale. This is a rare opportunity to get milk, Bloodlines and foundation cows that have the potential for high classifications. If you want to up your DHIA records these are the cows to buy.

Also One load of cows out of New England States.

And One Grade bull, Sire-Elevation Son, Dam milked up to 98 lbs. a day, ready for service.

Out of state buyers need bank reference and identification.

Cows milked at regular time.
Cash or good check day of sale.
Carl Diller, Auctioneer.

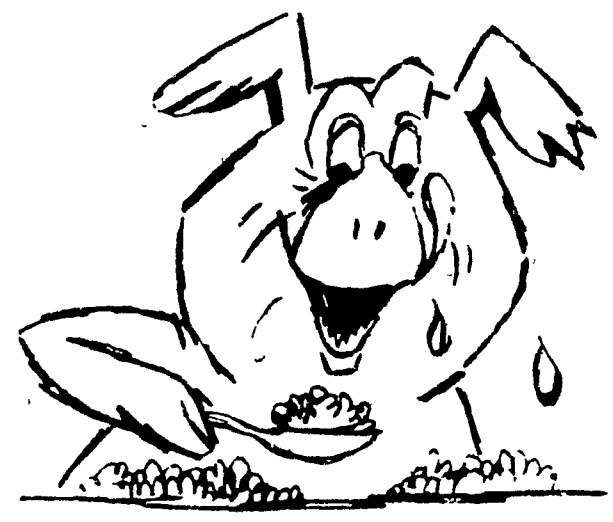
TWO NEW OCTANE PRODUCTS JOIN THE PERFORMANCE TEAM



Approximately three years ago Ralston Purina released revolutionary new growing and finishing rations called High Octane Hog Chows. They were based on several major nutrition discoveries by Purina Swine Research.

Today, you can take advantage of the High Octane breakthrough from the very moment pigs are farrowed ... a lactation ration ... a pre-starter ration ... a starter ration, and the already well-established growing and finishing Hog Chows.

So now you can go all the way with Purina High Octane Chows. Four feed products known as ... The High Octane Performance Team.

	WHAT THEY NEED	WHAT WE PROVIDE
NEW SUPER PALATABLE FARROWING CHOW® easier, safer farrowing	**FARROWING** ■ Laxative feed for easy, safe farrowing ■ Appetite satisfaction. ■ Medication to reduce scours-causing organisms. ■ Low-energy, bulky ration to reduce incidence of MMA.	**FARROWING** ■ Special laxative ingredients to prevent constipation. ■ Palatable formula to satisfy appetite. ■ Medication with high activity against scours-causing salmonella types of organisms. ■ Low-energy, bulky, pelleted formula.
NEW HIGH OCTANE® LACTATION CHOW® COMPLETE more milk, stronger sows	**LACTATION** ■ Help in producing lots of better-quality milk, even in hot weather. ■ Sufficient nourishment to wean heavier litters without excessive sow weight losses. ■ High nutrient levels which prevent sows from robbing their muscle tissues and bones to make milk.	**LACTATION** ■ High nutrient density to support production of superior quality and quantity of milk. ■ Correct balance of energy, amino acids, vitamins and minerals needed to wean heavier litters. ■ Necessary nourishment needed to prevent body-robbing and excessive weight losses.
HIGH OCTANE® BABY PIG CHOW® starts 'em right	**NEWBORN PIGS** ■ High palatability. ■ Excellent digestibility. ■ Correct ingredients needed to supplement sow's milk and promote fast, early growth. ■ High nutrient concentration to accommodate the pig's small stomach.	**NEWBORN PIGS** ■ Attractive aroma and great taste appeal, specially packaged to seal in freshness. ■ Ingredients specifically chosen for easy digestibility...combined into a small particle size. ■ Proper balance of nutrients needed to promote fast, early growth while nursing. ■ High nutrient density formula designed to ensure every ounce gives pigs a real boost.
HIGH OCTANE® PIG STARTENA® you can see the difference	**15 to 50 LBS.** ■ Good palatability. ■ High digestibility. ■ Plenty of nutritional power. ■ Help in fighting disease and stress.	**15 to 50 LBS.** ■ Special ingredients selected for tastiness and good aroma combined with "ett" form for easy eating. ■ High biological availability of nutrients for easy digestibility. ■ High nutrient density balance of energy, amino acids, vitamins and minerals needed for improved growth and reduced conversion. ■ High level antibacterial drug to reduce effects of stress and help prevent disease.
